

holland - select
zaden – seeds

2019 / 2020

Holland-Select, a private company, has been in business for over 100 years. The company, situated in Andijk, The Netherlands, is specialized in research, development and production of bean and other vegetable crops for the professional market.

All new varieties are being developed at our breeding station in Andijk and tested in different climatical regions before they are released and offered to the trade.

Our seed production is located in many carefully chosen parts of the world. These locations have been seriously tested for reliability over the years.

All produce is shipped to our facilities in Andijk where the quality of the seeds is checked. Apart from our own laboratory tests, we run grow out trials under glass. Furthermore additional tests are carried out by official laboratories to guarantee the quality of the seeds before it is conditioned and distributed.

We will continue our efforts to develop new and improved varieties in the future and appreciate your support as a client to purchase our varieties. Our objective is to work closely with our clients to our mutual benefit. Our specialization enables us to furnish your needs in a swift and reliable manner.

Please contact us to receive expert advice on your specific requirements.

ORGANIC SEEDS

Holland-Select B.V. is certified to process and export organic seeds. Our sales program includes several organic bean varieties.

NEN-ISO 9001

Holland-Select B.V. has obtained the NEN-EN-ISO 9001:2015 certificate. This ensures consistent management and procedures resulting in high quality products.

GENETIC MODIFICATION

Holland-Select's breeding techniques are innovative and advanced but our varieties have been developed without using GMO techniques.

The procedures adopted by the company are subject to supervision by the National Inspection Service. They are carried out with the utmost care, respecting the existing legal regulations and the procedures prescribed by the government regarding the marketing of varieties.

