Trysor is a Registered Organisation with the Chartered Institute for Archaeologists and both partners are Members of the Chartered Institute for Archaeologists, www.archaeologists.net

Jenny Hall (BSc Joint Hons., Geology and Archaeology, MCIfA) had 12 years excavation experience, which included undertaking watching briefs prior to becoming the Sites and Monuments Record Manager for a Welsh Archaeological Trust for 10 years. She has been an independent archaeologist since 2004 undertaking a variety of work that includes upland survey, desk-based appraisals and assessments, and watching briefs.

Paul Sambrook (BA Joint Hons., Archaeology and Welsh, MCIfA, PGCE) has extensive experience as a fieldworker in Wales. He was involved with Cadw's pan-Wales Deserted Rural Settlements Project for 7 years. He also undertook Tir Gofal field survey work and watching briefs. He has been an independent archaeologist since 2004 undertaking a variety of work including upland survey, desk-based appraisals/assessments, and watching briefs.

Elan Links
Heritage at Risk
Part Two – Site Gazetteer

This is the second part of a two part Report.

It contains a site gazetteer of all the assessed historic assets as part of the Elan Links Heritage at Risk Survey. The database structure used is given in Appendix C of Part One of the report.

This document is large and that should be considered before printing hard copy.

ELHAR ID Number: 1 TY'N Y PANT, CAIRN CEMETERY
 Bronze Age CAIRN CEMETERY
NGR: SN9297463288 - Area Centred **Community:** Llanwrthwl
NPRN: **PRN:**
Site Status: Scheduled Ancient Monument BR377

Description:

A cairn cemetery comprising of four small round cairns, each measuring between 5.5 metres and 6.5 metres in diameter and up to 0.4 metres high.

Form of Evidence: Complex **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: High Visible in recent ground photographs.

Evidential Value: Stone cairns

Group Value: A group of four cairns which form part of a larger group of Bronze Age funerary monuments on Gro Hill and surrounding hills.

Historical Value: Mentioned in historic sources

Aesthetic Value: None

Communal Value: None

Setting: In a natural saddle between Craig Cnwch and Crugiau Bach.

Accessibility:

Rarity: Not Common **Significance:** Nationally Important

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 2 CRUGIAU BACH
 Bronze Age CAIRN CEMETERY
NGR: SN9303062401 - Group or Complex Centred **Community:** Llanwrthwl
NPRN: **PRN:**

Site Status: No Site Status

Description:

A group of four small round cairns, recorded in the HER as PRNs 40401-04. They measure between 3 metres and 6 metres in diameter and are about 0.30 metres high. They each appear to be intact.

Form of Evidence: Complex **Condition:** Intact

Current land use: Rough Pasture

Confidence in Record?: High Visible on aerial photographs.

Evidential Value: Earth and stone cairns

Group Value: Associated with the group of Bronze Age funerary and ritual monuments found on the hills either side of the Nant y Gro valley.

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Situated on a flat, broad terrace to the western side of the foot of Y Gamrhiw hill.

Accessibility:

Rarity: Not Common **Significance:** Nationally Important

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 3 BANC CYNNYDD, CAIRN
 Bronze Age CAIRN
NGR: SN8917673181 - Feature Centred **Community:** Rhayader
NPRN: **PRN:** 132293 CPAT

Site Status: No Site Status

Description:

A small, low, cairn, 3 metres in diameter.

Form of Evidence: Other Structure **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field by David James.

Evidential Value: Stone cairn

Group Value: One of several small cairns on Banc Cynnydd

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: On a high, southeast-facing slope, overlooking the Nant y Ffald valley.

Accessibility:

Rarity: Not Common **Significance:** Regionally Important

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 4 RHAYADER ARTILLERY CAMP, PENRHIW WEN
 Modern MILITARY CAMP

NGR: SN9176071200 - Approximate **Community:** Rhayader

NPRN: **PRN:** 132234 CPAT

Site Status: No Site Status

Description:

A seasonally used pre-1914 artillery camp and firing range was located somewhere on Penrhiw-wen. Possible gun positions (NPRN 269379) survive to the north of the mountain road and the shells landed on Esgair Rhiwlan to the west of the Elan valley. There is no known trace of the camp today and its exact location has not been fixed.

Form of Evidence: Documentary Evidence **Condition:** Destroyed

Current land use: Rough Pasture

Confidence in Record?: Low The exact location of the camp is not known, but it was said to be located on Penrhiw-wen.

Evidential Value: Documents only

Group Value: Associated with the firing range on Esgair Rhiwlan to the west

Historical Value: Associated with artillery testing pre-First World War

Aesthetic Value: Postcard of the camp available

Communal Value: None

Setting: On the open common but exact location not known.

Accessibility:

Rarity: Not Common **Significance:** Locally Important

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 5 CEFN GWAIR, CULTIVATION MARKS
 Post Medieval CULTIVATION MARKS
NGR: SN8954569470 - Area Centred **Community:** Rhayader
NPRN: **PRN:** 118760 CPAT

Site Status: No Site Status

Description:

An extensive area of ridge and furrow cultivation to the west of the Craig Goch reservoir.

Form of Evidence: Earthwork **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: High Visible on aerial photographs.

Evidential Value: Earthworks

Group Value: None

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Situated on a flat area to the western side of the Craig Goch reservoir.

Accessibility:

Rarity: Not Common **Significance:** Minor Importance

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 6 WAUN LYDAN
 Post Medieval SHELTER
NGR: SN8823061100 - Approximate **Community:** Llanwrthwl
NPRN: **PRN:** 16593 CPAT

Site Status: No Site Status

Description:

A small, crude shelter formed by moving scree stones to build a sub- stone wall on the downslope side. It may be a relic of 20th century military training, perhaps during the Second World War.

Form of Evidence: Other Structure **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: Low Not visible on aerial photographs.

Evidential Value: Drystone structure

Group Value: Unknown

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: On a scree-covered slope to the northern side of the Rhiwnant valley.

Accessibility:

Rarity: Not Common **Significance:** Minor Importance

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 7 NANT Y CAR (SOUTH), MINE ADIT
 Post Medieval ADIT
NGR: SN8835060840 - Feature Centred **Community:** Llanwrthwl
NPRN: **PRN:** 18507 CPAT

Site Status: No Site Status

Description:

A disused mine drainage adit, recorded by CPAT, at the western end of the Nant y Car (South) mine complex and outside the scheduled area.

Form of Evidence: Earthwork **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: High Visible on aerial photographs

Evidential Value: Earthwork

Group Value: Associated with the Nant y Car (South) lead mine.

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Part of the disused Nant y Car (South) mine complex, on the northern side of the Rhiwnant valley.

Accessibility:

Rarity: Not Common **Significance:** Minor Importance

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 8 DALRHIW LEAD MINE, LEAT
 Post Medieval LEAT
NGR: SN8833060810 - Linear **Community:** Llanwrthwl
NPRN: **PRN:** 18497 CPAT

Site Status: No Site Status

Description:

A mine leat which crosses the lower valley slope to the south of the Rhiwnant stream, from which it took water to power machinery at the Dalrhiw mine complex.

Form of Evidence: Earthwork **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: High Visible on aerial photographs.

Evidential Value: Earthwork

Group Value: Part of the Dalrhiw mine complex

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Crosses the lower valley slope to the south of the Rhiwnant stream, from which it took water to power machinery at the Dalrhiw mine complex.

Accessibility:

Rarity: Not Common **Significance:** Minor Importance

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 9 DALRHIW LEAD MINE, LEAT
 Post Medieval LEAT
NGR: SN8838060750 - Linear **Community:** Llanwrthwl
NPRN: **PRN:** 18495 CPAT

Site Status: No Site Status

Description:

A mine leat which crosses the lower valley slope to the south of the Rhiwnant stream, from which it took water to power machinery at the Dalrhiw mine complex.

Form of Evidence: Earthwork **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: High Visible on aerial photographs.

Evidential Value: Earthwork

Group Value: Part of the Dalrhiw mine complex

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Crosses the lower valley slope to the south of the Rhiwnant stream, from which it took water to power machinery at the Dalrhiw mine complex.

Accessibility:

Rarity: Not Common **Significance:** Minor Importance

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 10 DALRHIW MINE, LEVEL
 Post Medieval LEVEL
NGR: SN8873060610 - Feature Centred **Community:** Llanwrthwl
NPRN: **PRN:** 18484 CPAT

Site Status: No Site Status

Description:

A small level, shown as a trial level, associated with the Dalrhiw lead mine. It shown on late 19th and early 20th century OS maps, but not on the First Edition 1:10560 map.

Form of Evidence: Earthwork **Condition:** Damaged

Current land use: Disused

Confidence in Record?: High Visible on aerial photographs.

Evidential Value: Earthwork

Group Value: Part of the Dalrhiw mine complex. A stone building PRN18485 stand at its northern side.

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: A mine level on the higher slopes to the southeast of the main Dalrhiw mine complex.

Accessibility:

Rarity: Not Common **Significance:** Minor Importance

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 11 DALRHIW MINE, BUILDING
 Post Medieval MINE BUILDING
NGR: SN8871860627 - Feature Centred **Community:** Llanwrthwl
NPRN: **PRN:** 18485 CPAT

Site Status: No Site Status

Description:

A rectilinear building alongside trial level PRN 18484. Its purpose is not known.

Form of Evidence: Building **Condition:** Damaged

Current land use: Derelict

Confidence in Record?: High Visible on aerial photographs.

Evidential Value: Stone building

Group Value: Part of the Dalrhiw mine complex. A stone building PRN18485 stand at its northern side.

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: A small building along a minor mine level on the higher slopes to the southeast of the main Dalrhiw mine complex.

Accessibility:

Rarity: Not Common **Significance:** Minor Importance

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 12 LLWYN DALE, SPRING
 Post Medieval SPRING
NGR: SN8890660936 - Feature Centred **Community:** Llanwrthwl
NPRN: **PRN:** 16596 CPAT

Site Status: No Site Status

Description:

A natural spring on the northern side of the Rhiwnant stream, which was used to supply water to nearby Llwyn-dale cottage in the late 19th and early 20th centuries. A path ran between the spring and the cottage. Edge set slabs have been set just to the east of the small pool fed by the spring.

Form of Evidence: Other Structure **Condition:** Not Known
Current land use: Rough Pasture
Confidence in Record?: High Still visible on aerial photographs.
Evidential Value: Historic mapping
Group Value: Associated with Llwyn Dale cottage
Historical Value: None
Aesthetic Value: None
Communal Value: Noen

Setting: A natural spring on the northern side of the Rhiwnant stream, which was used to supply water to nearby Llwyn-dale cottage in the late 19th and early 20th centuries. A path ran between the spring and the cottage.

Accessibility:
Rarity: Common **Significance:** Minor Importance

Known Threat?: No Identified Threat **Level of Threat:**
Type of Threat:

Management Recommendation:

ELHAR ID Number: 13 RHIWNANT, LONG HUT
 Medieval?; Post Medieval? LONG HUT

NGR: SN8889060930 - Feature Centred **Community:** Llanwrthwl

NPRN: **PRN:** 16595 CPAT

Site Status: No Site Status

Description:

A rectangular, drystone long hut, built of water-worn stones. It measures 9.7 metres northeast to southwest, by 3.8 metres wide. The wall bases stand up to 0.6 metres high.

Form of Evidence: Earthwork **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: Moderate Described by CPAT and apparently visible on aerial photographs.

Evidential Value: Drystone structure

Group Value: None

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Just above the northern bank of the Rhiwnant stream in an area of bracken.

Accessibility:

Rarity: Not Common **Significance:** Locally Important

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 14 LLWYN DALE, COTTAGE
 Post Medieval COTTAGE
NGR: SN8902560979 - Feature Centred **Community:** Llanwrthwl
NPRN: **PRN:** 9052 CPAT

Site Status: No Site Status

Description:

A ruined cottage, now roofless, with an associated garden plot and other ancillary structures. It dates to the 19th century and fell out of use by the early years of the 20th century.

Form of Evidence: Building **Condition:** Damaged

Current land use: Derelict

Confidence in Record?: High Visible on aerial photographs.

Evidential Value: Ruined stone building

Group Value: None

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: On the lower valley slope to the north of the Rhiwnant stream, alongside the trackway to the former Nant y Car Lead Mine.

Accessibility:

Rarity: Common **Significance:** Locally Important

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 15 NANT PARADWYS
 Post Medieval QUARRY
NGR: SN8922060750 - Feature Centred **Community:** Llanwrthwl
NPRN: **PRN:** 16570 CPAT

Site Status: No Site Status

Description:

At least two small quarry workings either side of the Nant Paradwys stream, with trackways running northwards to the Claerwen valley. They were active in the late 19th and early 20th centuries.

Form of Evidence: Earthwork **Condition:** Near Intact

Current land use: Disused

Confidence in Record?: High Visible on aerial photographs.

Evidential Value: Disused quarry pits

Group Value: None

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: At least two small quarry workings either side of the Nant Paradwys stream, with trackways running northwards to the Claerwen valley.

Accessibility:

Rarity: Common **Significance:** Minor Importance

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 16 NANT PARADWYS, CAIRN
 Bronze Age (Possible) CAIRN (POSSIBLE)
NGR: SN8911060630 - Approximate **Community:** Llanwrthwl
NPRN: **PRN:** 83006 CPAT

Site Status: No Site Status

Description:

A possible cairn, recorded by CPAT as having a central hollow. Ground photographs held by CPAT are not convincing and this is presently considered to be a dubious site. A small drainage gully runs to the southern side and any mounds here may be derived from cleaning or digging out the gully in the past.

Form of Evidence: Earthwork **Condition:** Not Known

Current land use: Rough Pasture

Confidence in Record?: Low CPAT have ground photos of the feature.

Evidential Value: Possible earthwork mound

Group Value: A second mound was noted 6 metres to the east and there are two scheduled cairns just to the north.

Historical Value: None

Aesthetic Value: None

Communal Value: Noen

Setting: On a north-facing slope to the western side of the Nant Paradwys stream.

Accessibility:

Rarity: Unknown **Significance:** Unknown

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 17 NANT PARADWYS, LONG HUT
 Medieval?; Post Medieval? LONG HUT
NGR: SN8914860560 - Feature Centred **Community:** Llanwrthwl
NPRN: **PRN:** 16571 CPAT

Site Status: No Site Status

Description:

A ruined long hut, now reduced to low wall-bases and measuring approximately 10 metres long north to south, but 5 metres wide.

Form of Evidence: Building **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: High Visible on aerial photographs.

