

## NIEUWE WEEKDIERSOORTEN (SCHELPEN) NEW SHELLED MOLLUSCAN SPECIES

W. Faber

*Newly described marine shelled molluscan (sub)species with reference to the publications in which they were introduced. Ordered per family, families sorted alphabetically. † fossil species.*

*Nieuw-beschreven (onder)soorten van schelpdragende mariene weekdieren met verwijzing naar de publicaties waarin zij worden geïntroduceerd. Familiegewijs gerangschikt, families in alfabetische volgorde opgenomen. † fossiele soorten.*

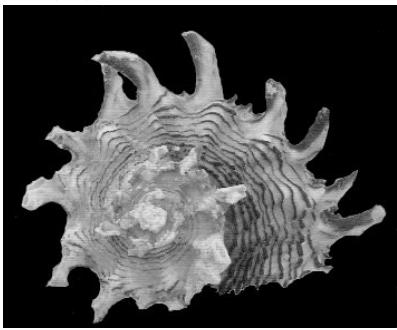

### POLYPLACOPHORA

- \* † *Leptochiton serenae* Dell'Angelo, Resta & Bonfitto, 2007. Pleistocene, S. Italy. [con riasunto italiano] – Bol. Malac. 43(9-12): 139-142.

### GASTROPODA

#### ANGARIIDAE

- \* *Angaria carmencita* Günther, 2007. W. Australia. [mit deutscher Zusammenfassung] – Club Conchylia Informationen 38(3-4): 47-53.

*Angaria carmencita* Günther, 2007. Paratype 4, 61.7 mm, Quondong, Broome, WA. – Club Conchylia Informationen 38(3-4): 50, fig. 4.

#### ATLANTIDAE

- \* † *Atlanta lingayanensis*; *A. richeri*; *A. seapyi*. All: Janssen, 2007. Both: Pliocene, Philippines. – Scripta Zoologica No. 135: 29-177.

#### CALLIOSTOMATIDAE

- \* *Calliostoma frumari* Garcia, 2007. Gulf of Mexico. – Novapex 8(3-4): 127-133.

#### CAECIDAE

- \* *Caecum skoghundae* Pizzini, Raines & Nofroni, 2007. Panama. – Iberus 25(2): 1-7.

#### CAVOLINIIDAE

- \* † *Cavolinia baniensis*; *C. perparvula*; *C. shibatai*; *Diacavolinia pristina*; *Diacria microstriata*; *D. paeninsula*; *D. philippinensis*. All: Janssen, 2007. All: Pliocene, Philippines. – Scripta Zoologica No. 135: 29-177.

#### COSTELLARIIDAE

- \* *Vexillum albolineatum* T. Cossignani & V. Cossignani, 2007. Australia. – Malacologia No. 57: 13.

#### CRESEIDAE

- \* † *Hyalocylis marginata* Janssen, 2007. Pliocene, Philippines. – Scripta Zoologica No. 135: 29-177.

### CYSTISCIDAE

- \* *Canalispira kerni*; *C. lipei*. Both: Garcia, 2007. Both: Gulf of Mexico. – Novapex 8(3-4): 127-133.

### DRILLIIDAE

- \* *Tylotilla roseofuca* Bozzetti, 2007. Madagascar. – Malacologia No. 57: 10-11.
- \* *Drillia (Clathrodrillia) blakensis* Tippett, 2007. W Atlantic Ocean. – The Nautilus 121(4): 210-213.

### EPITONIIDAE

- \* † *Scalina cheneyi*; *S. isaacsoni*; *S. belti*; *S. brophyi*; *S. foosei*. All: DeVries, 2007. S. Peru, Miocene, Pliocene. – The Veliger 49(4): 231-251.
- \* † *Alora teresmonile* DeVries, 2007. W South America, Miocene. – The Veliger 49(4): 252-255.

