claude.payri@noumea.ird.nc*

**Abstract :** The marine algae and seagrasses of New Caledonia are reviewed based on literature records and new surveys. 438 macroalgae species (Cyanobacteria excluded) representing 62 families, and 184 genera and 11 marine Angiosperms from reefs, lagoon and coastal environments are listed. Among these, 103 species are new records for the area, including a new genus, since the first comprehensive catalogue. This figure is likely to fall short of the actual total, as it does not include the majority of a rich, recently sampled, collection still remaining to be examined.

**Résumé :** Les algues et les Phanérogames marines de Nouvelle-Calédonie sont révisées à partir de la littérature et de nouvelles récoltes. Sont listées 438 espèces d'algues (Cyanobacteria exclues) représentant 62 familles, et 184 genres ainsi que 11 espèces d'Angiospermes marines provenant des récifs, lagons et zones littorales. Parmi celles-ci, 103 espèces sont nouvelles pour la région dont 1 genre nouveau pour la science depuis la publication de la première liste. Ce qui est une vision partielle de la réalité puisque n'est pas incluse dans sa totalité l'importante collection récemment constituée et qui reste à étudier.

### **Introduction**

New Caledonia was discovered by Captain Cook in 1774 but remained untouched by the trans-pacific voyages of discovery and the scientific explorations of 1800 - 1890. The first phycological collections from New Caledonia were composed during the years 1855-1860 and 1862-1867 by Eugène Vieillard, while he was posted as a naval surgeon at four bases in Balade, Wagap, Canala and Gatope. He sent back to France his extensive collections of both terrestrial plants and marine algae and these were distributed to botanists and museums throughout Europe by his friend Lenormand, an amateur French botanist. The phycological collections are housed in Leiden (L), Paris (PC) and Caen (CN; Valet 1968), with one small collection in Michigan (Millar & Payri, 2006). Part of Vieillard's collection was studied by Friedrich Kützing who described 66 new species from New Caledonia in the 20 volumes of *Tabulae Phycologicae* (1863b, 1864-1869). Millar & Prud'homme van Reine (2005) have re-examined those collections and proposed many name changes and new combinations. During 1869-1872, Benjamin Balansa, a naturalist from France, collected in several areas and his material was published with other amateur collections by Sauvageau (1901). Grunow appears to have been the first phycologist to have collected, in 1884, in New Caledonia and the material on green algae was later published by Murray & Boodle (1888) and by Kuckuck (1929) as regards the brown algae. Grunow's collection has not been re-examined because it was thought to have been lost during the WWII bombing of Berlin (Garrigue & Tsuda 1988). In fact the collection is housed in Vienna (W) and the *Sargassum* specimens are currently being re-examined by L. Mattio (in prep.).

During the following decades and until the early 1950s, little changed and only a small amount of New Caledonian material was published in occasional monograph studies (e.g. Weber van Bosse, 1898; Gepp 1922, Olsen-Stojkovich, 1985). In the early 1950s Mrs R. Catala, who was the co-founder of the aquarium in Nouméa, put together a large collection of 478 specimens from the lagoons and reefs of the Grande-Terre. Her collection was sent to Valerie May at 'The Marine Biological Laboratory, Division of Fisheries' in Cronulla (Australia), who identified 122 species in two separate papers (May 1953, 1966). This collection has been recently located at the National Herbarium of New South Wales in the Royal Botanic Gardens in Sydney, Australia. However, the

specimens are poorly preserved and many of the records which needed to be re-examined remain unverifiable (Millar Pers.com). Before May's publication, Mr R. Catala (Catala, 1950), published the first list of 42 species of macroalgae identified by V. May and G.F. Papenfuss as well as 4 seagrasses. In the following decades, new phycological material was collected with the « French expedition to the coral reefs of New Caledonia », supported by the Singer-Polignac Foundation during 1960-1963. The new genus *Riquetophycus polypus* Denizot and 3 new species *Bellotia simplex* Denizot, *Chlorodesmis penicillata* Farghali and *Rhipiliopsis novae-caledoniae* Farghaly & Denizot were described (Farghali & Denizot, 1979; Denizot 1965, 1968). But, unfortunately, the new species' (except for *Riquetophycus polypus*) cannot be recognized because they were not validly published as the authors did not provide Type vouchers and thus failed to satisfy the International Code of Botanical Nomenclature. Later, in the mid-1970s, Valet's work continued to contribute to the present knowledge of marine green algae of New Caledonia with the addition of *Halimeda melanesica* Valet and his work on Dasycladales (Valet 1966, 1968, 1969, 1976).

