# Crustaceans on Postage Stamps from 1870 to and Including 2002: Revised Article for Our Paper in 2000 and Addendum

Makoto Omori\*<sup>1</sup> and Lipke B. Holthuis\*<sup>2</sup>

(Received January 31, 2005)

**Abstract:** This is the second part of our paper “Crustaceans on Postage Stamps” (Omori and Holthuis, 2000). During the period from 1870 to and including / 5 2002, nearly 1468 postage stamps depicting crustaceans have been issued from 218 countries, regions and organizations. In all, 357 taxa were identified at species or genus level. They are classified into 92 families of the classes Branchiopoda, Maxillopoda and Malacostraca. Our checklist of all stamps with crustaceans is added.

**Key words:** Postage stamp, philately, Crustacea

## Introduction

Since the previous paper (Omori and Holthuis, 2000) many postage stamps (hereafter referred as to stamps) depicting crustaceans have been issued during the recent 5 years from 1998 to and including 2002. In addition, we regretfully must admit that there were a number of errors and omissions in the previous checklist (Table 3 of the above-mentioned paper). Accordingly, we felt that we should provide here the completed and revised checklist for readers of the previous paper. We have added a number of newly identified stamps depicting crustaceans and provide herewith a checklist that covers nearly all that have been issued worldwide. Remarks are included concerning several stamps that have raised questions or have interesting background stories.

We wish to dedicate the present publication again to the late Dr. T. Odawara (died on October 17, 2004) who did accomplish a great deal for carcinology in Japan.

## Methods

The present paper follows the method for identification of species described in the previous paper (Omori and Holthuis, 2000). Some figures are naturally difficult to identify when the picture is particularly inaccurate or when a figured species appears not to be indigenous of the given country or region. The stamps from Liberia, Palau, St. Thomas & Prince Islands, and Tanzania are examples of such a subject (see Remarks 16 and 18 of the present paper). Presumably many of them have been designed and printed by some foreign companies that would have a contract to handle the production of the stamps for the postal service of a country or region. After delivering certain numbers of the stamps to the postal service the remainders are sold to collectors of topical stamps with a premium. A postage stamp industry thus results, so that, in some cases, the figures on the stamps from different countries are taken from the same unreliable sources and the names for the figured

species have nothing to do with reality. We worry that such a shameless habit may eventually ruin thematic stamp collecting. Unfortunately, the numbers of the nasty stamps have been increasing recently.

The stamps from Ajman after 1973, Batum, Easdale Island, Kerner Island, Komi, Pabay, Siberia, Staffa, Stroma, etc. are categorized as local stamps, and they have not been dealt with in the present paper. They are mostly unapproved by the Universal Postal Union and/or excluded in the main stamp catalogues. Souvenir sheets or miniature sheets depicting crustaceans on the marginal part of the sheet, but not on the stamp itself, or with only an extremely small part of the figure of crustacean (e.g. the tips of antennae) on the stamp, have also been excluded. The stamps from Vessiegonsk in Russia have been included in the checklist, however, because of their significance as the earliest stamps on which crustacean figures appeared.

We used in principle the modern English names of the countries and regions, most being those given in the Scott catalogue (Kloetzel, 2004) and arranged alphabetically with code numbers. There are more than ten countries and regions that did not appear in the previous checklist but have issued stamps with crustaceans after 1997. We have given new code numbers using the following method. Firstly we added the secondary number “-1” to the original code number of countries and regions in the previous checklist, then placed new countries alphabetically between their code numbers, and affixed the secondary number “-2” or “-3”. We changed the code number of some countries in the previous checklist when spelling of an additional name of country or region preceded them in alphabetical order. Examples are Madagascar (110-3), Singapore (164-2), Tokelau (179-2), United Kingdom (190-1), U.S.A. (193-1), and Viet Nam (198-1).

The dating (year of issue) of the stamps is taken from the Scott catalogue (Kloetzel, 2004). If the date is not shown, other stamp catalogues such as Stanley Gibbons (Anony-

\*<sup>1</sup> Akajima Marine Science Laboratory, 179 Aka, Zamamison, Okinawa 901–3311, Japan. Emeritus Professor, Tokyo University of Marine Science and Technology. E-mail: makomori@amsl.or.jp (阿嘉島臨海研究所)

\*<sup>2</sup> National Museum of Natural History, P.O. Box 9517, 2300 RA Leiden, The Netherlands. (オランダ国立自然史博物館)

mous, 2003) were referred to. In few cases the date on the catalogues is different from that printed on the stamp, and it is so remarked in the checklist. For the stamps that are not found in any catalogue, the estimated year is shown with a question mark.

We have a problem with the whale barnacles. Humpback whales almost always have barnacles prominently exposed on the head and other parts of the body. Other whales, such as the genus *Eubalaena* also carry barnacles. In the figures of the stamps however it is often not possible to be certain that the white excrescences on the skin are barnacles. We have included stamps depicting these whales in the checklist of the previous paper but have excluded them from the present checklist.

When the name of taxon printed on a stamp was found to be different from the name that we thought to be correct, it is indicated in parentheses with "AS", as in *Homarus gamma-rus* (AS *H. vulgaris*); a misspelled or apparently incorrect species name is indicated in parentheses with "NOT", as in *Goniopsis cruentata* (NOT *G. crucentata*).

In the checklist, as mentioned previously, the Scott Catalogue (list) number is used principally. Those unlisted in the Scott catalogue are indicated with the list number of Michel (Anonymous, 2002, 2004), Stanley Gibbons (Anonymous, 2003) or Yvert et Tellier (Anonymous, 1998) in parentheses. In the case of local stamps from Vessiegonsk, we used the catalogue numbers given by Chuchin (1925).

## Results

As far as we know, worldwide 218 countries, regions or organizations have issued stamps depicting crustaceans during the period from 1870 to and including 2002. We have identified 357 taxa at species or genus level (Table 1). They are classified into 92 families of the crustacean classes Branchiopoda, Maxillopoda and Malacostraca according to an updated classification of the recent Crustacea (Martin and Davis, 2001). Our checklist of all stamps with crustaceans is shown in Table 2. The total number of stamps is 1468. Note that it may include stamps that have been declared by postal officials as "unauthorized" or "illegal", as an example of Barbuda 1971 depicting Durer's painting of *Eriphia verrucosa* (Kloetzel, 2004).

The genus *Penaeus sensu lato* is a large and diverse group, and is the most economically important group among the marine shrimps and prawns in the world. Many species have appeared on stamps (Table 1). Using diagnostic characters Perez Farfante and Kensley (1997) raised all the 6 subgenera to generic level in their revision of families and genera of Penaeoidea. We followed their proposal and used the 6 generic names in Table 1. The most recent phylogenetic analysis of *Penaeus s.l.* however does not support all the previously created genera (or subgenera) and suggests that raising their status to genera is premature (Lavery et al., 2004).

## Remarks on a few stamps

The following are remarks on some interesting stamps.