Evidential Value: Drystone ruin

Group Value: None

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: On a north-facing slope to the western side of the Nant Paradwys stream, situated in a fork between the Paradwys and a minor tributary rill.

Accessibility:

Rarity: Not Common **Significance:** Locally Important

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 19 NANT DYRYS, LONG HUT
 Medieval?; Post Medieval? LONG HUT (POSSIBLE)

NGR: SN8891060320 - Feature Centred **Community:** Llanwrthwl
NPRN: **PRN:** 16575 CPAT

Site Status: No Site Status

Description:

The site of a possible long hut, although CPAT could only identify the northern wall and part of the western wall, with no trace of the eastern or southern sides. They determined the long hut would have been at least 8.8 metres long, northeast to southwest, by 4.8 metres wide.

Form of Evidence: Building **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: Low It is not clear whether this is a long hut or some other type of structure. Not visible on aerial photographs.

Evidential Value: Drystone remains

Group Value: Associated with a sunken shelter 40m to the east PRN16574

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: On a north-facing slope to the western side of the Nant Dyrys stream.

Accessibility:

Rarity: Not Common **Significance:** Unknown

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 20 NANT DYRYS, SUNKEN SHELTER
 Medieval?; Post Medieval? SUNKEN SHELTER (POSSIBLE)

NGR: SN8895060310 - Feature Centred **Community:** Llanwrthwl

NPRN: **PRN:** 16574 CPAT

Site Status: No Site Status

Description:

A possible sunken shelter excavated into a natural, stony bank. The oval hollow is entered by a narrow passage, with two boulders at the entrance into the passage. No measurements are available for the dimensions of the structure.

Form of Evidence: Other Structure **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: Moderate Appears to be visible on aerial photographs.

Evidential Value: Drystone remains

Group Value: Associated with a longhut 40m to the west PRN16575

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: On a north-facing slope to the eastern side of the Nant DyrYS stream.

Accessibility:

Rarity: Not Common **Significance:** Locally Important

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

Group Value: Associated with the Elan Valley estate
Historical Value: None
Aesthetic Value: None
Communal Value: The boundary defines the historic Elan Valley estate
Setting: Within the Elenydd uplands, chiefly on open moorland, defining the watershed of the Afon Elan.
Accessibility: Various.
Rarity: Rare **Significance:** Regionally Important
Known Threat?: Yes **Level of Threat:** Moderate
Type of Threat: Natural Decay

Many of the concrete boundary posts are now decaying, some have fallen and others have been lost.

Management Recommendation:

The full recording of the boundary posts would define the original extent of the estate. The re-erecting of fallen stones will improve their visibility. The addition of new posts in key locations could continue the tradition in the public mind.

ELHAR ID Number: 61 WAUN GEUFRON, PLATFORM
 Medieval; Post Medieval PLATFORM
NGR: SN9028070940 - Feature Centred **Community:** Rhayader
NPRN: **PRN:** 44054 CPAT

Site Status: No Site Status

Description:

An earthwork platform terraced into the base of a north-facing slope. The platform measures 9 metres long by 4.5 metres wide, with possible wall bases along each side. An earthwork bank adjoins the platform on the north side, defining an enclosure measuring 20 metres by 17 metres, the entrance of which is in its southern side. The slopes rising to the south display evidence of ridge and furrow cultivation marks.

Form of Evidence: Earthwork **Condition:** Damaged
Current land use: Rough Pasture
Confidence in Record?: High Visible on aerial photographs
Evidential Value: Earthwork
Group Value: Cultivation marks are visible on the slope above.
Historical Value: None
Aesthetic Value: None
Communal Value: None
Setting: At the bottom of a steep, north-facing slope to the western side of the Elan Valley, now close to the western edge of the Craig Goch reservoir.
Accessibility:
Rarity: Not Common **Significance:** Locally Important

 Post Medieval FARMSTEAD
NGR: SN9074567687 - Area Centred **Community:** Rhayader
NPRN: **PRN:** 56137 CPAT

Site Status: No Site Status

Description:

A former farmstead, which worked until the end of the 19th century, when the area was transformed by the construction of the Elan Valley reservoir complex. Allt Goch farmhouse survived into the early 20th century, at the northern edge of Craig Goch reservoir, just above the Elan Valley Railway, but fell out of use and had been demolished by the mid-20th century. A field barn higher up the slope to the northeast (NPRN 98311) is still visible as a ruin in the landscape and the former field system of the farm (PRN 56135) was later incorporated into neighbouring Hafod Farm.

Form of Evidence: Complex **Condition:** Damaged
Current land use: Various
Confidence in Record?: High Visible on historic mapping and on aerial photographs.

Evidential Value: Documentary sources, historic mapping, some surviving remains.

Group Value: None

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: To the eastern side of the Elan valley, occupying the valley slopes and now overlooking the Penygarreg reservoir.

Site Status: No Site Status

Description:

Aberglanhirin is an upland farm with its farmhouse and outbuildings situated on the southern side of the upper Elan valley. It has historically been part of the Cwm Elan Estate and remains under the ownership of the Welsh Water Elan Estate. The present house is a 20th century bungalow, with the 19th century farmhouse now used as an outbuilding, part of an L-shaped range which also includes a stable, two-bay threshing barn and a cow house. The second edition 1:10560 Ordnance Survey map of 1903 shows that some small additions were made to this range by the early 20th century, and another outbuilding was built to the east. This latter building has been largely demolished, although the lower portions of its walls are maintained as a fold or enclosure at the edge of the farmyard. The main building range survives in good condition and is used for agricultural purposes.

It is likely that this L-shaped range dates to the second-half of the 19th century and replaced or incorporated an earlier building or buildings. Two buildings are depicted on the 1833 1 inch to 1 mile Ordnance Survey map, but neither building is L-shaped. It should be noted that the large field enclosure attached to Aberglanhirin (NPRN 502605) is shown on the 1833 map.

Little is known of the early history of the farmstead. The earliest known documentary references to Aberglanhirin include the will of Thomas Pugh of Aberglanhirin, written in 1802. Pugh died in 1808 and left a relatively valuable estate worth £1378 to his children, including cattle, horses and sheep, some of the latter noted as being depastured on Moelcrychion and Bryn Suog, to the north of the Elan river.

 Post Medieval HOUSE
NGR: SN90077048 - Feature Centred **Community:** Rhayader
NPRN: 261806 **PRN:** 21197 CPAT

Site Status: No Site Status

Description:

A post-medieval house build on the eastern valley slope of the Elan valley. It is thought that it was single story shepherding cottage which had its roof raised and a croglofft added in the 19th century. The house fell into ruin during the 20th century but in 2015 was restored to serve as a bothy for walkers by the Elan Estate.

Form of Evidence: Building **Condition:** Converted

Current land use: Re-used

Confidence in Record?: High Verified in the field.

Evidential Value: Standing building, restored

Group Value: Associated with a field

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: A post-medieval house build on the eastern valley slope of the Elan valley. The valley below was flooded at the end of the 19th century to create Penygarreg Reservoir. The house fell into ruin during the 20th century but in 2015 was restored to serve as a bothy for walkers by the Elan Estate.

Rarity: Common **Significance:** Nationally Important
Known Threat?: No Identified Threat **Level of Threat:**
Type of Threat:

Management Recommendation:

ELHAR ID Number: 132 CARN RICET
 Bronze Age CAIRN
NGR: SN87157092 - Inaccurate **Community:** Rhayader
NPRN: 304804 **PRN:**

Site Status: No Site Status

Description:

Carn Ricet is a possible prehistoric cairn that is now denuded, turf-covered, and hard to define. It is disturbed by a trackway (NPRN 503508), and the small amount of stone visible on the surface would appear to be the remains of a more recent cairn marking the boundary of a sheep walk and possibly the line of a drovers' road.

Source Ordnance Survey 495 Record Card, SN87SE1).

Form of Evidence: Earthwork **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Documentary evidence

Group Value: None

Historical Value: Mentioned in historic sources

Aesthetic Value: None

Communal Value: None

Setting: This very denuded cairn is situated on the upper valley slope to the south of the Nant Hirin valley, in a location which offers good views from the northwest around to the northeast. The trackway known as the Monks' Trod runs across the cairn which seems to have hastened its erosion in modern times to the point that it is virtually invisible in the field.

Accessibility: Reasonable.

Rarity: Not Common **Significance:** Unknown

Known Threat?: Yes **Level of Threat:** High

Type of Threat: Visitor Erosion

Surface evidence for the cairn is now slight but it may still have archaeological potential

Management Recommendation:

This cairn needs to be better understood. Geophysical survey may help reveal its character and identify any surviving features of archaeological interest, potentially followed by archaeological evaluation. Restoring the cairn as a landmark and rerouting the footpath around the monument would also improve matters.

 Post Medieval PILLOW MOUND
NGR: SN8987771986 - Feature Centred **Community:** Rhayader
NPRN: 24576 **PRN:** 50329 CPAT

Site Status: No Site Status

Description:

A pillow mound on Esgair y Ty, one of a group of eight which together form a rabbit warren, NPRN 340835. This pillow mound is the westernmost of a pair of conjoined mounds, separated from the main group by the modern Rhayader to Cwmystwyth road, NPRN 502700. The mound measures approximately 19m long north to south by 5.5m wide and is up to 0.75m high. The mound to its east, NPRN 24577, is slightly larger.

Some 30m to the northeast of this pair of pillow mound is a large building platform, NPRN 502521, dissected by the road line. It is possible that the rabbit warren on Esgair y Ty is associated with this platform. If that were the case the proximity of the pair of pillow mounds to the platform may indicate that they were reserved for breeding does, built close to the warrener's house, a pattern which is known to have occurred on medieval and early post medieval rabbit farms.

Form of Evidence: Earthwork **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Earthwork

Group Value: Part of Rabbit Warren NPRN 304835

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: This pillow mound is situated at the bottom of the valley slope to the northern side of the Elan valley. It is one of a pair of pillow mounds built close to a large earthwork platform, which was presumably the Warrener's house. When visited in May 2009 the site was grass-covered and in good condition.

 Medieval CHURCH (POSSIBLE)
NGR: SN89947229 - Approximate **Community:** Rhayader
NPRN: 143449 **PRN:** 3468 CPAT

Site Status: No Site Status

Description:

There is no evidence that a church has stood at this location. Samuel Lewis, in his Topographical Dictionary of Wales, records a tradition that there were two churches or chapels within the parish of Cwmtoyddwr which predated the parish church. Lewis records that the "vestiges of two ancient chapels are still visible". One is at Capel Madog, the other at Aber Hênllan. Lewis does not provide any further information or document his sources. There is an L-shaped building (NPRN 15538) on the banks of the Nant y Ffald, close to its confluence with the Elan, which is known as "Aberhenllan", but there is currently no evidence to associate this site with a putative church.

Form of Evidence: Documentary Evidence **Condition:** Not Known
Current land use: Rough Pasture
Confidence in Record?: Low The validity of the tradition that the name Aberhenllan points to a church at this location is unproven.

Evidential Value: Documentary
Group Value: Unknown
Historical Value: Mentioned in 19th century sources
Aesthetic Value: None
Communal Value: None
Setting: The existence of this church is not proven and its possible location the subject of speculation, but thought to be in the vicinity of Aberhenllan.

 Post Medieval HOUSE
NGR: SN8824472110 - Feature Centred **Community:** Rhayader
NPRN: 30848 **PRN:** 48703 CPAT

Site Status: No Site Status

Description:

A denuded long hut, which has two internal cells. The building is reduced to low, earth and stone wall bases, no more than 0.4m high and as much as 1.5m wide at the gable ends. It is on a north-northeast to south-southwest alignment, measuring 10m long by 5m wide. The terrace is slightly larger, being 12m long and up to 7m wide, with the west-northwestern edge cut into the hillslope. There is evidence of a low bank enclosing three sides of the terrace, presumably some form of drainage hood, with the east-southeast side being left open. The entrance(s) must have been in the east-southeast side, but are no longer visible.

There is a well-preserved earthwork enclosure, NPRN 502684, approximately 10m to the northeast and some evidence of lazy bed cultivation, NPRN 502685, approximately 150m to the south-southwest. Aerial photographs seem to show that there may also be denuded cultivation ridges on the natural terrace on which this long hut and associated enclosure sit, but this was not evident on the ground when visited in 2009, despite low sunlight. Vegetation cover was grazed grass.

Form of Evidence: Earthwork **Condition:** Damaged

Current land use: Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Earthwork

Group Value: Associated with enclosure NPRN 502684

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: This long hut is situated on a levelled terrace cut into a moderate slope on the northern side of the Nant Hirin valley, overlooking the valley and stream to the southeast. The site lies within the enclosed land associated with Aberglanhirin farm.

ELHAR ID Number: 158 ELAN VILLAGE, BIRMINGHAM CORPORATION WATERWOLF
Post Medieval SETTLEMENT

NGR: SN933650 - Area Centred **Community:** Rhayader

NPRN: 261453 **PRN:** 87211 CPAT

Site Status: No Site Status

Description:

Elan Village was originally built for the workers and staff employed in the construction of the Elan Valley reservoir scheme by Birmingham Corporation during the 1890s. After the completion of the scheme, the wooden houses built for the workforce were cleared away and a number of fine stone buildings were constructed for the administration of the estate and to house officials and workers employed on the maintenance and management of the reservoir complex. Also recorded in the HER as PRN16137.

Form of Evidence: Complex **Condition:** Near Intact

Current land use: In Use

Confidence in Record?: High Verified in the field

Evidential Value: Village in use

Group Value: Associated with the Elan Valley Reservoir Scheme

Historical Value: Described in historical sources

Aesthetic Value: Includes buildings built in the Arts and Crafts architectural style.

Communal Value: Some buildings have public access

Setting: Elan Village is situated in the Elan Valley, northeast of the Caban Coch reservoir dam. It is sheltered by the steep valley sides rising to Cefn Llanfadog to the northwest and Carn Gafallt to the southeast.

Accessibility:

Rarity: Not Common **Significance:** Nationally Important

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

 Bronze Age CIST
NGR: SN9312068952 - Feature Centred **Community:** Rhayader
NPRN: 261589 **PRN:** 43877 CPAT
Site Status: Scheduled Ancient Monument RD211

Description:

Remains of a stone cist measuring approximately 1 metre long, 0.80 metres wide and 0.20 metres deep. There is no trace of a cairn or barrow surrounding the feature.

Form of Evidence: Other Structure **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: High Modern, coherent descriptions available.

