ABSTRACT. – Adam White was appointed to the Zoology Branch of the Natural History Division in the British Museum at Bloomsbury in December 1835. During his 28 years service as an assistant, his scientific output was prodigious. This study concentrates on his contribution to Crustacea and includes a brief life history, a list of crustacean species attributed to White with appropriate remarks and a full list of his crustacean publications.

KEYWORDS. – Adam White. Crustacea. Bibliography, list of valid indications.

INTRODUCTION

Adam White was born in Edinburgh on 29th April 1817 and was educated at the High School of the city (McLachlan, 1879). At the age of 18, White, already an ardent naturalist, went to London with a letter of introduction to John Edward Gray at the British Museum. White was appointed as an Assistant in the Zoological Branch of Natural History Division of the British Museum in December 1835 (Dunning, 1879; Gilbert, 1977).

White was remembered fondly by several authors, Cowtan (1872), for example commenting on his "first appearance at the Museum in a short jacket, which, together with his ruddy and youthful appearance, gained for him the epithet of the boy White". McLachlan (1879) asserts that "no one was more willing to go out of his way to oblige" and to proffer "wise counsel and ready assistance". Dunning (1879) further recalls White's "broad Scotch accent with which his words of sound advice were delivered". Photographs of White in later life have been published in Ingle (1991) and Waterston (1997).

Ingle (1991) notes that White initially worked on the bird collections, but later was instructed to assist Mr George Samouelle in the Insect Room two days a week and curate the arthropod collection. Samouelle trod an unsteady path as Assistant. He took to drink, neglected his duties, was constantly absent from work and was insulting to his supervisors. He even spited co-worker White by deliberately

removing the registration numbers affixed to the specimens, thereby creating total confusion in the collections. Samouelle was eventually dismissed in 1841 (Stearn, 1981; Ingle, 1991).

Subsequently, White was placed in charge of the arthropod collection and, as a consequence, he published extensively on Insecta and Crustacea. As his experience of the advantages enjoyed by a national museum increased, White wrote tirelessly to Scottish newspapers, under the pseudonym *Arachnophilus*, campaigning for the establishment of a National Museum in Scotland. The name was meant to signify patient perseverance, and he lived up to it, the campaign continuing for a number of years. He felt strongly about education for all in the elitist society of the day, a view that became central in the debate leading to the establishment of Scotland's national museum (Waterston, 1997).

At the British Museum, White's relationship with J.E. Gray (appointed Keeper of Zoology in 1840) was not entirely satisfactory. In a letter (White, 1862; letter to Smith, Natural History Museum [NHM] Archives) to Frederick Smith (then Assistant Keeper) White speaks of "...poor Dr Gray's enmity to me - very marked since 1850...". Later, in a letter to his good friend Carruthers (White, 1870; letter to Carruthers, NHM Archives), White exhibited genuine sorrow for the breakdown of his relationship with Gray. "I wish I could from the heart forgive him for the many injuries he has occasioned to me, by his calumniating tongue" (White's underlining).

White remained only an Assistant in the Zoology Department after 28 years in service despite his prodigious output, (White 1862; letter to Smith, NHM Archives). The death of his first wife precipitated a mental breakdown and he was forced to retire prematurely (Carruthers, 1873; letter to Hooker, NHM Archives).

Embittered by his treatment at the hands of Gray, and by his "miserable pension of £115" (White, 1862; letter to Smith, NHM Archives), White fell into emotional and pecuniary decline and spent some time in the Sunnyside Lunatic Asylum, Montrose, Scotland (Carruthers, 1873, letter to Hooker, NHM Archives). However, his urge to write continued even while in confinement, and he edited and largely contributed to a journal, the contents of which were supplied by patients (McLachlan, 1879). His sense of ignominy was further compounded when the Trustees of the British Museum apparently refused him access. White was accused of the willful destruction of a book and dishonesty. He begs for support, writing "if any friends I have at the Museum were to write me that they deem me incapable of such conduct it would cheer me" (White, 1870; letter to Carruthers, NHM Archives).

White remarried and had three more children (he had one daughter from his first marriage), but his financial worries continued. He begged for help from his friend Carruthers, and applied for a small gratuity from the Royal Society (White, 1870; letter to Carruthers, NHM Archives; Carruthers 1873; letter to Hooker, NHM Archives).

Sadly, despite White's considerable contribution to the fields of entomology and carcinology he grew despondent in later life, describing himself as "one who has been somewhat unsuccessful in the race of life" (White, 1874; letter to Carruthers, NHM Archives). White died in January 1879 at Glasgow, aged 63 (Dunning, 1879).

WHITE'S PUBLICATIONS

White published a truly prodigious number of works on natural history, including such diverse works as *A popular history of Mammalia* (1850), *A popular history of Birds* (1855), and *Heads and Tails; or Anecdotes ... of Quadrupeds and other beasts* (1870). With R. M Stark he wrote *The instructive picture book* (1857) and for the Society for Promoting Christian Knowledge he arranged the plates for *Tabular view of Myriapoda, Arachnida, & Crustacea*, and *Tabular view of the orders and leading families of insects*, for the *Diagrams of Natural History* series. The *Tabular view of Crustacea* arranged by White (1861c: pls 2, 3) for the Society for Promoting Christian Knowledge appears to be an obscure publication. The two pages of plates contain beautifully engraved illustrations of various Crustacea taxa by J. W. Lowry and the list of species represented has been tabulated (Tables 1, 2). White made two important contributions to British carcinology. In 1850, White catalogued the Crustacea for a series which attempted to list specimens of British animals and (White, 1857), wrote *A*

popular History of British Crustacea. He (White, 1855b) also edited with notes a volume on "*A collection of documents on Spitzbergen & Greenland, comprising a translation from F. Martens' voyage to Spitzbergen: A translation from Isaac de la Peyère's histoire du Groenland*", for the Hakluyt Society. In addition to his fascination with animal life, White was also a keen botanist and apparently contributed many specimens to the British Museum Herbarium (Anon, 1879).

This present study comments upon White's publications relating to his descriptions of new Crustacea species in the *Proceedings of the Zoological Society of London* and their duplication in the *Annals and Magazine of Natural History, including Zoology, Botany, and Geology* - which journal was published first and took priority? Further difficulties were encountered with the precise dates of White's papers published in the *Journal of Proceedings of the Entomological Society of London*. A matter also confused by duplication in the *Annals and Magazine of Natural History, including Zoology, Botany, and Geology*. Strangely neither the NHM Library nor Crustacea Section possesses a compendium of White's reprints that might help resolve these issues, but the Crustacean Section Library does have White's (1847a) personal, annotated copy of his *Catalogue of Crustacea in the British Museum* and this has been the source of much information.

White was an industrious worker, but access to his publications is restricted because they are approximately 150 years old, rare and therefore difficult to obtain. This is a problem as White described a large number of new arthropod species. A measure of White's endeavours can be gained from the catalogue of scientific papers compiled by the Royal Society of London (1872: 347-349, 763), but although 59 journal references relating to Arthropoda are listed, it is incomplete and sometimes misleading. For example, reference 31 states "Short descriptions of some new species of Crustacea in the collection of the British Museum. Proc. Zool. Soc.Lond., XV, 1847, pp. 84-86, 118-127". This publication is in fact two separate papers, with almost identical titles (White, 1847d, 1847g). Further, citation 32 is dated 1847, but Waterhouse (1893: 438) and Duncan (1937: 80) suggested it was published on the 29th March 1848. Moreover, none of White's catalogues, books or contributions to the identification of expedition collected specimens, is cited. The latter are recorded in the Library Catalogue of the British Museum (Natural History) (1915: 2306-2307) and a total of 26 arthropod (Insecta and Crustacea) publications are indexed. Yet again the list is not complete and is inaccurate, especially for his crustacean works. For example the Crustacea of the H.M.S. *Samarang* voyage, published jointly with Arthur Adams, is dated 1848. However, according to Sherborn (1922: cxi), the Crustacea chapter was published in two parts dated 1848 and 1849. The Library Catalogue (1915: 2307) cites White's contribution to the "Narrative of the voyage of H.M.S. *Rattlesnake*" as 1852, the date on the title page, but during this present study the copy in the British Library was examined and it was date stamped 27 DE 1851. The above examples are just a few of the problems encountered while

Table 1. List of Crustacea engraved on plate 2. After J. W. Lowry, White, 1861c. * indicates species epithet spelt with an upper case letter by White.

