

LIST OF FAUNA OF NAMDAPHA TIGER RESERVE INCLUDING INVERTEBRATES.

III A: Insects and some arachnids

III B: Other invertebrates

IV: Butterflies

V: Fishes

VI: Herpetofauna (Amphibians and reptiles)

VII: Birds

VIII: Mammals

APPENDIX IIIA

Insects and Arachnids of Namdapha Tiger Reserve

Source: ZSI survey: Ghosh 1987, few addl. records, including a bee species new to science (Sureshan 2010)

The ZSI list had included 430 insect species, apart from other invertebrates. It did not include some orders such as Spiders (Order Araneae), Megaloptera (Fish-flies), Plecoptera (Stone flies), Tricoptera (Caddis flies), Phasmatodea (Stick insects), and Ephemeroptera (May flies). Butterflies are given in a separate list below. Species marked with an asterisk are additional records; some odonates have been added based on occurrence in other areas in Arunachal Pradesh.

APPENDIX IV

Butterflies of Namdapha Tiger Reserve

Source: Nel Rodrigues, Arjan Basu Roy, Dr. Amol Patwardhan, Balakrishna Valeppy and Rudraprasad Das (Butterfly India Yahoo group), 2008-2009, *unpubl. records* submitted to NTR, Rohit Naniwadekar, *unpubl. obs.* 2006-2012. Various other surveys and visitors have also recorded butterflies from the area (Athreya *et al.* 1997, Krushnamegh Kunte, Sanjay Sondhi), and if all such records are compiled, the comprehensive butterfly list would include more species. Moths have not been fully documented, with only 35 species belonging to 15 families recorded by ZSI (Ghosh 1987), but there are likely to be over 200 species.
