## REVISED CLASSIFICATION OF DAFFODILS 1977.

1. The classification of a daffodil cultivar shall be based on the description and measurements submitted by the person registering the variety, or shall be the classification submitted by such person.
2. Colours applicable to the description of daffodil cultivars are abbreviated as follows:  
W—white or whitish: G—green: Y—yellow: P—pink: O—orange; R—red.
3. For purposes of description, the daffodil flower shall be divided into perianth and corona.
4. The perianth shall be described by the letter or letters of the colour code most appropriate.
5. The corona shall be divided into three zones: an eye-zone, a mid-zone, and the edge or rim. Suitable coded colour descriptions shall describe these three zones, beginning with the eye-zone and extending to the rim.
6. The letter or letters of the colour code most accurately describing the perianth shall follow the division designation.
7. The letters of the colour code most accurately describing the zones of the corona shall then follow, from the eye-zone to the rim separated from the perianth letters by a hyphen. In Division 4, the letters of the colour code most accurately describing the admixture of petals and petaloids replacing the corona shall follow in proper order, using 3, 2, or 1 colour codes as appropriate.
8. If the corona is substantially of a single colour, a single letter of the colour code shall describe it.

Using these basic requirements, daffodils may be classified as follows:

### DIVISION 1: TRUMPET DAFFODILS OF GARDEN ORIGIN

Distinguishing characters: One flower to a stem; trumpet or corona as long or longer than the perianth segments.

### DIVISION 2: LONG-CUPPED DAFFODILS OF GARDEN ORIGIN

### DIVISION 4: DOUBLE DAFFODILS OF GARDEN ORIGIN

## CULTURAL NOTES

For best results, choose a well-drained, sunny plot of ground.

Deep digging to aerate the soil is very important, but too much organic manure is not recommended except in very dry areas, as this is liable to start fungus diseases. Bone meal helps bulb and flower production and sulphate of potash is a great help for producing intensity of colour. Bone meal not more than three ounces per square yard, potash a light sprinkling over the beds.

If it is desired to plant in beds, these should be made up some weeks before planting which, ideally, should be completed in September.

We plant the bulbs in about twice their own depth, i.e. a bulb that measures two inches from crown to base is planted in a hole four inches deep. We plant our bulbs eight per row in four foot beds, with a path about 18 inches between the beds. If the bulbs are a very small variety, nine may be planted. The rows are planted far enough apart to allow hoeing between them during the growing season to keep the weeds down. If the bulbs are not being grown commercially they can be left down for several seasons without being lifted and will flower extremely well. If desired they can be planted in clumps for garden decoration, but if Show specimens are aimed at the raised bed method is the best.

Many people like to grow bulbs in pots, and this method, certainly gives one great pleasure and a chance to study the flowers in comfort without the cold winds, rain, hail and even snow conditions which we have come to expect during the daffodil season.

It is not usually successful to try and force the bulbs, the best rule is to leave them sunk in the ground outside until the flower buds show above the ground. Then they may be brought into a cool greenhouse or a cool light window.

When the buds are starting to open they need a great deal of water and must never be allowed to dry out.

Five bulbs can be planted in a nine-inch pot or more if the bulbs are small. Potting does not improve the condition of the bulbs, but we have found that by replanting them in the lump as they come out of the pot immediately after flower they do not suffer much.

The Catalogue is set out in three sections. **First** - new introductions for 1979. **Second** - new introductions for 1978, **thirdly** - general list in alphabetical order, and finally an index of divisions for easy reference.

 £2.00 each                      4 Dollars each
- 7 y-y CLARE.** 3-4 (Alec Gray).