NEW

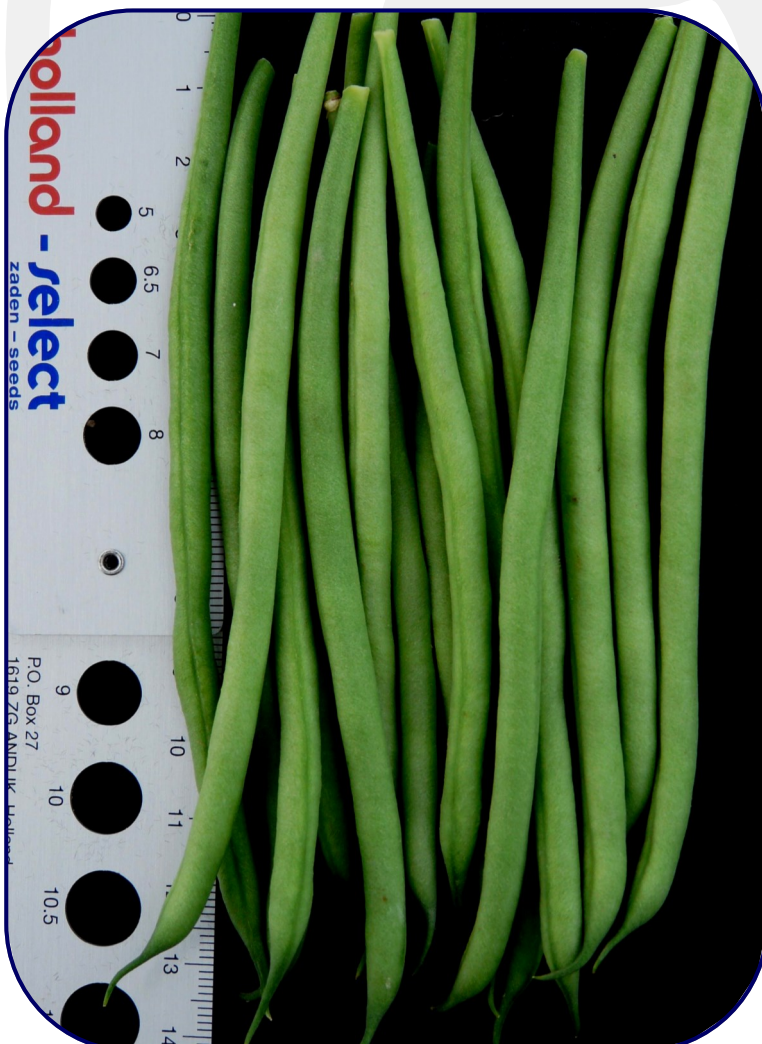

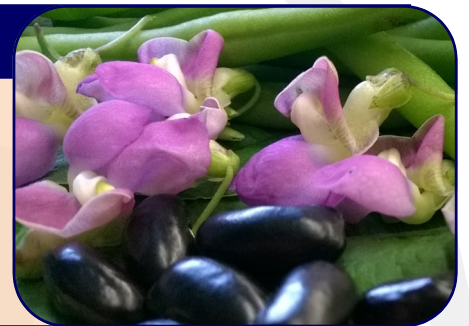

Introduction 2019 / 2020

HS 811

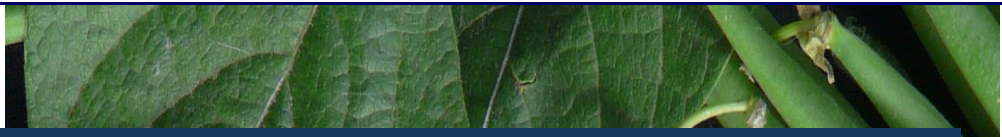

Compact and upright plant architecture. Uniform pods are carried well of the soil.

NAUTICA

Extra fine with black seeds and purple flowers.

Bush bean—Extra Fine

Variety	size <6,5	size 6,5-8	size 8-9	Pod Length	Pod Color	Maturity	Plant Height	Description
HS 811	75	25	0	12-13 cm	8		50 cm	Compact and upright plant architecture. Uniform pods are carried well of the soil.

