INTRODUCTION FOR 2008

Greetings,

The year 2007 was somewhat of a landmark for us , Ron had his hip replaced in February which prevented us from attending all our planned shows, we apologise to you all if you came to see our displays.

We were, with the help of the Family and stalwart friends Reg and Pearl Sleeman, able to feature special displays at Devoran, Falmouth, and Boconnoc where we gained the Large Gold and best Trade display at the show, also to be awarded the R.H.S. Gold for our display at Cardiff.

We have now moved to our new custom built premises at Penrose Farm, for the care and despatch of our bulbs, and whilst almost all our Daffodils are grown by us, we have to source some from carefully selected growers, the Collection of Tulips and other bulbs grown on specialist Nurseries in Holland has proved very successful and we are expanding the range and selection for you this year.

Many Garden Clubs and societies took advantage of our Special Discounts for larger quantities, but we do recommend early ordering, remember if it is not in the catalogue please enquire, we may just have it in the collection, remember despatch of you order will be during September and early October.

2007 also saw the launch of the "Designate" National Collection of Modern and Historical Daffodils, at Trevarno Gardens Nr Helston, Ron is the curator and many more varieties will be added each year, both from our collection and from other growers, the show Garden at Trevarno is open from mid February to the end April, admission at the Gate.

We shall be featuring displays at;

Trelissick 22nd, 23rd and 24th March

Falmouth. 29th and 30th March

Boconnoc. 5th and 6th April.

The Royal Horticultural Society. 15th and 16th April

Cardiff. 18th, 19th and 20th April

Daffodil Society Show. 18th and 19th April (to be confirmed)

Bath. 3rd, 4th and 5th May.

We thank you all for your continued support and wish everyone a most enjoyable year.

Ron and Maureen Scamp

of cultivated origin, once a selection has been distinguished by a cultivar name it should be assigned to Divisions 1-12 distinguished solely by botanical name should be assigned to Division 13.

Characteristics for Divisions 5 to 10 are given for guidance only; they are not all necessarily expected to be true in every cultivar assigned to those divisions.

Divisions 12 and 13 are not illustrated owing to the wide variation in shape and size between the flowers involved.

One flower to a stem; corona (trumpet) usually as long as, or longer than the perianth segments (petals)

Cultural Notes

able like to grow some Daffodils in pots, indeed there can be no nicer way to enjoy them than when grown correctly and opened to perfection in the conservatory or greenhouse.

The following notes are a guide to and for the benefit of those who would perhaps one day there are many prepared composts available for this purpose, and will suit our needs admirably, with perhaps the addition of a little coarse grit to aid drainage, and watering at flowering time.

Firstly, it is essential that the bulbs are kept cool and moist, this is to develop the root system. Hanging the pots outside and covering with a couple of inches of peat or similar material is the ideal, as should the bulbs be subjected to premature indoor warmth, growth will be stunted and often the flower will strangle in the neck of the bulb, also the bulb could be weakened and die. So a simple rule is to plant early, keep cold, and bring inside to a conservatory when the flower buds are clearly well out of the bulb. After planting keep well watered and give an occasional feed for about six to eight weeks, then watering in the usual way.

In ground culture, most garden soils will grow fine daffodils, but the ground should be well cultivated and free draining. Should manure or compost be necessary, this should be well rotted and worked into the soil a good spade's depth below the surface. Bulbs should not be in actual contact with manures as this does encourage disease and could be the cause of rotting.

When planting outside, make a hole deep enough to cover the bulbs by at least twice the height of the bulb. Some of the larger bulbs will need at least 6" of soil covering them. They should be left undisturbed for several years until lifting and dividing is necessary.

For display, a clump always looks better than a straight row; in this way Daffodils can be planted into a flower bed or shrubbery. Remember a little feeding at flowering time will help the bulbs and assist in producing next year's display. You should not remove the leaves until they are beginning to turn yellow, or for at least eight weeks after flowering.

"Castle Rings" 4Y-R (M) S369 (Paricutin x Tamar Fire)

This is a lovely rounded full double flower of Bright Golden Yellow with several inner whorls of segments interspersed with Dark Red, superb for showing and has already been successful as an un-named seedling, the poise is good and well supported on a strong stem and plant and buds that open easily, on most seasons a delicate scent can be detected. £5.00 each.