1. Azerbaijan 2001. *Rhithropanopeus harrisi* with sturgeon (Fig. 1-1).

This stamp shows a marine landscape with a sturgeon and a crab. The figure of the crab is rather small, but could well be *Rhithropanopeus harrisi*, a species recently introduced in the Caspian Sea and so far the only crab known from that sea.

2. Comoro 1998. *Persephona mediterranea* (as *P. punctata*) (Fig. 1-2).

The figure is not *Persephona punctata* as written on the stamp, but the closely related *P. mediterranea*. The latter species differs from the former by, among other things, the presence of a characteristic color pattern on the carapace, which is distinctly shown on the stamp. Both *P. punctata* and *P. mediterranea* are not Indo-West Pacific species, but belong to the western Atlantic fauna.

3. Dominica 2001. *Portunus sayi*, Diving in the Caribbean (Fig. 1-3).

The crab on the stamp seems to be *Portunus sayi*, a rather small portunid that lives on the seaweed *Sargassum* in the West Indies and central Atlantic (Sargasso Sea). When Linnaeus described *Cancer pelagicus*, he included three different species of portunids under this name, but the name *pelagicus* was actually meant for the present species. However, later the large Indo-West Pacific swimming crab was selected as the type of *C. pelagicus*, and that is why that species at present bears that rather inappropriate name.

4. Finland 2002. *Eurytemora affinis* (Fig. 1-4).

All 5 stamps in a block show the landscape around the Zoological Station of Tvarminne at Hankoniemi and underwater scenery. Although the copepod on one of the stamps is difficult to identify from the picture, the text attached to the stamps indicates that underwater scenery shows herrings, cod and some typical spring and summer plankton such as cyanobacterium, the copepod *Eurytemora affinis* and a water flea. Another stamp in the series shows half of *Saduria entomon* and *Balanus improvisus*, the only *Balanus* found in Finland.

5. French Polynesia 2002. *Penaeus* sp. Pacific Oceanographic Center (Fig. 1-5).

A circular for stamp collectors issued by the Office of Posts and Telecommunications states that, regarding two stamps issued in 2002, "The Pacific Oceanographic Centres belong to the French Research Institute for the Exploitation of the Sea. One of the centers is located in Tahiti where researchers include study of the biology and breeding techniques of Penaeidae (*Penaeus* sp.). This year the center celebrates its thirtieth anniversary in the Territory".

6. Greece 1992. Crab, ?*Xantho poressa*, Cancer control (Fig. 1-6).

It is part of a series of 5 stamps for the support of health. The other 4 of the 5 stamps show no crustaceans. The crab identity is indeterminable. It shows characters of *Cancer pagurus* with many teeth on the right anterolateral border of the carapace but otherwise looks more like *Xantho poressa*, a species quite common in Greek waters.

7. Greenland 2001. *Meganyctiphanes norvegica* (Fig. 1-7)

So far all euphausiids from high latitudes depicted on stamps were Antarctic krill *Euphausia superba* in the South-

ern Ocean. This is a different krill, *Meganyctiphanes norvegica*, which is confined to the North Atlantic and cool Mediterranean waters. Dr. E. Brinton, a well-known specialist of euphausiids, has given us the following notes regarding appearance of “swarming euphausiid” in the Greenland 2001 stamp. “It appears to have been chosen to be representative of an abundant, possibly dominant euphausiid crustacean in Greenland. The large, sometimes swarming *M. norvegica* corresponds to critical morphological characteristics of the euphausiids depicted with respect to dorsal lappet-like prominence on the 1st segment of antennal peduncle, size of eyes, absent rostrum and others”. The word Krill is Norwegian, and Norwegian whalers called *M. norvegica* “stor krill” (large krill).

8. Grenada Grenadines 1998. *Homarus* sp., Sea Exploration (Fig. 2-7).

This stamp is one of a block of 17 stamps with the title “Millennium of Sea Exploration”. There is a short text about voyages by Capt. J. Cook between 1768 and 1779 on the margin of a sheet. Judging by the text, what is intended is the largest known spiny lobster, *Jasus verreauxi*, because there is a record that a member of Cook’s *Endeavour* bartered with the Maoris of New Zealand, receiving the giant lobster in exchange for a piece of tapa cloth. An artist on board found that it weighed about 11 pounds (Begg and Begg, 1969, p. 26, fig. 24). However, the figure of the stamp shows either *Homarus gammarus* or *H. americanus*, species that both are confined in the North Atlantic.

9. Mauritius 1978. *Cardisoma carnifex*, Land crab, Settlement of Rodrigues (Fig. 2-6)

Clearly the figure on the stamp was copied from the frontispiece of the book of François Leguat’s “A New Voyage to the East Indies” which was originally published in French in the early 18th century. This frontispiece represents the settlement at the island of Rodrigues E. of Mauritius in the Indian Ocean. The only land crab reported from this island is *Cardisoma carnifex*, a species with a wide distribution from East Africa throughout the larger part of the Indo-West Pacific.

10. Mozambique 2002. O Mondo do Mar (Fig. 1-8)

It is quite difficult to give a name to the species shown in the block of 6 stamps titled “O Mundo do Mar” excepting for one that is *Panulirus versicolor* (lower right of the block). The lower left figure may be *Ocypode cordimana*, but we are not fully certain. Another figure (lower center of the block) is mysterious, although the figure is very clear. It cannot be a penaeid as the second leg is sharply bent and resembles that of a hippolytid or pandalid. The rostrum is indistinct. We decided just to call it “a shrimp”.

11. New Caledonia 1989. *Plesionika scopifera* (Fig. 1-9)

The shrimp shown on the stamps of 1989 is indicated *Plesionika* sp. Later, Chan (2004) described the species under the name *Plesionika scopifera* n. sp. with excellent description and figures; one of these figures (fig. 17) shows the holotype in color. The figure on the stamp, although not quite the same as Chan’s fig. 17, is clearly based on the same specimen, i.e. the holotype. So at last, after 15 years, we can definitely provide the correct name of the specimen on the stamp.

12. Palau 2000. *Carcinus maenas* (Fig. 2-1)

The crab is neither land crab nor sesarmid, but in our opinion it actually provides an excellent picture of *Carcinus maenas*, a species that is called “shore crab” or “green crab” in England and North America. We cannot understand why the one shown here is indicated as “Land Crab Sesarmidae”. Many stamps from Palau have subjects that are not related to this Micronesian country in the Pacific. This is a terrible example of such a subject. *Carcinus maenas* is found only in the North Atlantic Ocean on the coasts of Europe and North America. Although it has been introduced by shipping in other parts of the world recently, it has not been known from Palau.

13. Peru 2001. *Hyaella* sp. (Fig.1-10).

This amphipod lives only in a hot spring of Cajamarca in the Andes, Northern Peru. The altitude of the Cajamarca area is 3000–3500 m; the water temperature of the hot spring is said to be around 52°C. The species, about 5mm in body length, was recently discovered in such extremely high temperature, astonishing the world, but it has not been described as yet (S. Ishimaru, per. com.).

