

Management of Rhabdocline and Swiss Needle Cast

Dr. Gary Chastagner

**Plant Pathologist
Washington State University
Puyallup, WA
E-mail: chastag@wsu.edu**

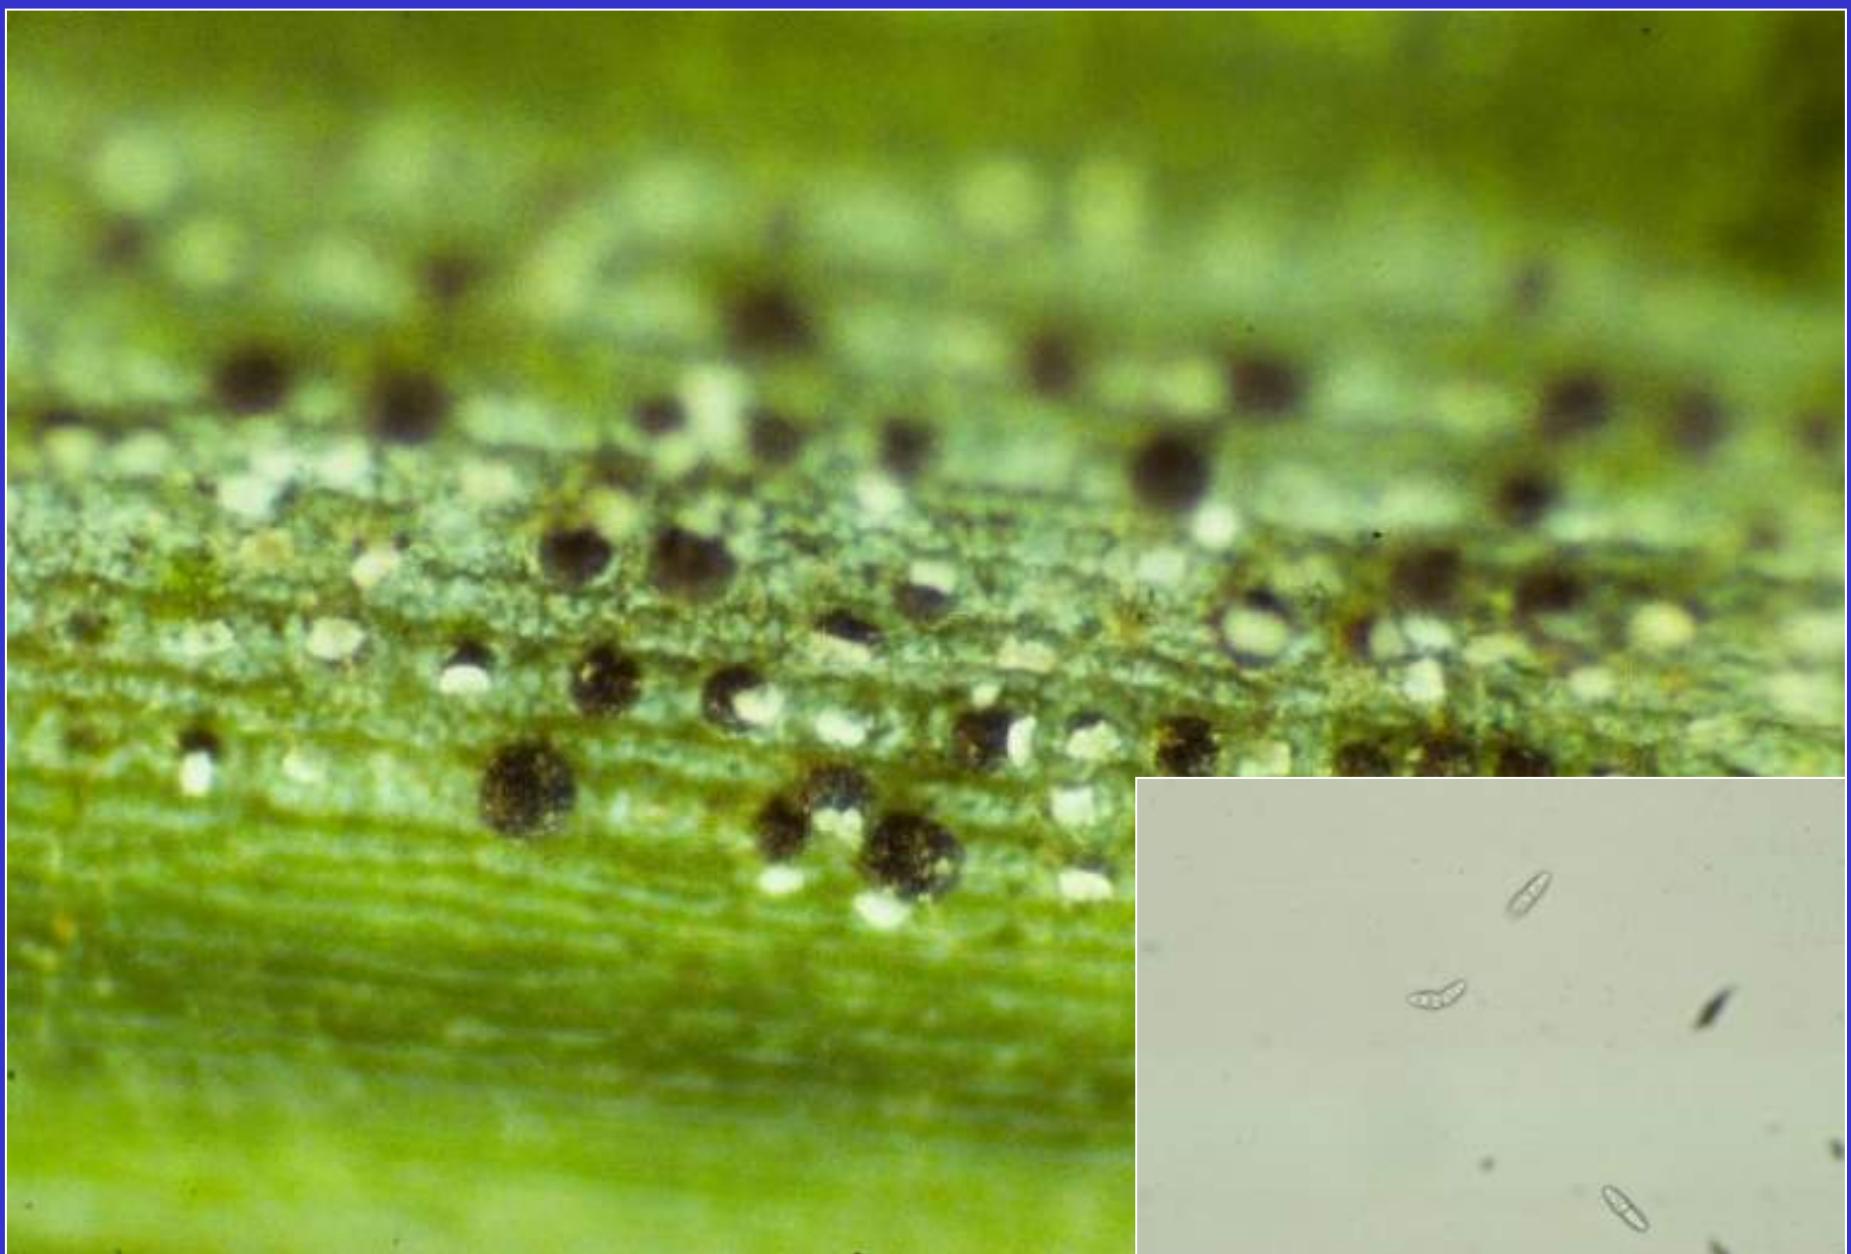

Swiss Needle Cast

Phaeocryptopus gaeumannii

Disease Monitoring

Pseudothecia

Effect of Protectant Applications of Fungicides in 1997 on SNC level in 1998 and Needle Loss and Color in 1999.

Treatment	Product/100 gallons	<u>March 20, 1998</u>		<u>June 6, 1999</u>
		Disease Index	Needle loss	Color
Check	-	47.5 a ¹	7.5 ab	4.7 a

80	0.0±0.0	2.7±1.0
400	1.7±1.3	3.1±1.6
800	0.0±0.0	0.0±0.0

¹ Averages ± standard errors of two experiments.