Crustacea	<i>Ommatocarcinus macgillivraii</i> *	<i>Scyllarus aequinoctialis</i>
Sub Class Malacostraca	<i>Grapsus pictus</i>	
Legion Podophthalma	<i>Cryptosoma orientis</i>	Section Macroura
Order Decapoda	<i>Leucosia longifrons</i>	
Section Brachyura	<i>Platymera gaudichaudii</i> *	<i>Palinurus homarus</i> (Thorny Lobster)
	<i>Utica gracilipes</i>	<i>Ibacus incisus</i>
<i>Oncinopus neptunus</i> *	<i>Bellia picta</i>	<i>Calocaris macandreae</i> *
<i>Arctopsis lanata</i> (Gibb's Crab)	<i>Arcania novemspinosa</i>	<i>Callinassa turneri</i> *
<i>Doclea calcitrata</i> *	<i>Nursia plicata</i>	<i>Astacus gammarus</i> (Common Lobster)
<i>Pericera cornuta</i> (Horned Crab)	<i>Corytes cassivelaunus</i>	<i>Rhynchocinetus typus</i>
<i>Lambrus hoplonotus</i>	<i>Dorippe quadridens</i>	<i>Alpheus bidens</i>
<i>Cryptopodia dorsalis</i>	<i>Cymopolia jukesii</i> *	<i>Stenopus hispidus</i>
<i>Zebrida adamsii</i>		<i>Crangon vulgare</i> (Shrimp)
<i>Galene dorsalis</i>	Section Anomoura	<i>Penaeus caramote</i>
<i>Polybius henslowii</i>		
<i>Atergatis integerrimus</i>	<i>Dromia vulgaris</i>	Order Stomapoda
<i>Podophthalmus vigil</i>	<i>Petalocerus bellianus</i> *	
<i>Neptunus sanguinolentus</i>	<i>Porcellana platycheles</i>	<i>Phyllosoma clavicorne</i> (Glassy shrimp)
<i>Thelphusa flaviatilis</i>	<i>Remipes testudinarius</i>	<i>Mysis longicornis</i> (Opossum Shrimp)
<i>Pinnotheres pisum</i> (Pea crab)	<i>Cenobita diogenes</i> (Diogenes Hermit-Crab)	<i>Squillaerichthys typus</i>
<i>Gecarcinus ruricola</i> (Land Crab)	<i>Pagurus streblonyx</i> (Soldier Crab)	<i>Squilla mantis</i>
<i>Mictyris longicarpus</i>	<i>Grinnothea gregaria</i>	
<i>Gela sinuus</i> (Calling Crab)	<i>Aeglea laevis</i>	

Table 2. List of Crustacea engraved on plate 3. After J. W. Lowry, White, 1861c. * indicates species epithet spelt with an upper case letter by White.

Crustacea	<i>Ourozeukes owenii</i> *	Order Lerneadae
Sub Class Malacostraca	<i>Serolis orbigny</i> *	
Legion Edriophthalma	<i>Ione thoracicus</i>	<i>Lernentomia asellina</i>
Order Amphipoda		<i>Anchorella rugosa</i>
	Division Entomostraca	<i>Lerneonema spratta</i>
<i>Talitrus saltator</i> * Sand Hopper	Legion Branchiopoda	<i>Lerneia branchialis</i>
<i>Amphithoe edwardsi</i> *	Ord. Phyllopoda	
<i>Erichthonius difformis</i>		Ord. Xyphosura
<i>Cerapus tubularis</i>	<i>Apus cancriformis</i>	
<i>Corophium longicorne</i>	<i>Nebalia bipes</i>	<i>Limulus moluccanus</i> (King crab)
<i>Chelura terebrans</i>	<i>Chirocephalus diaphanus</i> (Fairy Shrimp)	
<i>Vibilia peronii</i> *		Div: Cirripedia
<i>Hyperia latreillei</i> *	Ord. Cladocera	Fam: Balanidae
<i>Phoronima sedentaria</i> *		
<i>Lestrigonus jahraei</i> *	<i>Daphnia pulex</i>	<i>Balanus perforatus</i>
<i>Rhabdosoma acuminatum</i>	<i>Polyphemus pediculus</i>	<i>Balanus tintinnabulum</i>
<i>Oxycephalus piscator</i>		<i>Chelonobia testudinaria</i>
	Legion Lophyropoda	<i>Tetraclita purpurascens</i>
Order Laemodipoda	Ord. Ostracoda	<i>Tubicinella trachealis</i>
		<i>Coronula balaenaris</i>
<i>Cyamus ovalis</i>	<i>Cypris tristriata</i>	
<i>Caprella acuminifera</i>		Fam: Verrucidae
	Ord. Copepoda	<i>Verruca stromia</i>
Order Isopoda		
	<i>Cyclops quadricornis</i>	Fam. Lepadidae
<i>Arcturus baffini</i> *	<i>Cetochilus septentrionalis</i>	
<i>Praniza caeruleata</i>		<i>Alcippe lampas</i>
<i>Anceus rapax</i>	Legion Poecilopoda	<i>Lepas anatifera</i>
<i>Idotea lalandii</i> *	Ord. Siphostoma	<i>Alepes cornuta</i>
<i>Limnoria terebrans</i>		<i>Ibla cumingii</i> *
<i>Porcellio granulatus</i>	<i>Argulus foliaceus</i>	<i>Scalpellum vulgare</i>
<i>Sphaeroma serratum</i>	<i>Lepeoptheirus stromii</i> *	<i>Scalpellum rostratum</i>
<i>Cymodocea armata</i>	<i>Pandarus bicolor</i>	<i>Pollicipes mitella</i>
<i>Amphoroidea typa</i>	<i>Anthosoma smithii</i> *	<i>Lithotrya dorsalis</i>
<i>Glyptonotus antarcticus</i>	<i>Nicothoe astaci</i> *	

researching the crustacean publications of Adam White.

White, through no fault of his own, has left a legacy of nomenclatural confusion that has been difficult to resolve and relates to the date of publication of three journals. White communicated papers that contained descriptions of new species at the Entomological and Zoological Societies of London, which were published in *Journal of Proceedings of the Entomological Society* and the *Proceedings of the Zoological Society*. A contemporary serial of the period was the *Annals and Magazine of Natural History, including Zoology, Botany and Geology* and it contained regular reports entitled "Proceedings of Learned Societies". As a consequence, this Journal duplicated the majority of papers printed by the Entomological and Zoological Societies and the following explanatory comments may be helpful in recommending dates of priority.

THE ENTOMOLOGICAL SOCIETY

White published two crustacean papers in the *Journal of Proceedings of the Entomological Society of London*. This serial was issued in sheets A - K (the letter J was not used) sometime between 1841 and 1846, or later. This series was later reprinted by the Entomological Society in 1864 (see White, 1864a, b) because of its rarity, but it had different pagination from the original. The original 1841-46 volume presents a number of problems. Establishing the publication dates of these sheets proved difficult because a fire at the Royal Entomological Society destroyed many records (Neave, 1933: 89). However, Wheeler (1911) listed the publication dates of all *Proceedings* between January 1840 and December 1846. Wheeler's work confirms the publication date of the two White papers in *J. Proc. ent. Soc. Lond.* His paper presented at the meeting of the 2nd of August, 1841 was included in the sheet IIIC (erroneously printed on the first page of the sheet as IIC), which was first available on the 1st of February 1842. White's second paper, given on the 7th April 1845, was published on the 1st July 1846. However, these two White papers, were reprinted contemporaneously in *Ann. Mag. nat. Hist.* (see White, 1842b, 1846b). According to the Accessions Register of the Linnean Society Library the publication dates of these can also be established as the first of February 1842 and the first of July 1846 respectively. The authors of this present study recommend that the White papers published in the *Journal of the Proceedings of the Entomological Society* take priority because these were the original submissions and were reprinted by *Annals and Magazine of Natural History, including Zoology, Botany and Geology*.

THE ZOOLOGICAL SOCIETY

White published seven papers in the *Proceedings of the Zoological Society of London* (White, 1847b, 1847d, 1847g, 1848b, 1848d, 1849b, 1851a, 1861a). These were duplicated in *The Annals and Magazine of Natural History, including Zoology, Botany, and Geology* under a section entitled

"Proceedings of Learned Societies" (White, 1847c, 1847f, 1848a, 1848c, 1849a, 1849c, 1851b, 1861b respectively). The major difference between the two publications is that the plates were not reproduced in the *Annals*. The only *Proceedings* paper of White (1856) not to be reprinted in the *Annals* was the Zoological Society meeting held on the 13th of May 1856. However the problem with this duplication of papers is nomenclatural priority and the distribution (availability) dates of each journal.

Only the works of White published in the Entomological and Zoological Society house journals are listed in the catalogue of scientific papers compiled by the Royal Society (1872) and this seemed to suggest it is these journals that were the original descriptions and have nomenclatural priority. In order to confirm priority date, copies of the *Proceedings of Zoological Society* and *The Annals and Magazine of Natural History* were examined in the libraries of the Zoology Department and Mollusca Section, Natural History Museum, Linnean Society, Zoological Society and the British Library.