14. Russia, Vessiegonsk 1895. *Astacus astacus*, Coat of Arms (Fig. 1-11)

We recently acquired the present stamp. In our previous list we have briefly described those early Russian local stamps depicting crayfish in the late 19th century, but more remarks are given here. The stamps in question belong to the pre-revolutionary period. During the Czarist regime, the postal service was a monopoly of the State and the Zemstvo Post was supposed to carry on the work of the State Post in the localities where there was no State Post. The role of Zemstvo Post was to transfer the mail from the State Post to remote localities. According to Chuchin (1925), around 1864, the Zemstvo has been organized into 36 governments, containing 371 districts. There was Zemstvo Post in each of 33 districts. Vessiegonsk district belonged to the Twer government located northwest near Moscow. In all 28 local stamps were issued at Vessiegonsk between 1871 and 1913. All stamps have the figure of the crayfish *A. astacus* in the coat of arms. Chuchin (1925) listed in his catalogue the oval-shaped, imperforated stamps dated 1870 (Figs. 42-1, 42-2, 42-3 in Omori and Holthuis, 2000) as if they had been issued in 1873 after square, imperforated stamps. Although the reason of his judgment cannot be verified, the former oval-shaped stamps have more primitive figures of crayfish than other stamps, all of which are square. They seem to be the oldest stamps depicting crustaceans in the world (Holthuis, 1967).

15. Solomon Islands 1999. *Panulirus* sp., Philex France 99 (Fig. 2-2).

Of the block of 12 stamps, this blue spiny lobster is difficult to identify, as we have never seen, or heard of, one with such blue color. Judging by the striped legs and the common occurrence, it might be *Panulirus penicillatus*, but *P. femoristriga* is also a possibility.

16. Tanzania 1998. *Gecarcinus ruricola*, as mountain crab (Fig. 2-3)

Probably it is the same species shown as the one on the Uganda stamps of 1998 (500S, as mountain crab). *Gecarci-*

*nus ruricola* is a West Indian species, and indeed is named mountain crab. However, in view of the fact that Tanzanian stamps often show crustaceans that are not indigenous, we believe that the crab on both stamps should be identified as *G. ruricola*. In this connection, none of the stamps in the 1994 Tanzanian Crustacean series belongs to the fauna of Tanzania. *Astacus leptodactylus* is from East Europe and Turkey; *Eriocheir sinensis* from China and West Europe; *Cancer pagurus* from West Europe; *Cardisoma guanhumi* from the West Indies; *Birgus latro* from the Indo-West Pacific, but not E. Africa; *Menippe mercenaria* from Atlantic America; *Dromia personata* from the Mediterranean and East Atlantic; *Callinectes sapidus* from Atlantic America.

17. Tonga 2001. *Scylla serrata* (Fig. 2-4).

This is one of a block of 5 stamps entitled "Year of the Mangrove". The figure of the sheet, representing a mangrove landscape, shows 6 crustaceans, of which two species are on the stamps: a fiddler crab *Uca crassipes* and a swimming crab *Scylla* sp. The genus *Scylla* was until recently considered to contain only one species, *S. serrata*, but it is now split up into several species (Keenan et al., 1998). As we could not identify the ones shown in the stamps we replaced *S. serrata* everywhere by "*Scylla* sp."

18. Tuvalu 2000. ?*Coenobita clypeatus* (Fig. 2-5)

A hermit crab in a block of 6 stamps on a sheet "Animals of Tuvalu" is labelled on the stamp with the name "Hermit crab *Coenobita clypeatus*". Exactly the same figure is found in one of a block of 9 stamps in a souvenir sheet "Ocean life" issued probably in 2000 by Liberia. On this stamp the species is named "Hermit crab *Pagurus pollicaris*". The shape and color of the hermit crab and the shell that it lives in are exactly the same in the two stamps, notwithstanding the fact that they are given different specific and generic names. The true identity of the hermit crab cannot be positively ascertained, as the figures are so poor; most likely it is the West Indian species *Coenobita clypeatus* that does not occur in either Tuvalu or Liberia. *Pagurus pollicaris* is found on the east coast of North America and is not known from Liberia.

### Acknowledgements

We would like to express our sincere thanks to philatelists H. Ueda, M. Asazuma and G. ten Broek for assisting revision and correction of the checklist. Gratitude is extended to many colleague carcinologists including S. Ishimaru, M. Mitsushashi, M. Murano, S. Ohtsuka, M. Shimomura, and M. Takeda for helping with the identification of species. We appreciate E. Brinton for his kind reading of the manuscript and suggestions. Finally, we acknowledge publishing companies of postage stamp catalogues for their generosity to allow us to use

their list number for the present paper. M. Frankevicz of the Scott Publishing Co. provided us with valuable information concerning Scott listing policy for new issues and list numbers of some stamps.

<i>Porcellio scaber</i> Latreille, 1802	51-1
[FAMILY ARMADILLIDIIDAE]	
<i>Armadillidium tabacarui</i> Gruia, Iavorschi & Sarbu, 1994	148-1
[ORDER CUMACEA]	
[FAMILY NANNASTACIDAE]	
<i>Cumella limicola</i> Sars, 1879	29-1
[ORDER EUPHAUSIACEA]	
[FAMILY EUPHAUSIIDAE]	
<i>Euphausia superba</i> Dana, 1850	13-1, 14-1, 24-1, 29-1, 39-1, 63-1, 68-1, 142-1, 144-1, 148-1, 158-1, 169-1, 189-1
<i>Meganyctiphanes norvegica</i> (M. Sars, 1857)	79-1
[ORDER DECAPODA]	
[FAMILY ARISTEIDAE]	
<i>Aristaeomorpha foliacea</i> (Risso, 1827)	80-1, 121-1, 182-1
<i>Aristaeopsis edwardsiana</i> (Johnson, 1867)	7-1, 33-1, 138-1, 162-1
[FAMILY PENAEIDAE]	
<i>Farfantepenaeus aztecus</i> (Ives, 1891)	118-1
<i>Farfantepenaeus duorarum</i> (Burkenroad, 1939)	118-1, 179-1
<i>Farfantepenaeus notialis</i> (Pérez Farfante, 1989)	21-1, 51-1, 71-1, 132-1, 162-1
<i>Fenneropenaeus chinensis</i> (Osbeck, 1765)	40-1, 135-1
<i>Fenneropenaeus indicus</i> (H. Milne Edwards, 1837)	28-1, 122-1, 136-1, 198-1
<i>Fenneropenaeus merguensis</i> (De Man, 1888)	28-1, 178-1
<i>Fenneropenaeus</i> sp.	128-1
<i>Litopenaeus occidentalis</i> (Streets, 1871)	139-1
<i>Litopenaeus schmitti</i> (Burkenroad, 1936)	130-1
<i>Litopenaeus setiferus</i> (Linnaeus, 1767)	88-1, 118-1
<i>Litopenaeus stylirostris</i> (Stimpson, 1874)	118-1
<i>Litopenaeus vannamei</i> (Boone, 1931)	50-1, 59-1
<i>Marsupenaeus japonicus</i> (Bate, 1888)	114-1, 177-1

