Esker Farm Daffodils

Greetings from Northern Ireland! Welcome to our 2017 catalogue. After making tentative steps into the commercial side of selling daffodils in 2016 we have now gone 'big time' and have incorporated Ringhaddy Daffodils - this is both exciting and daunting, as we have very big shoes to fill: following the historical Irish breeding line through Nial and Hilary Watson, Brian and Betty Duncan, Tom Bloomer, to as far back as Guy Wilson himself. We are delighted to be in a position to be selling bulbs from some very prestigious breeders, in addition to the many B.S. Duncan and N. Watson varieties. We look forward to meeting as many of you as we can throughout the show season both in the UK and further afield — putting faces to the many names we've come across so please don't be shy and do make yourself known if you see us about (probably looking a bit awestruck!).

All varieties offered for sale are grown by us and we extend a very warm welcome to anyone who wishes to visit our fields during the flowering season. We have been inspected by the Department of Agriculture, Environment and Rural Affairs (DAERA) plant health inspectors who regularly test samples of our soil and bulbs in their laboratories to ensure we are free of pests and diseases. We have been given the all-clear and therefore the go-ahead to export bulbs anywhere around the world.

All our bulbs can come supplied with a Phyto-sanitary certificate issued by DAERA, if required. Our European Community Quality Passport Number is UK/NI 8401.

Dispatch of bulbs is September/October unless you specifically request otherwise.

If you require any further information or assistance or indeed have any suggestions or requests, feel free to contact us using our facebook page - via messenger; email or telephone.

Best wishes to you all for a happy and successful growing season in 2017.

2017 New Introductions

The name of the raiser is shown in brackets, followed by the parentage and the original seedling number.

All the varieties have been registered with The Royal Horticultural Society and the Classification and colour code is shown in the left margin. Under the colour code the approximate diameter is shown where available.