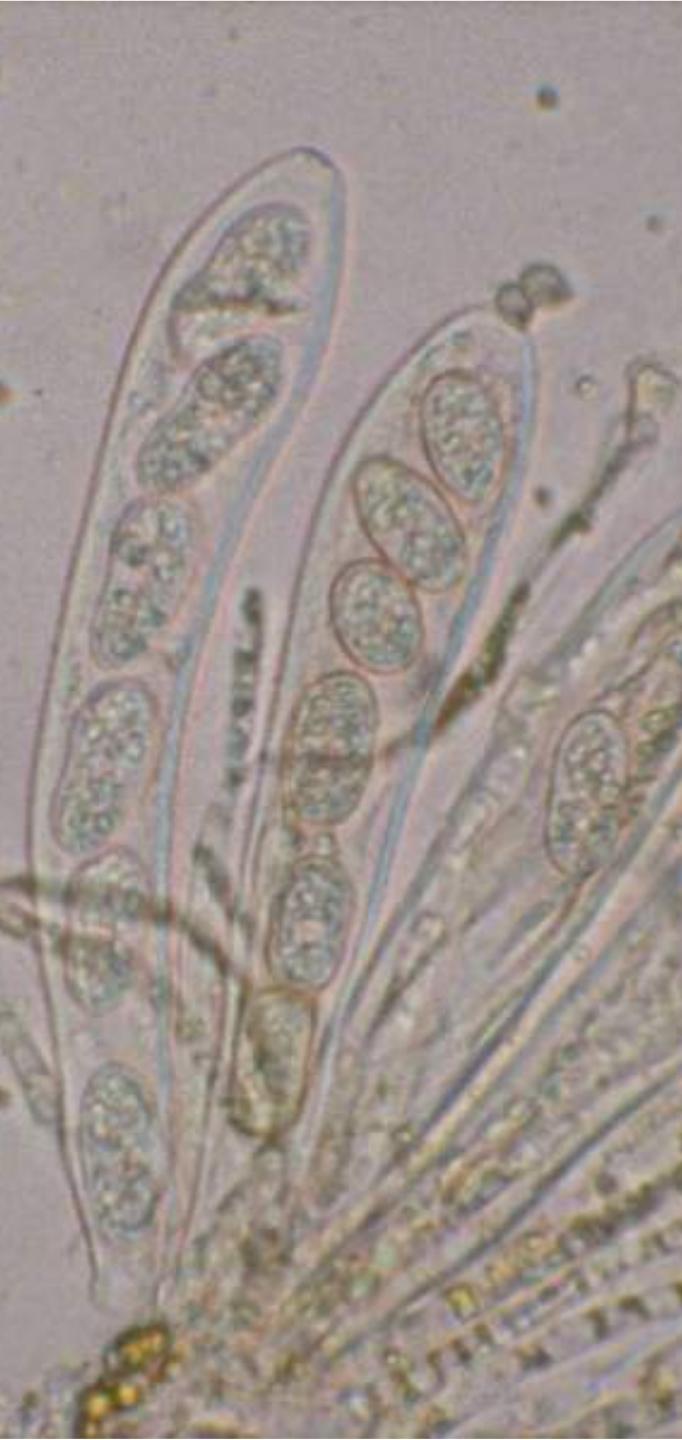

Rhabdocline Needle Cast

Rhabdocline pseudotsugae and
R. weiri with five subspecies

Rhabdocline Susceptibility Varies by Seed Source

Susceptibility Trials at WSU Puyallup

1. 9 seed sources
2. 20 seed sources obtained from Dr. Ed Palpant at Pennsylvania State University and one standard PNW coastal Christmas tree source

¹Rated on a scale of 0 (none) to 100 (>75% on needles with severe symptoms)

Genetic Variation in Susceptibility within Provenances

Effectiveness of Fungicides in Controlling Rhabdocline Needle Cast

May 8, 2003 spray

Effectiveness of a single application of fungicides in controlling Rhabdocline needle cast.

Treatment¹	Product/100 gal	Disease rating
Check	-	76.7 a²
Medallion 50W	4 oz	65.6 ab
Switch 62.5WP	6 oz	59.9 ab
Heritage 50W	4 oz	48.3 b
Kocide DF	2 lb	47.6 b
Insignia 20WP	4 oz	24.6 c
Daconil Weather Stik 720	2.75 pt	22.5 c
Thiolux	60 lb	18.9 c
Daconil Weather Stik 720	5.5 pt	6.2 c
Fore 80W	1.5 lb	5.7 c
Compass 50W	4 oz	3.4 c

¹Latron CS-7 was added to all treatments except Daconil at the rate of 8 oz/100 gal.

²Numbers followed by the same letter are not significantly different, P = 0.05, DMRT

Disease Management

- Plant resistant seed sources
- Remove highly susceptible trees
- Protect trees with fungicides

Thank You

Note: Always check the label prior to application of any pesticide to make sure you are using properly registered products in your disease management program.