<i>Melicertus kerathurus</i> (Forskål, 1775)	83-1, 107-2, 132-1, 184-1
<i>Metapenaeus joyneri</i> (Miers, 1880)	198-1
<i>Parapenaeus longirostris</i> (Lucas, 1846)	107-2, 132-1
<i>Penaeus monodon</i> Fabricius, 1798	17-1, 67-1, 178-1
<i>Penaeus semisulcatus</i> De Haan, 1844	105-1
<i>Penaeus</i> sp.	67-1
<b>【FAMILY STENOPODIDAE】</b>	
<i>Stenopus hispidus</i> (Olivier, 1811)	11-1, 13-1, 16-1, 19-1, 20-1, 51-1, 56-1, 99-1, 110-3, 117-1, 138-1, 159-1, 196-1
<b>【FAMILY RHYNCHOCINETIDAE】</b>	
<i>Cinetorhynchus rigens</i> (Gordon, 1936)	27-1, 37-1, 56-1
<i>Rhynchocinetes durbanensis</i> Gordon, 1936	196-1
<i>Rhynchocinetes typus</i> H. Milne Edwards, 1837	39-1
<b>【FAMILY XIPHOCARIDIDAE】</b>	
<i>Xiphocaris elongata</i> (Guérin Méneville, 1856)	120-1
<b>【FAMILY CAMPYLONOTIDAE】</b>	
<i>Campylonotus vagans</i> Bate, 1888	63-1
<b>【FAMILY GNATHOPHYLLIDAE】</b>	
<i>Gnathophyllum elegans</i> (Risso, 1816)	167-1
<i>Hymenocera picta</i> Dana, 1852	128-1, 152-1
<b>【FAMILY PALAEMONIDAE】</b>	
<i>Macrobrachium carcinus</i> (Linnaeus, 1758)	51-1, 158-1
<i>Macrobrachium equidens</i> (Dana, 1852)	17-1
<i>Macrobrachium lar</i> (Fabricius, 1789)	67-1, 126-1
<i>Macrobrachium macrobrachion</i> (Herklots, 1851)	107-1
<i>Macrobrachium nipponense</i> (De Haan, 1849)	40-1, 188-1, 198-1
<i>Macrobrachium rosenbergii</i> (De Man, 1879)	17-1, 90-1, 91-1, 143-1, 178-1
<i>Macrobrachium zariquieyi</i> Holthuis, 1949	157-1
<i>Macrobrachium</i> sp.	128-1, 178-1
<i>Nematopalaemon hastatus</i> (Aurivillius, 1898)	132-1
<i>Palaemon affinis</i> H. Milne Edwards, 1837	129-1
<i>Palaemon elegans</i> Rathke, 1837	71-1
<i>Palaemon serratus</i> (Pennant, 1777)	20-1, 29-1, 82-1, 101-1, 162-1
<i>Periclimenes brevicarpalis</i> (Schenkel, 1902)	196-1, 198-1
<i>Periclimenes holthuisi</i> Bruce, 1969	111-1
<i>Periclimenes imperator</i> Bruce, 1967	55-1
<i>Periclimenes pedersoni</i> Chace, 1958	11-1, 85-1, 186-1
<b>【FAMILY ALPHEIDAE】</b>	
<i>Alpheus bellulus</i> Miya & Miyake, 1969	198-1
<i>Alpheus</i> sp.	138-1
<i>Synalpheus neomeris</i> (De Man, 1888)	111-1
<b>【FAMILY HIPPOLYTIDAE】</b>	
<i>Lysmata amboinensis</i> (De Man, 1888)	16-1, 37-1, 193-1, 196-1
<i>Lysmata debelius</i> Bruce, 1963	71-1
<i>Lysmata wurdemanni</i> (Gibbes, 1850)	10-1, 19-1, 154-1
<i>Parhippolyte uveae</i> Borradaile, 1899	64-1
<i>Thor amboinensis</i> (De Man, 1888)	186-1
<b>【FAMILY PANDALIDAE】</b>	
<i>Heterocarpus ensifer</i> A. Milne Edwards, 1881	138-1
<i>Heterocarpus laevigatus</i> Bate, 1888	138-1
<i>Pandalus borealis</i> Krøyer, 1838	79-1
<i>Pandalus hypsinotus</i> Brandt, 1851	135-1
<i>Plesionika scopifera</i> Chan, 2004	128-1
<b>【FAMILY CRANGONIDAE】</b>	
<i>Crangon septemspinosa</i> Say, 1818	34-1
<b>【FAMILY ENOPLOMETOPIDAE】</b>	
<i>Hoplometopus callistus</i> (Intès & Leloeuff, 1970)	98-1
<i>Hoplometopus antillensis</i> (Lütken, 1865)	10-1, 19-1
<b>【FAMILY NEPHROPIDAE】</b>	
<i>Acanthacaris caeca</i> (A. Milne Edwards, 1881)	81-1
<i>Homarus americanus</i> H. Milne Edwards, 1837	34-1, 107-1, 156-1, 177-1, 193-1
<i>Homarus gammarus</i> (Linnaeus, 1758)	5-1, 47-1, 66-1, 69-1, 71-1, 73-1, 82-1, 89-1, 101-1, 119-1, 131-1, 135-1, 144-1, 168-1, 174-1, 189-1
<i>Homarus</i> sp.	8-2, 51-1, 75-1, 81-1, 137-1, 158-1, 202-1
<i>Hoploparia</i> sp.	24-1