The period from 1976 to 1990, with the IRD's (ex. ORSTOM) programs in pharmacology (SNOM, SMIB) and the beginning of the explorations of the marine fauna of New Caledonia and dependencies brought a large amount of biological material. But, unfortunately, algae have been poorly studied taxonomically due to the lack of phycological resources. However, and thanks to the biologist-divers at IRD, all the specimens were vouchered by means of permanent formalin specimens (labelled AL#), and underwater photographic records. In addition, relevant information about location, habitat, depth range, and substratum are stored in the database LAGPLOON at IRD Nouméa and which will be soon available online. Finally, the most complete compilation of New Caledonian algal records to date is by Garrigue and Tsuda (1988), which lists 335 species and includes species from Claire Garrigue's thesis and some AL# specimens (Garrigue, 1985). After Garrigue's activity, work on algae returned to an occasional sampling by the IRD's divers.

In 2004, phycological activities recommenced with the arrival of the author at IRD Nouméa. Since then, the shallow and deep-water habitats of the coral reefs and lagoonal environments of New Caledonia including Grande-Terre, Loyalty Islands and Ile des Pins, have been the subject of an intensive sampling effort of macroalgae and marine Angiosperms. Several graduate students are involved in this census of marine algae and in the development of a program of phylogenetic taxonomy for 3 major groups, e.g., Fucales, Dictyotales and Corallinales. Similarly, the coralline algae of Quaternary reef environments have received attention and this has subsequently increased taxonomic information on both modern and actual species (Payri & Cabioch, 2004). The most recent floristic additions are the 41 new records by Millar & Payri (2006), the new genus *Pinnatiphycus menouii* N'Yeurt, Payri & Gabrielson (N'Yeurt *et al.* 2006) and new species of *Struvea thoracica* Kraft & Millar (2005) from the Lagon Sud-Ouest of Nouméa. As a result, the algal flora is vouchered in an extensive phycological herbarium housed at IRD Nouméa.

This recent activity in phycology has heralded a new era which generates new knowledge on the taxonomic identity of the marine flora of New Caledonia as well as on its composition and its biogeographic affinities. The sampling of deep-water flora on the outer slope of the reefs and the recent collections from the southern part of the Ile des Pins, revealed a number of species collected for the first time; part of them are cool-temperate species already known from Japanese waters, Lord Howe and southern Australia, while others are still unidentified.

The following checklist is based on literature records and new collections mostly undertaken by the author and housed at the IRD Phycological Herbarium. Many of the species recorded in Garrigue & Tsuda (1988), were re-documented with new samples and their taxonomy has been updated. However, the species which have not been re-sampled by the author were not re-evaluated but the nomenclature has been updated. The Fucales and, in particular, the taxonomy of *Sargassum* has been completely revisited by Lydiane Mattio during her PhD research. Thanks to Grunow's collection and Agardh's Type specimens, 10 taxa are now recognized compared to the 26 previously recorded (Mattio, Pers. Comm.). The 13 records of Catala (1950) and May (1953), have not been resampled,

and are regarded as doubtful species as the sampling sites have been investigated several times. Unfortunately, these records will remain unverifiable because of the poorly preserved sample condition of Catala's collection as noted above.

In contrast, the intensive sampling of Dictyotales has increased twofold the number of species recorded and revealed at least one new genus, and 5 potentially new species, which are currently being described. The study of the IRD collection undertaken by the author has resulted in a significant number of new records. A detailed annotated checklist of all New Caledonian macroalgae species including distribution data, voucher and literature references is in preparation by the author. The present checklist includes all records which are verified either by specimen collection or by confirmation by revising authors. In both cases, "voucher" are mentioned.

The present checklist includes 438 macroalgae species (Cyanobacteria excluded) representing 62 families, and 184 genera and 11 marine Angiosperms from reefs, lagoon and coastal environments. Among these, 103 species are new records for the area since the Garrigue & Tsuda (1988) catalogue. This figure is likely to fall short of the actual total, since it does not include much of the crustose Corallinaceae, Peyssonneliaceae nor the Liagoraceae that are being studied separately.