Evidential Value: Damaged structure

Group Value: Possibly associated with the Trehesglog Stone Row to the south

Historical Value: Described in archaeological sources

Aesthetic Value: None

Communal Value: None

Setting: The original setting of this cist is not understood. It now survives in an area of open moorland.

Accessibility: Difficult

Rarity: Rare **Significance:** Nationally Important

Known Threat?: Yes **Level of Threat:** Moderate

Type of Threat: Vegetation

This feature would be easily lost if vegetation increased around it, particularly purple moor grass.

Management Recommendation:

Control bilberry growth and manage spread of heather or purple moor grass in the immediate vicinity.

 Medieval?; Post Medieval? ROAD
NGR: SN85646974 - Linear **Community:** Rhayader
NPRN: 23712 **PRN:** 64129 CPAT

Site Status: No Site Status

Description:

A trackway across the Elenydd hills, likely to have once been a droving route, with possible medieval origins. In recent decades it has become known as "The Monks' Trod" although there is no documented evidence of an association with its use by the monastery of Strata Florida. This section runs from the ford across the Afon Claerwen at Rhyd Hengae, northeastwards to a ford across the Afon Elan at Aber Henllan. Sections of this part of the trackway are disappearing into peat bogs on higher ground, but for most of its length it remains in good condition.

Form of Evidence: Earthwork **Condition:** Near Intact
Current land use: In Use
Confidence in Record?: High Verified in the field.
Evidential Value: Earthwork
Group Value: The trackway proceeds southwest of Rhyd Hengae to the Ffair Rhos road.
Historical Value: Mentioned in archaeological sources
Aesthetic Value: None
Communal Value: None
Setting: A trackway across the Elenydd hills.

Type of Threat:

Management Recommendation:

ELHAR ID Number: 220 ESGAIR-Y-TY, RABBIT WARREN
 Post Medieval RABBIT WARREN
NGR: SN89767213 - Area Centred **Community:** Rhayader
NPRN: 304835 **PRN:**

Site Status: No Site Status

Description:

Eight pillow mounds on a generally southeast facing slope called Esgair y Ty. When visited in May 2009 the site was in an area of rough grazing where the vegetation was grass and bracken. The largest of the mounds is approximately 40m long, the shortest approximately 9m. All are in a good state of preservation and obvious landscape features. Six of the pillow mounds are on the hillslope to the north of the modern Cwmystwyth to Rhayader road (which follows the line of the late 18th century turnpike road and an earlier road). Two others lie side by side to the south of the road, possibly detached for a specific reason, as they are located close to a large building platform, NPRN 502521, first noted in 2009. This platform has been dissected by the road, but either side of the road there is evidence of a building that stood on the platform.

It may be speculated that there was a house here that may have served as the warrener's house associated with the rabbit warren. The pair of pillow mounds to the south of the road and close to the building platform could conceivably have been reserved for breeding does, hence their separation from the main pillow mound group on the higher slopes.

Form of Evidence: Complex **Condition:** Near Intact
Current land use: Rough Pasture
Confidence in Record?: High Verified in the field.
Evidential Value: Earthworks
Group Value: Complex of features
Historical Value: None
Aesthetic Value: None
Communal Value: None
Setting: Eight pillow mounds on a generally southeast facing slope called Esgair y Ty, from where there are good views over the Elan valley to the southeast, towards Pont ar Elan.
Accessibility: Close to roadway.
Rarity: Not Common **Significance:** Nationally Important
Known Threat?: Yes **Level of Threat:** Moderate
Type of Threat: Erosion

The mowing of bracken may denude the earthwork pillow mounds and cultivation ridges in the complex

Management Recommendation:

Avoid close cropping across the area and avoid driving over the pillow mounds.

ELHAR ID Number: 222 CISTFAEN, CAIRN I
 Bronze Age CAIRN
NGR: SN86367701 - Feature Centred **Community:** Rhayader
NPRN: 304799 **PRN:**
Site Status: Scheduled Ancient Monument RD209

Description:

A large stone cairn measuring 14 metres in diameter and standing up to 1.3 metres high. A number of crude shelters have been built on the cairn mound.

Form of Evidence: Documentary Evidence **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Stone cairn

Group Value: One of a group of cairns around the hill summit

Historical Value: Mentioned in archaeological sources.

Aesthetic Value: None

Communal Value: None

Setting: Just to the south of the summit of Cistfaen hill, from where there would have been excellent views to the west, south and east, although the hill summit would have limited views to the north. Forestry plantations to the east, north and west have further closed the views from the site. There is a second large cairn to the north (NPRN 309812).

 Bronze Age CAIRN
NGR: SN89436950 - Feature Centred **Community:** Rhayader
NPRN: 261516 **PRN:** 4087 CPAT

Site Status: No Site Status

Description:

A very denuded, low cairn measuring circa 6 metres by 4 metres in extent. Some stone protrudes through the grass, but the monument is very damaged and almost unrecognisable.

Form of Evidence: Other Structure **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: Moderate Recent, coherent description and photograph in the regional HER. Not certain about accuracy of grid-reference number, although it must be close.

Evidential Value: Denuded cairn

Group Value: None

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: This cairn is situated on a low spur, above and to the western side of the former course of the Elan river, from where there would have been views along the valley floor. The adjacent part of the valley has been flooded to create the Craig Goch reservoir.

Accessibility: Not difficult.

Rarity: Not Common **Significance:** Regionally Important

Known Threat?: Yes **Level of Threat:** Moderate

Type of Threat: Agriculture

If Molinia were to be mown here machinery could damage the monument, which is not obvious.

Management Recommendation:

Increase awareness of the monument.

ELHAR ID Number: 237 CERRIG-CWPLAU, FARMSTEAD
 Post Medieval FARMSTEAD
NGR: SN86846344 - Area Centred **Community:** Rhayader
NPRN: 261352 **PRN:**

Site Status: No Site Status

Description:

This is a post-medieval farmstead on the Elan Estate. The farmhouse is on the valley slope to the western side of the Claerwen Valley, sheltered by a rocky hill immediately to the west. In modern times the Claerwen Dam has been built 100 metres to the north, with its spillway immediately in front of the property. Nevertheless this remains in occupation as a working upland farm.

Form of Evidence: Complex **Condition:** Intact

Current land use: In Use

Confidence in Record?: High Verified in the field.

Evidential Value: Working farmstead

Group Value: One of the farms of the Elan Estate

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: The farmhouse is on the valley slope to the western side of the Claerwen Valley, sheltered by a rocky hill and a small stand of deciduous trees immediately to the west.

Accessibility:

Rarity: Not Common **Significance:** Locally Important

Known Threat?: No Identified Threat **Level of Threat:**

ELHAR ID Number: 239 CEFN TROEDRHIW-DRAIN CIST
 Bronze Age CIST
NGR: SN8881466669 - Feature Centred **Community:** Rhayader
NPRN: 310036 **PRN:** 5177 CPAT
Site Status: Scheduled Ancient Monument RD214

Description:

The cist is as described above, lying on the baulk between two peat cuttings. It was overgrown with purple moor grass and reeds when visited in September 2009 and hard to find. The cist is defined by upright slabs, two parallel shorter ones aligned east-west inserted between the longer ones aligned north-south. The western slabs is now leaning in towards the centre. The internal cist measures 0.55m north-south by 0.75m. Further stone was felt under the vegetation cover to the west of the cist although its form could not be ascertained.

Form of Evidence: Documentary Evidence **Condition:** Near Intact
Current land use: Rough Pasture
Confidence in Record?: High Verified in the field.
Evidential Value: Stone cist
Group Value: None
Historical Value: Mentioned in historical sources
Aesthetic Value: None
Communal Value: None
Setting: This cist lies within an area of peat bog cut over a century ago, when the cist was exposed.
Accessibility: Reasonable access
Rarity: Rare **Significance:** Nationally Important
Known Threat?: Yes **Level of Threat:** Moderate
Type of Threat: Vegetation

This feature becomes reed-filled and if allowed to become infilled would disappear from view.

Management Recommendation:

Keep free of vegetation.

NPRN: 24577 **PRN:** 50330 CPAT

Site Status: No Site Status

Description:

A pillow mound on Esgair y Ty, one of a group of eight which together form a rabbit warren, NPRN 340835. This pillow mound is the easternmost of a pair of conjoined mounds, separated from the main group by the modern Rhayader to Cwmystwyth road, NPRN 502700. It measures c.20m long x 5.5m wide and is up to 0.75m high, being in good condition. The mound to its west, NPRN 24576, is slightly smaller.

Some 25m to the northeast of this pillow mound is a large building platform, NPRN 502521, dissected by the road line. If that were the case the proximity of the pair of pillow mounds to the platform may indicate that they were reserved for breeding does, built close to the warrener's house, a pattern which is known to have occurred on medieval and early post medieval rabbit farms.

Form of Evidence: Earthwork **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Earthwork

Group Value: Part of Rabbit Warren NPRN 304835

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: This pillow mound is situated at the bottom of the valley slope to the northern side of the Elan valley. It is one of a pair of pillow mounds built close to a large earthwork platform, which was presumably the Warrener's house. When visited in May 2009 the site was grass-covered and in good condition.

Management Recommendation:

ELHAR ID Number: 277 MAEN HIR; GLAN FEDWEN, CAIRN
 Bronze Age CAIRN
NGR: SN8576075950 - Feature Centred **Community:** Rhayader
NPRN: 308692 **PRN:**
Site Status: Scheduled Ancient Monument MG322

Description:

This fine stone cairn measures 18.5m in diameter and is 1.3m high. A rough sheep-shelter, c.5m square, has been created on top of the cairn. Several smaller cairns, NPRNs 502524-504527, are recorded close by and together the cairns form cairn cemetery NPRN 502591.

Form of Evidence: Other Structure **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field

Evidential Value: Stone cairn

Group Value: Central feature in a cairn cemetery

Historical Value: Mentioned in archaeological sources

Aesthetic Value: None

Communal Value: None

Setting: A large Bronze Age cairn situated on a natural terrace, from where there are excellent views southwestwards down the Ystwyth valley. It is notable that this cairn, despite its impressive size, is virtually invisible in the landscape and is only seen from close proximity. It is the central cairn in a cairn cemetery.

Accessibility:

Rarity: Not Common **Significance:** Nationally Important

Known Threat?: No Identified Threat **Level of Threat:**

ELHAR ID Number: 320 MOELFRYN, DESERTED RURAL SETTLEMENT
 Post Medieval LONG HUT

NGR: SN9390871926 - Feature Centred **Community:** Rhayader

NPRN: 86936 **PRN:** 110739 CPAT

Site Status: No Site Status

Description:

The remains of a long hut at the heart of the Moelfryn deserted settlement complex, measuring 14 metres by 6.5 metres. Only the outline of the walls now survive.

Form of Evidence: Earthwork **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: High Recent, coherent description. Shown on historic Ordnance Survey mapping and aerial photographs.

Evidential Value: Earthwork

Group Value: Part of the Moelfryn deserted settlement complex

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Situated at circa 470 metres above sea level on a northeast to east facing slope, with views over the Wye Valley, in an area of rough pasture. The ground rises to the west and would provide shelter from the prevailing winds.

Accessibility:

Rarity: Not Common **Significance:** Regionally Important

Management Recommendation:

ELHAR ID Number: 321 CWM ELAN LEAD MINE, MINE OFFICE
 Post Medieval MINE OFFICE
NGR: SN90086521 - Approximate **Community:** Rhayader
NPRN: 261279 **PRN:** 18455 CPAT

Site Status: No Site Status

Description:

This ruined building is stone built, with red-brick arches above the doorways and windows. It is said to have been the office building for the Cwm Elan Lead Mine, which closed in 1876.

This building has erroneously been associated with the cottage of Pengwaidd, which is shown on the parish tithe map of 1840 and predates the mine office. Pengwaidd was actually at the site of the mine blacksmith's workshop (NPRN261471), further to the west. The garden plot associated with Pengwaidd is still visible to the north of the ruined smithy (PRN18459, NPRN261470).

Form of Evidence: Ruin **Condition:** Damaged
Current land use: Derelict
Confidence in Record?: High Visible on aerial photograph.
Evidential Value: Ruined building
Group Value: Part of the Cwm Elan Lead Mine complex
Historical Value: None
Aesthetic Value: None
Communal Value: None
Setting: A former mine office building, serving the Cwm Elan mine, which sits below the mine complex in the Nant Methan valley.

 Post Medieval MINE
NGR: SN89996510 - Area Centred **Community:** Rhayader
NPRN: 34022 **PRN:** 5495 CPAT
Site Status: Scheduled Ancient Monument RD153

Description:

Cwm Elan lead mine developed initially in the late 18th century and was worked until final closure in 1876. Significant surface remains are present at the complex, including several ruined mine buildings, as well as old leats, trackways, mine shafts, levels and adits and their associated spoil tips.

Form of Evidence: Complex **Condition:** Damaged

Current land use: Derelict

Confidence in Record?: High Visible on aerial photographs.

Evidential Value: Derelict mine complex

Group Value: One of several lead mines in the Elan valley area

Historical Value: Described in historical and archaeological sources

Aesthetic Value: None

Communal Value: None

Setting: The location of this mine was determined by geological factors. It was developed from the late 18th century until the late 19th century on the southern side of the Nant Methan, below the steep slopes of Craig Ddu, on the western side of the Elan valley.

Accessibility:

 Bronze Age ROUND BARROW (POSSIBLE)
NGR: SN9215066189 - Approximate **Community:** Rhayader
NPRN: 261704 **PRN:** 43983 CPAT
Site Status: Scheduled Ancient Monument RD213

Description:

A possible denuded round barrow with a possible cist exposed in the centre. The "cist" appears quite high up in the "barrow" mound however and there is a suspicion that this could be a natural feature. The cist measures 1 metre by 0.8 metres, which is a credible size for such as feature.

Form of Evidence: Other Structure **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: Low Not visible on aerial photographs, CPAT, RCAHMW and Cadw grid-references all give different positions. CPAT seem to be most likely to be accurate.

Evidential Value: Earthwork

Group Value: None

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: On high ground to the east of the Elan Valley.

Accessibility: Remote

Rarity: Not Common **Significance:** Nationally Important

Known Threat?: Yes **Level of Threat:** Moderate

Type of Threat: Vegetation

Cadw report that the barrow is heavily bracken-covered.

Management Recommendation:

Careful removal of bracken.