<i>Metanephrops binghami</i> (Boone, 1927)	81-1
<i>Nephrops norvegicus</i> (Linnaeus, 1758)	5-1, 70-1, 94-1, 101-1, 107-1, 162-1
【FAMILY ASTACIDAE】	
<i>Astacus astacus</i> (Linnaeus, 1758)	29-1, 33-1, 65-1, 74-1, 106-2, 108-1, 109-1, 127-1, 148-1, 150-1, 175-1, 198-1
<i>Astacus colchicus</i> Kessler, 1878	72-1
<i>Astacus leptodactylus</i> Eschscholtz, 1823	162-1, 177-1
<i>Astacus</i> sp.	102-1
<i>Austropotamobius pallipes</i> (Lereboullet, 1858)	51-1, 172-1
<i>Pacifastacus leniusculus</i> (Dana, 1852)	174-1
【FAMILY CAMBARIDAE】	
<i>Cambaroides similis</i> (Koelbel, 1892)	104-1
<i>Procambarus clarkii</i> (Girard, 1852)	193-1
【FAMILY PARASTACIDAE】	
<i>Cherax communis</i> Holthuis, 1949	126-1
<i>Cherax papuanus</i> Holthuis, 1949	140-1
<i>Cherax</i> sp.	13-1
【FAMILY CALLIANASSIDAE】	
<i>Callianassa kraussi</i> Stebbing, 1900	43-1
【FAMILY ERYONIDAE】	
<i>Eryon arctiformis</i> (Schlotheim, 1820)	107-2
【FAMILY POLYCHELIDAE】	
<i>Eryoneicus alberti</i> Bouvier, 1905	119-1
<i>Polycheles perarmatus</i> Holthuis, 1952	98-1
【FAMILY PALINURIDAE】	
<i>Jasus frontalis</i> (H. Milne Edwards, 1837)	39-1
<i>Jasus lalandii</i> (H. Milne Edwards, 1837)	171-1
<i>Jasus paulensis</i> (Heller, 1862)	68-1
<i>Jasus tristani</i> Holthuis, 1963	153-2, 183-1
<i>Justitia longimanus</i> (H. Milne Edwards, 1837)	67-1, 80-1
<i>Palinurus charlestoni</i> Forest & Postel, 1964	35-1
<i>Palinurus delagoae</i> Barnard, 1926	122-1
<i>Palinurus elephas</i> (Fabricius, 1787)	5-1, 7-1, 22-3, 69-1, 70-1, 107-1, 119-1, 127-1, 153-1, 154-1, 167-1, 184-1, 198-1, 202-1
<i>Palinurus mauritanicus</i> Gruvel, 1911	116-1
<i>Palinurus</i> sp.	201-1
<i>Panulirus argus</i> (Latreille, 1804)	6-1, 8-2, 9-1, 10-1, 16-1, 18-1, 19-1, 20-1, 22-1, 25-1, 27-1, 31-1, 36-1, 37-1, 51-1, 56-1, 80-1, 81-1, 118-1, 125-1, 130-1, 138-1, 159-1, 163-1, 186-1, 203-1
<i>Panulirus echinatus</i> S. I. Smith, 1869	35-1
<i>Panulirus guttatus</i> (Latreille, 1804)	50-1, 80-1
<i>Panulirus homarus</i> (Linnaeus, 1758)	41-1, 136-1, 181-1
<i>Panulirus interruptus</i> (Randall, 1840)	187-1
<i>Panulirus japonicus</i> (Von Siebold, 1824)	71-1, 100-1, 114-1, 164-1
<i>Panulirus laevicauda</i> (Latreille, 1817)	80-1
<i>Panulirus longipes</i> (A. Milne Edwards, 1868)	110-3, 112-1
<i>Panulirus ornatus</i> (Fabricius, 1790)	117-1, 122-1, 177-1, 178-1
<i>Panulirus pascuensis</i> Reed, 1959	39-1
<i>Panulirus penicillatus</i> (Olivier, 1791)	71-1, 103-1, 160-1
<i>Panulirus polyphagus</i> (Herbst, 1793)	198-1
<i>Panulirus regius</i> de Brito Capello, 1864	33-1, 35-1, 71-1, 116-1, 162-1
<i>Panulirus versicolor</i> (Latreille, 1804)	46-1, 62-1, 112-1, 122-1, 126-1, 128-1, 143-1, 187-1
<i>Panulirus</i> sp.	122-1, 166-1, 198-1
【FAMILY SCYLLARIDAE】	
<i>Evibacus princeps</i> S. I. Smith, 1869	139-1
<i>Parribacus antarcticus</i> (Lund, 1793)	67-1, 81-1
<i>Parribacus caledonicus</i> Holthuis, 1960	128-1
<i>Scyllarides aequinoctialis</i> (Lund, 1793)	80-1
<i>Scyllarides latus</i> (Latreille, 1802)	35-1, 162-1
<i>Scyllarides nodifer</i> (Stimpson, 1866)	81-1
<i>Scyllarides obtusus</i> Holthuis, 1993	153-2
<i>Scyllarus arctus</i> (Linnaeus, 1758)	107-2, 145-1
<i>Scyllarus depressus</i> (S. I. Smith, 1881)	20-1
【FAMILY SYNAXIDAE】	
<i>Palinurellus gundlachi</i> Von Martens, 1878	80-1
【FAMILY GALATHEIDAE】	

<i>Galathea strigosa</i> (Linnaeus, 1767)	152-1
<i>Galathea</i> sp.	172-1
<i>Munida gregaria</i> (Fabricius, 1793)	63-1
<i>Munidopsis</i> sp.	128-1
<b>[FAMILY PORCELLANIDAE]</b>	
<i>Neopetrolisthes maculatus</i> (H. Milne Edwards, 1837)	80-1, 187-1
<i>Neopetrolisthes ohshimai</i> Miyake, 1937	111-1
<i>Petrolisthes monodi</i> Chace, 1956	69-1
<b>[FAMILY COENOBITIDAE]</b>	
<i>Birgus latro</i> (Linnaeus, 1758)	26-1, 42-1, 44-1, 67-1, 103-1, 115-1, 122-1, 134-1, 166-1, 177-1, 179-2, 180-1, 187-1, 203-1
<i>Coenobita brevimanus</i> Dana, 1852	42-1, 166-1, 179-2
<i>Coenobita clypeatus</i> (Herbst, 1791)	69-1, 107-1, 125-1, 187-1
<i>Coenobita perlatus</i> H. Milne Edwards, 1837	67-1, 179-2
<i>Coenobita rugosus</i> H. Milne Edwards, 1837	42-1
<i>Coenobita scaevola</i> (Forskål, 1775)	55-1
<b>[FAMILY DIOGENIDAE]</b>	
<i>Aniculus ursus</i> (Olivier, 1811)	110-3
<i>Calcinus elegans</i> (H. Milne Edwards, 1836)	44-1
<i>Clibanarius humilis</i> Dana, 1852	44-1
<i>Dardanus arrosor</i> (Herbst, 1796)	113-2, 119-1, 131-1, 138-2, 152-1, 179-1
<i>Dardanus guttatus</i> (Olivier, 1811)	110-3
<i>Dardanus megistos</i> (Herbst, 1804)	13-1, 26-1, 164-2, 166-1, 180-1, 187-1, 193-1, 203-1
<i>Dardanus venosus</i> (H. Milne Edwards, 1848)	10-1, 19-1, 20-1, 37-1, 80-1
<i>Paguristes cadenati</i> Forest, 1954	18-1
<i>Paguristes grayi</i> Benedict, 1901	37-1, 120-1
<i>Paguristes</i> sp.	8-1
<i>Petrochirus diogenes</i> (Linnaeus, 1758)	27-1, 51-1
<i>Trizopagurus strigatus</i> (Herbst, 1804)	44-1
<b>[FAMILY PAGURIDAE]</b>	
<i>Pagurus bernhardus</i> (Linnaeus, 1758)	47-1, 58-1, 101-1, 167-1, 192-1
<i>Pagurus excavatus</i> (Herbst, 1791)	52-1, 107-2
<i>Pagurus prideaux</i> Leach, 1815	95-1
<i>Pagurus</i> sp.	67-1, 80-1
<i>Pylopaguropsis magnimanus</i> (Henderson, 1896)	44-1
<b>[FAMILY LITHODIDAE]</b>	
<i>Lithodes ferox</i> Filhol, 1885	132-1
<i>Lithodes murrayi</i> Henderson, 1888	68-1
<i>Lithodes santolla</i> (Molina, 1782)	39-1
<i>Lithodes turritus</i> Ortmann, 1892	198-1
<i>Neolithodes grimaldii</i> (A. Milne Edwards & Bouvier, 1894)	79-1
<i>Paralithodes brevipes</i> (H. Milne Edwards & Lucas, 1841)	149-1, 198-1
<i>Paralithodes camtschatica</i> (Tilesius, 1815)	135-1, 189-1
<i>Paralomis granulosa</i> (Hombrom & Jacquinet, 1846)	63-1
<i>Paralomis spinosissimus</i> Birstein & Vinogradov, 1972	169-1
<b>[FAMILY DROMIIDAE]</b>	
<i>Dromia personata</i> (Linnaeus, 1758)	177-1
<i>Dromidiopsis edwardsi</i> Rathbun, 1919	138-1
<b>[FAMILY RANINIDAE]</b>	
<i>Lyreidus tridentatus</i> De Haan, 1841	128
<i>Ranina ranina</i> (Linnaeus, 1758)	41, 77, 166
<b>[FAMILY CALAPPIDAE]</b>	
<i>Ashtoret lunaris</i> (Forskål, 1775)	178-1
<i>Calappa calappa</i> (Linnaeus, 1758)	128-1
<i>Calappa flammea</i> (Herbst, 1794)	80-1
<i>Calappa galloides</i> Stimpson, 1859	127-1
<i>Calappa granulata</i> (Linnaeus, 1758)	52-1, 107-2, 121-1
<i>Calappa rubroguttata</i> Herklots, 1851	75-1
<i>Matuta planipes</i> Fabricius, 1798	178-1
<i>Mursia musorstomia</i> Galil, 1993	128-1
<b>[FAMILY LEUCOSIIDAE]</b>	
<i>Persephona mediterranea</i> (Herbst, 1794)	46-1, 81-1
<b>[FAMILY MAJIDAE]</b>	
<i>Chionoecetes opilio</i> (Fabricius, 1780)	79-1, 100-1, 104-1, 135-1