"Geevor" 4Y-YYO(EM) S274 (St. Keverne x Tamar Fire). A full formal double of lovely golden yellow with slightly darker petaloids that are edged with orange, a pretty flower that has been much admired for several seasons, and has already won several prizes as a show flower here in Cornwall. Also an excellent cut flower with long stems and a sturdy plant. each £5.00

"Gossmoor" 4Y-Y(LM) S626 (St. Keverne x Marjorie Treveal). We think this is one of the best Double Flowers we have bred to date. the plant is strong, the stems stiff, the flower is of excellent poise and held on a short neck with several layers of well overlapping perianth and coronal segments. £10 or 3 for £25.00

"Gribben Head" 4Y-O(M) S251 (Obelisk x Tamar Fire). This is a large heavy very full double flower, held well on stiff stems and a strong plant. The back petals are broad and well overlapped, reflexing slightly to show off the full clustered centre of bright orange. 3 for £2.50

"Madam Speaker" 4Y-O(E) S299 (St. Keverne x Tamar Fire). We are very proud to have introduced this fine variety at the special request of the lady herself and the Marie Curie Cancer Care to commemorate 50 years of cancer care in 1998. The plant is as robust as the lady, stands up well to the elements and admired by all who see it and a first rate flower of show quality. each £3.00 or 3 for £7.50

"Mazzard" 4W-P (L) S639 (Rainbow x Rosewarne seedling 4W-P)

"Menabilly" 4O-R (Ocarino x Ambergate) S205 Late season. This flower is one with very unusual colour of apricot orange tones to the perianth segments with darker red petaloids, I do not think it will win many top show prizes, but it is a 4O-R perhaps one of the first, it is very fertile and already beginning to produce some interesting seedlings. each £4.50

"Poltrean" 4W-P, (EM) S/613 (Accent x Jamaica Inn) This is a super Double flowered Daffodil coloured White with Bright Rosy Pink coronal segments in several layers the blooms are of good size, and held well on stiff upright stems, the plant is strong and vigorous with bulbs that increase well. £15 each or 3 bulbs for £30

It is neat and brightly coloured, always well liked when seen at the early shows, and has an added bonus of being nicely scented. One of my favourites, it is very nice in arrangements. AGM. 5 for £6.50

"Trewoon" 4W-W (L) S918 (Pitchroy x Gay Kybo) Very few all white Double of show capability are available today, we think this fills that gap, the flower is pure white without any cream or yellow undertones, it is large but stands well on the plant. £30.00 each

DIVISION 5 - TRIANDRUS HYBRIDS

These delightful varieties of Daffodil are the result of selective breeding where the species n.triandrus has been introduced into its parentage, the resulting plants often have 2 or 3 flowers on the stem, and are amongst the ladies' favourites in floral arrangements.

These from Division 5. and those of Division 6. are generally much dwarfer in stature and are ideally suited to the garden or rockery. The plants are hardy and quite resistant to the windier spot where the conventional Daffodil often gets broken off.

"**Budock Bells**" 5W-W(L) S98 (Broomhill x n.triandrus) Up to three florets per stem - chalky white - drooping, the perianth segments are narrow and slightly reflexed, smooth and nicely overlapped - the bulb sometimes gives secondary stems to extend the flowering period. A super garden variety with plenty of show potentialeach£6.00

"**Morvah Lady**" 5W-W (LM) S614 (Foundling x n.triandrus)

"**St. Day**" 5W-Y(LM) S717 (Merlin x Foundling) x n.triandrus). This has been much admired by everyone who has seen it growing in the field trials where it has withstood 'all weathers' very well. For show we have success on many occasions. Usually it has 2 or 5 blooms to a stem, it is smooth, well poised and of good clear colours....each £12.50

"**Tater Du**" 5W-Y (Penril x n.triandrus) S374 Mid season. This charming little Triandrus cultivar is ideally suited to the rockery and has consistently produced many stems with 2 or 3 drooping florets to each stem, the perianth segments reflex to show off the widely expanded corona with the stamens and stigma exerted. Division 8. The Tazetta Hybrids.