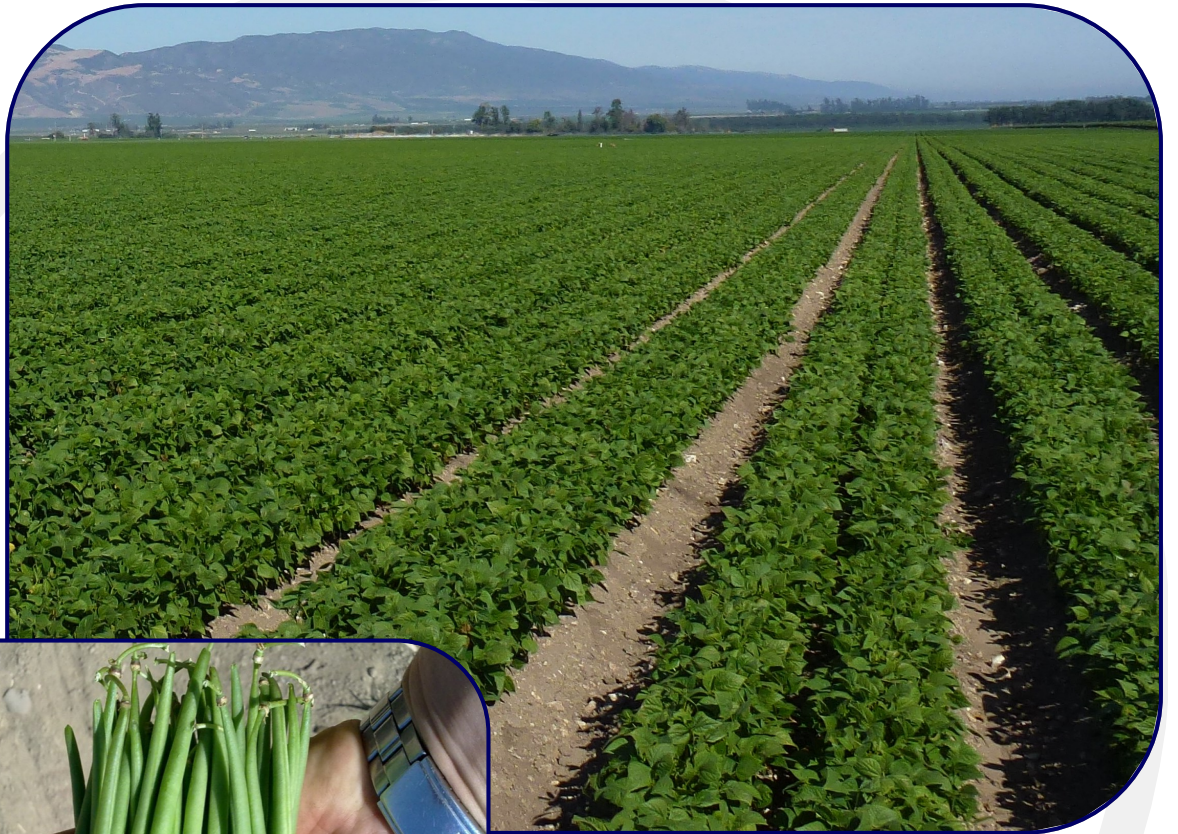

Variety	size <6,5	size 6,5-8	size 8-9	Pod Length	Pod Color	Maturity	Plant Height	Description
TOBAGO	80	20	0	12 cm	8	+2	50 cm	Extra fine variety, combines compact plant architecture with very uniform pod set.
COMPASS	75	25	0	12-14 cm	9	+2	50 cm	Well known extra fine variety with dark color and a high percentage easy pick.
COSTAL	75	25	0	12-13 cm	8	+2	50 cm	Nice compact plant with high percentage of extra fine.
CATAMARAN	70	30	0	12-13 cm	8	-2	50 cm	Very early variety for the first sowing. Uniform and dark green pods.
NAVIGATOR	65	35	0	12-13 cm	8	-1	50 cm	Nice compact plant with high percentage of extra fine.
NAUTICA	60	40	0	12-13 cm	7	+2	55 cm	Black seeded variety with attractive purple flowers. Excellent taste.

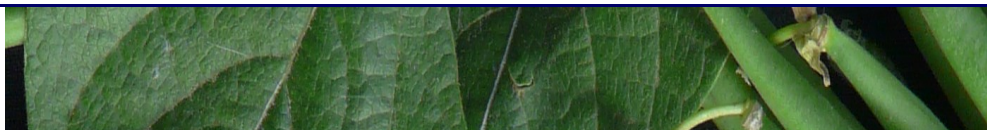

All varieties resistant against Ps/A/V1

Phaseolus vulgaris

Bush bean-Very Fine

Variety	size <6,5	size 6,5-8	size 8-9	Pod Length	Pod Color	Maturity	Plant Height	Description
EDISON	10	80	10	12-13 cm	8	+1	50cm	Fine and uniform pods, showing an attractive color with a little gloss.
PROTON	0	80	20	12-13 cm	8	0	45cm	A reference for many years, long dark and heavy pods, wide harvest window and productive.
FARADAY	0	80	20	13-14 cm	8	+3	50cm	Very uniform and very high yielding
AMPERE	0	80	20	13-14 cm	7	+1	55cm	Medium early variety with very compact plant habit and long, uniform pods
KELVIN	0	70	30	12-13 cm	8	+1	50cm	Strong and well yielding variety that performs well under various conditions.
DAVIS / HS 738	0	60	40	15 cm	8	+2	50cm	Especially developed for hand-picking, showing exceptional long and uniform pods. Highly tolerant against rust(Uromyces).
ELAN	0	50	50	13 cm	8	+2	50cm	Suitable for all soil types, compact plant habit and high percentage "easy pick".
HS 931	0	40	60	12-13 cm	8	+2	55 cm	Long and uniform pods, showing a little gloss.
DAWSON	0	30	70	13 cm	9	+2	45cm	Uniform and attractive dark green pods.
ANDERSON	0	20	80	13 cm	8	+1	45cm	Medium early variety, showing nice and dark green pods.

