(c) Copyright 1999 Paul Callomon. This work may be distributed for personal or institutional use via download from designated web sites; it may be formatted and reprinted in single copies on the condition that the work remains entire. It may not be sold or republished in any form. This work is not available for purposes of zoological nomenclature.

Introduction

S. D. Kaicher's 'Card Catalogue of World-wide Shells' is one of the largest illustrated publications concerning the Recent marine mollusca. Though its scope is confined to the Gastropoda, it includes figures of many type specimens and this alone makes it a valuable reference work. The usefulness of the Card Catalogue has hitherto been somewhat compromised by the lack of an index. The present work is a simple index of the species figured, designed both to record all the species treated and to permit quick reference to individual cards.

The Card Catalogue contains a large number of errors and unintentional taxonomical acts. The identification and correction of all of these will be a major task, and this is a matter for specialists both in individual families and in zoological nomenclature. A collation of Kaicher's work is shortly to appear, and revisions of various individual sections are also known to be in preparation. Users are advised to annotate their copy of this index as further information emerges over time.

The author will be grateful to receive corrections of his own errors in recording the original card contents, or data regarding the contents of missing cards, and this will be incorporated in future versions of the index. Users are however requested not to forward to the author data concerning incorrect original spellings, identification or classification.

Notes

- Cards are listed here in alphabetical order by their species name as originally published; where the original author's number modifications are available, these have been adopted. In order to use this index as efficiently as possible, owners of cards are recommended to store them by pack, in numerical order. In order not to preempt any of the revisions of the Card Catalogue currently in preparation, no attempt has been made to correct spellings (even where there are clearly typographical errors) or to revise classification. Kaicher's own subsequent modifications to generic placement are similarly not incorporated here.
- In the case of 'replacement' cards, Kaicher gave the card a series number as well as the number of the card it was to replace. These are listed by series number here, so readers should be aware that in some cases the same species appears on two different cards.
- Some card numbers were duplicated in subsequent packs; these numbers are reproduced here as published. Readers should note the differing pack numbers.
- Where question marks or quotation marks are attached to names, these are from the original author.
- Each entry gives the pack and card number, for example : CO3-1229 for card 1229 which is in the pack 'Conidae part 3'
- This file is also available in ASCII text-only format. This is to keep its size down for fast downloading, and to allow it to be supported by the largest possible number of different computer/software combinations. No character or paragraph formatting is present in the text-only version.
- the contents of the following cards are still unknown : 96, 1328, 1542, 2009, 2178, 2275, 2303, 2687, 2990, 3214, 3239, 3346, 5047, 5660, 5661, 5757. Some of these are known to have been withdrawn and destroyed between printing and dispatch. The author would be most grateful for details of any cards listed here which are still in existence.

Changes in version 1.1

Some typographical errors by the present author have been corrected, and the contents of a number of the cards missing from the Elle Scientific Publications set have been added. The pack code for Turbinidae part 1 (pack #52) has been changed to TRB-.

Acknowledgments

The author would like to thank the following for their ongoing assistance with this project : Mr. R. E. Petit, Dr. G. Rosenberg, Ms. L. Scheu, Mr. A. Weil, Ms. D. Wills.