<i>Eurypodius latreillii</i> Guérin, 1828	63-1
<i>Huenia heraldica</i> (De Haan, 1837)	112-1
<i>Hyas araneus</i> (Linnaeus, 1758)	79-1, 88-1
<i>Hyas coarctatus</i> Leach, 1815	79-1
<i>Lissa chiragra</i> (Fabricius, 1775)	107-2
<i>Macrocheira kaempferi</i> (Temminck, 1836)	119-1
<i>Macropodia longirostris</i> (Fabricius, 1775)	107-2
<i>Maja crispata</i> Risso, 1827	67-1
<i>Maja squinado</i> (Herbst, 1788)	70-1, 75-1, 101-1, 107-2, 113-2, 162-1
<i>Mithraculus forceps</i> A. Milne Edwards, 1875	27-1
<i>Mithraculus sculptus</i> (Lamarck, 1818)	81-1
<i>Mithrax spinosissimus</i> (Lamarck, 1818)	81-1, 127-1, 139-1, 159-1
<i>Oxypleurodon orbiculatus</i> (Guinot & Richer de Forges, 1985)	128-1
<i>Platymaia alcocki</i> Rathbun, 1918	41-1
<i>Pugettia</i> sp.	110-1
<i>Rochinia carpenteri</i> (W. Thomson, 1873)	132-1
<i>Schizophrys aspera</i> (H. Milne Edwards, 1834)	112-1
<i>Stenorhynchus seticornis</i> (Herbst, 1788)	18-1, 27-1, 56-1, 159-1
<b>[FAMILY PARTHENOPIDAE]</b>	
<i>Parthenope longimanus</i> (Linnaeus, 1764)	41-1
<i>Parthenope massena</i> (Roux, 1830)	52-1
<i>Parthenope valida</i> De Haan, 1839	135-1
<b>[FAMILY ATELECYCLIDAE]</b>	
<i>Atelecyclus undecimdentatus</i> (Herbst, 1783)	113-1
<i>Erimacrus isenbeckii</i> (Brandt, 1848)	135-1
<i>Peltarion spinulosum</i> (White, 1843)	129-1
<b>[FAMILY CANCRIDAE]</b>	
<i>Cancer borealis</i> Stimpson, 1859	156-1
<i>Cancer pagurus</i> Linnaeus, 1758	5-1, 47-1, 58-1, 73-1, 85-1, 101-1, 107-2, 177-1, 190-1
<i>Cancer setosus</i> Molina, 1782	39-1
<b>[FAMILY GERYONIDAE]</b>	
<i>Chaceon granulatus</i> (T. Sakai, 1978)	138-1
<i>Chaceon maritae</i> (Manning & Holthuis, 1981)	132-1
<b>[FAMILY PORTUNIDAE]</b>	
<i>Carcinus aestuarii</i> Nardo, 1847	5-1, 29-1, 107-2, 119-1, 184-1, 185-1
<i>Carcinus maenas</i> (Linnaeus, 1758)	82-1, 101-1, 124-1, 138-1
<i>Callinectes amnicola</i> (de Rochebrune, 1883)	33-1
<i>Callinectes sapidus</i> Rathbun, 1896	27-1, 36-1, 51-1, 70-1, 118-1, 127-1, 138-1, 159-1, 177-1, 193-1
<i>Callinectes marginatus</i> (A. Milne Edwards, 1861)	8-1
<i>Charybdis bimaculata</i> (Miers, 1886)	198-1
<i>Liocarcinus holsatus</i> (Fabricius, 1798)	147-1
<i>Lissocarcinus orbicularis</i> Dana, 1852	103-1, 166-1
<i>Necora puber</i> (Linnaeus, 1767)	101-1, 107-2, 127-1, 153-1, 154-1, 162-1
<i>Ovalipes punctatus</i> (De Haan, 1833)	146-1
<i>Portunus granulatus</i> (H. Milne Edwards, 1834)	112-1
<i>Portunus pelagicus</i> (Linnaeus, 1758)	69-1, 77-1, 122-1, 167-1, 177-1, 178-1, 198-1
<i>Portunus sanguinolentus</i> (Herbst, 1783)	198-1
<i>Portunus sayi</i> (Gibbes, 1850)	56-1, 127-1
<i>Portunus sebae</i> (H. Milne Edwards, 1834)	80-1
<i>Portunus trituberculatus</i> (Miers, 1876)	135-1, 146-1
<i>Sanquerus validus</i> (Herklots, 1851)	98-1
<i>Scylla</i> sp.	64-1, 122-1, 178-1, 180-1, 198-1
<i>Thalamitoides quadridens</i> A. Milne Edwards, 1869	44-1
<b>[FAMILY BYTHOGRAEIDAE]</b>	
<i>Bythograea thermydron</i> Williams, 1980	85-1
<i>Bythograea</i> sp.	186-1
<b>[FAMILY GONEPLACIDAE]</b>	
<i>Beuroisia duhameli</i> Guinot & Richer de Forges, 1981	68-1
<b>[FAMILY CARPILIIDAE]</b>	
<i>Carpilius corallinus</i> (Herbst, 1783)	8-2, 10-1, 19-1, 20-1, 27-1, 51-1, 56-1, 80-1, 81-1, 138-1, 186-1
<i>Carpilius maculatus</i> (Linnaeus, 1758)	26-1, 49-1, 67-1, 77-1, 103-1, 105-1, 112-1, 126-1, 160-1, 166-1, 187-1, 203-1
<i>Liagore rubromaculata</i> (De Haan, 1835)	41-1
<b>[FAMILY TRAPEZIIDAE]</b>	
<i>Tetralia nigrolineata</i> Serène & Dat, 1957	111-1