ELHAR ID Number: 399 COED-Y-FOEL, PILL BOX III
 Modern PILLBOX
NGR: SN9112164192 - Feature Centred **Community:** Rhayader
NPRN: 261690 **PRN:**
Site Status: Scheduled Ancient Monument RD266

Description:

A type FW3/22 concrete and brick pillbox, dating to the Second World War. One of three constructed on the slope to the west of the Garreg Ddu dam to protect the dam.

Form of Evidence: Building **Condition:** Near Intact
Current land use: Derelict
Confidence in Record?: High Visible on aerial photographs and recent ground photographs.

Evidential Value: Standing structure
Group Value: One of three adjacent pillboxes
Historical Value: None
Aesthetic Value: None
Communal Value: None

Setting: Situated on the steep valley side to the east of the Garreg Ddu dam, from where there is a clear view across the dam. The pillbox is one of three positioned here during the Second World War to protect the dam.

Accessibility: Good
Rarity: Not Common **Significance:** Nationally Important

Known Threat?: Yes **Level of Threat:** Moderate
Type of Threat: Vegetation; Tourism

The pillbox is affected by vegetation. A picnic site alongside the pillboxes will potentially increase visitor footfall.

Management Recommendation:

Interpretation could help develop an understanding of the importance of these pillboxes and their scheduled status.

ELHAR ID Number: 400 RHOS-Y-GELYNEN, BANK AND DITCH II
 Modern? FIELDWORK (POSSIBLE)

NGR: SN9027363374 - Feature Centred **Community:** Rhayader

NPRN: 261688 **PRN:**

Site Status: No Site Status

Description:

A possible Second World War military fieldwork or firing trench for infantry training. It is a U-shaped trench, 1.5 metres wide by 0.5 metres deep, with a low earth bank to its eastern side, measuring 23 metres long, 2.5 metres wide by 0.5 metres high. The apex of the bank points to the east.

Form of Evidence: Earthwork **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: Moderate This earthwork is visible on aerial photographs but its date and purpose are not known.

Evidential Value: Earthwork

Group Value: One of at least two similar features

ELHAR ID Number: 408 BRIDDEL FELEN STANDING STONE; NANTGWYNLLYN STA
 Bronze Age STANDING STONE
NGR: SN9320969729 - Feature Centred **Community:** Rhayader
NPRN: 261819 **PRN:** 43200 CPAT
Site Status: Scheduled Ancient Monument RD196

Description:

A squat monolith, which is about 1.2m high, by 1.75 metres wide and 0.40 metres thick. It stands just to the south of a ford across the Nant Llyngwyn stream on open moorland. It should be noted that the ford is at the beginning of a trackway which crosses the mountain to Penygarrag and the heart of the Elan Valley.

Although scheduled as a Bronze Age standing stone, it is possible that this stone was erected as a marker stone in more recent times that recognised to mark an important short cut from the Rhayader road towards the Elan Valley.

Form of Evidence: Other Structure **Condition:** Intact
Current land use: Rough Pasture
Confidence in Record?: Moderate Not archaeologically attested as a standing stone, but scheduled as a Bronze Age monument.

Evidential Value: Stone in situ
Group Value: None
Historical Value: Described in archaeological sources
Aesthetic Value: None
Communal Value: None

Setting:
Accessibility: Highly accessible to walke
Rarity: Not Common **Significance:** Nationally Important

Known Threat?: Yes **Level of Threat:** Moderate
Type of Threat: Erosion

Risk of damage from erosion by walkers or vehicles. This has been a problem in the past.

Management Recommendation:

Monitoring erosion

 Unknown STANDING STONE
NGR: SN79716989 - Feature Centred **Community:** Ysbyty Ystwyth
NPRN: 303638 **PRN:** 5585 DAT

Site Status: No Site Status

Description:

A probably natural monolith which has been recognised since at least the 1530s when John Leland noted it during his "Itinerary through Wales". The small stone seems to be broken and reduced in size.

Form of Evidence: Documentary Evidence **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: This appears to be a natural stone

Group Value: None

Historical Value: Mentioned by John Leland in the 1530s

Aesthetic Value: None

Communal Value: None

Setting: On the summit of a small ridge to the southeast of Llyn Fyrddon Fach, which is a noted viewpoint from where nine lakes are visible.

Accessibility:

Rarity: Not Common **Significance:** Unknown

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 426 DRYGARN FAWR EAST, CAIRN
 Bronze Age CAIRN
NGR: SN86755858 - Feature Centred **Community:** Llanwrthwl
NPRN: 304679 **PRN:** 807 CPAT

Site Status: No Site Status

Description:

A Bronze Age cairn measuring almost 9 metres in diameter with some evidence of a kerb around its outer edge. A large "beehive" cairn of probable 19th or early 20th century date stands on top of the cairn, built of stone taken from the cairn body.

Form of Evidence: Other Structure **Condition:** Near Intact
Current land use: Rough Pasture
Confidence in Record?: High Visible on aerial photographs.
Evidential Value: Stone cairn
Group Value: One of two large cairns on the summit of Drygarn
Historical Value: Mentioned in historical sources
Aesthetic Value: None
Communal Value: None
Setting: To the east of the summit of Drygarn with good views to the north, west and south.
Accessibility:
Rarity: Not Common **Significance:** Regionally Important
Known Threat?: No Identified Threat **Level of Threat:**
Type of Threat:

 Medieval?; Post Medieval LONG HUT?; SHEEP FOLD?

NGR: SN93046882 - Approximate **Community:** Rhayader

NPRN: 261586 **PRN:**

Site Status: No Site Status

Description:

The foundations of a rectangular structure are visible on a slope above a marshy area. The structure measured 10 metres by 6 metres and is orientated east to west. Originally interpreted as a sheepfold, it may be a long hut. A similar structure is recorded nearby to the north-northeast.

Form of Evidence: Other Structure **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: Moderate Grid-references are not accurate but the feature appears to be visible on aerial photographs.

Evidential Value: Drystone wall bases

Group Value: One of a pair of similar structures less than 50 metres apart.

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: The foundations of a rectangular structure are visible on a slope above a marshy area on the eastern slopes of Crugyn Ci.

Accessibility:

Rarity: Not Common **Significance:** Unknown

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 429 TROED-Y-RHIW-FELEN NEW HOUSE
 Post Medieval HOUSE
NGR: SN9410867122 - Feature Centred **Community:** Rhayader
NPRN: 81544 **PRN:**

Site Status: No Site Status

Description:

A farmhouse dating to the second half of the 19th century, shown on the 1st edition 1:10560 Ordnance Survey maps c.1880. It is stone built but has brick detail above its doors and windows.

Form of Evidence: Building **Condition:** Intact

Current land use: In Use

Confidence in Record?: High Visible on aerial photographs.

Evidential Value: Standing building, in use

Group Value: Associated with an earlier house which stands to the south

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Set on a steep, east-facing slope. Just to the south is an earlier dwelling which this building replaced in the later 19th century.

Accessibility:

Rarity: Common **Significance:** Locally Important

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

ELHAR ID Number: 430 COED-Y-FOEL, PILL BOX I
 Modern PILLBOX
NGR: SN9114564056 - Approximate **Community:** Rhayader
NPRN: 270333 **PRN:** 110463 CPAT
Site Status: Scheduled Ancient Monument RD266

Description:

A type FW3/22 concrete and brick pillbox, dating to the Second World War. One of three constructed on the slope to the west of the Garreg Ddu dam to protect the dam.

Form of Evidence: Building **Condition:** Near Intact
Current land use: Derelict
Confidence in Record?: High Visible on aerial photographs and recent ground photographs.

Evidential Value: Standing structure
Group Value: One of three adjacent pillboxes
Historical Value: None
Aesthetic Value: None
Communal Value: None

Setting: Situated on the steep valley side to the east of the Garreg Ddu dam, from where there is a clear view across the dam. The pillbox is one of three positioned here during the Second World War to protect the dam.

Accessibility: Good
Rarity: Not Common **Significance:** Nationally Important

Known Threat?: Yes **Level of Threat:** Moderate
Type of Threat: Vegetation; Tourism

The pillbox is affected by vegetation. A picnic site alongside the pillboxes will potentially increase visitor footfall.

Management Recommendation:

Interpretation could help develop an understanding of the importance of these pillboxes and their scheduled status.

ELHAR ID Number: 438 LLUEST PEN-RHIW
 Post Medieval DWELLING
NGR: SN93097147 - Feature Centred **Community:** Rhayader
NPRN: 30782 **PRN:** 3761 CPAT

Site Status: No Site Status

Description:

The ruined dwelling which once served the small farmstead of Lluest Penrhiw. It was occupied during the 19th century and was still in use at the end of the century. It is probable that the present ruin replaced an earlier "lluest" or shepherding station on the mountain pastures. "Lluestau" in the neighbouring Pumlumon uplands have been shown to date to early post-medieval times, often with origins as medieval hafods or summer houses. The origins of Lluest Penrhiw are not known.

Form of Evidence: Ruin **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: High Visible on aerial photographs and historic mapping.

Evidential Value: Drystone ruins

Group Value: Associated with a field system

Historical Value: Mentioned in early documents and shown on historic mapping

Aesthetic Value: Well photographed by the RCAHMMW from the air in winter

Communal Value: None

Setting: This abandoned dwelling stands on the northern side of the Nant y Sarn valley. It stands within a post-medieval field system and appears to have been developed as a farmstead in post-medieval times. Its origins as a lluest (shepherding cottage) suggest it would originally have been a small cottage on the upland pastures, possibly founded on the site of an earlier, medieval, hafod or summer house.

Site Status: Scheduled Ancient Monument BR216

Description:

A medieval or early post-medieval upland settlement complex, possibly in the hafod tradition. It includes the remains of several rectangular stone buildings as well as a large, irregular fold. All the structures are of drystone build and reduced to wall bases.

The complex includes PRNs 16530 & 16534-49.

Form of Evidence: Documentary Evidence **Condition:** Damaged

Current land use:

Confidence in Record?: High Visible on aerial photographs.

Evidential Value: Drystone ruins

Group Value: A cluster of settlement features

Historical Value: Described by Cadw for Scheduling purposes

Aesthetic Value: None

Communal Value: None

Setting: In the shelter of the Nant Rhyd Goch valley.

Accessibility:

Rarity: Not Common **Significance:** Nationally Important

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

 Medieval?; Post Medieval? BOUNDARY BANK
NGR: SN92496250 - Inaccurate **Community:** Llanwrthwl
NPRN: 261378 **PRN:**

Site Status: No Site Status

Description:

An earthwork bank over 1 metre wide and up to 0.60 metres high. It defines an area of cultivation ridges to its northern side of probable medieval or early post-medieval date.

Form of Evidence: Earthwork **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: High Visible on aerial photographs.

Evidential Value: Linear earthwork

Group Value: Apparently associated with a large area of ridge and furrow cultivation to its northern side, and a medieval or later settlement to the east of Nant y Gro, which are unrecorded.

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Runs northeast to southwest across the slopes to the west of Nant y Gro and defines an area of cultivation ridges to its northern side of probable medieval or early post-medieval date.

Accessibility:

Rarity: Common **Significance:** Locally Important

Known Threat?: No Identified Threat **Level of Threat:**

ELHAR ID Number: 464 COED-Y-FOEL, PILL BOX II
 Modern PILLBOX
NGR: SN9111664125 - Approximate **Community:** Rhayader
NPRN: 270332 **PRN:**
Site Status: Scheduled Ancient Monument RD266

Description:

A type FW3/22 concrete and brick pillbox, dating to the Second World War. One of three constructed on the slope to the west of the Garreg Ddu dam to protect the dam.

Form of Evidence: Building **Condition:** Near Intact
Current land use: Derelict
Confidence in Record?: High Visible on aerial photographs and recent ground photographs.

Evidential Value: Standing structure
Group Value: One of three adjacent pillboxes
Historical Value: None
Aesthetic Value: None
Communal Value: None

Setting: Situated on the steep valley side to the east of the Garreg Ddu dam, from where there is a clear view across the dam. The pillbox is one of three positioned here during the Second World War to protect the dam.

Accessibility: Good
Rarity: Not Common **Significance:** Nationally Important

Known Threat?: Yes **Level of Threat:** Moderate
Type of Threat: Vegetation; Tourism

The pillbox is affected by vegetation. A picnic site alongside the pillboxes will potentially increase visitor footfall.

Management Recommendation:

Interpretation could help develop an understanding of the importance of these pillboxes and their scheduled status.

 Post Medieval HOUSE
NGR: SN92936969 - Feature Centred **Community:** Rhayader
NPRN: 81345 **PRN:** 125039 CPAT

Site Status: No Site Status

Description:

A small, ruined, drystone cottage of uncertain origin. It has been a ruin since at least the early 20th century. The term "Lluest" usually signifies a shepherding station of early post-medieval origin, but this building is not shown on either the 1820 Ordnance Survey Original Surveyors Drawings, nor on the 1841 parish tithe map for Llansantffraid Cwmdeuddwr. Either it was already abandoned by 1820 or it post-dates the tithe map. The cottage is shown on the 1890 1:10560 scale Ordnance Survey map, but it is not clear if it was occupied or a ruin at that time.

Form of Evidence: Building **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Ruined building

Group Value: The cottage has a small enclosed garden area to its southern side (NPRN261593).

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: This cottage was built in a sheltered, minor stream valley just to the south of the Rhayader to Cwmystwyth road on the eastern side of Esgair Perfedd.

Accessibility:

Rarity: Not Common **Significance:** Locally Important

 Post Medieval STONE PILE
NGR: SN88466135 - Feature Centred **Community:** Llanwrthwl
NPRN: 277121 **PRN:**

Site Status: No Site Status

Description:

A small stone cairn, 1.75 metres in diameter and 0.40 metres high.

Form of Evidence: Earthwork **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: Moderate Recent, coherent description.

Evidential Value: Stone pile

Group Value: None

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: On the east-facing side of a local summit, from where there are good views to the Claerwen valley to the northeast.

Accessibility:

Rarity: Not Common **Significance:** Minor Importance

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 534 ESGAIRHAFOD CIST CAIRN II
 Bronze Age ROUND CAIRN
NGR: SN89126066 - Approximate **Community:** Llanwrthwl
NPRN: 404132 **PRN:**
Site Status: Scheduled Ancient Monument BR211

Description:

A very denuded round cairn, about 5 metres in diameter, which has been robbed and has its central cist left open.