Further increases in the number of macroalgae will mostly come from the deep part of fore-reef habitats (60 m and below) which are currently being investigated as well as from both the remote and isolated area of Chesterfield and Bellona plateau in the western part, Entrecasteaux reefs in the northern part and Côte Oubliée in the eastern part of the Grande-Terre, areas which have been poorly sampled. The list is arranged alphabetically for the families, genera and species. Subfamilies and subgenera have not been specified. New records are boldface marked, \* indicates species with New Caledonia Type locality. Records identified only to the genus level have not been included. Names from the earlier lists that are now regarded as synonymous are in (brackets) others synonymies have been omitted. Type vouchers when known are indicated by the citation of herbarium abbreviations assigned by the International Association for Plant Taxonomy (Holmgren *et al.* 1990) mostly (NSW) and (PC). Each taxon citation is referenced by a publication. All the species listed in the Garrigue & Tsuda (1988) compilation are referenced to this work without distinction of the original citation. The nomenclatural and arrangement into families and orders follows that of Silva *et al.* (1996 and online updates). Spellings, authorities and synonymies have been also check on the "AlgaeBase" website [<http://www.algaebase.org/>].

The list of the marine Angiosperms is based on the recent collection of the author, but earlier records by Den Hartog (1970) are indicated in the reference part of the list. Taxonomic arrangement follows nomenclature of Les *et al.* (1997).

#### ACKNOWLEDGMENTS

The author would like to thank the IRD biologist-divers Jean-Louis MENOU, Cathy GEOFFRAY, Eric FOLCHER and John BUTSCHER who have provided assistance, sample collections and photo records since 2004. Special thanks are addressed to Georges BARGIBANT, Pierre LABOUTE, and Jean-Louis MENOU who had the initiative to sample and voucher algae since 1974. Thanks also are due to Bertrand RICHER DE FORGES and Hervé LE GUYADER for the encouragement to start an extensive work on macroalgae in New Caledonia. This is a contribution of UMR 7138 'Systématique, Evolution, Adaptation'.

<b>NEMASTOMATALES</b>		
<b>NEMASTOMATACEAE</b>		
<i>Platoma cyclocolpum</i> (Montagne) Schmitz	3	
<i>Predaea weldii</i> Kraft & Abbott	3, 4	NSW 611 724
<i>Predaea laciniosa</i> Kraft	3, 4	NSW 611788
<b>PLOCAMIALES</b>		
<b>PLOCAMIACEAE</b>		
<i>Plocamium angustum</i> (J. Agardh) J.D. Hooker & Harvey		

(as * <i>P. botryoides</i> Kützing)	1, 4	Type : L 941, 240-49 (barcode L 0056037)
<i>Plocamium leptophyllum</i> Kützing ( as <i>P. cartilagineum</i> var. <i>leptophyllum</i> (Kützing) V. J. Chapman)	1	
<i>Plocamium hamatum</i> J. Agardh	1, 3	
<b>RHODYMENIALES</b>		
<b>CHAMPIACEAE</b>		
<i>Champia parvula</i> (C. Agardh) Harvey	1	
<i>Champia expansa</i> Yendo	1	
* <i>Champia vieillardii</i> Kützing	1, 3, 4	Type: L938, 303-132 (barcode L 0055786)
<b>FAUCHEACEAE</b>		
<i>Gloiocladia halymenoides</i> (Harvey) Norris	3	
<b>LEPTOFAUCHEACEAE</b>		
<i>Leptofauchea anastomosans</i> (Weber-van Bosse) R.E. Norris & Aken	3	NC04-137
<b>RHODYMENIACEAE</b>		
<i>Asteromenia peltata</i> (Taylor) Huisman & Millar	2	NSW 611 799
<i>Gelidiopsis intricata</i> (C. Agardh) Vickers (=* <i>Acrocarpa capitatus</i> Kützing)	1, 3, 4	Type: L941-104 (barcode L 0194024)
<i>Gelidiopsis repens</i> (Kützing) Weber-van Bosse (as * <i>Gelidium repens</i> Kützing = <i>Gelidiopsis acrocarpa</i> (Harvey ex Kützing ) de Toni )	1, 4	*Type: L941, 11-84 (barcode L 0055781)
<i>Rhodymenia caulescens</i> (Kützing) Millar (= <i>Sphaerococcus</i> <i>caulescens</i> Kützing)	4	Type: L 941, 311-36 (barcode L 0194041)
<i>Gloiosaccion brownii</i> Harvey (as <i>Botryocladia brownii</i> (Harvey) P.C. Silva ex Nelson & Adams)	1	
<i>Botryocladia leptopoda</i> (J.Agarth) Kylin	1, 3	
<i>Botryocladia occidentalis</i> (Børgesen) Kylin	1	
<i>Chameobotrys boergesenii</i> (Weber-van Bosse) Huisman	3	
<i>Chrysomenia kaernbachii</i> Grunow	3	
<i>Chrysomenia cf littleriana</i> J. N. Norris & D. L. Ballantine	3	AL 537a
<i>Chrysomenia ornata</i> Kylin	2	NSW611803
<i>Chrysomenia polyglandulosa</i> Okamura	1	
<i>Coelarthrurum cliftonii</i> (Harvey) Kylin ( as <i>C. albertisii</i> (Piccone) Børgesen)	1	
* <i>Halichrysis irregularis</i> (Kützing) Millar (= <i>Iidae irregularis</i> Kützing)	4, 3	*Type : L 941, 119-12 (barcode L 0055963)
<b>RHODOGORGONALES</b>		
<b>RHODOGORGONACEAE</b>		
<i>Renouxia antillana</i> Fredericq & J. N. Norris	3	
<b>OCHROPHYTA</b>		
<b>PHAEOPHYCEAE</b>		
<b>CUTLERIALES</b>		
<b>CUTLERIACEAE</b>		
<i>Cutleria mollis</i> Allender & Kraft	2, 3	NSW 611823
<b>DICTYOTALES</b>		
<b>DICTYOTACEAE</b>		
* <i>Dictyota vieillardi</i> Kützing		
( <i>Vaughaniella</i> stage of an unidentified species of <i>Padina</i> )	4	*Type: L936, 291-5 (barcode L 0194020)
* <i>Dictyota vieillardi</i> var. <i>B. filiformis</i> Kützing		