<i>Trapezia areolata</i> Dana, 1852	13-1
<i>Trapezia cymodoce</i> (Herbst, 1801)	44-1
<i>Trapezia ferruginea</i> Latreille, 1825	44-1
<i>Trapezia guttata</i> Rüppell, 1830	44-1
<i>Trapezia rufopunctata</i> (Herbst, 1799)	44-1
【FAMILY XANTHIDAE】	
<i>Atergatis floridus</i> (Linnaeus, 1767)	112-1
<i>Atergatis subdentatus</i> (De Haan, 1835)	135-1
<i>Etisus laevimanus</i> Randall, 1840	112-1
<i>Etisus splendidus</i> Rathbun, 1906	103-1, 128-1, 166-1
<i>Lophozozymus pictor</i> (Fabricius, 1798)	103-1, 164-2, 166-1, 187-1
<i>Lophozozymus pulchellus</i> A. Milne Edwards, 1867	44-1
<i>Pilodius areolatus</i> (H. Milne Edwards, 1834)	44-1
<i>Platypodiella georgei</i> Den Hartog & Türkay, 1991	153-2
<i>Platypodiella spectabilis</i> (Herbst, 1794)	86-1
<i>Xantho porressa</i> (Olivi, 1792)	78-1
<i>Zosimus aeneus</i> (Linnaeus, 1758)	44-1, 117-1, 140-1
【FAMILY MENTIPPIDAE】	
<i>Baptozius vinosus</i> (H. Milne Edwards, 1834)	151-1
<i>Eriphia sebana</i> (Shaw & Nodder, 1803)	140-1, 166-1, 187-1
<i>Eriphia verrucosa</i> (Forskål, 1775)	19-1, 107-2, 141-1
<i>Eriphia</i> sp.	177-1
<i>Menippe mercenaria</i> (Say, 1818)	127-1, 177-1
【FAMILY PILUMNIDAE】	
<i>Lybia tessellata</i> (Latreille, 1812)	44-1
<i>Pilumnus hirtellus</i> (Linnaeus, 1761)	107-2
<i>Pilumnus</i> sp.	145-1
【FAMILY PLATYXANTHIDAE】	
<i>Homalaspis plana</i> (H. Milne Edwards, 1834)	39-1
【FAMILY PANOPEIDAE】	
<i>Rhithropanopeus harrisi</i> (Gould, 1841)	15-2
【FAMILY POTAMIDAE】	
<i>Johora singaporensis</i> Ng, 1986	164-2
<i>Potamon fluviatile</i> (Herbst, 1785)	131-1
<i>Thaiphusa sirikit</i> (Naiyanetr, 1992)	178-1
<i>Thaipotamon chulabhorn</i> Naiyanetr, 1993	178-1
【FAMILY POTAMONAUTIDAE】	
<i>Potamonautes</i> sp.	30-1
【FAMILY PSEUDOTHELPHUSIDAE】	
<i>Guinotia dentata</i> (Latreille, 1825)	56-1
【FAMILY GECARCINUCIDAE】	
<i>Phricotelphusa limula</i> (Hilgendorf, 1882)	178-1
<i>Phricotelphusa sirindhorn</i> Naiyanetr, 1989	178-1
【FAMILY PARATHELPHUSIDAE】	
<i>Irmengardia johnsoni</i> Ng & Yang, 1985	164-2
<i>Parathelphusa reticulata</i> Ng, 1989	164-2
【FAMILY OCYPODIDAE】	
<i>Ocypode ceratophthalmus</i> (Pallas, 1772)	42-1, 44-1, 77-1, 110-3, 122-1, 151-1, 166-1, 179-2, 187-1, 203-1
<i>Ocypode cordimana</i> Latreille, 1818	42-1, 44-1
<i>Ocypode cursor</i> (Linnaeus, 1758)	52-1, 75-1
<i>Ocypode gaudichaudii</i> H. Milne Edwards & Lucas, 1843	50-1
<i>Ocypode quadrata</i> (Fabricius, 1787)	8-2, 11-1, 81-1, 159-1, 197-1
<i>Ocypode</i> sp.	18-1, 167-1
<i>Uca arcuata</i> (De Haan, 1833)	135-1
<i>Uca chlorophthalmus</i> (H. Milne Edwards, 1852)	44-1
<i>Uca coarctata</i> (H. Milne Edwards, 1852)	151-1
<i>Uca crassipes</i> (Adams & White, 1848)	67-1, 180-1
<i>Uca lactea</i> (De Haan, 1835)	55-1, 173-1
<i>Uca pugilator</i> (Bosc, 1802)	18-1, 127-1
<i>Uca pugnax</i> (S. I. Smith, 1870)	155-1, 159-1
<i>Uca tangeri</i> (Eydoux, 1835)	8-1, 71-1
<i>Uca tetragonon</i> (Herbst, 1790)	117-1, 140-1, 166-1, 203-1
<i>Uca thayeri</i> Rathbun, 1900	27-1
<i>Uca vocans</i> (Linnaeus, 1758)	164-2, 198-1