Form of Evidence: Earthwork **Condition:** Damaged
Current land use: Rough Pasture
Confidence in Record?: Moderate Not visible on aerial photographs.
Evidential Value: Low stone cairn
Group Value: One of two cairns in close proximity
Historical Value: Described by Cadw for Scheduling purposes
Aesthetic Value: None
Communal Value: None
Setting: On a north facing slope to the west of Nant Paradwys, in an area obscured by bracken in summer.
Accessibility:
Rarity: Not Common **Significance:** Nationally Important
Known Threat?: No Identified Threat **Level of Threat:**
Type of Threat:

ELHAR ID Number: 584 NANT Y CAR (NORTH)
 Post Medieval METAL MINE
NGR: SN89086192 - Area Centred **Community:** Llanwrthwl
NPRN: 277004 **PRN:** 5513 CPAT

Site Status: No Site Status

Description:

Nant y Car (North) was a lead mine which operated between 1844 and 1883. It is likely that there was some small scale activity on the site prior to this. The site is now derelict and several mine shafts, spoil tips, trial workings and fragmentary buildings and structures can be seen running down the hill across an area of about 400 metres by 100 metres. On the higher slopes, to the south, are the shafts and tips, with the processing area at the northern end, close to the south bank of the Claerwen river.

Form of Evidence: Earthwork **Condition:** Damaged
Current land use: Derelict
Confidence in Record?: High Visible on aerial photographs.
Evidential Value: Includes building remains, tips and workings
Group Value: One of several metal mines in the locality
Historical Value: Described in historical sources
Aesthetic Value: None
Communal Value: None
Setting: The location of this mid-19th century metal mine was determined by geological factors. It is found on the valley slopes to the south of the Claerwen river, where old tips, shafts and building remains can still be seen.
Accessibility: Good.
Rarity: Not Common **Significance:** Regionally Important
Known Threat?: Yes **Level of Threat:** Moderate
Type of Threat: Agricultural Re-Use; Natural Decay

This mine site is not Scheduled and there is no management plan. A number of features of interest survive, including building remains, which may be susceptible to future landscaping or agricultural activity.

Management Recommendation:

A detailed survey and management plan is required. Possibly Scheduling. Open workings need to be securely fenced off if they aren't already for safety reasons.

 Post Medieval LONG HUT
NGR: SN8833164311 - Feature Centred **Community:** Rhayader
NPRN: 504532 **PRN:**

Site Status: No Site Status

Description:

A rectilinear long hut, reduced to its wall bases, which are less than 0.25m high and approximately 1m wide. The wall bases are composed of grassed-over banks with stone slabs protruding through the grass or still exposed. The structure overall measures 8m southwest-northeast by 4m and appears to sit on a platform terraced into the slope. Presumably a clom structure stood on this foundation. This long hut is probably associated with nearby sunken shelter NPRN 504533. When visited in September 2009 the area was used for rough grazing and the vegetation cover was grass.

Form of Evidence: Earthwork **Condition:** Near Intact
Current land use: Rough Pasture
Confidence in Record?: High Verified in the field.
Evidential Value: Stone foundation and earthwork
Group Value: Associated with Sunken Shelter NPRN 504533
Historical Value: None
Aesthetic Value: None
Communal Value: None
Setting: Situated in a hollow on a slope which falls away gently to the southeast.

NPRN: 277106 **PRN:**

Site Status: No Site Status

Description:

Form of Evidence: Ruin **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: Moderate

The grid reference appears to be incorrect but to refer to the nearby site of a building shown on late 19th and early 20th century Ordnance Survey maps and labelled as "Pen y Gwaith". It seems to have been associated with the lead mine. This building does not appear on the 1849 parish tithe map and was abandoned during the earlier 20th century. It may have been a cottage or mine building.

Evidential Value: Stone ruin

 Post Medieval BANK (EARTHWORK)
NGR: SN87176827 - Linear **Community:** Rhayader
NPRN: 261660 **PRN:**

Site Status: No Site Status

Description:

This earthwork watercourse is a former leat that took water from Llyn Cerrigllwydion Isaf for approximately 16km to feed Nant Methan and provide a head of water for the waterwheels at Cwm Elan mine (NPRN 34022). According to David Bick, the leat was dug over three months in 1876 by the New Cwm Elan mine company. It is orientated from east to west along the slope of Llethr Du and varies from 1 - 2m in width with a bank between 0.3 and 0.5m high with the ditch on the southern side. A section on Moelfryn, at SN8946966376 where it is taken across the level ridge top, is a cutting with pronounced banks either side.

Form of Evidence: Earthwork **Condition:** Near Intact
Current land use: Rough Pasture
Confidence in Record?: High Verified in the field.

ELHAR ID Number: 653 CERRIG GWALCH, PLATFORM
 Medieval PLATFORM (POSSIBLE)

NGR: SN93757020 - Approximate **Community:** Rhayader

NPRN: 269396 **PRN:**

Site Status: No Site Status

Description:

A possible building platform. The possible fan is evident, but not the apron, with the levelled area measuring about 8 metres northwest to southeast by 5 metres wide.

Form of Evidence: Earthwork **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: Moderate Not certainly an archaeological feature but has a coherent description.

Evidential Value: Earthwork

Group Value: Possible associated with a nearby longhouse and field system

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: A possible platform on the open common on a northeast facing slope.

Accessibility:

Rarity: Not Common **Significance:** Locally Important

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 654 MOELFRYN, CAIRN
 Post Medieval CAIRN
NGR: SN93617211 - Feature Centred **Community:** Rhayader
NPRN: 269440 **PRN:**

Site Status: No Site Status

Description:

Farm or shepherding marker cairn?

Form of Evidence: Earthwork **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: Moderate Not visible on aerial photographs but has a recent, coherent description.

Evidential Value: Stone pile

Group Value: None

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting:

Accessibility:

Rarity: Not Common **Significance:** Minor Importance

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 656 WAUN GEUFRON SHEEPFOLD II
 Post Medieval SHEEP FOLD
NGR: SN90957105 - Feature Centred **Community:** Rhayader
NPRN: 261797 **PRN:**

Site Status: No Site Status

Description:

A drystone sheepfold measuring 12 metres, east to west, by 5 metres wide. The walls still stand up to 1.25 metres high and the fold has been in occasional use into modern times.

Form of Evidence: Other Structure **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: High Visible on aerial photographs.

Evidential Value: Standing structure

Group Value: None

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: A drystone sheepfold built to the northern side of the Nant Cedenu stream.

Accessibility:

Rarity: Common **Significance:** Locally Important

Known Threat?: No Identified Threat **Level of Threat:**

Type of Threat:

Management Recommendation:

ELHAR ID Number: 660 CERRIG LLWYDION, ROUND BARROW
 Bronze Age CAIRN
NGR: SN90677344 - Approximate **Community:** Rhayader
NPRN: 269502 **PRN:** 247606 CPAT

Site Status: No Site Status

Description:

A small cairn, which has a ring of stone exposed through the grass approximately 5 metres in diameter, with stones heaped up inside the ring to form a low cairn, 4 metres x 3 metres in area and up to 0.4 metres high.

Form of Evidence: Other Structure **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: High Coherent description and visible on aerial photographs.

Evidential Value: Stone cairn

Group Value: Probably associated with a group of larger cairns just to the west on Rhiw Afon.

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Set on high ground at about 460 metres above sea level, overlooking a minor valley to the east, with views southwards across the Elan Valley and wider Elenydd district.

Accessibility:

Rarity: Not Common **Significance:** Nationally Important

Known Threat?: No Identified Threat **Level of Threat:**

ELHAR ID Number: 760 CERRIG LLWYDION DESERTED RURAL SETTLEMENT
 Post Medieval DESERTED RURAL SETTLEMENT
NGR: SN88136234 - Area Centred **Community:** Llanwrthwl
NPRN: 275646 **PRN:** 64067 CPAT
Site Status: Scheduled Ancient Monument BR287

Description:

An extensive upland deserted rural settlement complex which includes at least six long huts, along with banks and platforms. The area is hidden in bracken to a considerable extent and the archaeological record is confused. The NMR and HER records give different accounts of the locations of the component structures, many of which are not visible on aerial photographs.

Form of Evidence: Complex **Condition:** Various

Current land use: Rough Pasture

Confidence in Record?: High Visible on aerial photographs.

Evidential Value: Drystone and earthwork features

Group Value: A complex of long huts and associated features scattered across a large area

Historical Value: Mentioned in archaeological sources

Aesthetic Value: None

Communal Value: None

Setting: Situated on land gently sloping to the northeast, just above the top of the valley slope to the western side of the lower Claerwen valley.

Accessibility: Good

Rarity: Not Common **Significance:** Nationally Important

Known Threat?: Yes **Level of Threat:** Moderate

Type of Threat: Vegetation

Bracken and other invasive species cover parts of the area. Bracken roots can damage archaeological features.

Management Recommendation:

Targeted removal of bracken from archaeological features. Resurvey.

Management Recommendation:

ELHAR ID Number: 785 CAE BLAEN METHAN SHED
 Post Medieval SHEEP DIP
NGR: SN8906966159 - Feature Centred **Community:** Rhayader
NPRN: 261810 **PRN:**

Site Status: No Site Status

Description:

The tin shed houses a sunken, concrete sheep dip that was fed from water diverted from the Nant Methan via a small sluice or water control NPRN 504574. The sheep dip appears to be no longer used although the building is intact. According to Erwyd Howells in his 2005 book Good Men and True, page 10, the Birmingham Corporation built several communal dipping places in 1915 and this is thought to be the Blaenmethan one.

Form of Evidence: Building **Condition:** Near Intact
Current land use: Disused
Confidence in Record?: High Verified in the field.
Evidential Value: Standing building
Group Value: One of a number of sheep dips built by the Elan Estate in 1915
Historical Value: Mentioned in historic sources
Aesthetic Value: None
Communal Value: None
Setting: Built alongside the Nant Methan stream.
Accessibility: Can be reached via severa
Rarity: Not Common **Significance:** Locally Important
Known Threat?: Yes **Level of Threat:** High
Type of Threat: Natural Decay

The corrugated tin shed will not stand for many more years.

Management Recommendation:

Consider more detailed recording, potential for oral history link

Evidential Value: Stone foundation

Group Value: One of several settlement features in the upper Marchnant/Llwydnant valley.

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: On the southern bank of the Marchnant stream.

Accessibility: Good via the track up the

Rarity: Not Common **Significance:** Locally Important

Known Threat?: Yes **Level of Threat:** High

Type of Threat: Erosion

The adjacent stream has already eroded the northern corner of the building.

Management Recommendation:

Excavate this long hut to retrieve any data before the stream causes more damage.

NGR: SN8678474975 - Area Centred **Community:** Rhayader
NPRN: 502584 **PRN:**

Site Status: No Site Status

Description:

Bodtalog farmstead has origins as an upland farm in post medieval times. It is mapped on 19th century Ordnance Survey maps, which show a house and outbuilding within a small field system. By the early 21st century the earlier field system, which was defined by earthwork banks, has largely been supplanted by new field parcels defined by post and wire fences, rarely respecting the old field boundaries and enclosing a larger area. The 19th century house and outbuilding survive, but two larger farm buildings have been added to the south of the original farmyard. As an upland farm, the bulk of the land under the management of Bodtalog is an extensive upland pasture to the north of the main Cwmystwyth to Rhayader road. The holding has been in the management of the Elan Estate since the late 19th century and occupied by tenant farmers.

Form of Evidence: Complex **Condition:** Intact

Current land use: Various

Confidence in Record?: High Verified in the field.

Evidential Value: Working farmstead

Group Value: One of the farms of the Elan Estate

Historical Value: None

Aesthetic Value: None

Communal Value: NONE

Setting: Situated in the relatively sheltered Bodtalog valley, a tributary valley to the north of the upper Elan valley. It included a farmhouse and a group of farm buildings of 19th and 20th century date.

ELHAR ID Number: 862 ESGAIR Y TY, PLATFORM
 Post Medieval PLATFORM
NGR: SN8983472014 - Feature Centred **Community:** Rhayader
NPRN: 502521 **PRN:**

Site Status: No Site Status

Description:

The site of a substantial earthwork platform, which has unfortunately been dissected by the Rhayader to Cwmystwyth road, which was formerly a turnpike road. This does of course indicate that the site had been abandoned before the turnpike road was constructed in the early 19th century. The central section of the site has been lost as a result, but the upper and lower ends, including the platform hood and apron, survive as well as what appear to be the wall foundations of a building which stood on the platform, particularly at the southern end. Overall, the platform was approximately 35m north to south by 21.5m. It seems likely that a substantial building stood on the platform, possibly a house. The adjacent hill is known as Esgair y Ty, the reference to a house (Ty) may be derived to this site. On Esgair y Ty itself, a group of 8 pillow mounds survive, which may have been associated with this site (two of the pillow mounds are located close to the platform, to the south of the modern road. An extensive area of cultivation across Esgair y Ty may equally be associated with the site, although their relationship with the pillow mounds is unclear. When visited in May 2009 vegetation cover was grass.

Form of Evidence: Earthwork **Condition:** Near Destroyed

Current land use: Built Over; Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Earthwork

Group Value: Appears to be associated with Rabbit Warren NPRN304835

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: This large platform probably represents the site of the Warrener's House in the Esgair y Ty Rabbit Warren complex. It lies near the bottom of the southern flank of the hill and has been partly built over by the Rhayader to Cwmystwyth road, formerly a turnpike road, which runs across the centre of the platform.

Accessibility: At the roadside

Rarity: Not Common **Significance:** Nationally Important

Known Threat?: Yes **Level of Threat:** High

Type of Threat: Development

Road widening would destroy what remains of this platform.

Management Recommendation:

Excavate the remaining parts of the platform.

NPRN: 502672 **PRN:**

Site Status: No Site Status

Description:

An irregular stone cairn, positioned on a line of outcropping bedrock on the valley slope, north of Gors Lwyd, at the head of the Elan Valley. It is not clear if it is a funerary cairn or not. There is no earth component or evidence of structure, but it does seem to be an artificial stone pile. It is a low stone spread, 2.5m by 2m by 0.2m high. It is located in close proximity to another cairn (NPRN 502555) and within 350m of the Maen Hir cairn cemetery (NPRN 502591).

Form of Evidence: Other Structure **Condition:** Intact

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Stone cairn

Group Value: Several small cairns are found in the area

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Situated on the upper valley slope overlooking the upper Elan Valley to the southwest.

