GREENFUSE[®]
botanicals, inc.

All of us at Green Fuse® Botanicals would like to welcome you to our 2020/2021 offerings. As we move into our second decade of breeding we are proud to offer you our largest introductory year ever. We remain committed to our focus of delivering pioneering genetics to our growing partners. Green Fuse® Botanicals owns and operates Calico™ Genetics, our internal breeding company as well as a liaison to our global network of breeding partners. Calico™ Genetics strives to not only deliver revolutionary genus to the marketplace, but to orient all breeding to the ultimate goal of grower solutions.

We are proud to offer sixty five new varieties, consisting of five completely new series for the 2020/2021 season. Many of these new introductions are industry first and fully realize our goal of customer advantage breeding. The First ever Game Changer® Hydrangea will save months of production time due as no cooling is required for flowering. The Rudbeckia Dakota™ series redefines the class as the first ever zone hardy hirta combined with day length neutrality.

We at Green Fuse® Botanicals remain driven to deliver breeding breakthroughs to the horticultural community, but it is the cultivation of our grower relations that remains our passion. It is your trust and support of the program that strengthens our dedication. We wish our partnership to bring you success this season and many seasons to come.

proudly offered by our partners at

Lifestyle Plants™ is our selection of plants designed for the changing life-style needs of our customers. Lifestyle Plants™ can be grown for outdoor seasonal color or as indoor house plants. Year round availability brings all new options for seasonal programs. There are no boundaries to where we can bring color into our lives!

The breeding goal of the Green Fuse® Botanicals Optimum™ Annuals program is to deliver uniformity within each series for ease of production. Each color in each series will perform uniformly regardless of geography. The earliness to flower allows delivery any time of year.

The First Light® Perennial program contains first year flowering varieties that require no cold treatment (vernalization) to flower and are day length neutral. The goal of First Light Perennials® is to offer perennials that can be programmed to flower as you would annual selections. Schedule these selections to meet a desired week instead of waiting for the traditional photoperiod. This will not only remove many weeks of crop time allowing for additional rotations, but also dramatically saves on labor as the crops are able to always be fresh.

This collection of perennials exhibits extremely unique attributes that validate their inclusion into the Green Fuse® Botanicals perennial program. While they do require vernalization and/or long days, their flower intensity ensures excellent sell through.

BEGONIA SHADOW KING®

The Green Fuse® Shadow King® series has small leaves and is heavily branched, making them the perfect fit for smaller containers and combinations. The uniformity within the series ensures predictable scheduling and shipping. The complete, textural color selection will enhance any retail bench. Finished height will be 8" to 12".

Bred by Koppe. Plants protected under USPP 24,717; USPP24,738; USPP23,468; USPP27,483 and USPPAF

BEGONIA REX BEWITCHED™

The strong upright growth and incredible leaf structure on the Bewitched™ series is just plain spooky! Noted for their cut leaf, the crisp colors, with deep veins is a must have for any Begonia Rex program. Finish times are blazing fast, just like the Dibs®, due to their aggressive growth pattern. A yearlong sales window, with such an excellent habit, it's just plain scary! Finished height of 12" to 18".

BIDENS DOUBLOON™

Doubloon™ puts on a show of gold in the garden that lasts the entire summer. Doubloon's™ compact size plays well for perfect containers without the need for growth regulators. Their large yellow flowers are a perfect highlight for planters. Finished height is 4" to 6".

CALIBRACHOA CRUZE® CONTROL

Calibrachoa Cruze® Control series boast enormous flowers and a more "controlled" habit than other calibrachoa. Plants have shorter internodes producing more branching for a beautifully full container. Cruze® Control are among the earliest of all to flower, so they are perfect for any part of the world. Mature height is 6" to 10".

CLEOME CLEMENTINE™

The combination of daylength neutrality and superior basal branching gives the Clementine™ series easy container fill in both small and large containers. Geared for the hottest environments, Clementine™ will throw massive blooms all season long. Mature height is 24" to 30".