 30p each                      60c each

- 2 w-p CLARE PARK.** 3-4 (Carncairn). Rosario X Debutante.  
 This flower has been one of my favourites for several years, but it is definitely not for the show bench unless fashions change. It has a huge crinoline like cup of a deep pink which opens very wide, backed by a pure white perianth which does not overlap enough. A magnificent plant in pots and in clumps in the garden. Has been much admired. Good lasting qualities, and, tall strong stems. A good breeder.  
 £1.00 each                      2 Dollars each
- 2 w-w COLUMBUS.** 3-4 (Carncairn). Easter Moon X Guy Wilson seedling.  
 This is a sister of Churchfield. A flower of the most wonderful substance and texture, standing proudly on a tall stem. In some seasons it opens with a tiny yellow rim which quickly fades, leaving the whole flower a very pure white with a greenish-grey eye.  
 £5.00 each                      10 Dollars each
- 1 y-y COPHETUA.** 4 (Carncairn). Kingscourt X Goldcourt.  
 This flower very much resembles Kingscourt, but it is larger, and much later. The mouth of the trumpet has smaller and more even serrations than Kingscourt, and forms a perfect circle in almost every flower. Should be of value for late shows.  
 £2.00 each                      4 Dollars each
- 2 y-r CRAIGTARA.** 2-3 (Carncairn).  
 A very tall long-lasting flower with a deep yellow well formed perianth and orange cup which seems to be sunproof. Not brilliant colouring but an attractive flower and a strong, healthy bulb.  
 £1.00 each                      2 Dollars each
- 2 w-w CREME DE MENTHE.** 4 (Carncairn) Chinese White X Seedling 11/39/59.  
 This is a very tall flower, unfortunately too late for most shows. We have only tried it in a pot once, in 1975, when it was in our winning group of twelve in Omagh. It has an eye like an emerald, and an expanded, crinkled cup of pure white, and a pure white perianth of very smooth texture. The snags are:- not enough overlap in the perianth segments, and a slightly long neck, but it does hold its head quite well up in spite of this, and is definitely an outstanding flower.  
 £10.00 each                      20 Dollars each

**3 w- gww CUSHENDALL. 5** (Guy L. Wilson) A.M. at R.H.S. 1936, and at Haarlem 1949.

This is one of the best green-eyed flowers; of faultless form and quality, it has a smooth, overlapped perianth of sparkling poeticus-white, and a shallow saucer-shaped crown with a cream frill, and the eye is lovely moss green.

**30p each**  
**60c each**

**10 for £2.70**  
**10 for 5 Dollars 40c**

**5 w-y DAWN. 2-3** (Engleheart).

An old-world flower very suitable for rockeries. The perianth is white and pointed and it has a flat deep yellow cup with several heads on each stem.

**30p each**

**60c each**

**2 y-w DAYDREAM. 3** (Grant Mitsch). F.C.C. R.H.S. 1966.

This is one of the best American-raised Daffodils and a certain winner in shows. A very perfectly-formed flower with flat, over-lapping perianth of good substance and texture. The trumpet-shaped crown opens lemon coloured, but quickly passes to white with a white halo around the base. One of the longest-lasting flowers we have grown.

**75p each**

**1 Dollar 50c each**

**2 w-p DELAMONT. 3-4** (Carncairn).

Of immense value for breeding, as it does not burn in the sun. A very good laster.

**3 w-r IRISH RANGER.** 3-4 (Carncairn). Kilworth X Seedling R260. An outstanding 3 with a brilliant glowing red cup, not sun proof, but of good form and texture. Unfortunately, in some seasons the perianth does not whiten enough, but the cup is the most brilliant of anything we have raised. Named on request of the Royal Irish Rangers.

**2 w-p JOHN'S PINK.** 4 (Carncairn) Irish Rose X Radcliffe Seedling. A small flower of perfect form. I have never seen a nick or a misshapen perianth. The size and pale pink colouring do not make it a great show winner, and it is seen best in classes for groups of three, where uniformity is important. The perianth segments are very smooth and circular, and the corona has a beautiful roll and is of a soft, dusty pink. A flower of great charm.