ELHAR ID Number: 884 GWAR Y TY, BANK (EARTHWORK) II
 Unknown BANK (EARTHWORK)
NGR: SN8984474657 - Linear **Community:** Rhayader
NPRN: 502687 **PRN:**

Site Status: No Site Status

Description:

A denuded earthwork bank, measuring 780m in length north-northeast to south-southwest. It is generally 3m wide at base and up to 0.5m high, with a slight ditch on its western side, which becomes more pronounced towards the north as the bank runs towards a natural rill on the northern flank of Gwar y Ty, which it eventually joins. This bank joins another bank on Gwar y Ty (NPRN 502548) at its southern end at SN8965574268. The two banks appear to be a land boundary, perhaps defining a large parcel of land on Gwar y Ty and Rhiw Afon. It is noteworthy that bank NPRN502548 runs into well-developed peat bogs, suggesting these boundaries are probably early post-medieval or earlier.

 Post Medieval LONG HUT
NGR: SN8721275994 - Feature Centred **Community:** Rhayader
NPRN: 502557 **PRN:**

Site Status: No Site Status

Description:

A rectilinear long hut, measuring 12m north northeast to south southwest by 5m overall. The walls are low, less than 0.5m high by 1m wide. The structure was possibly divided into two cells by a line of edge-set slabs. The smallest of these cells is at the north-northeast end of the building, and measures only 1.5m by 2m internally. There is a possible central entrance in the eastern, lateral wall.

Form of Evidence: Other Structure **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Earthwork

Group Value: None

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Set on a level terrace on the western side of the Mytalog Fawr stream. When visited in May 2009 the area was used for rough grazing and vegetation cover was grass and reeds.

Accessibility: Difficult

Rarity: Not Common **Significance:** Locally Important

Known Threat?: Yes **Level of Threat:** High

Type of Threat: Erosion

At the north northeastern end, the eastern corner of the structure has been eroded by the Mytalog Fawr stream, suggesting a long term threat to the integrity of the site.

Management Recommendation:

Could be excavated in advance of further damage by the stream.

Site Status: No Site Status

Description:

This denuded earthwork bank still measures 3m wide at base and up to 0.5m high. It has a shallow ditch along its southern side. It has been suggested in the past that it may be a medieval dyke, possibly marking a manorial boundary. However, when visited for the Uplands Initiative project in 2009, it was observed that this bank runs east-southeast to west-northwest from Rhiw Afon at SN9026773974 to Gwar y Ty at SN896574268, distance of some 675m. It appears that it may well join with another earthwork bank (NPRN 502687) at SN896574268, from where the latter bank runs northwards to a natural rill at the northern edge of Gwar y Ty. The two banks appear to be a land boundary, perhaps defining a large parcel of land on Gwar y Ty and Rhiw Afon. This may well be associated with post medieval land division, rather than earlier activity. There is no evidence of this bank running further to the west.

Form of Evidence: Earthwork **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Earthwork

Group Value: Associated with Bank NPRN502687

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: A bank crossing high ground on Rhiw Afon now partly submerged in peat bogs. Date and purpose not known, nor its original setting.

NPRN: 502700 **PRN:**

Site Status: No Site Status

Description:

This historic road follows the upper Elan Valley from the east, crossing into the Ystwyth at Blaen y Cwm. It is shown on Ogilby's road map of 1675 and may be based on an earlier medieval route. During the 18th century it was improved as a turnpike road, around 1790. More recently, during the 20th century, further improvements were made, with some straightening and widening undertaken, and the whole road being tarmaced. The modern roadway is well maintained. Some sections of the earlier turnpike or county road can still be seen running parallel to the modern road.

Form of Evidence: Earthwork **Condition:** Converted

Current land use: Re-used

Confidence in Record?: High Verified in the field.

Evidential Value: Largely hidden below a modern road, some section survive as earthwor

NPRN: 502530 **PRN:** 43193 CPAT

Site Status: No Site Status

Description:

A large, recumbent stone, 3m long by 0.6m wide, tapering to a point at one end, now lying at the southern edge of the Cwmystwyth to Rhayader road. Erwyd Howells has written in his 2005 book "Good Men and True" that the stone once stood on the northern side of the road, but was moved when the road was widened in the 1990s. It may be significant that the hill to the north is called Maen Hir.

Form of Evidence: Other Structure **Condition:** Moved
Current land use: Rough Pasture
Confidence in Record?: High Verified in the field.
Evidential Value: Recumbent stone
Group Value: None
Historical Value: None
Aesthetic Value: None
Communal Value: Local people are interested in this stone and the farmer is able to identify it.
Setting: This stone now lies to the southern side of the Cwmystwyth to Rhayader road. It is said to have formerly stood on the hillside nearby.
Accessibility: Good.
Rarity: Not Common **Significance:** Unknown
Known Threat?: Yes **Level of Threat:** Moderate
Type of Threat: Road

The stone was moved to its present roadside position in the 20th century and could be damaged or removed.

Management Recommendation:

Consider returning the stone to its original location and discussing re-erecting it as a standing stone, as local tradition maintains it once stood above the road, north of its present location.

 Post Medieval LONG HUT
NGR: SN8538574826 - Feature Centred **Community:** Ysbyty Ystwyth
NPRN: 522261 **PRN:**

Site Status: No Site Status

Description:

A large long hut, situated on a southeast-facing slope overlooking the upper Elan valley. The building was built directly onto the slope. There is slight evidence of terracing at the upper end of the structure, and perhaps a slight foundation platform beneath its lower end.. From the upper end to the lower end, the surface still falls southeastwards by almost 1 metre. The wall-bases are roughly coursed, composed of flat stone slabs, and define a structure which measures 10 metres southeast to northwest, by 5.5 metres wide. There is an entrance at a central point in the northeast lateral wall. It is notable that the northeastern half of the structure is largely stone-filled, whilst the southeastern portion is relatively stone free. This may suggest that the upper portion of the site was occupied by a structure with a large proportion of stone in its fabric, whilst the lower end of the site was clom-built.

Form of Evidence: Ruin **Condition:** Damaged
Current land use: Rough Pasture
Confidence in Record?: High Verified in the field.
Evidential Value: Drystone ruin
Group Value: Possibly associated with Sheepfold NPRN522259 and Shelter NPRN522260

 Post Medieval DAM
NGR: SN8447069970 - Feature Centred **Community:** Rhayader
NPRN: 503507 **PRN:**

Site Status: No Site Status

Description:

A dam on the eastern side of Llyn Cerrigllwydion Isaf controlling water into leat NPRN 261660. The drystone dam was placed across the point where the Nant Cerrigyrhelyg exits Llyn Cerrigllwydion Isaf. It consists of stone laid up to a height of 0.50m above the ground surface. The southern section is approximately 35m south southeast to north northwest, then at the northern end it runs to the north northeast for a further 10m. It is at least 3m wide, but was partially obscured by vegetation in October 2009. Water trickles through it to the stream, but it no longer supplies water to the leat. It was built to raise or maintain the water level of the lake so that sufficient water was available for leat NPRN 261660. It presumably dates to 1876 when the leat was constructed by the New Cwm Elan mine company, according to David Bick in his 1991 book *The Old Metal Mines of mid-Wales, Part 6 A Miscellany*, page 21.

Form of Evidence: Other Structure **Condition:** Intact

ELHAR ID Number: 979 MONKS WAY: CARN RICET TO RHYD HENGAE
Post Medieval TRACKWAY

NGR: SN8543169545 - Linear **Community:** Rhayader
NPRN: 503508 **PRN:**

Site Status: No Site Status

Description:

This section of the trackway or road, NPRN 23712, runs from Rhyd Hengae at SN8239368206, to Carn Ricet at SN8715370924, a distance of 6km. It is shown on the 1833 1" to 1 mile Ordnance Survey map as a road/track. On the 1st edition Ordnance Survey map of 1891 it is shown as track in use and labelled "Ancient Road". The trackway today follows the same line as shown on both these maps and is now called the Monks Way or the Monks Trod.

At Rhyd Hengae, SN8239368206, where it fords the Afon Claerwen, the track is quite broad and ill-defined with animal trampling. As it runs diagonally up the west-facing slope of Llethr Ffos To, it is a terraced path up to 4m wide but when it reaches the steeper section at SN8281768493 it narrows down to a footpath no more than 1m wide, suffering heavily from erosion. Reaching the top of the steeper slope at SN8297768546, it becomes a grass-covered, shallow "hollow way", up to 4m wide at base. At SN8315068577, an informal modern vehicle track approaching from the south joins the trackway giving access to NPRN 503506. From SN8317968612 the trackway is terraced rather than a hollow way, with some erosion occurring from vehicle use. Going down the slope the erosion increases as the surface water increases. The modern track diverges to the south of the trackway, presumably to avoid the rutted areas. At SN8327468775, the trackway is revetted on its southern side by rough, coursed stonework. The dating of this is uncertain but as this part of the trackway has been used for vehicular access to NPRN 503506 since the early 20th century it may relate to that. East of this the ground becomes wetter, with standing or running water on the trackway until it starts to climb again at SN8363268778. The boulder clay is much thinner here and the trackway braids across a rocky surface. Once the trackway reaches the flatter ground at Blaen Rhestr the trackway continues as a track with one set of wheel ruts, up to a short track created by vehicles driving to NPRN 503508. This track has been created by erosion of the overlying peat and the same natural boulder clay/stone can be seen exposed as is seen in the trackway. The trackway now continues along the broad ridge of Clawdd Du Mawr and Clawdd Du Bach to Carn Ricet. The trackway is sometimes indistinct neither a hollow way nor terraced. As it approaches Carn Ricet it becomes more of a hollow way, often water-logged. Beyond Carn Ricet, the trackway has been given NPRN 261236.

Andrew Fleming stated in 2009, *The Making of a Medieval Road, Landscapes, Vol 10, Number 1*, pages 77-100, that the much of this section of the trackway had been metalled. However, the wider scope of Upland Survey project in 2009, suggested that stone thought to be metalling was probably material within the boulder clay, seen clearly in many exposures throughout the area. The stone revetting of the trackway was only seen on the section of track used since the early 20th century for access to NPRN 503506. This use included bringing all the materials to build NPRN 503506, so it is possible that the stone revetting was to strengthen the trackway for this.

Form of Evidence: Earthwork **Condition:** Near Intact

Current land use: In Use

Confidence in Record?: High Verified in the field.

Evidential Value: Earthwork

Group Value: One section of a much longer historic route

Historical Value: Mentioned in historic sources

Aesthetic Value: None

Communal Value: Used as a public footpath

Setting: This section of the trackway or road, NPRN 23712, runs across high and exposed ground from Rhyd Hengae at SN8239368206, to Carn Ricet at SN8715370924, a distance of 6km.

Accessibility: Difficult

Rarity: Not Common

Significance: Locally Important

Known Threat?: Yes

Level of Threat: Low

Type of Threat: Erosion

Vehicles have caused damage in the past, but cyclists and walkers can also continue to erode some of the sensitive parts of the track where peat has now grown across some sections and poor drainage has led to localised flooding.

Management Recommendation:

Improved drainage in some areas might help, also rerouting the trail around sensitive or damaged sections.

 Bronze Age RING CAIRN
NGR: SN8606665273 - Feature Centred **Community:** Rhayader
NPRN: 504578 **PRN:**

Site Status: No Site Status

Description:

This is a well-preserved ring cairn, measuring circa 6m in diameter. It has a 1m wide stone ring, up to 0.35m high, created by slightly inclined stone slabs laid on top of each other giving an impression of rough coursing. The largest slabs are on the eastern side of the cairn. There is a 0.35m deep depression within the ring. Some of the stones have been moved from their original position, possibly by animal trampling in the past. The monument is situated on a flat terrace overlooking the Claerwen valley to the south. When visited in September 2009 the area was used for rough grazing and the vegetation cover was grass and thistles.

Form of Evidence: Earthwork **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Damaged cairn

Group Value: None

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: This cairn is situated on a flat-topped ridge which would have had views long the Claerwen valley to the west and southeast. In modern times the valley has been flooded to create the Claerwen reservoir.

Description:

An upland farmstead in a tributary valley, Nant y Beddau, on the northern side of the Claerwen valley. It is depicted on the 1831 1" to 1 mile Ordnance Survey map and Nant y beddau is shown on the 1841 parish tithe map, when it consisted of a house, and two fields, Cae Bach and Cae Mawr. At that time it was part of the Lewis Lloyd estate and occupied by Noah Edwards. Later it was acquired by the Birmingham Corporation when the Elan Valley reservoirs were being built and is still one of the tenant farms of the Elan Valley Trust. The farmstead is now larger than in the past with many small paddocks as well as larger pasture fields.

Form of Evidence: Complex **Condition:** Intact

Current land use: In Use

Confidence in Record?: High Verified in the field.

Evidential Value: Small upland farmstead, still lived in.

Group Value: One of the farms of the Elan Estate

ENCLOSURE

NGR: SN8854164471 - Feature Centred**Community:** Rhayader**NPRN:** 504534**PRN:****Site Status:** No Site Status**Description:**

A probable enclosure, which is estimated to be a little over 0.2ha in area, defined on two sides (north and southwest) by substantial earth banks and ditches, with a weaker bank just visible at its western side. The eastern side of this enclosure, which is either polygonal or trapezoidal in shape, is difficult to define as it is obscured in an area of thick vegetation (purple-moor grass). The southwestern bank is substantial, being 3.5m wide by 0.5m high, whilst the northern bank measures 3m x 0.25m high. Each have a ditch cut along their inner sides, making the purpose of this enclosure difficult to explain. A disturbed area to the west of the centre of the enclosure may be the site of a platform or other feature, but surface evidence was inconclusive.

Form of Evidence: Earthwork**Condition:** Near Intact**Current land use:** Rough Pasture**Confidence in Record?:** High

Verified in the field.

Evidential Value: Earthwork**Group Value:** None**Historical Value:** None**Aesthetic Value:** None**Communal Value:** None**Setting:**

Situated on a gentle, east-facing slope, at the edge of a boggy area in the upper Nant Cwm Coel valley. The bog has grown to submerge the eastern side of this enclosure.