( <i>Vaughaniella</i> stage of an unidentified species of <i>Padina</i> )	4	*Type: L936, 291-4 (barcode L 0194023)
<i>Dictyopteris acrostichoides</i> (J.Agardh) Bornet	1	
<i>Dictyopteris australis</i> (Sonder) Askenasy	1, 3	IRD 310
<i>Dictyopteris crassinervia</i> (Zanardini) O.C.Schmidt	3	IRD 305
<i>Dictyopteris delicatula</i> Lamouroux	3	IRD 446
<i>Dictyopteris plagiogramma</i> (Montagne) Vickers	1	
<i>Dictyopteris repens</i> (Okamura) Børgesen	3	
<i>Dictyota acutiloba</i> J. Agardh	1	
<i>Dictyota adnata</i> Zanardini	3, 8	L 936.291-7; (Vieillard, L937.117-12C); (L 937.117-86)
<i>Dictyota bartayresiana</i> Lamouroux	1	
<i>Dictyota cervicornis</i> Kützing	3	
<i>Dictyota ceylanica</i> Kützing	3	
<i>Dictyota dichotoma</i> (Hudson) Lamouroux	1	
(According to de Clerck <i>D. dichotoma</i> is restricted to the North Atlantic; the Pacific species cited as <i>D. dichotoma</i> should bear another name)		
<i>Dictyota furcellata</i> (C.Agardh) Greveille	1	
<i>Dictyota grossedentata</i> De Clerck & Coppejans	3	
<i>Dictyota moniliformis</i> (J.Agardh) Hörning, Schnetter &		
Prud'homme van Reine	3	
<i>Distromium decumbens</i> (Okamura) Levring	3	IRD 247
<i>Distromium didymothrix</i> Allender & Kraft	3	IRD 320
<i>Distromium flabellatum</i> Womersley	3	
<i>Homeostrichus flabellatus</i> Okamura	3	IRD 242, IRD 273, IRD 444
<i>Lobophora papenfusii</i> (W.R. Taylor) Farghaly	3	IRD 259
<i>Lobophora variegata</i> (Lamouroux) Womersley ex Oliveira	1, 3	IRD 276
<i>Padina australis</i> Hauck	3	IRD 158, IRD 172, IRD233, IRD 241
<i>Padina boryana</i> Thivy in Taylor (as <i>P. tenuis</i> (C. Agardh) Bory)	1	
<i>Padina gymnospora</i> (Kutz) Sonder	3	IRD 150, IRD 162
<i>Padina jonesii</i> Tsuda	3	IRD 165, IRD 199
<i>Padina melemele</i> Abbott & Magruder	3	IRD 219
<i>Padina minor</i> Yamada	3	IRD 173, IRD 166
<i>Padina pavonica</i> (Linnaeus) Thivy	1	(subject to any verification)
<i>Padina sanctae-crucis</i> Børgesen	3	IRD 207
<i>Padina stipitata</i> Tanaka & Nozawa	3	IRD 152, IRD 155, IRD 154 IRD 217
<i>Spatoglossum asperum</i> J. Agardh	1, 3	IRD 293, IRD 294, IRD 295, IRD 296
<i>Stylopodium australiacum</i> (Zanardini) Allender & Kraft	3	IRD 289
<i>Stylopodium flabellatum</i> Weber-van Bosse	3	IRD 285
<i>Stylopodium zonale</i> (Lamouroux) Papenfuss	1	subject to any verification
<i>Taonia australasica</i> J. Agardh	3	
<i>Zonaria stipitata</i> Tanaka & K. Nozawa	3	IRD 260, IRD 263, IRD 267
<b>ECTOCARPALES</b>		
<b>ACINETOSPORACEAE</b>		
<i>Feldmannia irregularis</i> (Kützing) Hame	1	
<i>Hincksia indica</i> (Sonder) J. Tanaka (as <i>Feldmannia indica</i> (Sonder) Womersley & Bailey)	1	
<b>CHORDARIACEAE</b>		
* <i>Cladosiphon novae-caledoniae</i> Kylin	1, 3	
<i>Spermatochnus paradoxus</i> Kützing	1	