All varieties resistant against Ps/A/V1

NEW

Introduction 2019 / 2020

HS 841

Strong and upright variety with very long and dark green pods.

HS 842

Very compact plant architecture. Uniform pods are showing an attractive dark green pod color.

Bush bean - Fine & Mangetout

Variety	size 8-9	size 9-10½	size >10½	Pod Length	Pod Color	Maturity	Plant Height	Description
HS 841	40	60	0	16-17 cm	9	-	50 cm	Strong and upright variety with very long and dark green pods.
HS 842	30	70	0	13-14 cm	8	-	45 cm	Very compact plant architecture. Uniform pods are showing an attractive dark green pod color.

Variety	size 8-9	size 9-10½	size >10½	Pod Length	Pod Color	Maturity	Plant Height	Description
DOMINO	80	20	0	12-13 cm	8	+2	50 cm	Well known reference, excellent yielder under various conditions.
AMIGO	70	30	0	11-12 cm	8	0/+1	50 cm	High yielding variety. Dark color and easy pick. Slow seed development.
PARKER	40	60	0	14-15 cm	8	0/+2	55 cm	Long straight pods with dark shiny color. Very suitable for fresh market.
MODESTO	40	60	0	13-14 cm	7	+1	50 cm	Nice plant architecture and very uniform long pods.
STANLEY	30	70	0	12-13 cm	7	0/+2	50 cm	Well known reference. Remarkable yields throughout the season.
MARTINI	30	70	0	11-12 cm	8	-1	45 cm	Very well structured compact plant, uniform pod set and size. Early variety.
WILSON	0	40	60	15 cm	8	-	50 cm	Uniform pod set and high yield potential.
JACKSON	0	25	75	15-16 cm	9	-	50 cm	Uniform pods showing a very dark green coloring.

All varieties resistant against Ps/A/V1

NEW

Introduction 2019 / 2020

HS 864

New wax bean variety, showing uniform pods.

Wax beans

Variety	size <6,5	size 6,5-8	size 8-9	size 9-10,5	Pod Length	Pod Color	Maturity	Plant Height	Description
HS 864	70	30	0	0	12-13 cm	wax		45 cm	New wax bean variety, showing uniform pods.

Variety	size <6,5	size 6,5-8	size 8-9	size 9-10,5	Pod Length	Pod Color	Maturity	Plant Height	Description
ADORATION / HS 761	75	25	0	0	12-13 cm	wax	+1	45 cm	Early maturing variety, showing very uniform pods.
CALA D'OR	60	40	0	0	11-12 cm	wax	+2	50 cm	Strong variety with high yield in the extra fine - very fine segment.
DORADO	0	70	30	0	11-13 cm	wax	+2	50 cm	Upright bush, highly recommended.
HS 767	0	60	40	0	12-13 cm	wax	+3	50 cm	Good plant vigor and uniform pod set. High yield potential.
VALDOR	0	50	50	0	12-14 cm	wax	+6	50 cm	A late maturing variety with very nice color and an excellent upright plant.
DIOR	0	20	80	0	12-14 cm	wax	+2	50 cm	Very compact plant habit. High yielding variety, showing exceptional uniform pods.
VOLTAGE	0	0	20	80	14-15 cm	wax	+3	50 cm	Long uniform pods showing an attractive yellow coloring.

All varieties resistant against Ps/A/V1

NEW

Introduction 2019 / 2020

HS 851

New Romano variety. Compact plant habit and uniform green pod set.

Romano beans

Variety	Width	Pod Length	Pod Color	Maturity	Plant Height	Description
HS 851	Flat podded, width 18 mm	15-16 cm	8	0	45 cm	New Romano variety. Compact plant habit and uniform pod set.