The *Proceedings*

None of the volumes examined suggested that the "*Proceedings*" was distributed in sheets/numbers and there is no evidence of additional wrappers within the bindings. The date stamps in the British Library copies of volumes 1844, 1845, 1846 and 1848 are as follows:-

1844 (part XII) = 12th November 1845
 1845 (part XIII) = 15th February 1847
 1846 (part XIV) = 2nd December 1847
 1847 (part XV) = 7th July 1848

The Accessions Register of Linnean Library revealed a different distribution story for the same volumes:-

1844 (part XII), sheets (no.) 131-142 and 1845 (part XIII), sheets (no.) 143-145 = 16th October 1845
 1845 (part XIII), sheets (no.) 146-148 = 10th April 1847
 1845 (part XIII), sheets (no.) 149-154 and 1846 (part XIV), sheets (no.) 155-158 = 18th August 1846
 1846 (part XIV), sheets (no.) 160-166 = 21st March 1847
 1847 (part XV), sheets (no.) 167-176 = 14th September 1847
 1847 (part XV), sheets (no.) 177-179 = 29th May 1848

The publication dates of the *Proceedings* were confused and have obviously been a problem in the past, but are important. This matter was resolved when Sclater (Anon, 1893: 435) laid before the Zoological Society meeting of May 2, 1893 a list of the *Proceedings* dates. This list was compiled from the printers' (Taylor & Francis) receipts for the sheets of the *Proceedings* from 1831-1859 by Waterhouse (1893) who was the Librarian to the Zoological Society from 1872 to 1913. Waterhouse was not originally credited with the authorship of the delivery dates and his work was later reprinted at the request of Sherborn in Duncan (1937: 78-83). The sheets were referred to as numbers in the list assembled by Waterhouse. What is not clarified is whether

these sheets were individually distributed to the members of the Zoological Society as they became available from the printers or if the Society distributed the volumes in parts. Further, two papers by White (1847g, 1848a) run into the following sheet. However, the dates of delivery from the printers to the Zoological Society have produced a stable nomenclature with regard to papers published in the *Proceedings* and this been generally accepted.

The *Annals*

In comparison, the distribution dates of the *Annals and Magazine of Natural History, including Zoology, Botany, and Geology* appear to be without contention. The date stamp in the British Library volumes are as follows:-

- No. 130, July 1847 = 15th July 1847
- No. 131, August 1847 = 12th November 1847
- No. 132, September 1847 = 22nd September 1847
- No. 133, October 1847 = 15th October 1847
- No. 134, November 1847 = 12th November 1847
- No. 135, December 1847 = 27th December 1847

Richard Taylor was one of the leading printers/publishers during this period and his firm printed most of the scientific journals in London. He was also a Fellow of the Linnean Society. From studying the Linnean Society Library Accession book for the period of White's publications, *Ann. Mag. nat. Hist.* appears to have been made available at the beginning of the month as stated on the title heading of each part. This was made possible because one of the Journal editors (Richard Taylor) ensured that a copy of the Journal was promptly delivered to the library.

- No. 130, July 1847 = 1st July 1847
- No. 131, August 1847 = 2nd August 1847
- No. 132, September 1847 = 1st September 1847
- No. 133, October 1847 = 2nd October 1847
- No. 134, November 1847 = 1st November 1847
- No. 135, December 1847 = 1st December 1847

Priority of Proceedings and Annals

From Waterhouse (1893) and the Linnean Society Library Accessions Register, White's papers published by the *Proceedings of the Zoological Society* are considered here to take priority because they were available before the *Annals and Magazine of Natural History, including Zoology, Botany, and Geology*.

HMS FLY

July 1847 saw three papers published by White (1847c,d,e) but establishing the distribution date of the HMS *Fly* narrative was difficult. The copy in the Natural History Museum General Library has the month July hand written by Sherborn, in pencil, on the title page. Also in the General Library is a book containing the correspondence of Juke and within is a letter to a friend dated the 28th August 1847 which gives a list of newspapers that have reviewed the book. These

were traced via the British Library newspaper section but gave no further help. *Spectator* Saturday 14th August; *Morning Post* Tuesday 24th August; the *Daily News* and *Morning Herald* Thursday 26th August. However, the HMS *Fly* copy in the British Library was date stamped with the numbers 47.7.28.25 establishing the distribution date as the 28th July 1847.

VALID GENERA & SPECIES ATTRIBUTED TO WHITE

White is the authority for 31 genera of which nine were jointly established with Arthur Adams, three were attributed to White by Kinahan (1859) and two of the genera established by White are invalid.

Two hundred and eighty-nine crustacean species were considered by White to be new to science, but for various reasons this figure should be revised. One hundred and seventy-one species thought to be new by White (mainly 1847a) are *nomina nuda* because they are without a valid indication. Sixty-five new species were described solely by White, 42 jointly with Arthur Adams, five species descriptions were attributed to White by Miers (1874), one replacement name (White, 1847a: 30, *Thelphusa dehaanii*) and two new species were attributed to White by Kinahan (1859). White is also the authority for 31 genera.

Of the *nomina nuda*, White (1847a) was preparing figures with the intention of describing new crustacean species and publishing them in the zoological account of the HMS *Erebus & Terror* voyage, but this study was never completed. Instead Miers (1874) completed an account of the Crustacea from the Voyage and published some of White's figures, amounting to four plates. Miers (1874: 1) wrote an introduction to the paper stating "The greater number of Crustacea here figured have been described by Mr. Adam White. The plates having been printed off many years since, and the stones destroyed, it has not been possible to alter their lettering, and bring it into correspondence with the nomenclature adopted in the text; but whenever I have adopted for any species a different generic or specific name from that used by Mr. White, and printed on the plate, a reference has been made to the latter in the synonyma of the species"

Further, White (1847a) indicated that a number of species descriptions appeared in *Ann. Mag. nat. Hist.* 1846 but the authors of this present study did not find this paper and therefore the names appear to be *nomina nuda*.

Additional problems were encountered when establishing the correct authorship of some White proposed species. With Doubleday he recorded a list of annulose animals from New Zealand but only the name of White appears after the descriptions of the crustacean species. Crustacea from the voyage of HMS *Samarang* were described jointly with Arthur Adams. In a number of instances Adams and White incorrectly attributed the authority of the species to

themselves when a previous description by only White took priority. In one instance the earlier combination of White & Adams (in White, 1847d: 84) was later altered to Adams & White (Adams & White, 1848: 30).

GENERA AND SPECIES

The following is a list of crustacean genera and species attributed to Adam White. The list does not include any synonymies except those authors directly associated with White and includes Adams & White (1848), Gosse (1851), Kinahan (1859) and Miers (1874). This list is ordered alphabetically by genus with valid indications in bold type and remarks have been included with some species to clarify outstanding issues. Abbreviations used in the text, *n.n.* = *nomen nudum*.

Acanthoniscus White (in Kinahan, 1859)—White, 1847a: 99 [*n.n.*]; Kinahan, 1859: 132.

Acanthoniscus spiniger White (in Kinahan, 1859)—White, 1847a: 99 [*n.n.*]; Gosse, 1851: 65 [*n.n.*]; Kinahan, 1859: 132.

Acanthonyx elongatus—White, 1847a: 11 [*n.n.*].

Actaea carcharias White, 1848—White, 1847a: 15 [*n.n.*], 1848b: 224, 1848c: 284.

Actaea nodulosa White, 1848—White, 1847a: 15 [*n.n.*], 1848b: 224, 1848c: 284; Adams & White, 1849: 39, tab. VIII, fig. 4.

Aega edwardsii—White, 1847a: 107 [*n.n.*].

Aega hirta—White, 1847a: 107 [*n.n.*]. REMARKS: White, 1847a: 107 erroneously states that this species is figured (t. 6) in the *Zoology of the Erebus and Terror* (see Richardson and Gray, 1844-1875).

Aegle cythera—White, 1847a: 125 [*n.n.*].

Albunea microps—White, 1847a: 129 [*n.n.*].

Alima aphrodite White, 1847—White, 1847a: 83 [*n.n.*], 1847g: 124, 1848a: 226. REMARKS: White, 1847a: 83 erroneously states that this species is figured in the *Zoology of the Erebus and Terror* (see Richardson and Gray, 1844-1875).

Alope White, 1847—White, 1847a: 75 [*n.n.*], 1847g: 123, 1848a: 225.

Alope palpalis White, 1847—White, 1847a: 75 [*n.n.*], 1847g: 124, 1848a: 226; Miers, 1874: 4, Tab. 4, fig. 1. REMARKS: Although White 1847a: 75 suggests by inserting *t. f.* after the species name that he is going to figure this species in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875), it was Miers (1874, Tab. 4, fig. 1) that eventually published the figure.

Alpheus alope White (in Miers, 1874)—White, 1847a: 75 [*n.n.*]; Miers, 1874: 5, Tab. 4, fig. 6. REMARKS: The name *Alpheus alope* as established by White, 1847a: 75 is a *nomen nudum*. Although White had prepared an illustration of this alpheid, it was Miers, (1874, Tab. 4, fig. 6) who finally published the drawing and wrote a brief description of (1874: 5) the species making the name valid and available. The authority for this species is attributed to White by Miers (1874: 1).

Alpheus amphitrite—White, 1847a: 74 [*n.n.*].

