NEW ZEALAND OCEANOGRAPHIC INSTITUTE

PUBLICATIONS TO DECEMBER 1972

by R.J. Wanoa

The New Zealand Oceanographic Institute is concerned with research into marine geology, biology and physics. The results of research appear in several series of publications - Contributions, Memoirs, Records, Miscellaneous Publications and Charts.

The Contributions are reprints of papers published in existing journals. All Contributions are collected together in annual volumes as Collected Reprints. Limited numbers only are produced.

The Memoirs include series on the Fauna of the Ross Sea, Marine Fauna of New Zealand, Results of Chatham Islands 1954 Expedition and regional hydrological, geological and zoological surveys. All published Memoirs are available on request.

The Charts are published in five series - Coastal, Oceanic, Island, Lake and Miscellaneous Series. The Coastal and Oceanic Series include both bathymetric and surface sediment charts. The Island and Lake Series charts are all bathymetric. Charts are supplied folded in covers. However, unfolded charts are available on request.

Contributions have been issued in Collected Reprints as follows:

1-30	as CR 1952-57	168-187	as CR 1965
31-60	" " 1958	188-210	" " 1966-67
61-86	" " 1959	211-230	" " 1968
87-106	" " 1960	231-253	" " 1969
107-126	" " 1961	254-285	" " 1970
