INTRODUCTION FOR 2012

Greetings to you all,

When Spring finally came we enjoyed a season of beautiful flowers over a long period, and June gave a good harvest of bulbs.

At the shows we were awarded another Royal Horticultural Society Gold Medal for the display at the Cardiff Show, also the prestigious Best Exhibit in the Floral Marquees, our displays gained Gold awards at Falmouth, Trelassick and at the County Show held at Boconnoc.

The American Daffodil Society Convention held in Jackson Mississippi, where Ron appeared as the Guest Speaker was a most enjoyable occasion, we were pleased to see our Friends from all over the States and to make many new ones, it was pleasing to see many of our Daffodils on show there and to see some of the new and exciting varieties now being bred in the USA, we hope in time to be able to introduce some of these to you.

Once again we are very grateful to John Edsall who made a display in the New Forrest also to the Royal Caledonian Horticultural Society for the Display in Edinburgh and to Don Elder for his stalwart work in Scotland, all these shows create considerable enjoyment for the show visitors and we are pleased to be able to supply the flowers for the occasion.

The Walk and Talk visits to our Fields were well received and the weather was kind to us, we hope to continue these for various charities.

This year we shall again be featuring Displays at;
Devoran on the 10th March

Trelassick on the 17th and 18th March

Falmouth on the 24th and 25th March

Boconnoc on the 31st March and 1st April

The RHS Spring show London 10th and 11th April

The RHS Show Cardiff on the 20th, 21st and 22nd April

The Isle of Wight Spring Show on the 28th and 29th April

We thank you all for your continued support and hope that you will enjoy our 2012 Catalogue

Best wishes for an enjoyable and successful year.

Ron, Maureen, Adrian and Sharon Scamp

*Special Discounts for larger quantities -
the prices will be adjusted as follows:*

50 of any single variety 10% Discount

100 of any single variety 20% Discount

Division 5 Triandrus Hybrids for exhibition and garden

These delightful varieties of Daffodil are the result of selective breeding where the species *n.triandrus* has been introduced into its parentage; the resulting plants often have 2 or 3 flowers on the stem, and are amongst the ladies' favourites in floral arrangements.

These from Division 5. and those of Division 6. are generally much dwarfer in stature and are ideally suited to the garden or rockery. The plants are hardy and quite resistant to the windier spot where the conventional Daffodil often gets broken off.

Division 5. White perianth with yellow.

Division 8 Tazetta Hybrids for exhibition and garden

Characteristics of Section Tazetta clearly evident: usually three to twenty flowers to a stout stem; perianth segments spreading not reflexed; flowers usually fragrant.

These plants are the result of many years of breeding and can really be divided into two types. They are with the exception of "Minnow" all quite big plants, some do have very tall stems and foliage. The first kind are more of the true N.Tazetta species in form. As the species is generally found in warmer regions of Southern Europe and the Mediterranean. They are somewhat tender and do require a hot dry summer period to perform at their best, however they are well worth trying, when each stem could have up to 15 or 20 highly scented florets. The second group or kind is the "Poetaz", these are slightly different in style and have fewer florets, and the scent is an admixture of the N.Tazetta and that of the N.Poeticus from which these hybrids have been derived. It is the poeticus part that makes these much hardier and withstand our winters as well as any other of daffodil.

Division 9 Poeticus Hybrids for exhibition and garden

Murlough:[LM]40/60cm.
10 Bulbs for £7.50

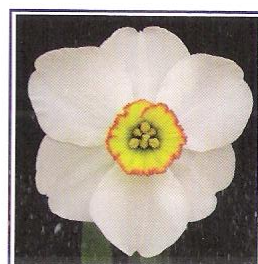

These flowers have been commonly called the "Pheasants Eye" and indeed they have been bred from the old species, however these varieties are far superior in form and colour, and bloom when most other Daffodils have been long finished. They are best picked young as the sun does affect the lovely colours if left out. They are without exception all highly scented. The plants like to be planted in good soil that never completely dries out, this helps to keep them cool. Set the bulbs slightly deeper than normal and leave undisturbed. New bulbs may take a season to settle, but are well worth their place in the garden.