Alpheus doris—see *Alpheus strenuus*

Alpheus doto White (in Miers, 1874)—White, 1847a: 75 [*n.n.*]; Miers 1874: 5, Tab. 4, fig. 5. REMARKS: The name *Alpheus doto* as established by White, 1847a: 75 is a *nomen nudum*. Although White had prepared an illustration of this alpheid, it was Miers, (1874, Tab. 4, fig. 5) that finally published the drawing and described (1874: 5) the species making the name valid and available. The authority for the species is attributed to White by Miers (1874: 1).

Alpheus forceps—White, 1847a: 75 [*n.n.*].

Alpheus galathea White (in Miers, 1874)—White, 1847a: 75 [*n.n.*]; Miers, 1874: 5, Tab. 4, fig. 4. REMARKS: The name *Alpheus galathea* as established by White, 1847a: 75 is a *nomen nudum*. Although White had prepared an illustration of this alpheid, it was Miers, (1874, Tab. 4, fig. 4), who finally published the drawing. There is no written description but the figure does constitute an indication making the name valid and available. The authority for this species is attributed to White by Miers (1874: 1).

Alpheus neptunus—see *Athanasus edwardsii*

Alpheus rhode—White, 1847a: 74 [*n.n.*].

Alpheus strenuus Miers, 1874—Miers, 1874: 5, Tab. 4, fig. 2. *Alpheus doris* White, 1847a: 75 [*n.n.*]. REMARKS: *Alpheus doris* is a White, 1847a: 75 *nomen nudum*. Although White 1847a: 75 suggests by inserting *t. f.* after the species name that he is going to figure this species in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875), it was Miers (1874, Tab. 4, fig. 2) that eventually published the figure captioned *Alpheus doris*. Miers revised this White species, acknowledged that the description of *Alpheus strenuus* by Dana [1853], 1852:545, pl. 34, f. 2 was the first available valid name and it took priority.

Alpheus thetis White (in Miers, 1874)—White, 1847a: 75 [*n.n.*]; Miers, 1874: 5, Tab. 4, fig. 7. REMARKS: The name *Alpheus thetis* as established by White, 1847a: 75 is a *nomen nudum*. Although White had prepared an illustration of this alpheid, it was Miers, 1874: 5, who finally published it (1874, Tab. 4, fig. 7) and described the species, making the name valid and available. The authority for this species is attributed to White by Miers (1874: 1).

- Alpheus triton*—White, 1847a: 74 [n.n.].
- Amphitrite argentata*—White, 1847a: 126 [n.n.].
- Amphitrite ceto*—White, 1847a: 127 [n.n.].
- Amphitrite phorcys*—White, 1847a: 127 [n.n.].
- Anilocra trichiura*—White, 1847a: 108 [n.n.].
- Anisonotus*—White, 1847a: 97 [n.n.]. REMARKS: This genus is not valid because the species assigned to the taxon, *Anisonotus falklandicus* by White, 1847a: 97, is a *nomen nudum*.
- Anisonotus falklandicus*—White, 1847a: 97 [n.n.].
- Apseudes? tropicus*—White, 1847a: 96 [n.n.].
- Arcania belcheri*—White, 1847a: 128 [n.n.].
- Arcania laevimana*—White, 1847a: 50 [n.n.].
- Arctopsis tessellata*—White, 1847a: 5 [n.n.].
- Arica*—White, 1847a: 31 [n.n.]. REMARKS: This genus is not valid because the species assigned to the taxon, *Arica septemdentata* by White, 1847a: 31, is a *nomen nudum*.
- Arica septemdentata*—White, 1847a: 31 [n.n.]. REMARKS: White (1847a: 31) stated that *A septemdentata* was described in "Ann. & Mag. Nat. Hist. 1846" but in his personal annotated copy this statement is crossed out because the paper does not exist.
- Armadillidium isurum*—White, 1847a: 101 [n.n.].
- Armadillo thoracicus*—White, 1847a: 100 [n.n.].
- Asellus australis*—White, 1847a: 97 [n.n.].
- Astacus zealandicus*—see *Paranephrops zealandicus*.
- Atecyclus spinosulus*—see *Peltarion spinosulum*.
- Atergatis asperimanus* White, 1848—White, 1847a: 14 [n.n.], 1848b: 224, 1848c: 285.
- Atergatis insularis* Adams & White, 1849—Adams & White, 1849: 38, tab. VIII, fig. 2.
- Atergatis lateralis* White, 1848—White, 1847a: 15 [n.n.], 1848b: 225, 1848c: 285; Adams & White, 1849: 39, tab. VIII, fig. 1.
- Atergatis sinuatifrons* White, 1848—White, 1847a: 14 [n.n.], 1848b: 224, 1848c: 284; Adams & White, 1849: 38.
- Atergatis subdivisus* White, 1848—White, 1847a: 14 [n.n.], 1848b: 224, 1848c: 284; Adams & White, 1849: 38, tab. VIII, fig. 3.
- Athanasus edwardsii* Miers, 1874—Miers, 1874: 4, Tab. 4, fig. 3. *Alpheus neptunus*—White, 1847a: 74 [n.n.]. REMARKS: *Alpheus neptunus* is a *nomen nudum*. White (1847a: 74) suggested by inserting *t. f.* after the species name that he was going to figure this species in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875). However, Miers, (1874, Tab. 4, fig. 3) eventually published the figure prepared by White and captioned *Alpheus neptunus*. But Miers (1874: 4) revised this White species, acknowledged that the description of *Athanasus edwardsii* by Audouin, 1826: 91, pl. 10, f. 1 was the first available valid name, it took priority and he assigned this species to *Alpheus*.
- Callianassa? abdominalis*—White, 1847a: 70 [n.n.].
- Callianassa? carinaedorsis*—White, 1847a: 70 [n.n.].
- Callianassa turnerana* White, 1861—White, 1861a: 42, pl. VI; 1861b: 479.
- Cancer (Galene) dorsalis*—see *Galene dorsalis*
- Caphyra pectenicola*—White, 1847a: 54 [n.n.].
- Caprella cercopoides* White, 1852—White, 1852: ccvii, fig. 1.
- Carpilius cinctimanus* White, 1847—White, 1847a: 14 [n.n.], 1847e: 336, pl. 2, fig. 3; Adams & White, 1849: 37, tab. VII, fig. 4. REMARKS: White, 1847a: 14 erroneously states that the original indication of the species was published in White, *Ann. & Mag. Nat. Hist.* 1846.
- Carpilius signatus* Adams & White, 1849—Adams & White, 1849: 37, tab. X, fig. 1.
- Cenobita compta*—White, 1847a: 62 [n.n.].
- Cenobita laeviuscula*—White, 1847a: 62 [n.n.].
- Ceratocarcinus* Adams & White (in White, 1847)—White, 1847a: 125 [n.n.], 1847b: 57, 1847c: 61; Adams & White, 1849: 33.
- Ceratocarcinus longimanus* White, 1847—White, 1847a: 125 [n.n.], 1847b: 57, 1847c: 62; Adams & White, 1849: 34, tab. VI, fig. 6.
- Charybdis dura* Adams & White, 1849—White, 1847a: 28 [n.n.]; Adams & White, 1849: 48.
- Chlorodius congener*—White, 1847a: 125 [n.n.].
- Chlorodius fragifer* White, 1848—White, 1847a: 18 [n.n.], 1848b: 226, 1848c: 286; Adams & White, 1849: 40, tab. XI, fig. 2.
- Chlorodius hirtipes* White, 1848—White, 1847a: 18 [n.n.],

1848b: 226, 1848c: 286; Adams & White, 1849: 40, tab. XI, fig. 4.

Chlorodius pilumnoides White, 1848—White, 1847a: 18 [n.n.], 1848b: 226, 1848c: 286; Adams & White, 1849: 41, tab. IX, fig. 3.

Chorinus acanthonotus Adams & White (in White, 1847)—White, 1847a: 123 [n.n.], 1847g: 119, 1848a: 222; Adams & White, 1848: 11, Tab. I, Fig. 1.

Chorinus verrucosipes Adams & White, 1848—Adams & White, 1848: 13, Tab. II, Fig. 3.

Cirolana rossii—White, 1847a: 106 [n.n.]. REMARKS: White, 1847a: 106 erroneously states that this species is figured (t. 5, f. 9) in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875).

Cosmonotus Adams & White (in White, 1848)—White, 1847a: 129 [n.n.], 1848b: 227, 1848c: 287; Adams & White, 1849: 60.

Cosmonotus grayii White, 1848—White, 1847a: 129 [n.n.], 1848b: 227, fig. unnumbered; 1848c: 287, fig. unnumbered; Adams & White, 1849: 60, Tab. XIII, Fig. 3.

Cryptopodia dorsalis White & Adams (in White, 1847)—White, 1847a: 125 [n.n.], 1847d: 84, 1847f: 205, 1861c, pl. 2; Adams & White, 1848: 30, tab. 6, fig. 5. REMARKS: Adams & White 1848: 30 erroneously cite the illustration of this species as Tab. 5, Fig. 6 instead of tab. 6, fig. 5 and altered the authorship of this species to Adams & White.

Cryptosoma orientis Adams & White, 1849—Adams & White, 1849: 62, Tab. XIII, Fig. 4.