### EULIMIDAE

- \* *Melanella ameliae* Engl, 2007. Antarctic. [mit deutscher Zusammenfassung] – Club Conchylia Informationen 38(3-4): 54-56.

### FASCIOLARIIDAE

- \* *Dolicholatirus minusculus* Bozzetti, 2007. Madagascar. – Malacologia No. 57: 15-16.
- \* *Amiantofusus*, gen. nov.; *A. amiantus* (Dall, 1889) comb. nov.; *A. pacificus*, SW Pacific; *A. gloriabundus*, North Fiji Basin; *A. sebalis*, New Caledonia, Vanuatu; *A. candoris*, Coral Sea; *A. maestratii*, New Caledonia; *A. borbonica*, Réunion; *A. cartilago*, Mozambique. All: Fraussen, Kantor & Hadorn, 2007. – Novapex 8(3-4): 79-101.

### LIMACINIDAE

- \* † *Heliconoides sondaari*; *Striolumacina andaensis*. Both: Janssen, 2007. Both: Pliocene, Philippines. – Scripta Zoologica No. 135: 29-177.

### MARGINELLIDAE

- \* *Dentimargo spengleri* Lussi, 2007. South Africa. – Malacologia No. 57: 3-6.
- \* *Hydroginella marina* Lorenz & Kostin, 2007. Papua New Guinea. – Malacologia No. 57: 12.
- \* *Marginella verdascai* Hayes & Rosado, 2007. Mozambique. – Malacologia No. 57: 17-19.

### MATHILDIDAE

- \* *Mathilda letei* Prkiae & Smriglio, 2007; *M. bieleri* Smriglio & Mariottini, 2007. Both: Mediterranean Sea. – Basteria 71(4-6): 177-188.

### MITRIDAE

- \* *Mitra (Mitra) lussii* Turner & Salisbury, 2007. South Africa. – Arch. Molluskenkunde 136(2): 211-215.

- \* *Mitra (Mitra) leforti*, Madagascar; *M. (M.) thachi*, Vietnam; *M. (Nebularia) gracilefragum*, Indo-West-Pacific; *M. (N.) silviae*, Indian Ocean; *Domiporta polycincta*, Phillipines; *Scabricola gorii*, Indo-Pacific. All: Turner, 2007. – Contrib. to Nat. Hist. No. 10: 1-39.

### MURICIDAE

- \* *Favartia brevispira*; *Coralliophila parvula*; *Typhinellus androyensis*; *T. bicolor*. All: Bozzetti, 2007. All: Madagascar. – Malacologia No. 57: 6-10.

### NASSARIIDAE

- \* *Bullia mirepicta* Bozzetti, 2007. Madagascar. – Malacologia No. 57: 14-15.
- \* *Nassarius (Zeuxis) semiplicatoides* Zhang & You, 2007. China. – Acta Zootaxonomica Sinica 32(4): 900-902.

### NEOMPHALIDAE

- \* † *Retiskenea? kieli*; *R. ? tuberculata*. Both: Campbell, Peterson & Alfaro, 2008. Lower Cretaceous, N. California. – J. Paleont. 82(1): 149-153.

### RISSOIDAE

- \* *Setia levantina* Bogi & Galil, 2007. Israel. [in Italian with English abstract] – Boll. Malac. 43(9-12): 171-173.

- \* *Alvania gemina*; *A. cabrensis*; *A. portentosa*. All: Rolán & Hernández, 2007. All: Gulf of Guinea. [con resumen español] – Iberus 25(2): 9-18.

### SOLARIELLIDAE

- \* *Solariella cancapae* Vilvens & Swinnen, 2007. Azores. – Novapex 8(3-4): 123-126.

### SPHAEROCINIDAE

- \* † *Spaerocina convolvula* Janssen, 2007. Pliocene, Philippines. – Scripta Zoologica No. 135: 29-177.