Variety	Width	Pod Length	Pod Color	Maturity	Plant Height	Description
NASSAU	Flat podded, width 17 mm	16 cm	7	+3	50 cm	Strong reliable variety.
ATLANTA	Flat podded, width 18 mm	15 cm	8	0	40 cm	The earliest variety in this segment, clean harvesting.
M. ARIANA	Flat podded, width 18 mm	16-17 cm	8	+1	45 cm	Very compact plant habit, showing uniform and fleshy pods.
MENDOZA	Flat podded, width 19 mm	16 cm	8	+2	50 cm	Uniform pod set, fleshy pods, slow seed development.
M. NADIA	Flat podded, width 20 mm	17 cm	8	+2	50 cm	Fleshy pods, showing an attractive coloring.

Variety	Width	Pod Length	Pod Color	Maturity	Plant Height	Description
CAPITANO	Flat podded, width 20 mm	15 cm	wax	+3	50 cm	Nice upright bush with straight pods and uniform in color.

NEW

Introduction 2019 / 2020

HS 798

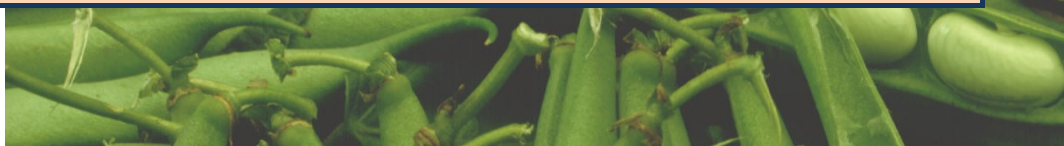

Upright plant habit. Early variety with good yield potential.

Flageolet beans

Variety	Size	Pod Length	Pod Color	Maturity	Plant Height	Description
HS 798	Extra fine	12-13 cm		+1	50 cm	Up right plant habit. Early variety with good yield potential.

Variety	Size	Pod Length	Pod Color	Maturity	Plant Height	Description
FLAGRANCE	Extra fine	12-13 cm	7	+1	50 cm	Smallest in seed size, great color and best appearance.
FLAGRANO	Extra fine/ Fine	12-13 cm	6	0	45 cm	Reference. Strong variety, easy to harvest, very reliable.
FLAMBEAU	Extra fine/ Fine	13-14 cm	7	+2	50 cm	Improved plant habit and a slightly smaller seed size.

All varieties resistant against Ps/A/V1

NEW

Introduction 2019 / 2020

HS 678

Modern climbing bean variety, showing straight pods with excellent green pod color.

HS 679

Uniform green pods are carried in clusters. Very good yielding capacity.

Climbing beans - flat podded

Variety	Width	Pod Length	Pod Color	Resistance	Description
HS 678	23 mm	26-27 cm	8	-	Modern climbing bean variety, showing straight pods with excellent pod color.
HS 679	23 mm	27-28 cm	7	-	Uniform pods are carried in clusters. Very good yielding capacity.

Variety	Width	Pod Length	Pod Color	Resistance	Description
HUNTER	20mm	20 cm	7	V1	Uniform product for indoor and outdoor growing.
VITALIS	20mm	20-22 cm	8	V1	Recommended for indoor and outdoor production. Slow seed development.
HELDA	22mm	25-26 cm	7	V1	Well known reference , vigorous growth.
LIMKA	22mm	22-24 cm	7	V1	More suitable for outdoor.
ALGARVE	25mm	26-28 cm	7	V1	More suitable for indoor, open plant habit.
PANTHEON	25mm	25-26 cm	8	V1	Indoor, good plant vigour will result in high yield even under stressful conditions.

Variety	Width	Pod Length	Pod Color	Resistance	Description
GOLDFIELD	25 mm	26-28 cm	wax	V1	Outdoor. Bright yellow pods that do not turn pale, fleshy, straight.
GOLDEN GATE	24 mm	24-26 cm	wax	V1	Indoor and outdoor, a more open plant habit. Will produce uniform yellow pods. Highly recommended.