Cyclograpsus marmoratus—White, 1847a: 41 [n.n.].

Cymopolia jukesii White, 1847—White, 1847a: 54 [n.n.], 1847e: 338, pl. 2, fig. 1, 1861c, pl. 2; Miers, 1874: 3, Tab. 3, fig. 4, 4a-c.

Cymothoa aegoides—White, 1847a: 110 [n.n.]. REMARKS: White, 1847a: 110 erroneously states that this species is cited in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1847-1875).

Cymothoa approximans—White, 1847a: 110 [n.n.].

Cymothoa contracta—White, 1847a: 110 [n.n.]. REMARKS: White, 1847a: 110 erroneously states that this species is figured (t. 6, f.) in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875).

Cymothoa novae-zealandiae—White, 1847a: 110 [n.n.]. REMARKS: White (1847a: 110) erroneously states that this species is figured (t. 6) in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875).

Doclea calcitrata White, 1847—White, 1847a: 4 [n.n.], 1847b: 56, 1847c: 61, 1861c, pl.2; Adams & White, 1848: 7, t. I, f. 2.

Dorippe armata—White, 1847a: 54 [n.n.].

Dromia pustulata—White, 1847a: 129 [n.n.].

Dromia verrucosipes—White, 1847a: 55 [n.n.].

Echinocerus White, 1842—White, 1842a: 36, 1842b: 453, 1847a: 56 & 1864a: 30, *Echinocerus (Lithodes)*, White, 1848d: 48, 1849a: 226. *Lithodes (Echinocerus)*, 1855a: 307, 1856: 133. REMARKS: White used two different spellings for the generic name and although initially attributed generic status by him, he later assigned *Echinocerus* to a subgenus of *Lithodes*.

Echinocerus (Lithodes) cibarius—see *Lithodes (Echinocerus) cibarius*

Echinocerus (Lithodes) cibarius—see *Lithodes (Echinocerus) cibarius*

Ephippiphora White, 1847—White, 1847a: 130 [n.n.], 1847g: 124, 1848a: 226.

Ephippiphora kroyeri White, 1847—White, 1847a: 130 [n.n.], 1847g: 124, 1848a: 227. REMARKS: White 1847a: 130 erroneously states that this species is figured in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875).

Eriphia? verrucosa—White, 1847a: 22 [n.n.].

Etisus phoebe—White, 1847a: 126 [n.n.].

Etisus occidentalis—White, 1847a: 20 [n.n.].

Galathea affinis—White, 1847a: 66 [n.n.].

Galathea elegans—White, 1847a: 66 [n.n.].

Galathea subrugosa White (in Miers, 1874)—White, 1847a: 66 [n.n.]; Miers, 1874:3, Tab. 3, fig. 2. REMARKS: Although White 1847a: 66 appeared to suggest that he was going to figure this species in *Zoology of the Erebus and Terror*, (see Richardson & Gray, 1844-1875), it was Miers (1874, Tab. 3, fig. 2.) that published the prepared drawing, described *G. subrugosa* and assigned (1874: 3) the species to *Munida*. Miers (1874: 1) attributed the species to White.

Galene dorsalis (White, 1849)—*Cancer (Galene) dorsalis* White, 1849b: 144, pl. 6; 1849c: 381. *Galene dorsalis*—White, 1861c, pl. 2.

Galene? panopeoides—White, 1847a: 18 [n.n.].

Gammarus zete—White, 1847a: 89 [n.n.].

Gebia hirtifrons White, 1847—White, 1847a: 71 [*n.n.*]; 1847g: 122; 1848a: 225; Miers, 1874: 4, Tab. 3, fig. 5, 5a. REMARKS: Although White 1847a: 71 suggested that he was going to figure this species in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875), it was Miers (1874: 4, Tab. 3, fig. 5, 5a) that published the prepared figure.

Gelasimus bellatrix—White, 1847a: 128 [*n.n.*].

Gelasimus bellator White, 1847—White, 1847a: 36 [*n.n.*], 1847d: 84, 1847f: 205; Adams & White, 1849: 49.

Gelasimus crassipes White, 1847—White, 1847a: 36 [*n.n.*], 1847d: 84, 1847f: 205; Adams & White, 1849: 49.

Gelasimus cultrimanus White, 1847—White, 1847a: 35 [*n.n.*], 1847d: 84, 1847f: 205; Adams & White, 1849: 49.

Gelasimus forcipatus Adams & White, 1849—White, 1847a: 36 [*n.n.*]; Adams & White, 1849: 50.

Gelasimus porcellanus White, 1847—White, 1847a: 36 [*n.n.*], 1847d: 85; 1847f: 206; Adams & White, 1849: 50

Gelasimus robustus—White, 1847a: 36 [*n.n.*].

Gelasimus tenuimanus—White, 1847a: 35 [*n.n.*].

Gonatonotus Adams & White (in White, 1847)—White, 1847a: 125 [*n.n.*], 1847b: 57, 1847c: 62; Adams & White, 1848: 32.

Gonatonotus pentagonus White, 1847—White, 1847a: 125 [*n.n.*], 1847b: 58, 1847c: 62; Adams & White, 1849: 33, tab. VI, fig. 7.

Gonodactylus cultrifer White, 1851—White, 1851a: 96, pl. XVI, fig. 1, 2, 1851b: 422.

Gonodactylus graphurus—White, 1847a: 85 [*n.n.*].

Gonodactylus guerinii White, 1861—White, 1861a: 43, pl. VII, 1861b: 480.

Gonodactylus trispinosus—White, 1847a: 85 [*n.n.*]. REMARKS: White (1847a: 85) erroneously states that this species is figured (t. 5, f. 2) in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875).

Grapsus fluvicola—White, 1847a: 39 [*n.n.*].

Grapsus latifrons White, 1847—White, 1847a: 40 [*n.n.*]; 1847e: 337, pl. 2, fig. 2.

Grapsus strigilatus White, 1842—White, 1842c: 78; White & Doubleday, 1843: 265.

Halicarcinus White, 1847—*Hymenosoma* (*Halicarcinus*) White, 1846c: 178; White, 1847a: 33. REMARKS: Originally this taxon was afforded subgeneric status within

Hymenosoma by White (1846c: 178) but later he (1847a: 33) established it as a genus.

Harrovia Adams & White, 1849—White, 1847a: 51 [*n.n.*]; Adams & White, 1849: 55. REMARKS: The establishment of *Harrovia* by White (1847a: 51) was based on the species *H. albo-lineata* White, 1846, and White (1847a: 51) cites the indication as White, *Ann. & Mag. Nat. Hist.* 1846. This paper does not exist in the literature, consequently the genus (White, 1847a) and species (White, 1846) are *nomina nuda*. The first available indication of *Harrovia* is Adams & White, 1849: 55.

Harrovia albo-lineata Adams & White, 1849—White, 1847a: 51 [*n.n.*].

Adams & White, 1849: 56, Tab. XII, Fig. 5. REMARKS: White 1847a: 51 erroneously refers the description of this species to *Ann. & Mag. Nat. Hist.* 1846. The first available description of this species is Adams & White, 1849: 56.

Hippolyte lygdamis—White, 1847a: 76 [*n.n.*].

Hippolyte metis—White, 1847a: 76 [*n.n.*].

Huenia dehaanii White, 1848—White, 1847a: 10 [*n.n.*], 1848b: 223, 1848c: 283.

Huenia frontalis White, 1848—White, 1847a: 10 [*n.n.*], 1848b: 223, 1848c: 283; Adams & White, 1848: 20, Tab. IV, Fig. 3. REMARKS: Adams & White, 1848: 20 [July] attribute the authority incorrectly to themselves, but the description by White, 1848b: 223 [March] takes priority.

Huenia proteus de Haan *var. tenuipes* Adams & White, 1848—Adams & White, 1848: 22, tab. 4, fig. 5.

Hyas bufonius—White, 1847a: 6 [*n.n.*].

Hyastenus White, 1847—White, 1847a: 6 [*n.n.*], 1847b: 56, 1847c: 61; Adams & White, 1848: 11.

Hyastenus sebae White, 1847—White, 1847a: 6 [*n.n.*], 1847b: 57, 1847c: 61; Adams & White, 1848: 11.

Idotea compacta—White, 1847a: 95 [*n.n.*].

Idotea elongata—White, 1847a: 95 [*n.n.*]. REMARKS: White (1847a: 95) erroneously states that this species is figured (t. 5, f. 7) in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875).

Idotea lobata—White, 1847a: 95 [*n.n.*].

Inachus lorina Adams & White, 1848—White, 1847a: 123 [*n.n.*]; Adams & White, 1848: 3, Tab. II, f. 2.

Iphiculus Adams & White, 1849—White, 1847a: 51 [*n.n.*]; Adams & White, 1849: 57.

Iphiculus spongiosus Adams & White, 1849—White,

1847a: 51 [*n.n.*]; Adams & White, 1849: 57.

Iphis novemspinosa Adams & White, 1849—White, 1847a: 51 [*n.n.*]; Adams & White, 1849: 56, Tab. XIII, Fig. 1.