<i>Uca vomeris</i> McNeill, 1920	13-1
<i>Uca</i> sp.	64-1, 112-1, 118-1, 152-1, 166-1
<b>【FAMILY GECARCINIDAE】</b>	
<i>Cardisoma armatum</i> Herklots, 1851	21-1, 70-1, 75-1
<i>Cardisoma carnifex</i> (Herbst, 1794)	44-1, 64-1, 117-1, 140-1, 151-1, 203-1
<i>Cardisoma guanhumi</i> Latreille, 1825	8-2, 51-1, 81-1, 127-1, 177-1
<i>Cardisoma hirtipes</i> Dana, 1851	42-1
<i>Cardisoma longipes</i> (A. Milne Edwards, 1873)	134-1
<i>Cardisoma</i> sp.	152-1
<i>Gecarcinus lagostoma</i> H. Milne Edwards, 1837	12-1
<i>Gecarcinus lateralis</i> (de Fréminville, 1835)	8-2, 22-1
<i>Gecarcinus ruricola</i> (Linnaeus, 1758)	51-1, 56-1, 81-1, 127-1, 177-1, 188-1
<i>Gecarcoidea natalis</i> (Pocock, 1898)	42-1
<b>【FAMILY MICTYRIDAE】</b>	
<i>Mictyris brevidactylus</i> Stimpson, 1858	151-1
<b>【FAMILY GRAPSIDAE】</b>	
<i>Geograpsus crinipes</i> (Dana, 1851)	42-1
<i>Geograpsus grayi</i> (H. Milne Edwards, 1853)	42-1, 44-1, 134-1
<i>Geograpsus stormi</i> (De Man, 1895)	42-1
<i>Goniopsis cruentata</i> (Latreille, 1803)	37-1
<i>Goniopsis pelii</i> (Herklots, 1851)	8-1
<i>Grapsus albolineatus</i> Lamarck, 1818	166-1
<i>Grapsus grapsus</i> (Linnaeus, 1758)	12-1, 19-1, 23-1, 59-1, 61-1, 75-1, 80-1, 127-1, 142-1, 162-1
<i>Grapsus tenuicrustatus</i> (Herbst, 1783)	42-1
<i>Leptograpsus variegatus</i> (Fabricius, 1793)	129-1
<i>Metopograpsus frontalis</i> Miers, 1880	166-1
<i>Pachygrapsus marmoratus</i> (Fabricius, 1787)	148-1
<b>【FAMILY PLAGUSIIDAE】</b>	
<i>Percnon planissimum</i> (Herbst, 1804)	112-1, 166-1
<i>Plagusia chabrui</i> (Linnaeus, 1758)	129-1
<i>Plagusia depressa</i> (Fabricius, 1775)	81-1
<b>【FAMILY SESARMIDAE】</b>	
<i>Aratus pisonii</i> (H. Milne Edwards, 1837)	27-1
<i>Metasesarma rousseauxi</i> H. Milne Edwards, 1853	42-1
<i>Parasesarma erythroductyla</i> (Hess, 1865)	64-1
<i>Sesarma cinereum</i> (Bosc, 1802)	127-1
<i>Sesarma</i> sp.	64-1
<b>【FAMILY VARUNIDAE】</b>	
<i>Eriocheir sinensis</i> H. Milne Edwards, 1853	40-1, 177-1, 188-1

**Table 2** CHECK LIST OF CRUSTACEANS ON POSTAGE STAMPS FROM 1870 TO AND INCLUDING 2002.

Incorrect and/or misspelled expressions of genus and species name on postage stamps are indicated in parentheses with "NOT". Genus and species names originally indicated on the stamps are shown in parentheses with "AS". Abbreviations are explained and notes about some questionable stamps are given at the end.

CODE	COUNTRY / REGION	YEAR	DESCRIPTION	CAT. NO.	FACE VALUE	TYPE

**Abbreviations in Table 2**

CH···Chuchin catalogue (list) number

DCML···Decimal currency

D.D.R.···Democratic Republic

IMPERF···Imperforated

IMPERF/S···Imperforated sheet

LITHO···Lithographed

ML···Michel catalogue (list) number

m.p.r.···minimum postage rate

M/S···Miniature sheet

n.s.···have not confirmed by the present authors

OVPTD···Overprinted

P.D.R.···People's Democratic Republic of

REP···Republic

PERF···Perforated

PERF 13 1/2···Perforation gauge or size 13 1/2

PIN-PERF···Pin perforated

SG···Stanley Gibbons catalogue (list) number

S/S···Souvenir sheet

U.A.E.···United Arab Emirates

UNWMK···Unwatermarked

WMK···Water mark

YT···Yvert et Tellier catalogue (list) number

B, C, O, RA, Z···Prefix letters of list number denote categories of special postage stamps such as semi-postal (B), air post (C), official (O), postal tax (RA) and Japan's prefecture issues (Z) classified in the Scott catalogue

.···Face value not printed

Notes: Congo Democratic Republic—Stamps from Zaire are now being released by this name or “Republic Democratique du Congo,” despite the resumption of civil war. The Scott continue to list these stamps under the country's name Zaire, and does not list some recent issues from there, as the validity of the stamps from these time period has been questioned (Kloetzel, 2004, Vol. 6, p. 1058).

Liberia—The Scott has not listed Liberian stamps since 1999 for a number of reasons that were explained in the December 2003 Scott Stamp Monthly. The government of Liberia has been in chaos, and postal service has been sporadic from years. And, rogue agents have tried to infiltrate illegal Liberia stamps into the market place. Lack of law and government is the reason that the Scott does not list the new stamps of another failed state, Somalia (Kloetzel, 2003).

Republica Saharaui—The Scott does not list the stamps, as that is not a recognized country (Frankevicz, pers. comm.).

The Djibouti ?2000 and ?2001 and Tanzania ?1998 stamps are not listed by any catalogue as far as we can refer. According to Mr. Frankevicz (pers. comm.) of the Scott Publishing Co., in spite of efforts, the Scott has failed to determine whether they are legitimate stamps from the postal authorities of these countries.

Fig. 1. Interesting postage stamps (1). 1. Azerbaijan 2001, 2. Comoro 1998, 3. Dominica 2001, 4. Finland 2002, 5. French Polynesia 2002, 6. Greece 1992, 7. Greenland 2001, 8. Mozambique 2002, 9. New Caledonia 1989, 10. Peru 2001, 11. Russia, Vessiegonsk 1895.

Fig. 2. Interesting postage stamps (2). 1. Palau 2000, 2. Solomon Islands 1999, 3. Tanzania 1998, 4. Tonga 2001, 5. Tuvalu 2000, 6. Mauritius 1978 and the frontispiece of "A New Voyage to the East Indies" Dutch edition, 7. Grenada Grenadines 1998 and the picture shown in Begg and Begg, 1969 "A Maori barter a crayfish for a piece of tapa cloth, by and unknown artist on the Endeavour".

## 郵便切手の甲殻類 (2)—1870年から 2002年まで—: 前編の改訂と追加

大森 信<sup>\*1</sup>・Lipke B. Holthuis<sup>\*2</sup>

(<sup>\*1</sup> 東京海洋大学名誉教授, 現 阿嘉島臨海研究所)  
(<sup>\*2</sup> オランダ国立自然史博物館)

前編の世界の甲殻類切手の分類群ならびに発行国別総目録 (1997年まで) に 1998年から 2002年の 5年間のものを加えて, すべてを改訂した。2002年末までに発行された切手は 218の国と地域および国際機関からの 1468種に及ぶ。これらについて, 世界の甲殻類分類学者と郵便切手収集家の全面的な協力を得て 92科 357種 (または属) を同定した。そして, このうち, 疑問あるいは興味ある事項のある 18種の切手の図柄について検討し, 記述した。その中には近年の切手請負業者による無思慮な図柄の選定が郵便切手の文化的価値を下げ, トピカル切手収集の楽しみを損なってしまうことへの危惧と, 世界初の甲殻類切手の発行は 1870年であることについての考察が含まれている。
