The Apple Education Trainer (AET) program prepares individuals from intermediate agencies and noncommercial education groups to use the Apple Teacher program resources to support the educators within their organization.

PARTICIPANT OBJECTIVES

- Enhance your skills for creating a culture of learning.
- Expand personal skills in macOS or iOS device and Apple app used for learning. Training is focused on iPads, but apps and resources are similar across iOS devices.
- Ensure an understanding of the AET program and resources and successfully support educators in your organization.

BENEFITS

Following the AET courses, you will be asked to submit a project within 30 days to complete your authorization. Once you've collected all the badges for iPad or Mac, you'll receive an official Apple Teacher logo and Certificate of Recognition so you can share your achievements. You'll also gain access to more learning resources and badges to continue your learning as an Apple Teacher.