Ixa megaspis Adams & White, 1849—White, 1847a: 129 [*n.n.*]; Adams & White, 1849: 55, Tab. XII, Fig. 1.

Jaera gigantea—White, 1847a: 97 [*n.n.*].

Lambrus crenatus—White, 1847a: 12 [*n.n.*].

Lambrus harpax Adams & White, 1848—Adams & White, 1848: 25, Tab. VI, Fig. 3.

Lambrus hoplonotus Adams & White, 1849—Adams & White, 1849: 35, tab. VII, fig. 3; White, 1861c, pl. 2.

Lambrus lamellifrons Adams & White, 1848—Adams & White, 1848: 26, Tab. V, Fig. 1.

Lambrus lamelliger White, 1847—White, 1847a: 12 [*n.n.*], 1847b: 58, 1847c: 63.

Lambrus lupoides—White, 1847a: 12 [*n.n.*].

Lambrus pisoides Adams & White, 1848—White, 1847a: 12 [*n.n.*]; Adams & White, 1848: 28, Tab. V, Fig. 4.

Lambrus rapax—White, 1847a: 124 [*n.n.*].

Lambrus segnis—White, 1847a: 124 [*n.n.*].

Lambrus turriger White, 1847—White, 1847a: 12 [*n.n.*], 1847b: 58, 1847c: 63; Adams & White, 1848: 26, tab. V, fig. 2.

Leucosia cumingii—White, 1847a: 48 [*n.n.*].

Leucosia haematosticta Adams & White, 1849—*Leucosia haematosticta* White, 1847a: 128 [*n.n.*].—*Leucosia hoematosticta* Adams & White, 1849: 54.—*Leucosia haematosticta* Adams & White, 1849, Tab. XII, fig. 2. REMARKS: The spelling of the species epithet is a problem because in the original description reference (Adams & White, 1849: 54) is made to blood red spots on the fore-legs and a blood red band on the hinds legs. Therefore the species name should perhaps be *Leucosia haematosticta* as referred to in White's (1847a: 128) catalogue and the caption of Adams & White, 1849, Tab. XII.

Leucosia hestia—White, 1847a: 128 [*n.n.*].

Leucosia marmorea—White, 1847a: 48 [*n.n.*].

Leucosia obscura—White, 1847a: 48 [*n.n.*].

Leucosia phyllocheira—White, 1847a: 48 [*n.n.*].

Lissocarcinus Adams & White, 1849—White, 1847a: 126

[*n.n.*]; Adams & White, 1849: 45.

Lissocarcinus polybioides Adams & White, 1849—*Portunus polybioides* White, 1847a: 25 [*n.n.*].—*Lissocarcinus polybioides* White, 1847a: 126 [*n.n.*]; Adams & White, 1849: 46, Tab. XI, fig. 5. REMARKS: Originally White (1847a: 25) assigned this species to *Portunus* but later in his catalogue (1847a: 126) he assigned this species to a new genus *Lissocarcinus*. However the new combination only became available when the Zoology of the *Samarang* was published.

Lithodes (Echinocerus) cibarius (White, 1842)—*Echinocerus cibarius* White, 1842a: 36, 1842b: 453, 1847a: 56 & 1864a: 30.—*Echinocerus (Lithodes) cibarius* White, 1848d: 48, 1849a: 226.—*Lithodes (Echinocerus) cibarius*, White, 1855a: 307; 1856: 133.

Lithodes (Petalocerus) White, 1855—White, 1855a: 307; 1856: 133.

Lithodes (Petalocerus) bellianus White, 1855—White, 1855a: 307, 1856: 134, Pl. XLII, figs 1-7.

Lupocyclus Adams & White, 1849—White, 1847a: 127 [*n.n.*]; Adams & White, 1849: 46.

Lupocyclus rotundatus Adams & White, 1849—White, 1847a: 127 [*n.n.*]; Adams & White, 1849: 47, tab. XII, fig. 4.

Lygia dubia—White, 1847a: 98 [*n.n.*].

Macrophthalmus definitus Adams & White, 1849—White, 1847a: 37 [*n.n.*]; Adams & White, 1849: 51.

Macrophthalmus serratus Adams & White, 1849—White, 1847a: 37 [*n.n.*]; Adams & White, 1849: 51.

Menaethius porcellus White, 1848—*Menaethius porcellus* White, 1847a: 10 [*n.n.*].—*Menoethius porcellus* White, 1848b: 224; 1848c: 284.—*Menaethius porcellus* Adams & White, 1848: 19. REMARKS: Adams & White, 1848: 19 [July] attribute the authority incorrectly to themselves, but the description by White, 1848b: 224 [March] takes priority. In the original description the spelling of the genus name is a typographical error.

Menaethius tuberculatus Adams & White, 1848—White, 1847a: 10 [*n.n.*]; Adams & White, 1848: 19.

Menaethius subserratus Adams & White, 1848—White, 1847a: 10 [*n.n.*]; Adams & White, 1848: 18, Tab. IV, Fig. 1, 2.

Menippe? cumingii—White, 1847a: 19 [*n.n.*].

Menippe signata—White, 1847a: 19 [*n.n.*].

Micippa bicarinata Adams & White, 1848—White, 1847a:

9 [n.n.]; Adams & White, 1848: 16.

Mithraculus White, 1847—White, 1847a: 7.

Monolepis orientalis—White, 1847a: 65 [n.n.].

Myctiris subverrucatus—White, 1847a: 34 [n.n.].

Myra affinis—White 1847a: 49 [n.n.].

Myra carinata—White, 1847a: 49 [n.n.].

Myra dilatimanus—White, 1847a: 49 [n.n.].

Myra elongata—White, 1847a: 128 [n.n.].

Naesa antennalis—White, 1847a: 105 [n.n.]. REMARKS: White, 1847a: 105 erroneously states that this species is figured (t. 6, f.) in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875).

Naesa genoensis—White, 1847a: 105 [n.n.].

Neptunus hespera—White, 1847a: 126 [n.n.].

Nerocila congener—White, 1847a: 108 [n.n.].

Nerocila macleayi—White, 1847a: 108 [n.n.]. REMARKS: White, 1847a: 108 erroneously states that this species is figured (t. 5, f. 8) in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875). The spelling of this species is incorrect as it has been named for MacLeay. White 1847a: 108 refers to White & Doubleday 1843: 268 where the species is cited as *Cilonera macleayi*, Leach ? Leach never described this species.

Naxia sinope see *Pisa sinope*

Ommatocarcinus macgillivrayi White, 1851—White, 1851c: 393, Tab. v, fig. 1; 1861c, pl. 2.

Oncinopus neptunus Adams & White, 1848—Adams & White, 1848: 1, Tab. II, Fig. 1; White, 1861c, pl. 2.

Oniscus? scaberrimus—White, 1847a: 98 [n.n.].

Oreophorus reticulatus Adams & White, 1849—Adams & White, 1849: 54, Tab. VI, Fig. 1.

Oreophorus tenerrimus—White, 1847a: 50 [n.n.].

Ourachoerus White (in Kinahan, 1859)—White, 1847a: 100 [n.n.]; Kinahan, 1859: 133.

Ourachoerus caudatus White (in Kinahan, 1859)—White, 1847a: 100 [n.n.]; Kinahan, 1859: 133.

Ozius? subverrucosus White, 1848—White, 1847a: 19 [n.n.], 1848b: 226, 1848c: 286.

Pagurus cavipes White, 1847—White, 1847a: 60 [n.n.], 1847g: 122, 1848a: 224; Miers, 1874: 3, Tab. 2, fig. 3. REMARKS: Miers (1874, Tab. 2, fig. 3) published the prepared figure of White and commented (1874: 3) that "I have no doubt from the figure and descriptions above quoted that *P. cavipes* and *P. cultratus*, White, are the same species as *P. deformis*, Milne Edwards".

Pagurus chinensis—White, 1847a: 60 [n.n.].

Pagurus comptus White, 1847—White, 1847a: 59 [n.n.], 1847g: 122, 1848a: 224; Miers, 1874: 3, Tab. 2, fig. 5, 5a. REMARKS: Miers (1874: Tab 2, f. 5, 5a) published the captioned figure of *Pagurus comptus* prepared by White and (1874: 3) assigned this species to *Eupagurus*.

Pagurus cultratus—White, 1847a: 60 [n.n.]. REMARKS: Miers (1874: 3) commented that "I have no doubt from the figure and descriptions above quoted that *P. cavipes* and *P. cultratus*, White, are the same species as *P. deformis*, Milne Edwards".

Pagurus hirtimanus—White, 1847a: 60 [n.n.].

Pagurus horridus—White, 1847a: 60 [n.n.].

Pagurus isochirus—White, 1847a: 59 [n.n.].

Pagurus pilosimanus—White, 1847a: 60 [n.n.].

Pagurus pilosiusculus—White, 1847a: 60 [n.n.].

