INTRODUCTION FOR 2014

Greetings to you all

Our sympathy is with those from various parts of the Country where the floods and storms have been the worst and wettest on record. Here in Cornwall the Rain started in November and I do not think it stopped for more than a few days all winter -they say the wettest for 200 years. The flower season has been very slow to start with the ambient temperatures high for the season, when spring finally came we enjoyed Beautiful Flowers over a long period.

The Harvest of Bulbs last year was good, and we managed to get everything done in good time. The bulbs were a good size and quality.

At the shows Adrian was awarded another Royal Horticultural Society Gold Medals for the Displays at the London Plant Fair; and at the Cardiff Show where we were delighted to receive the prestigious Best Floral Exhibit. We were awarded the Gold at the County show at Boconnoc Show - our displays also gained Gold at Falmouth, Trelissick.

We are deeply honoured when Ron was awarded the 'Carlo Naef' trophy from The Springfield's Horticultural Society in recognition of his work to the United Kingdom's bulb industry.

Once again we are very grateful to the Royal Caledonian Horticultural Society for the Display in Edinburgh and to Don Elder for his stalwart work in Scotland. All these shows create considerable enjoyment for the show visitors, and we are pleased to be able to supply the flowers for the occasion.

The Walk and Talk visits to our Fields were well received and the weather was kind to us. We hope to continue these for various charities.

This year we shall again be featuring Displays at:

Devoran on the 15th March

The RHS Garden at Rosemoor for the first Daffodil competition on the 15th and 16th March

Trelissick on the 22nd and 23rd March

Falmouth on the 29th and 30th March

The RHS Plant Fair and daffodil Show London 1st and 2nd April

Boconnoc on the 5th April and 6th April

The RHS Show Cardiff on the 11th, 12th and 13th April

We thank you all for your continued support and hope that you will enjoy our 24th Catalogue for 2014

Best wishes for an enjoyable and successful season

Ron, Maureen, Adrian and Sharon

R.A.Scamp Bulb Tokens

Why not send a special present with one of our New Gift Tokens , all are sent with a decorative card, and our latest Catalogue.

New or First Time Introductions for 2014

"Sharon's Champagne" 3Y-Y [L] 40 to 60cms
The flower opens with a creamy white and yellow cup but as the flower matures develops a luminous yellow tinge the perianth.
£6.00 each or 5 Bulbs for £25.00

"Jenny Copeland" 4W-W [LM] 40 to 60cms
Chosen by the National Trust at Trelissick to mark the retirement of the Copeland family and for their generosity towards the Gardens. This is a strong growing variety with long lasting flowers, that open with some yellow and quickly matures to a snowy White. **3 Bulbs for £15.00**

"Doctor Who" 4O-O [L] 40 to 50 cms
Named at the request of the RHS Cardiff Show this flower develops the unusual shade of yellowish orange at maturity. **3 Bulbs for £10**

"Brook Agar" 2W-P [LM] 30 to 50 cms
A lovely dwarf and intermediate size flower, one of the best of its type for show. **£5.00 each**

"Gallipoli Dawn" 2Y-Y

During the trial period, "Gallipoli Dawn" has proved to be a vigorous and hardy plant and produces a good medium-sized bulb with strong foliage. The flowers are early to mid-season, 45 to 60 cms in height and appear to last for several weeks in the garden. The colour is a clear Golden Yellow. Not only has this proved to be a fine Show Quality Flower, but is a sound variety for the discerning gardener and is well suited for the cut flower industry.

Profits from the sale of these bulbs are being donated to the Gallipoli Association assist them in the work they do.
3 Bulbs for £12.00

for show but has a soft stem.
£7.50 each

Division 5 Triandrus Hybrids for exhibition and garden

These delightful varieties of Daffodil are the result of selective breeding where the species *n.triandrus* has been introduced into its parentage; the resulting plants often have 2 or 3 flowers on the stem, and are amongst the ladies' favourites in floral arrangements.

These from Division 5. and those of Division 6. are generally much dwarfer in stature and are ideally suited to the garden or rockery. The plants are hardy and quite resistant to the windier spot where the conventional Daffodil often gets broken off.

Division 5. All Yellow.

5Y-Y(LM) "Liberty Bells"3 for £4.50

Division 5. White With Yellow.

Division 8 Tazetta Hybrids for exhibition and garden

Characteristics of Section Tazetta clearly evident: usually three to twenty flowers to a stout stem; perianth segments spreading not reflexed; flowers usually fragrant.