NEW

Introduction 2019 / 2020

SUNSHINE / HS 675

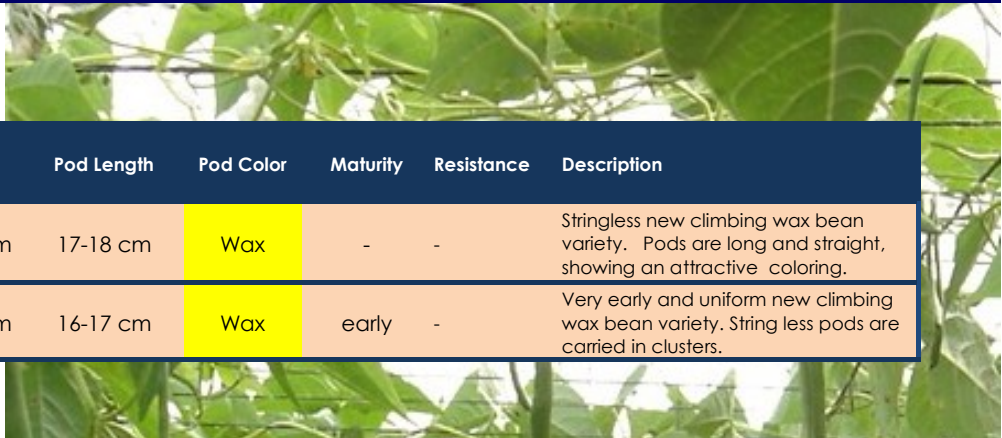

Stringless new climbing wax bean variety. Pods are long and straight, showing an attractive coloring.

SUNSHADE / HS 676

Very early and uniform new climbing wax bean variety. String less pods are carried in clusters.

Climbing beans - round podded

Variety	Size(mm)	Pod Length	Pod Color	Maturity	Resistance	Description
SUNSHINE / HS 675	9-10,5 mm	17-18 cm	Wax	-	-	Stringless new climbing wax bean variety. Pods are long and straight, showing an attractive coloring.
SUNSHADE / HS 676	9-10,5 mm	16-17 cm	Wax	early	-	Very early and uniform new climbing wax bean variety. String less pods are carried in clusters.

Variety	Size(mm)	Pod Length	Pod Color	Maturity	Resistance	Description
PYTHON	<9> mm	15-17 cm	8	mid	V1	Uniform pods with an attractive coloring, showing a little gloss.
COBRA	9 mm	18-20 cm	7	mid	A/V1	Black seeded stringless variety with purple flowers. Good shelf life. Indoor / outdoor.
MAMBA	9-10 mm	15-16 cm	8	early	V1	High yielding variety, suitable for both, indoor / outdoor production.
ISABEL	9-11 mm	14-16 cm	7	mid	V1	Outdoor. Will produce a slightly shorter pod size. All stringless.

NEW

Introduction 2019 / 2020

GUINNESS RECORD / HS 989

Longest runner on the market! Excellent plant vigor.

% seed / sieve (TM 140)