Pagurus strigimanus White, 1847—White, 1847a: 60 [n.n.], 1847g: 121, 1848a: 224; Miers, 1874: 3, Tab. 2, fig. 4. REMARKS: Miers (1874, Tab. 2, f. 4) published the figure captioned *Pagurus strigimanus* prepared by White and assigned this species to *Clibinarius*.

Palaemon aciculatus—White, 1847a: 79 [n.n.].

Palaemon colombicus—White, 1847a: 78 [n.n.].

Palaemon creusa—White, 1847a: 78 [n.n.].

Palaemon cydippe—White, 1847a: 78 [n.n.].

Palaemon electra—White, 1847a: 78 [n.n.].

Palaemon glauca—White, 1847a: 79 [n.n.].

Palaemon hypsa—White, 1847a: 78 [n.n.].

Palaemon nicippe—White, 1847a: 79 [n.n.].

Palaemon procles—White, 1847a: 79 [n.n.].

Pandarus australis—White, 1847a: 119 [n.n.]. REMARKS: White, 1847a: 119 erroneously states that this species is figure in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875).

- Panopeus caystrus* Adams & White, 1849—White, 1847a: 125 [n.n.]; Adams & White, 1849: 42, tab. IX, fig. 2.
- Panopeus dentatus* White, 1848—White, 1847a: 18 [n.n.], 1848b: 226, 1848c: 286; Adams & White, 1849: 41, tab. XI, fig. 1.
- Panopeus formio* Adams & White, 1849—White, 1847a: 126 [n.n.]; Adams & White, 1849: 42, tab. IX, fig. 1.
- Panulirus occidentalis*—White, 1847a: 70 [n.n.].
- Paramiccippa sex-spinigera*—White, 1847a: 9 [n.n.].
- Paramithrax rotundatus*—White, 1847a: 124 [n.n.].
- Paramiccippa subclivosa*—White, 1847a: 9 [n.n.].
- Paramaya dehaanii*—White, 1847a: 7 [n.n.].
- Paranephrops* White, 1842—White, 1842c: 79, 1847a: 72; Miers, 1874: 4. REMARKS: White (1842c: 79) gave this taxon subgeneric status (subg. nov.), but did not assign it to a specific genus, he only stated that “This species ... connects the two genera *Nephrops* and *Potamobius*, in having the habit of the former, and combining characters of both”. Later Miers (1874: 4) afforded this taxon full generic status.
- Paranephrops zealandicus* (White, 1847)—*Astacus zealandicus* White, 1847a: 72 [n.n.], 1847g: 123, 1848a: 225.—*Paranephrops zealandicus* Miers, 1874: 4, Tab. 2, fig. 2. REMARKS: Although White 1847a: 72 suggests by inserting *t. f.* after the species name that he is going to figure this species in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875), it was Miers (1874, Tab. 2, fig. 2) that eventually published the figure. In the text, Miers (1874: 4) assigns this species to another genus by using the name *Paranephrops zealandicus*, but White’s original name *Astacus zealandicus* captions the plate.
- Paranephrops planifrons* White, 1842—White, 1842c: 79, 1847a: 72; White & Doubleday, 1843: 267; Miers, 1874: 4, Tab. 3, fig. 1. REMARKS: Although White 1847a: 72 suggests by inserting *t. f.* after the species name that he is going to figure this species in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875), it was Miers (1874, Tab. 3, fig. 1) that eventually published the figure.
- Parthenope calappoides* Adams & White, 1849—White, 1847a: 13 [n.n.]; Adams & White, 1849: 34, Tab. V, Fig. 5.
- Parthenope cyrnus*—White, 1847a: 125 [n.n.].
- Parthenope reticulata*—White, 1847a: 124 [n.n.].
- Parthenope tarpeius* Adams & White, 1849—White, 1847a: 124 [n.n.]; Adams & White, 1849: 35, Tab. VII, Fig. 2.
- Peltarion spinosulum* (White, 1843)—*Atelecyclus spinosulum* White, 1843: 345.—*Peltarion spinosulum*—White, 1847a: 52. REMARKS: White (1843: 345) originally assigned this species to *Atelecyclus spinosulum* but later (1847a: 52) moved the species to *Peltarion*. White (1847a: 52) erroneously stated that this species was initially attributed to the genus *Corystes*. White, *Ann. & Mag. Nat. Hist.* vol. 12, p. 345.
- Pericera setigera* Adams & White, 1848—Adams & White, 1848: 17.
- Pericera tigrata* Adams & White, 1848—Adams & White, 1848: 17.
- Philyra granigera*—White, 1847a: 128 [n.n.].
- Philyra humilis*—White, 1847a: 128 [n.n.].
- Pilumnus dilatipes* Adams & White, 1849—White, 1847a: 21 [n.n.]; Adams & White, 1849: 44, tab. IX, fig. 4.
- Pilumnus dioxippe*—White, 1847a: 126 [n.n.].
- Pilumnus helia*—White, 1847a: 126 [n.n.].
- Pilumnus merope*—White, 1847a: 126 [n.n.].
- Pilumnus scabriusculus* Adams & White, 1849—White, 1847a: 21 [n.n.]; Adams & White, 1849: 44, Tab. IX, fig. 5.
- Pilumnus spinimanus*—White, 1847a: 21 [n.n.].
- Pilumnus ursulus* Adams & White, 1849—Adams & White, 1849: 45, tab. IX, fig. 6.
- Pinnixa* White, 1846—White, 1846c: 177; 1847a: 33
- Pinnotheres orientalis*—White, 1847a: 127 [n.n.], Adams, 1848: 353 [n.n.]. REMARKS: Adams (1848: 353) states “I have detected a species of *Pinnotheres*, hitherto undescribed (*P. orientalis*, Adams & White,) that inhabits the large *Avicula* so common in these seas”. This species was never described by Adams or White.
- Pisa planasia* Adams & White, 1848—White, 1847a: 123 [n.n.]; Adams & White, 1848: 9, Tab. II, Fig. 4 & 5.
- Pisa sinope* Adams & White, 1848—*Naxia sinope* White, 1847a: 123 [n.n.].—*Pisa sinope* Adams & White, 1848: 8.
- Porcellana annulipes*—White, 1847a: 63 [n.n.].
- Porcellana obesula*—White, 1847a: 130 [n.n.].
- Porcellana parvula*—White, 1847a: 63 [n.n.].
- Porcellana pulchripes*—White, 1847a: 129 [n.n.].
- Porcellana pura*—White, 1847a: 62 [n.n.].
- Porcellana rugosimanus*—White, 1847a: 63 [n.n.].

Porcellana squamulata—White, 1847a: 63 [n.n.].

Porcellana streptochirus—White, 1847a: 64 [n.n.].

Porcellana subpilosa—White, 1847a: 64 [n.n.].

Porcellana versimana—White, 1847a: 130 [n.n.].

Porcellanella triloba White, 1851—White, 1851c: 394, Tab. v, fig. 2.

Porcellio echinata—White, 1847a: 100 [n.n.].

Porcellio graniger—White, 1847a: 99 [n.n.].

Porcellio insularis—White, 1847a: 100 [n.n.].

Porcellio sericea—White, 1847a: 100 [n.n.].

Porcellio sublaevis—White, 1847a: 100 [n.n.].

Porcellio tristensis—White, 1847a: 99 [n.n.].

Porcellio zealandicus—White, 1847a: 99 [n.n.].

Portunus catharus White (in White and Doubleday, 1843)—White & Doubleday, 1843: 265; White, 1847a: 25. REMARKS: Miers (1874, tab 1, f. 1) published the captioned figure of *Portunus catharus* prepared by White and states (1874: 2) that "The specimen figured is the type of *Portunus catharus* White, which M. A. Milne-Edwards, in his paper in the Archiv. Du Museum above quoted, rightly considers synonymous with *Platyonychus bipustulatus*, Milne-Edwards.

Portunus polybioides see *Lissocarcinus polybioides*.

Potamia schomburgkii—White, 1847a: 30. [n.n.].

Potamobius serratus White, 1851—White, 1851a: 95, pl. XV; 1851b: 421.

Primno guerinii—White, 1847a: 91 [n.n.].

Pyrgoniscus White in Kinahan, 1859—Kinahan, 1859: 134.

Remipes denticulatifrons—White, 1847a: 57 [n.n.].

Remipes marmoratus—White, 1847a: 58 [n.n.].

Rhabdosoma Adams & White (in White, 1847)—White, 1847a: 130; Adams & White, 1849: 63.

Rhabdosoma armatum Adams and White, 1849—Adams and White, 1849: 63, tab. XIII, fig. 7.

Schizophrys White, 1848—White, 1847a: 9 [n.n.], 1848b: 222, 1848c: 282; Adams & White, 1848: 16. REMARKS: Adams & White, 1848: 16 [July] attribute the authority incorrectly to themselves, but the description by White,

1848b: 222 [March] takes priority.

Schizophrys serratus White, 1848—White, 1847a: 9 [n.n.], 1848b: 223, Text fig., 1848c: 283, Text. Fig; Adams & White, 1848: 16. REMARKS: Adams & White, 1848: 16 [July] attribute the authority incorrectly to themselves, but the description by White, 1848b: 223 [March] takes priority.