**SPHACELARIACEAE**

<i>*Sphacelaria cornuta</i> Sauvageau	1	Type locality: Canala, New Caledonia Type: PC
---------------------------------------	---	---

<i>*Sphacelaria novae-caledoniae</i> Sauvageau	1	Type locality: Noumea, New Caledonia Type: PC
--	---	---

<i>Sphacelaria rigidula</i> Kützing	1
-------------------------------------	---

<i>Sphacelaria tribuloides</i> Meneghini	1
--	---

**FUCALES****CYSTOSEIRACEAE**

<i>Cystoseira trinodis</i> (Forsskal) C. Agardh (as <i>Cystophyllum muricatum</i> (Turner) J. Agardh)	1, 3
--	------

<i>Hormophysa cuneiformis</i> (Gmelin) Silva (as <i>H. triquetra</i> (C. Agardh) Kützing)	1, 3
---	------

**SARGASSACEAE**

<i>Sargassum albermarlense</i> Taylor	1	[subject to any verification]
<i>Sargassum carpophyllum</i> J. Agardh	1, 3	NC05-1016, NC05-1165
<i>Sargassum cinctum</i> J. Agardh	1	[subject to any verification]
<i>Sargassum coriifolium</i> J. Agardh	1	[subject to any verification]
<i>Sargassum crassifolium</i> J. Agardh	1, 3	NC05-1000, NC05-1097
<i>Sargassum (Phyllotrichia) decurrens</i> (Brown ex Turner) C. Agardh (as <i>S. boryi</i> C. Agardh, and as <i>S. scabripes</i> J. Agardh)	1, 3	NC05-1051, NC05-1027
<i>Sargassum desvauxii</i> (Mertens) C. Agardh	1	[subject to any verification]
<i>Sargassum cristaefolium</i> C. Agardh (as <i>S. duplicatum</i> J. Agardh)	1, 3	IDP05-309, NC05-1161
<i>Sargassum echinocarpum</i> J. Agardh	1, 3	NC06-027, IDP05-1010
<i>Sargassum filifolium</i> C. Agardh	1	[subject to any verification]
<i>Sargassum fissifolium</i> (Mertens) C. Agardh	1	[subject to any verification]
<i>Sargassum flavicans</i> (Mertens) C. Agardh	1	[subject to any verification]
<i>Sargassum ilicifolium</i> (Turner) C. Agardh	1, 3	NC02-34, NC05-998
<i>Sargassum linearifolium</i> (Turner) C. Agardh	1	[subject to any verification]
<i>Sargassum lophocarpum</i> J. Agardh	1	[subject to any verification]
<i>Sargassum myriocystum</i> J. Agardh	1	[subject to any verification]
<i>Sargassum oligocystum</i> Montagne	1	[subject to any verification]
<i>Sargassum polyacanthum</i> J. Agardh	1	[subject to any verification]
<i>Sargassum polycystum</i> C. Agardh	1, 3	NC05-1061, NC05-1167
<i>Sargassum spathulaefolium</i> J. Agardh	1	[subject to any verification]
<i>Sargassum spinuligerum</i> Sonder	1, 3	NC06-044, NC05-973
<i>Sargassum spinuligerum</i> var. <i>crispata</i> (Sonder) J. Agardh	3	<b>NC05-999, NC05-1060</b>
<i>Sargassum stenophyllum</i> J. Agardh	1	[subject to any verification]
<i>Sargassum torvum</i> J. Agardh	1	[subject to any verification]
* <i>Sargassum turbinarioides</i> Grunow	1, 3	IDP05-1056
<i>Sargassum verruculosum</i> (Mertens) C. Agardh	1	[subject to any verification]
<i>Turbinaria ornata</i> (Turner) J. Agardh	1, 3	
<i>Turbinaria conoides</i> (J. Agardh) Kützing	3	