These plants are the results of many years of breeding and can really be divided into two types. They are with the exception of "Minnow" all quite big plants, some do have very tall stems and foliage. The first kind are more of the true n.tazetta species in form. As the species is generally found in warmer regions of southern Europe and the Mediterranean. They are somewhat tender and do require a hot dry summer period to perform at their best, however they are well worth trying, when each stem could have up to 15 or 20 highly scented florets. The second group or kind is the "Poetaz", these are slightly different in style and have fewer florets, and the scent is an admixture of the n.tazetta and that of the n.poeticus from which these hybrids have been derived. It is the poeticus part that make these much hardier and do withstand our winters as well as any other type of daffodil.

"Hugh Town" 8Y-O(VE)

This wonderful multi-headed flower is proving to be one of the best of its type for cutting and floral arrangements, and is a magnificent choice for the early Garden Display. Site the planting to avoid a very cold situation and to receive the full benefit of sun during the summer to ensure a thorough ripening of the bulbs. This is one we highly recommend to you, highly scented..... 3 for £2.50, or 10 for £6.50

Division 9. The Poeticus Hybrids

These flowers have been commonly called the "Pheasant Eye" and indeed they have been bred from the old species, however these varieties are far superior in form and colour and flower when most other Daffodils have been long finished. They are best picked young as the sun does affect the lovely colours if left out. They are without exception all highly scented. The plants like to be planted in good soil that never completely dries out, this helps to keep them cool. Set the bulbs slightly deeper than normal and leave undisturbed. New bulbs may take a season to settle, but are well worth their place in the garden.

I have been acquiring these for many years and have obtained much pleasure from them, particularly those grown in the alpine house. The species always seems to resent being moved about, but once settled are a joy to see in naturalised surroundings. Very large quantities are not available. I believe them all to be true to name, but like many there seems to be some considerable variance of form, they are however named as sent to me or have been grown from seed.

INTERMEDIATE SIZE VARIETIES

Many of these varieties have been re-classified from the Miniature section as being just too large in bloom size for the show classes, however the plants are much dwarfier in stature than the standard cultivars and most are well suited for the intermediate classes at show or for the Border and rock Garden.

"Pentire" 11aY-R (M) S686 (Falstaff x Brandaris) (AME)

This is an indispensable and valuable little variety for the "Intermediate" sections the plant and flowers are dwarf and much smaller than its counterparts, but the quality of this little flower is such that it has already won on several occasions.£7.50 each or 3 for £18.00

"Pretty Baby" 3W-GYO (LM) A perfectly proportioned sized bloom with many top awards to its credit at major shows, just 74mm diameter with broad rounded petals and a shallow cup of yellow rimmed in Red and a deep green eye, a "Pretty Baby"£9.00 each 3 for £25.00

"Radjel" 4Y-R(M) S298 (Paricutin x Tamar Fire). A perfect intermediate size bloom that won its class at the National Shows. The stems are tall and stiff with a small formal double flower of bright golden yellow with rich red petaloids. Like its parents a good grower. each £5.00

"Salakee" 2Y-Y (E) S401 (Ristin x *n.cyclamineus*). This lovely little flower is a true intermediate, very dwarf and a good grower, despite its pollen parentage there is no reflex in the perianth, but it has inherited the rich golden colour and smoothness of "Ristin", and has many times been a winner in the intermediate classes.each £4.50

"Skilliwidden" 2Y-Y (E) S539 (Ristin x *n.cyclamineus*) AGM AMe. This is a Fun flower named after one of our mischievous, Cornish Pixies (Piskies). The plant and flowers are small, rich in colour and perfectly formed, an ideal intermediate bloom.£3.00 each or 3 for £7.50

'Abba' 4W-O (E) AGM

'Golden Rain' 4Y-YOO (VE)

Some say this is a double sport of the 'Soleil D'Or' with several blooms to a stem, the scent is delightful and the plant is vigorous, however it is slightly tender and as such may not do so well in colder districts, here in Cornwall we produce some very fine flowers early in the year, but the best results have been achieved by specialised treatment of the bulb during the flowering initiation, the results have been quite startling, these we offer have been prepared for you. £3.95 per 10 bulbs