Site Status: No Site Status

Description:

The deserted rural settlement at Lluest y Gadair is shown on the 1831 1" to 1 mile Ordnance Survey map but not named. It is shown as a single unoccupied building on the 1841 parish tithe map. By the time of the 1st edition 1:10560 Ordnance Survey map of 1891 it is shown as a single building within a very small field system, NPRN 504519. Trackway NPRN 504565 runs to it and a well NPRN 504518 may have provided its water. When visited in 2009, the settlement consisted of two ruined buildings NPRN 504517 and 504517. The field system was hard to define and the well was not found. Local information says that this place was also known as Lluest Abraham, which probably refers to the name of Abraham Davis, who lived here during the second half of the 19th century and appears on the census returns for 1871-1891. It may have been abandoned after the death of Abraham Davis in 1900, although is shown on later Ordnance Survey maps also. Amongst the ruins of the house, it was noted that some good roofing slates were present, with slating nails still in place. This suggests that the property may have been improved in the late 19th or early 20th century, perhaps at the time when the Birmingham Corporation was investing in the buildings on its tenant farms. One local tale about Lluest y Gadair has it that Abraham would bring new servants home from hiring fairs after dark, and by a circuitous route, in order that they wouldn't easily be able to leave him and find their way home. This was undoubtedly one of the more remote settlements in the area when it was occupied.

Form of Evidence: Complex **Condition:** Damaged

Site Status: No Site Status

Description:

A relatively well-preserved earthwork enclosure, which would appear to be associated with a more denuded long hut (NPRN 30848) some 10m to the southwest. The enclosure is defined by strong earth banks, 0.7m high by 2.5m wide at base, with an external ditch, 1m wide around all sides. There is an entrance in the centre of the west-northwestern side. The enclosure measures 12.5m west-northwest to east-southeast by 10m, but due to the thickness of its walls is relatively small internally, approximately 7.5m by 5m. It is presumably some form of animal pen or fold. When visited in June 2009 the area was improved pasture and the vegetation cover was of reeds and grass.

Form of Evidence: Earthwork **Condition:** Near Intact

Current land use: Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Earthwork

Group Value: Associated with long hut NPRN 30848

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: This enclosure is situated on a moderate slope on the northern side of the Nant Hirin valley, overlooking the valley and stream to the southeast. The site lies within the enclosed land associated with Aberglanhirin farm.

ELHAR ID Number: 1095 NANT BRYN YR IEIR, STRUCTURE
 Post Medieval COTTAGE (POSSIBLE)
NGR: SN8465172535 - Feature Centred **Community:** Rhayader
NPRN: 503521 **PRN:**

Site Status: No Site Status

Description:

The remains of a rectilinear drystone structure on the northwestern bank of the Nant Bryn yr Ieir. It is not shown on the 1833 1" to 1 mile map, nor on the 1st and 2nd edition 1:10560 Ordnance Survey maps of 1891 and 1905. However, according to Winchester and Straughton, 2008, a cottage is mentioned as having been built in 1811 at Brynyair in the 1722-1817 Manor of Grange Cwmtoyddwr presentments book. This structure and NPRN 503522 may be the remains of this cottage and ancillary structures as no other settlement site were found at Bryn yr Ieir during Uplands Survey in 2009.

The original nature of this structure was not clear as the southern end had been eroded away by the stream. What remained was a length of well-built roughly coursed wall, 1m wide and 0.75m high. This ran east southeast to west northwest for just over 5m. At its eastern end a separate wall ran at right angles to it towards the stream. There was a gap of 0.70m between the two and the second wall was more ruinous. At the western end of the first wall was the rubble remains of another wall again running at right angles towards the stream. Further rubble lay around about.

Form of Evidence: Ruin **Condition:** Near Destroyed
Current land use: Rough Pasture
Confidence in Record?: High Verified in the field.
Evidential Value: Drystone ruin, badly damaged
Group Value: Associated with a drystone wall NPRN503521
Historical Value: Probably named in 19th century manorial records as being built in 1811
Aesthetic Value: None
Communal Value: None
Setting: This ruined drystone structure is situated on the northwestern bank of the Nant Bryn yr Ieir, a tributary of the Gwngu, in a remote area of rough moorland. The stream has badly eroded the structure.
Accessibility: Remote area.
Rarity: Not Common **Significance:** Locally Important
Known Threat?: Yes **Level of Threat:** High
Type of Threat: Erosion

The stream has already badly eroded this feature and removed perhaps half of the structure.

Management Recommendation:

Excavation of the remaining portion of the building. The stream will eventually destroy the site.

 Bronze Age CAIRN
NGR: SN9070673875 - Feature Centred **Community:** Rhayader
NPRN: 502541 **PRN:**

Site Status: No Site Status

Description:

A well-preserved stone cairn, measuring 9.25m in diameter and up to 0.75m high. It does not appear that the cairn has been disturbed to any great extent.

Form of Evidence: Other Structure **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Stone cairn

Group Value: None

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: The cairn sits in a prominent position at the head of a natural pass between Rhiw Afon and Cefn Bach, from where there are good views to the upper Wye valley to the northeast.

Accessibility:

Rarity: Not Common **Significance:** Nationally Important

Known Threat?: No Identified Threat **Level of Threat:**

 Post Medieval LEAT (POSSIBLE)
NGR: SN8944566456 - Linear **Community:** Rhayader
NPRN: 504608 **PRN:**

Site Status: No Site Status

Description:

A linear earthwork feature that runs from SN8922866981 south southeastwards and appears to be cut by leat NPRN 261660 twice. It carries on down the south-facing slope and then turns to run southeastwards along the valley side. It has many of the characteristics of a mine leat, especially to its northern end where it is often a reed-filled gully. It may well be a failed attempt at building a leat to connect to the upper section of the leat (NPRN 261660) from Llyn Cerrigllwydion Isaf. At its northern extremity it runs parallel, but below, the leat, but suddenly peters out, which may be an indication that a point had been reached when it was realised that an error had been made or continuation was futile.

Form of Evidence: Earthwork **Condition:** Near Intact
Current land use: Rough Pasture
Confidence in Record?: High Verified in the field.
Evidential Value: Earthwork
Group Value: Associated with Cwm Elan Lead Mine
Historical Value: None
Aesthetic Value: None
Communal Value: None
Setting: A linear cut across an area of open moorland which descends to the Cwm Elan Lead Mine at its southeastern end.
Accessibility:
Rarity: Not Common **Significance:** Locally Important
Known Threat?: No Identified Threat **Level of Threat:**
Type of Threat:

Management Recommendation:

ELHAR ID Number: 1158 LAN FRAITH, ROUND BARROW
 Bronze Age ROUND BARROW
NGR: SN8744372252 - Feature Centred **Community:** Rhayader
NPRN: 502590 **PRN:**

Site Status: No Site Status

Description:

A circular, grassy mound, 7m in diameter and 0.6m high. It has a thin peat cover but slight erosion shows that the main body of the mound is composed of earth and stone.

Form of Evidence: Earthwork **Condition:** Intact

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Earthwork

Group Value: None

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: This barrow is located on a flat, broad hill summit, overlooking the Elan valley to the north. When visited in June 2009 the area was used for rough grazing and vegetation cover was grass.

Accessibility: Accessible from farm track

Rarity: Not Common **Significance:** Nationally Important

Known Threat?: Yes **Level of Threat:** Low

Type of Threat: Agricultural Re-Use

The area has evidently been periodically mown by Glanhirin farm to control the spread or density of Molinia. The mowing had crossed over the mound in 2009 and could erode the barrow if repeated.

Management Recommendation:

The barrow should be avoided by heavy machinery. Keeping the Molinia off the barrow is a valuable outcome of the mowing however but maybe in future strimming any Molinia growing on the mound would be preferable.

 Post Medieval COTTAGE
NGR: SN8593072983 - Feature Centred **Community:** Rhayader
NPRN: 503502 **PRN:** 4120 CPAT

Site Status: No Site Status

Description:

A drystone, rectangular structure on the southern side of the Afon Gwngu, close to where the Nant Garw joins it. The building measured 7m west northwest to east southeast by 6.75m. The walls were 0.70m wide and stood to a maximum of height of 0.20m. Rubble was scattered over the site, either side of the walls, particularly concentrated at the east southeast end. There was a suggestion of an internal structure in the northwest corner as shown by a squarish spread of stone, 1.5m by 2m. There may have been an entrance in the western corner. A more recent stone pile, NPRN 503515, has been erected on the remains of the westernmost wall.

Form of Evidence: Ruin **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Drystone ruin

Group Value: The dwelling in a deserted settlement complex which includes at least two sunken shelters

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Situated on a raised terrace at the southern side of the Afon Gwngu, close to its confluence with the Nant Garw. The building faces northeast over the floor of the Gwngu. A group of minor ancillary structures in clustered on either side of the river.

NPRN: 502552 **PRN:** 130969 CPAT

Site Status: No Site Status

Description:

Esgair Rhiwlan is dotted with hollows and mounds, less than 5m in diameter and 0.70m high. These features have been noted in the past but it was unclear what had created them. It had been thought they might be a cairnfield or cairn cemetery. However during the Elenydd (North) 2009 field survey fragments of shrapnel were found on the surface of the hill. The hollows and mounds appear to have been created by shelling. During the years immediately preceding and during the First World War, the hill formed a part of the Rhayader Artillery Camp, and was a target area for guns positioned to the eastern side of the Elan Valley, some 3km away. When visited in May 2009 the area was used for rough grazing and vegetation cover was grass.

Form of Evidence: Earthwork **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Multiple shellholes across the landscape, now overgrown

Group Value: Probably associated with earthworks on Penrhiwen NPRN269379

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: The shell holes caused by artillery fire are scattered across the top of Esgair Rhiwlan and on adjacent land to the west and southwest.

Accessibility: Easily accessed from the '

Rarity: Rare **Significance:** Nationally Important

Known Threat?: Yes **Level of Threat:** Moderate

Type of Threat: Visitor Damage

Fragments of shrapnel are scattered across the area and are susceptible to be removed by visitors as the site becomes more popular

Site Status: No Site Status

Description:

A sheep fold shown on 1st and 2nd edition 1:10560 Ordnance Survey maps of 1888 and 1903. The structure has roughly coursed drystone walls, standing up to 1.2m high and 0.8m thick. Overall, it measures 9.5m northeast to southwest by 5m. There is no firm evidence to suggest that the sheep fold has replaced an earlier structure, although it is not impossible that it was predated by a long hut. A slight change in the floor level inside the fold may be an indication that there was originally a two-celled structure here.

 Modern BUILDING
NGR: SN8417369196 - Feature Centred **Community:** Rhayader
NPRN: 503506 **PRN:**

Site Status: No Site Status

Description:

This building is only shown on modern Ordnance Survey mapping but according to a local informant was built at the beginning of the 20th century by local fishermen. It sits on a level area cut into the north northwest slope and revetted by a rough stone wall. The building now consists of a mortared stone base, on which stands a corrugated iron building, painted green. It measures 15m east northeast to west southwest by 5m. The gable at the east northeast end carries a chimney. Beyond the opposite gable, at the west southwest end, is a raised area, defined by stone. This may be the footings of an earlier phase of the building or a bit of landscaping. The building was still in use in 2009.

Form of Evidence: Building **Condition:** Intact
Current land use: In Use
Confidence in Record?: High Verified in the field.
Evidential Value: Standig building, in use
Group Value: None
Historical Value: Mentioned in historic sources
Aesthetic Value: None
Communal Value: Home to a fishing club
Setting: This building is situated in a remote location just to the east of Llyn Cerrigllwydion Uchaf, at the heart of the Elenydd uplands.

 Post Medieval HOUSE
NGR: SN8687766297 - Feature Centred **Community:** Rhayader
NPRN: 504517 **PRN:**

Site Status: No Site Status

Description:

A building is shown at Llest y Gadair on the 1831 1" to 1 mile Ordnance Survey map and on the 1841 parish tithe map, although it does not seem to have been occupied at the time of the tithe. When visited in September 2009 the building in this position was seen to be a former house, now ruinous. It measured 6m east southeast to west northwest by 5.5m, with an additional 2m wide sheltered area to the north northeast created by a wall now a grass-covered bank. The stone building appeared to have been deliberately levelled, the 0.60m wide walls standing to a height of 1m and centre of the building filled with rubble. The southeast corner of the building stood slightly higher, up to 1.5m and remains of lime mortar could be seen between the stones. The doorway was in the southern wall and there was probably an internal division running from the eastern side of this. Evidence of a slate roof could be seen lying around the house as well as some red brick, which suggests improvements or maintenance were carried out in the late 19th century when the Birmingham Corporation took over the Elan Estate.

Form of Evidence: Ruin **Condition:** Damaged
Current land use: Derelict
Confidence in Record?: High Verified in the field.

Site Status: No Site Status

Description:

A large enclosure taking in land on the northern side of the Nant y Sarn valley, up to 400 metres north to south by 300 metres wide. It is defined by an earthwork bank and tributary stream channels. Within it lies the smaller, possibly later, field system NPRN81344 associated with the abandoned Lluest Penrhiw farmstead.

Form of Evidence: Earthwork **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: High Visible on aerial photographs.

Evidential Value: Earthwork complex

Group Value: Associated with Lluest Penrhiw abandoned farmstead

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Situated on a south-facing valley slope, overlooking the Nant y Sarn, in an area of rough grazing.

 Bronze Age STANDING STONE
NGR: SN94306988 - Feature Centred **Community:** Rhayader
NPRN: 140790 **PRN:** 869 CPAT
Site Status: Scheduled Ancient Monument RD043

Description:

A standing stone measuring over 2 metres high by 0.53 metres wide and 0.18 metres thick. It has a cross incised into its southeastern face and is traditionally said to commemorate the murder of Einion Clud in 1177. The stone has been reset in a concrete base.

Form of Evidence: Other Structure **Condition:** Near Intact
Current land use: Rough Pasture
Confidence in Record?: High Visible on aerial photographs.
Evidential Value: Monolith reset in a new base
Group Value: None
Historical Value: Associated with a tradition about medieval prince Einion Clud
Aesthetic Value: A medieval cross is carved into the stone
Communal Value: None
Setting: Situated on a high and exposed ridge to the northern side of the Nant Gwynllyn valley.
Accessibility: Good.
Rarity: Not Common **Significance:** Nationally Important
Known Threat?: Yes **Level of Threat:** Low
Type of Threat: Erosion

Visitor and sheep trampling around the base of the stone have eroded the land surface slightly.

Management Recommendation:

Resurface the area immediately around the stone base.

 Post Medieval SHEEP FOLD (POSSIBLE)
NGR: SN8553475486 - Feature Centred **Community:** Ysbyty Ystwyth
NPRN: 522257 **PRN:**

Site Status: No Site Status

Description:

This structure was difficult to interpret when first recorded in 2011. It is clearly a rectilinear, drystone structure, measuring 10.5 metres long east to west, by 4.5 metres wide, but thick reed growth within and around the structure made it impossible to determine whether it was a fold or a long hut or long house. No evidence of an entrance was noted. The low wall bases defining the structure were up to 0.9 metres wide and consisted of mostly large stone blocks, and appeared rubble-built rather than coursed. There was some evidence that the western end was terraced into the hillside, but it was not clear whether the structure stood on an artificial platform or not.