Pisum sativum

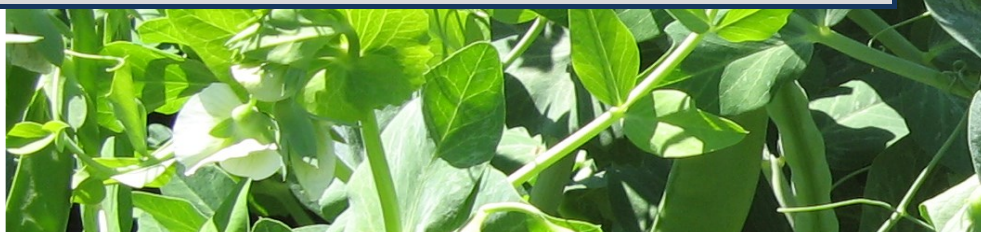

Mangetout peas / Snow- & Snap

SNOW PEAS

Variety	Width	Pod Length	Color	Stringless	Resistance	Description
SWEET SAHARA	21 mm	8-9 cm	8	yes	PM	Very compact plant habit. Uniform pods are stringless at picking stage.
SWEET SENSATION	22 mm	8-9 cm	8	medium	PM / F1	Very uniform and early maturing.
SWEET DELIGHT	25 mm	9-9,5 cm	7	good	PM / F1	Mid-early, uniform, large and straight pods.
SWEET HORIZON	22 mm	9-10 cm	8	good	PM / F1	Late maturing, uniform production, very high yielding because of strong and vigorous plants.

SNAP PEAS

Variety	Width	Pod Length	Color	Stringless	Resistance	Description
LUSAKA	15 mm	8-9 cm	8	yes	PM	Very compact and short bush. Uniform pods are carried in clusters. Stringless at picking stage.
NAIROBI	15 mm	8-9 cm	8	yes	PM	Well yielding variety. Stringless at picking stage.
DELIKETT	13-14 mm	8-9 cm	7	medium	PM	Improved plant habit (compact). Pods are carried in pairs.

Daucus carota

Baby carrots Amsterdamse Bak

Variety	Maturity	Description
Amsterdam 3 - SPRINT	0	Very early variety recommended for early sowing. Is the shortest variety in our range.
Amsterdam 2 - AMROLA	0	Very early but slightly longer compared to Sprint. Uniform product, smooth skin.
Amsterdam 2 - SOLO	2	Early type, heavy yielder with firm upright foliage. Long slender cylindrical roots with excellent internal and external color. Uniform in length and in diameter.
Amsterdam 2 - MAXI	3	Well known reference; long, slender, cylindrical roots with excellent color. Firm foliage that will hold well. Will not produce oversized carrots even when harvested late.
Amsterdam 2 - SALTO	4	All-round variety with a high Alternaria-tolerance. Produces the longest carrot in the Amsterdam-range. Very nice color. Will keep its size until harvest. Highly recommended.