**3 y-y LEMONADE.** 4 (J. L. Richardson). A.M. R.H.S. 1961 as a show flower.

A quite unique flower, reputed to have come from Green Island X Chinese White; the perianth is broad and flat, of excellent quality and substance, a pale, green lemon colour (hence its name); the medium-sized flat eye is of a slightly deeper greeny tone. The flower opens with a white perianth, and only acquires the lemony colour after some days. A very tall, robust plant.

**1 y-y LOUGHANMORE.** 4 (Carncairn). Kingscourt X Antwerp. This is a very useful flower for late shows. It is very like Kingscourt, but with a more serrated edge to the trumpet. The flower is a lovely bright clear yellow throughout and stands on a short neck at right angles to the strong stem.

**2 y-r MARCH MADNESS. 1** (Carncairn). Armada X Fury.  
A very early red and yellow. In 1976 it was in full flower in Mid March. The flowers stand on very tall stems high above the leaves. The perianth is a good yellow, and the corona is circular and expanded, of a solid red which will stand a good deal of sun so early in the season.  
A very brilliantly coloured flower, but the perianth does need flattening for the show bench.

£2.00 each                      4 Dollars each

**6 y-y MARCH SUNSHINE. 1** (De Graaff).  
A lovely golden cyclamineus, with well-reflexing perianth and a longish cup.

**2 w-p MARY'S PINK. 3-4** (Carncairn). Irish Rose X Jaypin.  
This is a good pink, having a uniform colour right to the base of the cup, which is long and fairly straight. The eye is a beautiful clear green. Not a large flower, but remarkable for its clear pink cup and glistening white slightly pointed perianth.

£1.00 each                      2 Dollars each

**1 w-y MARY SUMNER. 2-3** (Carncairn).  
Since introducing this flower 2 years ago as a garden plant and not as a show flower we have heard that it has had several successes in shows.  
It opens with a pale cream perianth and yellow trumpet, as the flower ages the trumpet turns a greenish cream with a beautiful roll to the mouth, and the perianth whitens. Very tall and strong growing. Chosen by members of the Mother's Union to be named after their founder.

£3.00 each                      6 Dollars each

**3 w-yyr MINIKIN. 4-5** (M. Evans).

**2 y-r MONEYMORE. 2** (W. J. Dunlop).  
An Exhibition flower of the very highest quality, having broad satin-smooth, deep, intense golden yellow perianth and nicely-proportioned dark, crimson-red crown of medium length. This is one of the most strikingly coloured flowers I have seen to date, the intense depth of colour in the perianth being quite magnificent. Nice plant coming into bloom fairly early in the season.

60p each                      1 Dollar 20c each

**2 y-r MONTALTO. 4** (Carncairn). Chungking X Fury.  
This is one of the most brilliantly-coloured red and yellows that we have raised, having a well-formed perianth of smooth texture and uniform deep yellow colour. The well-rounded cup is a deep solid red, right to the base. Of great value for late shows.

75p each                      1 Dollar 50c each

**2 w-p MOYOLA. 4-5** (Carncairn). Templemore X Rose Caprice.  
This is a very beautiful flower, coming in consistently good form with wonderful smooth texture. The cup is of an unusual peach colour with a greenish-grey eye. Unfortunately the rather pale colouring makes it little unobtrusive on the show bench, but it has won in the 2b class.

£1.00 each                      2 Dollars each

**2 w-p PASSIONALE. 3** (G. L. Wilson).  
This is considered the best pink raised by Guy Wilson. A consistent winner in shows. Earlier than most pinks, of great quality and substance, with a beautifully-formed perianth and pure pink crown, gently frilled at the mouth.

A lovely flower of rather similar colouring to Brunswick, but coming later and being an altogether larger and more striking flower. Should make a most useful market flower and an ideal garden plant.

**2 y-r** **RED BAY.** 5-6 (W. J. Dunlop).

This is by far the latest flowering yellow-red which has appeared here to date, coming at the same time as the last of the red and whites. The small frilled cup, and olive green eye complete this snow white flower, which holds up its head much better than most.