Form of Evidence: Other Structure **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Drystone structure

Group Value: None

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Situated on a northeast facing terrace looking towards Gorslwyd bog. Sheltered by rising ground to the southwest.

Accessibility:

Rarity: Not Common **Significance:** Locally Important

NGR: SN91187156 - Feature Centred **Community:** Rhayader
NPRN: 165813 **PRN:** 36645 CPAT
Site Status: Listed Building 16,229 II

Description:

An early 19th century, round-headed, milestone bearing the inscription "Aberystwyth 25 Rhayader 4+). The stone appears to be in situ.

Form of Evidence: Other Structure **Condition:** Intact

Current land use: Rough Pasture

Confidence in Record?: High Stone visible at roadside.

Evidential Value: Stone stands in situ

Group Value: One of a series of milestones along the former turnpike road

Historical Value: Described by Cadw for listing purposes

Aesthetic Value: An early 19th century, round-headed, milestone

Communal Value: A distance marker on a public road

Setting: At the northern side of the Cwmystwyth to Rhayader road, at the eastern corner of the junction between the road and a minor trackway.

Accessibility: Good

Rarity: Common **Significance:** Nationally Important

Known Threat?: Yes **Level of Threat:** Moderate

Type of Threat: Vehicle Erosion

Due to proximity to the main road, the stone could be vulnerable to being disturbed by a vehicle.

LONG HUT

NGR: SN8060770356 - Feature Centred**Community:** Ysbyty Ystwyth**NPRN:** 522677**PRN:****Site Status:** No Site Status**Description:**

A drystone long hut which measures 8 metres east-southeast by west-northwest. It is terraced into the slope at its western end. Its wall bases are largely obscured by stone spread across the site.

Form of Evidence: Earthwork**Condition:** Damaged**Current land use:** Rough Pasture**Confidence in Record?:** High

Verified in the field.

Evidential Value: Drystone ruin**Group Value:** None**Historical Value:** None**Aesthetic Value:** None**Communal Value:** None**Setting:**

Situated at c.492m above sea level in a remote location in the Elenydd uplands. It is built on a natural terrace, facing eastwards down the Nant Llyn y Fign valley, with rising ground to the west providing shelter from prevailing winds.

Accessibility: Remote area**Rarity:** Not Common**Significance:** Locally Important**Known Threat?:** Yes**Level of Threat:** Low**Type of Threat:** Agriculture

A plastic feeding bucket at this location shows that the dry ground around the long hut is being used as a focus to feed cake to sheep. Over time animal trampling could impact on the archaeological remains here.

Management Recommendation:

Don't put feeding buckets directly on the archaeological remains.

ELHAR ID Number: 1406 TRACKWAY, NANT MELYN
 Post Medieval TRACKWAY
NGR: SN8009266647 - Linear **Community:** Ystrad Fflur
NPRN: 522246 **PRN:**

Site Status: No Site Status

Description:

This trackway runs for over 3 kilometres from the Claerwen at SN8193067150 to Nant Egnant at SN7906066510 along the southernside of the Afon Claerddu and its tributary Nant Melyn. For much of its length the trackway is cut into the north facing slope creating an often substantial earthwork, up to 2m wide. The track is now very overgrown with purple moorgrass but can be readily followed. It continues eastwards as trackway NPRN 504565, along the north side of the Claerwen. This trackway is shown on 1st edition Ordnance Survey map.

Form of Evidence: Earthwork **Condition:** Near Intact
Current land use: Rough Pasture
Confidence in Record?: High Verified in the field.
Evidential Value: Earthwork
Group Value: Unknown
Historical Value: None
Aesthetic Value: None
Communal Value: Public Footpath
Setting: Crosses the Elenydd hills from Cwm Mwyro in the west to Claerwen to the east.
Accessibility: Fairly remote area but it is
Rarity: Common **Significance:** Locally Important
Known Threat?: Yes **Level of Threat:** Low
Type of Threat: Water Drainage; Vegetation

Parts of the trackway are becoming flooded and reed growth is blocking the route.

Management Recommendation:

Ensure drainage of trackway

ELHAR ID Number: 1409 CRUG EYNON, TRACKWAY
 Post Medieval TRACKWAY

 Post Medieval SHEEP FOLD
NGR: SN8400173288 - Feature Centred **Community:** Ysbyty Ystwyth
NPRN: 522197 **PRN:**

Site Status: No Site Status

Description:

This sheepfold is shown on the 1st edition 1:10560 Ordnance Survey map and also depicted on the 2nd edition Ordnance Survey map but not labelled. When visited in December 2012 it was seen to be a drystone sheep fold on a small, natural terrace to the north of Llyn Gwngu. The square, single celled fold measured 7 metres in diameter with an entrance in the south wall. Its walls were 1 metre thick and up to 0.75 metres high. Vegetation cover was reeds and grass.

Form of Evidence: Other Structure **Condition:** Damaged
Current land use: Rough Pasture
Confidence in Record?: High Verified in the field.
Evidential Value: Drystone ruin
Group Value: None
Historical Value: None
Aesthetic Value: None
Communal Value: None
Setting: Situated on a south-facing slope, overlooking Llyn Gwngu.
Accessibility:
Rarity: Not Common **Significance:** Minor Importance
Known Threat?: No Identified Threat **Level of Threat:**
Type of Threat:

Management Recommendation:

ELHAR ID Number: 1411 AFON ELAN, SHEEP FOLD I
 Post Medieval SHEEP FOLD
NGR: SN8385874531 - Feature Centred **Community:** Ysbyty Ystwyth
NPRN: 522194 **PRN:**

Site Status: No Site Status

Description:

This sheepfold was shown on the 1st edition 1:10560 Ordnance Survey map but was no longer depicted on the 2nd edition Ordnance Survey map. When visited in December 2011 it was seen to be a two-celled, drystone sheep fold on the south side of the upper reaches of the Afon Elan. Overall it measured 8 metres east to west by 5.5 metres, the cells being equal sized. The walls were roughly coursed and up to 1.25 metres wide and 0.80 metres high. The north side had been eroded by the stream and was largely missing. There was an entrance in the western wall. Vegetation cover was grass and reeds.

Form of Evidence: Ruin **Condition:** Damaged
Current land use: Rough Pasture
Confidence in Record?: High Recorded description
Evidential Value: Shown on historic mapping and partially standing structure seen in 2011
Group Value: Associated with a long hut NPRN 522445 on the opposite bank.
Historical Value: None
Aesthetic Value: None
Communal Value: None
Setting: This structure is situated on the southern bank of the upper Afon Elan and is being actively eroded by the river.
Accessibility: Remote area
Rarity: Not Common **Significance:** Locally Important
Known Threat?: Yes **Level of Threat:** High
Type of Threat: Erosion

The Afon Elan is eroding the northern side of this structure

Management Recommendation:

Let nature take its course, consider recording in more detail

ELHAR ID Number: 1413 UCHELFA, SUNKEN SHELTER II
 Post Medieval SHELTER
NGR: SN7925868826 - Feature Centred **Community:** Ysbyty Ystwyth
NPRN: 522660 **PRN:**

Site Status: No Site Status

Description:

A sunken shelter, which measures 7.5 metres northwest to southeast, by 2.5 metres wide and 0.85 metres deep. The cut is stone lined, with some relatively large orthostats at the northwest end.

Form of Evidence: Earthwork **Condition:** Near Intact
Current land use: Rough Pasture
Confidence in Record?: High Verified in the field.
Evidential Value: Earthwork
Group Value: None
Historical Value: None
Aesthetic Value: None
Communal Value: None
Setting: Situated on an east-facing slope and sheltered by a low ridge on its western side.
Accessibility:
Rarity: Not Common **Significance:** Locally Important
Known Threat?: No Identified Threat **Level of Threat:**

 Post Medieval FARMHOUSE
NGR: SN8681975033 - Feature Centred **Community:** Rhayader
NPRN: 502710 **PRN:** 21119 CPAT

Site Status: No Site Status

Description:

A farmhouse with attached outbuilding range. The latter appears to include a cart shed and byre/stable. The house is shown on the 1st edition 1:10560 Ordnance Survey map of 1888, apparently in the same location and with the same dimensions as at present. A building also appears to stand in the same location on the 1841 parish tithe map, although the present structure would appear to be of later 19th century date.

Form of Evidence: Building **Condition:** Intact

Current land use: In Use

Confidence in Record?: High Verified in the field.

Evidential Value: Standing building, in use

Group Value: Part of Bodtalog farmstead

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Situated in the relatively sheltered Bodtalog valley, a tributary valley to the north of the upper Elan valley. The house stands within a group of farm buildings of 19th and 20th century date.

Site Status: No Site Status

Description:

This is a drystone long hut, aligned north-northwest to south-southeast, 4.5 metres wide. It is defined by low wall bases, a metre wide by up to 0.80 metres high. The entrance is in the east lateral wall, but has been infilled with stone walling. The structure stands on a slight terrace cut into the slope at its north-northwest end, where they may be a drainage gully. A stone wall seems to overlie the western side of the long hut.

Form of Evidence: Other Structure **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Drystone structure

Group Value: Associated with Wall NPRN 522305

Historical Value: None

 Post Medieval CURVILINEAR ENCLOSURE; SHI
NGR: SN80206478 - Feature Centred **Community:** Ystrad Fflur
NPRN: 408470 **PRN:** 8366 DAT

Site Status: No Site Status

Description:

This rounded enclosure stands on the southern end of a minor ridge north of Llyn Gynon, and may be related to a long house (NPRN 408470) 85m to its south. The enclosure is 25 metres north-east to south-west by 23 metres. The enclosure bank is 2.5 metres wide at the base and 0.5 metres high. A 1 metre wide by 0.25 metre deep gully surrounds the outside of the bank. The enclosure is divided internally by a bank running north-north-west to south-south-east with the north-eastern segment being slightly smaller than the south-east. A causeway through the bank and ditch at the south-east corner appears to be an original entrance. There is a narrow gap in the southwest corner of the enclosure, possibly a drainage feature.

Form of Evidence: Earthwork **Condition:** Near Intact

Current land use: Rough Pasture

Confidence in Record?: High Verified in the field.

Evidential Value: Earthwork

Group Value: Probably associated with the longhouse NPRN 408471

Historical Value: None

 Medieval LONG HUT
NGR: SN93877205 - Feature Centred **Community:** Rhayader
NPRN: 269443 **PRN:**

Site Status: No Site Status

Description:

A long hut, measuring circa 10 metres by 6 metres, outside the field system of the Moelfryn deserted settlement and possibly associated with it.

Form of Evidence: Building **Condition:** Damaged

Current land use: Rough Pasture

Confidence in Record?: Moderate Not visible on aerial photographs. Recent, coherent description from NMR. Confused description in HER (PRN110750) which as been ignored.

Evidential Value: Earthwork

Group Value: Probably part of a deserted settlement complex

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Situated at circa 470 metres above sea level on a northeast to east facing slope, with views over the Wye Valley, in an area of rough pasture. The ground rises to the west and would provide shelter from the prevailing winds.

Accessibility:

Rarity: Not Common **Significance:** Locally Important

NEINT, PLATFORM III

Medieval; Post Medieval PLATFORM

NGR: SN8442875522 - Feature Centred**Community:** Ysbyty Ystwyth**NPRN:** 522390**PRN:****Site Status:** No Site Status**Description:**

An earthwork platform which measures 12 metres north to south, by 5 metres wide. The fan, at the south end, is much broader than the building and defines the platform and a flat area to the east which would appear to be a 5 metre wide yard area alongside the platform.

Form of Evidence: Earthwork**Condition:** Near Intact**Current land use:** Rough Pasture**Confidence in Record?:** High

Verified in the field.

Evidential Value: Earthwork**Group Value:** One of four platforms in close proximity**Historical Value:** None**Aesthetic Value:** None**Communal Value:** None**Setting:**

The platform is terraced into the moderate slope on the southern side of the upper Ystwyth valley, now overlooking the Cwmystwyth to Rhayader road which passes close by, downslope to the south.

Accessibility:**Rarity:** Not Common**Significance:** Locally Important**Known Threat?:** No Identified Threat**Level of Threat:****Type of Threat:****Management Recommendation:**

ELHAR ID Number: 1566 LLYN GYNON, EARTHWORK
 Modern FIRING RANGE
NGR: SN8060064860 - Area Centred **Community:** Ystrad Fflur
NPRN: 522648 **PRN:**

Site Status: No Site Status

Description:

A local farmer said that the area around Llyn Gynon had been used as an artillery range in the past. During fieldwork in this area small mounds and hollows between 1 and 2 metres diameter were seen and it was thought they could be the result of firing at the hill.

Form of Evidence: Documentary Evidence **Condition:** Near Destroyed

Current land use: Rough Pasture

Confidence in Record?: Moderate Some possible shell holes noted, but these were small, 1-2 metres across. More holes are evident further east near Claerwen reservoir.

Evidential Value: Earthworks

Group Value: Associated with WW2 training across a wide area

Historical Value: None

Aesthetic Value: None

Communal Value: None

Setting: Shell holes appear to be spread across the area to the east and northeast of Llyn Gynon including across the slopes to the south of Claerwen reservoir.

Post Medieval

DAM

NGR: SN8011070630 - Feature Centred**Community:** Ysbyty Ystwyth**NPRN:** 522664**PRN:****Site Status:** No Site Status**Description:**

A broad stone dam, very well constructed and up to 2.5 metres high. It narrows to its northern end.

Form of Evidence: Other Structure**Condition:** Intact**Current land use:** In Use**Confidence in Record?:** High

Verified in the field.

Evidential Value: Stone structure**Group Value:** Associated with Glogfawr Lead Mine and Leat NPRN412613**Historical Value:** None**Aesthetic Value:** None**Communal Value:** None**Setting:**

A dam built to control water flow out of the Llyn y Fyrddon Fawr lake. The water was diverted into a leat which supplied the Glogfawr lead mine, over 5km to the west.

Accessibility:

Remote

Rarity:

Not Common

Significance: Locally Important**Known Threat?:**

Yes

Level of Threat: Moderate**Type of Threat:**

Erosion

Water action is eroding parts of the dam face on the lakeward side.

Management Recommendation:

Restoration of the dam structure. If the dam fails the lake would reduce in size considerably.