**SCYTOTHAMNALES****SCYTOTHAMNACEAE**

<i>Asteronema breviarticulatus</i> (J. Agardh) Ouriques & Bouzon	3
--	---

**SCYTOSIPHONALES****CHNOOSPORACEAE**

<i>Chnoospora implexa</i> J. Agardh	1, 3
-------------------------------------	------

**SCYTOSIPHONACEAE**

<i>Colpomenia sinuosa</i> (Mertens ex Roth) Derbès & Solier	1, 3
---	------

<i>Colpomenia ecuiculata</i> Parson	3
-------------------------------------	---

<i>Hydroclathrus clathratus</i> (C. Agardh) Howe	1, 3
--	------

<i>Hydroclathrus tenuis</i> CK Tseng & Lu	3
---	---

<i>Rosenvingea intricata</i> (J.Agardh) Børgesen	1, 3
<i>Rosenvingea nhatrangensis</i> Dawson	3

#### SPOROCHNALES

##### SPOROCHNACEAE

<i>Bellotia simplex</i> Denizot	1, 3
<i>Nereia intricata</i> Yamada	3
<i>Sporochnus</i> sp 1	3
<i>Sporochnus</i> sp 2	3

## Appendix 2: seagrasses (Marine Angiosperms) from New Caledonia

3: Payri Collection housed at IRD, 10: Den Hartog (1970) ; 11: Larkum (1995);

#### SPERMATOPHYTA

##### ALISMATALES

##### CYMODOCEAE

<i>Cymodocea rotundata</i> Ehrenberg & Hemprich ex Ascherson	10, 3	Balansa 3103 (PC); Cribs 208 (PC)
<i>Cymodocea serrulata</i> (R. Brown) Ascherson & Magnus	10, 3	Balansa, 1527 (PC); Catala 19 (NSW)
<i>Halodule uninervis</i> (Forskål) Ascherson	10, 3	Balansa, 1528, 1529 (PC)
<i>Halodule pinnifolia</i> (Miki) den Hartog	10, 3	McKee 7891 (US)
<i>Syringodium isoetifolium</i> (Ascherson) Dandy	10, 3	Balansa, 1526 (PC)

##### HYDROCHARITACEAE

<i>Enhalus acoroides</i> (Lf.) Royle	10, 3	Vieillard, 1412 (CN) ; Balansa, 3162 (PC)
<i>Halophila capricorni</i> Larkum	11, 3	Garrigue, NSW S153; Larkum NSW S122-124
<i>Halophila decipiens</i> Ostenfeld	10, 3	Vieillard, 1368 (CN, PC)
<i>Halophila minor</i> (Zolinger) den Hartog (as <i>H. ovata</i> Gaud.)	10, 3	Balansa, 1525 (PC)
<i>Halophila ovalis</i> (R. Brown) Hook.	10, 3	Balansa, 1525 (PC)
<i>Thalassia humpreyiae</i> (Ehrenberg) Ascherson	10, 3	Balansa, 3103, 3161 (PC)

L'IRD propose des programmes regroupés en 5 départements pluridisciplinaires :

- I DME Département milieux et environnement
- II DRV Département ressources vivantes
- III DSS Département sociétés et santé
- IV DEV Département expertise et valorisation
- V DSF Département du soutien et de la formation des communautés scientifiques du Sud