Division 13 The Species and Wild Forms Daffodils for exhibition and garden

I have been acquiring these for many years and have obtained much pleasure from them, particularly those grown in the alpine house. The species always seems to resent being moved about, but once settled are a joy to see in naturalized surroundings. Some are not available in very large quantities.

I believe them all to be true to name, but like many there seems to be some considerable variance of form; they are however named as sent to me or have been grown from seed.

This space is left for you to make notes of daffodils that you see at the shows.

If it is not in our catalogue or on our website Please ask

We may have it in our collection

Horticultural Classification

Whether of wild or cultivated origin, once a selection has been distinguished by a cultivar name it should be assigned to Divisions 1-12. Daffodils distinguished solely by botanical name should be assigned to Division 13.

Notes

- The characteristics for Divisions 5 to 10 are given for guidance only; they are not all necessarily expected to be present in every cultivar assigned to those divisions.
- Divisions 12 and 13 are not illustrated owing to the wide variation in shape and size between the flowers involved.

DIVISION 1

TRUMPET DAFFODIL CULTIVARS

One flower to a stem; corona (trumpet) as long as, or longer than the perianth segments (petals)

DIVISION 2

LARGE-CUPPED DAFFODIL CULTIVARS

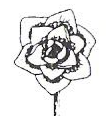

One flower to a stem; corona more than one-third, but less than equal to the length of the perianth.

DIVISION 3

SMALL-CUPPED DAFFODIL CULTIVARS

One flower to a stem; corona not more than one-third the length of the perianth segments.

DIVISION 4

DOUBLE DAFFODIL CULTIVARS

One or more flowers to a stem, with doubling of the perianth segments or the corona or both.

DIVISION 5

TRIANDRUS DAFFODIL CULTIVARS

Characteristics of *N.Triandrus* clearly evident: usually two or more pendant flowers to a stem; perianth segments reflexed.

DIVISION 6

CYCLAMINEUS DAFFODIL CULTIVARS

Characteristics of *N.cyclamineus* clearly evident: one flower to a stem; perianth segments significantly reflexed; flower at an acute angle to the stem, with very short pedicel (neck).

DIVISION 7

JONQUILLA AND APODANTHUS DAFFODIL CULTIVARS

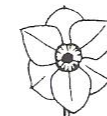

Characteristics of Sections Jonquilla or Apodanthi clearly evident: one to five (rarely eight) flowers to a stem; perianth segments spreading or reflexed; corona cup-shaped, funnel-shaped or flared, usually wider than long; flowers usually fragrant.

DIVISION 8

TAZETTA DAFFODIL CULTIVARS

Characteristics of Section Tazetta clearly evident: usually three to twenty flowers to a stout stem; perianth segments spreading not reflexed; flowers usually fragrant.

DIVISION 9

POETICUS DAFFODIL CULTIVARS

Characteristics of the *N.poeticus* group: usually one flower to a stem; perianth segments pure white; corona very short or disc-shaped, usually with a green and/or yellow centre and a red rim, but sometimes of a single colour; flowers usually fragrant.

DIVISION 10

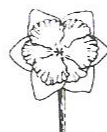

BULBODIUM DAFFODIL CULTIVARS

Characteristics of Section Bulbocodium clearly evident: usually one flower to a stem; perianth segments insignificant compared with the dominant corona; anthers dorsified (ie attached more or less centrally to the filament and style usually curved).

DIVISION 11

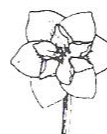

SPLIT CORONA DAFFODIL CULTIVARS.

Corona split - usually for more than half its length

a). Collar Daffodils

Split-corona daffodils with the corona segments opposite the perianth segments; the corona segments usually in two whorls of three.

b). Papillon Daffodils

Split-corona daffodils with the corona segments alternate to the perianth segments usually in a single whorl of six.

DIVISION 12 - OTHER DAFFODIL CULTIVARS

Daffodil cultivars which do not fit the definition of any other division

DIVISION 13 - DAFFODILS DISTINGUISHED SOLELY BY BOTANICAL NAME

New Horticultural Classification (taken from the International Daffodil Register by kind permission of the Royal Horticultural Society)