Schizophrys spiniger White, 1848—White, 1847a: 9 [n.n.], 1848b: 223, 1848c: 283; Adams & White, 1848: 17. REMARKS: Adams & White, 1848: 17 [July] attribute the authority incorrectly to themselves, but the description by White, 1848b: 223 [March] takes priority.

Scyllarus insularis—White, 1847a: 67 [n.n.].

Scyllarus sinensis—White, 1847a: 67 [n.n.].

Serolis latifrons—White, 1847a: 106 [n.n.]. REMARKS: White, 1847a: 106 erroneously states that this species is figured (t. 6, f.) in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875).

Serolis quadricarinata—White, 1847a: 106 [n.n.]. REMARKS: White, 1847a: 106 erroneously states that this species is figured (t. 6, f.) in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875).

Sesarma? graptochirus—White, 1847a: 39 [n.n.].

Sesarma helicoides—White, 1847a: 38 [n.n.].

Sesarma subintegra—White, 1847a: 38 [n.n.].

Sesarma taeniolata—White, 1847a: 38 [n.n.].

Sphaeroma armatum—White, 1847a: 103 [n.n.]. REMARKS: White, 1847a: 103 erroneously states that this species is figured (t. 6, f.) in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875).

Sphaeroma lanceolatum (White, 1843)—*Sphaeroma gigas* var. *lanceolatum* White, 1843: 345.—*Sphaeroma lanceolatum* White, 1847a: 102. REMARKS: Originally assigned by White (1843: 345) as a variety of *Sphaeroma gigas*, but later he (1847a: 102) establishes this taxon as a species.

Sphaeroma leucura—White, 1847a: 104 [n.n.].

Sphaeroma spongiosum—White, 1847a: 103 [n.n.]. REMARKS: White, 1847a: 103 erroneously states that this species is figured (t. 6, f.) in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875).

Sphaeroma subgranulosum—White, 1847a: 103 [n.n.].

Sphaeroma verrucauda—White, 1847a: 102 [n.n.]. REMARKS: White, 1847a: 102 erroneously states that this species is figured (t. 6) in the *Zoology of the Erebus and Terror* (see

Richardson & Gray, 1844-1875). In Sherborn 1931: 6863 the spelling of the genus is a typographical error, *Sphaerana*.

Squilla halesus—White, 1847a: 84 [n.n.].

Squilla multicaudata White, 1849—White, 1847a: 84 [n.n.], 1849b: 144, pl.6, 1849c: 381.

Telmessus White, 1846—White, 1846a: 124; 1846b: 497, 1847a: 124, 1864b: 103; Adams & White, 1848: 14. REMARKS: The generic name *Telmessus* first appeared in an anonymous report on the proceedings of an Entomological Society meeting dated April 7th, [1845], chaired by the Rev. F. W. Hope, F.R.S., President. The proceedings report states that, "Mr A. White exhibited a drawings and various remarkable species of Crustacea, ...". In the text a valid description of the genus *Telmessus* is given and this is attributed to White.

Telmessus serratus White, 1846—White, 1846a: 124, 1846b: 497, 1847a: 124, 1864b: 103; Adams & White, 1848: 14, Tab III. REMARKS: The species name *Telmessus serratus* first appeared in an anonymous report on the proceedings of an Entomological Society meeting dated April 7th, [1845], chaired by the Rev. F. W. Hope, F.R.S., President. The proceedings report states that, "Mr A. White exhibited a drawings and various remarkable species of Crustacea, ...". In the text a valid description of the genus *Telmessus serratus* is given and this is attributed to White.

Thalassina talpa—White, 1847a: 71 [n.n.].

Thelphusa cumingii—White, 1847a: 30 [n.n.].

Thelphusa dehaanii White, 1847—White, 1847a: 30. REMARKS: This species of White (1847a: 30) was a replacement name for the *Cancer (Thelphusa) berardi* of de Haan (1835: 52, T. VI, f.2) not *Thelphusa berardi* Audouin, 1826.

Thelphusa gracilipes—White, 1847a: 30 [n.n.].

Thelphusa spinigera—White, 1847a: 30 [n.n.].

Thysanopoda australis—White, 1847a: 130 [n.n.]. REMARKS: White, 1847a: 103 erroneously states that this species is figured in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875).

Tlos Adams & White, 1849—White, 1847a: 129 [n.n.]; Adams & White 1849: 57.

Tlos muriger Adams & White, 1849—White, 1847a: 129 [n.n.];

Adams & White 1849: 58, Tab. XIII, Fig. 2.

Trapezia affinis—White, 1847a: 126 [n.n.].

Trichodactylus affinis—White, 1847a: 31 [n.n.].

Trichocera porcellana Adams & White, 1849—White, 1847a: 52 [n.n.]; Adams & White, 1849: 59.

Trichopus mystacinus—White, 1847a: 43 [n.n.].

Tyche emarginata White, 1847—White, 1847a: 10 [n.n.], 1847e: 85, 1847f: 206.

Uca africana—White, 1847a: 127 [n.n.].

Utica White, 1847—White, 1847a: 43 [n.n.], 1847e: 85, 1847f: 206; Adams & White, 1859: 52.

Utica gracilipes White, 1847—White, 1847a: 43 [n.n.], 1847d: 86, 1847f: 207, 1861c, pl. 2; Adams & White, 1849: 53, Tab. XIII, Fig. 6.

Valdivia White, 1847—White, 1847a: 31 [n.n.], 1847d: 85, 1847f: 206.

Valdivia convexiuscula—White, 1847a: 31 [n.n.].

Valdivia serrata White, 1847—White, 1847a: 31 [n.n.], 1847d: 85, 1847f: 206. REMARKS: White (1847a: 31) erroneously stated that *V. serrata* was described in *Ann. & Mag. Nat. Hist.* 1846. The first available description of this species was White, 1847d: 85.

Xanthasia White, 1846—White, 1846c: 176, 1847a: 33.

Xanthasia murigera White, 1846—White, 1846c: 177, pl. II, fig. 3, 1847a: 33.

Xantho cultrimanus White, 1848—White, 1847a: 17 [n.n.], 1848b: 225, 1848c: 285; Adams & White, 1849: 39.

Xantho denticulatus White, 1848—*Xantho denticulata* White, 1847a: 17 [n.n.].—*Xantho denticulatus* White, 1848b: 225, 1848c: 285. REMARKS: In his catalogue, White (1847a: 17) named this species *Xantho denticulata*.

Xantho deplanatus White, 1847—*Xantho deplanata* White, 1847a: 17 [n.n.].—*Xantho deplanatus* White, 1847e: 337. REMARKS: In his catalogue, White (1847a: 17) named this species *Xantho deplanata*.

Xantho depressus White, 1848—*Xantho depressus* White, 1848b: 225; 1848c: 285.—*Xantho depressa* White, 1847a: 17 [n.n.]; Adams & White, 1849: 39. REMARKS: In his catalogue, White (1847a: 17) named this species *Xantho depressa*.

Xantho dia—White, 1847a: 125 [n.n.].

Xantho lamelligera White, 1848—White, 1847a: 17 [n.n.], 1848b: 225, 1848c: 285; Adams & White, 1849: 40.

Xantho peuce—White, 1847a: 125 [n.n.].

Xantho spinigera—White, 1847a: 16 [n.n.].

Xenocarcinus White, 1847—White, 1847a: 123 [n.n.], 1847e: 335, 1847g: 118; 1848a: 221; Miers, 1874: 1.

Xenocarcinus tuberculatus White, 1847—White, 1847a: 123 [n.n.], 1847e: 336, 1847g: 119, 1848a: 221; Miers, 1874: 1, Tab. 2, fig. 1, a-e. REMARKS: Although White 1847a: 123 suggests by inserting *t. f.* after the species name that he is going to figure this species in the *Zoology of the Erebus and Terror* (see Richardson & Gray, 1844-1875), it was Miers (1874, Tab. 2, fig. 1, a-e) that eventually published the figure.

Xenophthalmus White, 1846—White, 1846c: 177, 1847a: 127; Adams & White, 1849: 63.

Xenophthalmus pinnotheroides White, 1846—White, 1846c: 178, pl. II, Fig. 2, 1847a: 127; Adams & White, 1849: 63, Tab. XII, Fig. 3.

Zebrida White, 1847—White, 1847a: 124 [n.n.], 1847g: 120, 1848a: 222; Adams & White, 1848: 23. REMARKS: Adams & White, 1848: 23 [July] attribute the authority incorrectly to themselves, but the description by White, 1847g: 120 [November] takes priority.

Zebrida adamsii White, 1847—White, 1847a: 124 [n.n.], 1847g: 121, 1848a: 223, 1861c, pl. 2; Adams & White, 1848: 24, tab. VII, fig. 1.

ACKNOWLEDGEMENTS

We wish to thank Ann Datta, Head of General Library, Natural History Museum, for information relating to Adam White and Gina Douglas, Librarian and Archivist, Linnean Society of London, for allowing us to examine the Society's Accessions Register.