Blush

Pink

Violet

EUPHORBIA CRYSTAL™ WHITE

Euphorbia Crystal™ White flowers non-stop and is a great impact plant with its sparkling white blossoms. Their incredible branching structure produces near perfect small pots. This Euphorbia is the perfect drought and heat tolerant component plant for mixed containers and hanging baskets. Mature height is 8" to 12".

FUCHSIA WINDCHIMES® BASKET

The Windchimes® Baskets flower under short days and continue to perform as high summer temperatures approach. They are perfect for all sizes of baskets and great for mixed containers, too. Their tight internode structure equates to higher density production and shipping. Huge flowers are reminiscent of older style fuchsia, but still deliver the uniformity of new breeding. Finishing height is 8" to 14".

PETUNIA BLANKET®

Every garden bed needs a Blanket® Petunia to keep it covered with beautiful colors through the most extreme summer conditions. Blanket® Petunias are also great in containers that grow to dramatic proportions throughout summer. The ideal quick crop petunia to allow multiple turns within the season, even with just one plant per basket. Their milliflora flowers require near zero maintenance for the consumer; even the doubles are excellent at self-cleaning. Plants will reach 6" to 8" in height with an impressive 36" spread.

PERENNIAL COMPATIBLES®

First Light® Perennial Compatibles® can be scheduled and finished just like annual mixes. No more worrying about forcing varieties out of season or planning for special cold requirements or vernalizations. The First Light® Perennial Compatibles® are completely programmable, since all our components are completely day length neutral and require zero cooling. These mixes shine brightly for early spring sales, through the summer heat and are a great companion crop to break the mundanity of fall mum programs.

WHITE MOUNTAIN[®]

BETSY[®]

LEUCANTHEMUM ANGEL DAISY[®]

Angel Daisy[®] is so early to flower, it makes production planning a snap. Angel Daisy[®] has anemone flowers that transition to pure white. Excellent for containers or as a mixed element. Garden height is 8" to 12". Zone 4

LEUCANTHEMUM DOUBLE ANGEL DAISY[®]

NEW

The all NEW Double Angel Daisy[®] throws a massive number of fully double flowers all season long. With a habit matching the industry leading Angel Daisy[®] perfectly, Double Angel Daisy[®] will boast the same finishing time and garden performance with a unique flower formation. Garden height 8" to 12". Zone 4

LEUCANTHEMUM WHITE MOUNTAIN[®]

White Mountain[®] is also day length neutral. White Mountain[®] boasts large blooms on stout plants and can be programmed to flower for retail sales from early spring to well into fall. Ideal for larger container, White Mountain[®] is the flag ship of the Green Fuse[®] Botanicals Leucanthemum program. Garden height is 18" to 24". Zone 4

LEUCANTHEMUM BETSY[®]

Betsy[®] is the world's largest flowering day length neutral shasta daisy. With flower sizes of 5" to 8" Betsy[®] will blow you away! Thick petals translate into a single flower holding beautifully on the plant for multiple weeks. Geared for 1.5 gallon to 2 gallon production, Betsy's[®] robust stature will impress! Garden height is 18" to 20". Zone 4

LUPINE STAIRCASE®

The Lupine Staircase® Series is the pure definition of First Light™ perennials. Able to flower under any day length without the need for vernalization. Let the growing temperature dictate your finish date, not the plant requirements. They will also continue to produce impressive flower displays until the heat of summer. Once the night time temperatures cool, the Staircase® series will come back into their glory. The all new Red/White is a standout in this seven-color series. This also allows for a fantastic new fall crop. The Staircase® series allows any grower to become a lupine grower! Garden height is 18" to 24". Zone 3

IBERIS GIBALTARICA CHILL™ LAVENDER

NEW

The Spring season just got a whole lot cooler with this all new selection. While this selection does require vernalization, its smooth lavender flowers are a welcomed achievement in this genus. Chill™ has been intentionally bred to bloom just a couple weeks later than traditional Iberis in order to greet the higher traffic in spring, rather than late winter. Garden Spread 15" to 18". Zone 4

Pink

MONARDA MARJE®

Marje® will require long days like other monarda, but unlike other monarda, Marje® has incredible resiliency to mildew. Its compact habit becomes loaded with unusually large blossoms through the summer and into the fall. Garden height is 12" to 15". Zone 4