These plants are the result of many years of breeding and can really be divided into two types. They are with the exception of "Minnow" all quite big plants, some do have very tall stems and foliage. The first kind are more of the true N.Tazetta species in form. As the species is generally found in warmer regions of Southern Europe and the Mediterranean. They are somewhat tender and do require a hot dry summer period to perform at their best, however they are well worth trying, when each stem could have up to 15 or 20 highly scented florets. The second group or kind is the "Poetaz", these are slightly different in style and have fewer florets, and the scent is an admixture of the N.Tazetta and that of the N.Poeticus from which these hybrids have been derived. It is the poeticus part that makes these much hardier and withstand our winters as well as any other of daffodil.

Murlough:[LM]40/60cm.
5 Bulbs for £4.50

These flowers have been commonly called the "Pheasants Eye" and indeed they have been bred from the old species, however these varieties are far superior in form and colour, and bloom when most other Daffodils have been long finished. They are best picked young as the sun does affect the lovely colours if left out. They are without exception all highly scented. The plants like to be planted in good soil that never completely dries out, this helps to keep them cool. Set the bulbs slightly deeper than normal and leave undisturbed. New bulbs may take a season to settle, but are well worth their place in the garden.

Division 13 The Species and Wild Forms Daffodils for exhibition and garden

I have been acquiring these for many years and have obtained much pleasure from them, particularly those grown in the alpine house. The species always seems to resent being moved about, but once settled are a joy to see in naturalized surroundings. Some are not available in very large quantities.

I believe them all to be true to name, but like many there seems to be some considerable variance of form; they are however named as sent to me or have been grown from seed.

Notes

Horticultural Classification

Whether of wild or cultivated origin, once a selection has been distinguished by a cultivar name it should be assigned to Divisions 1 - 12. Daffodils distinguished solely by botanical name should be assigned to Division 13.

Notes

1. The characteristics for Divisions 5 to 10 are given for guidance only; they are not all necessarily expected to be present in every cultivar assigned to those divisions.
2. Divisions 12 and 13 are not illustrated owing to the wide variation in shape and size between the flowers involved.

DIVISION 1
TRUMPET DAFFODIL CULTIVARS
 One flower to a stem; corona (trumpet) as long as, or longer than the perianth segments (petals)

DIVISION 2
LARGE-CUPPED DAFFODIL CULTIVARS
 One flower to a stem; corona more than one-third, but less than equal to the length of the perianth.

DIVISION 3
SMALL-CUPPED DAFFODIL CULTIVARS
 One flower to a stem; corona not more than one-third the length of the perianth segments.

DIVISION 4
DOUBLE DAFFODIL CULTIVARS
 One or more flowers to a stem, with doubling of the perianth segments or the corona or both.

DIVISION 5
TRIANDRUS DAFFODIL CULTIVARS
 Characteristics of *N.Triandrus* clearly evident: usually two or more pendant flowers to a stem; perianth segments reflexed.

DIVISION 6
CYCLAMINEUS DAFFODIL CULTIVARS
 Characteristics of *N.cyclamineus* clearly evident: one flower to a stem; perianth segments significantly reflexed; flower at an acute angle to the stem, with very short pedicel (neck).

DIVISION 7
JONQUILLA AND APODANTHUS DAFFODIL CULTIVARS
 Characteristics of Sections Jonquilla or Apodanthi clearly evident: one to five (rarely eight) flowers to a stem; perianth segments spreading or reflexed; corona cup-shaped, funnel-shaped or flared, usually wider than long; flowers usually fragrant.

DIVISION 8
TAZETTA DAFFODIL CULTIVARS
 Characteristics of Section Tazetta clearly evident: usually three to twenty flowers to a stout stem; perianth segments spreading not reflexed; flowers usually fragrant.

DIVISION 9
POETICUS DAFFODIL CULTIVARS
 Characteristics of the *N.poeticus* group: usually one flower to a stem; perianth segments pure white; corona very short or disc-shaped, usually with a green and/or yellow centre and a red rim, but sometimes of a single colour; flowers usually fragrant.

DIVISION 10
BULBOCODIUM DAFFODIL CULTIVARS
 Characteristics of Section Bulbocodium clearly evident: usually one flower to a stem; perianth segments insignificant compared with the dominant corona; anthers dorsified (ie attached more or less centrally to the filament and style usually curved).

DIVISION 11

SPLIT CORONA DAFFODIL CULTIVARS.
 Corona split - usually for more than half its length

a). Collar Daffodils
 Split-corona daffodils with the corona segments opposite the perianth segments; the corona segments usually in two whorls of three.

b). Papillon Daffodils
 Split-corona daffodils with the corona segments alternate to the perianth segments usually in a single whorl of six.

DIVISION 12 - OTHER DAFFODIL CULTIVARS
 Daffodil cultivars which do not fit the definition of any other division

DIVISION 13 - DAFFODILS DISTINGUISHED SOLELY BY BOTANICAL NAME

A spectacular sight - Our Daffodil Field mid April 2013