### TURRIDAE

- \* *Hindsiclavula rosenstielianus* Tippett, 2007. W Atlantic Ocean. – The Nautilus 121(4): 210-213.

### BIVALVIA

#### GRYPHAEIDAE

- \* *Empressostrea* n. gen.; *E. kostini* Huber & Lorenz, 2007. S. China Sea. – Club Conchylia Informationen 38(3-4): 26-41.

## LIMOPSIDAE

\* *Nipponolimopsis littoralis* Sasaki & Haga, 2007. Japan. — The Veliger 49(4): 215-230.

## MONTACUTIDAE

\* *Mysella gregaria* Rotvit, Lützen, Jespersen

& Fox, 2007. N. Carolina, USA. — The Nautilus 121(4): 191-200.

## THYASIROIDEA (order)

\* *Axinus cascadiensis* Oliver & Holmes, 2007.-NE Pacific. — J. Conch 39(4): 363-375.

## VESICOMYIDAE

\* † *Adulomya hokkaidoensis* Amano & Kiel, 2007. Hokkaido, Japan, Miocene. — The Veliger 49(4): 270-293.

**WORLDWIDE SPECIMEN SHELLS**

10 Minutes from Brussels Airport. Visitors welcome.

All families from the very common to the ultra rare,  
specialized in Pectinidae, Philippine shells and  
European shells

*Specimen shells and books on shells, free lists on request.  
Satisfaction guaranteed!*

## NIEUWE BOEKEN NEW BOOKS

W. Faber

**The Shell. A World of Decoration & Ornament** by I. Thomas, 2007. 256 pp., 526 photographs of which 507 in colour. Ed.: Thames & Hudson, London, UK. ISBN 978-0-500-51357-6

Shells have always been important in the life of mankind: in religion, as money, as utensils, in art. This very special book deals with shells in all kinds of art: symbols of status, magic and religion, carved shells, shell jewelry, shells in art, ornamental shellwork, shells in architecture and shells in the decorative art, largely illustrated in colour. The author also gives an illustrated glossary of 126 species of shells. The book ends with a list of public collections of shells, a list of shell houses and grottoes open to public, some books and websites, a bibliography and an index.

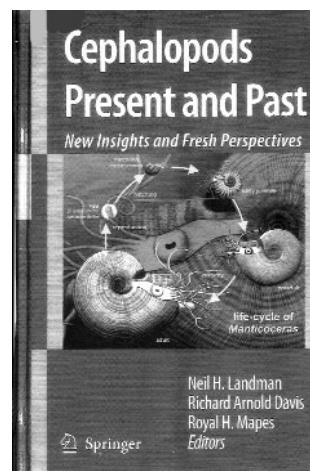

\*\*

Schelpen hebben altijd een belangrijke rol gespeeld in het leven van de mens: in de godsdienst, als geld, als gebruiksvoorwerp, in de kunst. Dit bijzondere en rijkelijk in kleur geïllustreerde boek behandelt schelpen in allerlei kunstvormen: als statussymbool, in de magie en godsdienst, bewerkte schelpen, als sie-

raad, in de kunst, als ornament, in de architectuur en als versiering. De auteur geeft ook een geïllustreerd overzicht van 126 schelpsoorten. Het boek eindigt met een lijst van openbare schelpenverzamelingen, een lijst van voor het publiek toegankelijke schelpenhuizen en -grotten, enige boeken en websites, een bibliografie en een register.

\*\*\*

**Cephalopods Present and Past: New Insights and Fresh Perspectives** by N.H. Landman, R.A. Davis & R.H. Mapes (eds.), 2007. 16 x 24 cm, pp. 481, numerous bw illustrations. Ed.: Springer, Dordrecht, the Netherlands. ISBN 978-1-4020-6461-6.

