## **The world's best Narcissi or Daffodils**

Narcissi, as is the botanical name, or daffodils as they are commonly called in English speaking countries, are easily among the most popular of the springflowering bulbs.

They are among the first harbingers of Spring and will cheerfully sprinkle their colors all over your garden. As heralds of a better time, more light and more sunshine, they are among the most charming of the bulbous flowers.

Their gay colors chiefly yellow and white, with all shades of red now represented in the newer varieties, both in large or smaller cups and eyes, will soon make you forget Winter's storms and snows.

The healthiest and cleanest stock, produce of a country where Daffodils have been successfully grown for ever so long, is at your disposal, at prices which are within every real flowerlover's reach.

The collections we offer in the various divisions are not made up at random, but have proven their merit and suitability for American Gardens and are, in every case, the best the price can buy.

## **DAFFODILS FOR NATURALIZATION**

One of the most beautiful sights in a garden in Spring, are drifts of naturalized daffodils. In thin woodlands, outlying grounds, shrubberies, orchards, grass etc. wherever you dispose of a suitable spot, they make a fascinating picture.

To encourage liberal plantings we have made up a special mixture of varieties all suitable for naturalization, both in the trumpets and shortcupped varieties, including all divisions.

We offer daffodil bulbs, all strong flowering size, healthy and plump bulbs, which will give you a galaxy of beauty and a profusion of flowers extending over a period of nearly two months:

1000 bulbs mixed varieties \$ 115.00

500 bulbs mixed varieties \$ 60.00