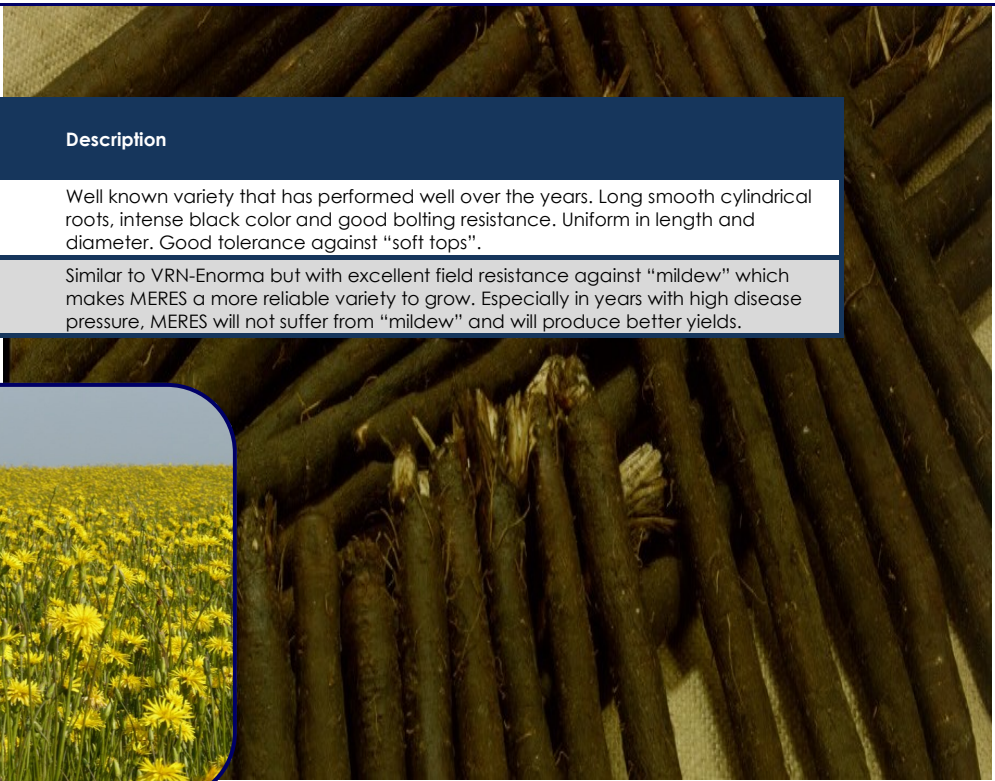

Variety	Maturity	Description
Parijse Markt 5 - ATLAS	90-95 days	Produces a small round carrot with strong upright foliage. Excellent dark internal and external color. It is a nicely shaped carrot, a so-called "blocked" round model. (90-95 days)

Scorzoner

Scorzoner hispanica

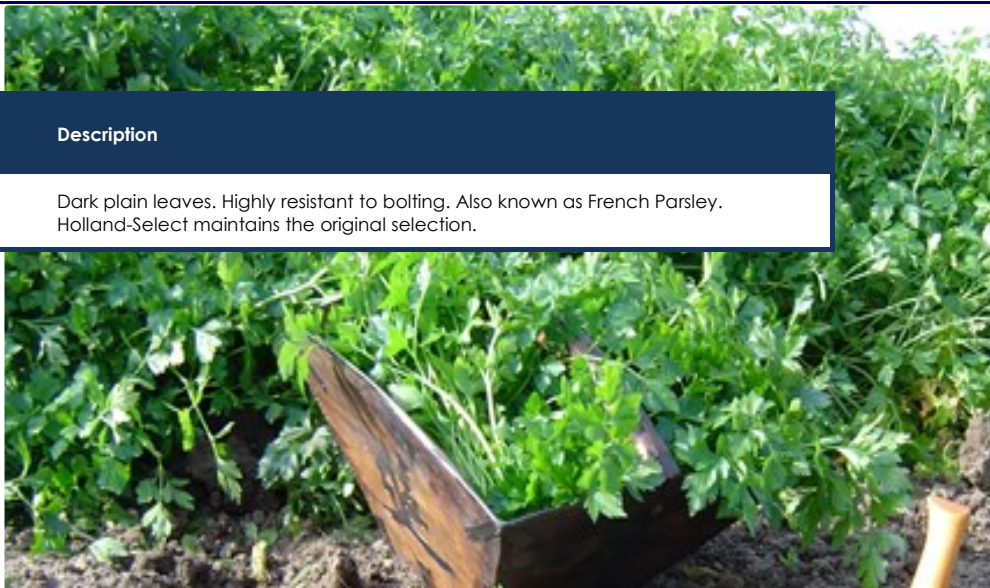

Variety	Maturity	Description
VRN - ENORMA		Well known variety that has performed well over the years. Long smooth cylindrical roots, intense black color and good bolting resistance. Uniform in length and diameter. Good tolerance against "soft tops".
MERES		Similar to VRN-Enorma but with excellent field resistance against "mildew" which makes MERES a more reliable variety to grow. Especially in years with high disease pressure, MERES will not suffer from "mildew" and will produce better yields.

Chervil

Anthriscus cerefolium

Variety	Maturity	Description
MASSA		Dark plain leaves. Highly resistant to bolting. Also known as French Parsley. Holland-Select maintains the original selection.

Organic seed

GENETIC MODIFICATION

Holland-Select's breeding techniques are innovative and advanced but our varieties have been developed without using GMO techniques.

The procedures adopted by the company are subject to supervision by the National Inspection Service. They are carried out with the utmost care, respecting the existing legal regulations and the procedures prescribed by the government regarding the marketing of varieties.