Cephalopods with about 900 species are not only an important component of present-day marine ecosystem but have also an extraordinary fossil record, back to the Cambrian Period with as many as 10,000 extinct species. Because of this record they also serve as ideal index fossils to subdivide geologic time. This book contains 20 chapters covering a wide range of topics about both fossil and present-day cephalopods. These

chapters are grouped in three sections: Phylogeny and Systematics; Morphology of Soft and Hard Tissues; and Biogeography, Biostratigraphy, Ecology and Taphonomy. Each chapter has its own references. A general index completes the book.

\*\*

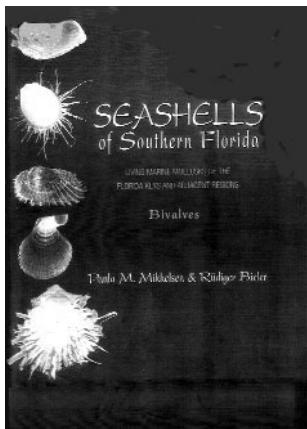

Koppotigen vormen met ongeveer 900 soorten een belangrijk onderdeel van het tegenwoordige mariene ecosysteem maar hebben ook een buitengewone fossiele staat die terugreikt tot het Cambrium met zoveel als 10.000 uitgestorven soorten. Hierdoor dienen zij eveneens als ideale gidsfossielen voor het onderverdelen van de geologische tijdschaal. Dit boek heeft 20 hoofdstukken met een veelheid van wederwaardigheden over zowel fossiele als recente koppotigen. Deze hoofdstukken zijn gegroepeerd in drie afdelingen: Fylogenie en systematiek; Morfologie van de zachte en harde delen; en Biogeografie, biostratigrafie, ecologie en tafonomie. Elk hoofdstuk heeft zijn eigen literatuuropgave. Met een algemeen register sluit het boek af.

\*\*\*

**Seashells of Southern Florida: living marine mollusks of the Florida Keys and adjacent regions. Bivalves** by P.M. Mikkelsen & R. Bieler, 2008. 20 x 25 cm, pp. 503, numerous colour photographs and colour and bw drawings. Ed.: Princeton University Press, Princeton and Oxford. ISBN 0-691-11606-7.

\*\*

The rich and varied molluscan fauna of the Florida Keys includes more than 300 species of bivalves. Many of these have a wide distribution and all are described and illustrated in this book. The systematic part is preceded by an introduction about the Florida Keys, bivalve morphology and a list of the recent bivalve

families of the world. Each family description is accompanied by a drawing

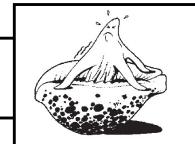

of the shell with the teeth and muscle scars and a colour drawing of the soft tissues of the animal. References are given by family. The authors also give a note about shell collecting, a note on species names introduced by d'Orbigny and an illustrated glossary of bivalve terms. The book closes with a large index.

\*\*

De rijke en gevarieerde weekdierenfauna van de Florida Key's telt meer dan 300 soorten tweekleppigen. Vele van deze soorten hebben een uitgebreid verspreidingsgebied. Al deze soorten worden in dit boek beschreven en afgebeeld. Het systematisch gedeelte wordt vooraf-

gegaan door een inleiding over de Florida Key's, de morfologie van de tweekleppigen en een lijst van recente families bivalven van de gehele wereld. Elke familiebeschrijving gaat vergezeld van een tekening van de tanden en spierafdrucksels van de schelp en een kleurtekening van de weke delen van het dier. De literatuur wordt per familie gegeven. Voorts vertellen de auteurs iets over het verzamelen van schelpen, geven een lijst van namen die geïntroduceerd zijn door d'Orbigny en een geïllustreerd overzicht van de termen die bij tweekleppigen worden gebruikt. Het boek sluit af met een uitgebreid register.

## SCHELPENBEURZEN EN BIJEENKOMSTEN INTERNATIONAL SHELL SHOWS AND MEETINGS

- |                          |  |
|--------------------------|--|
| April 19-20<br>2008      | 5TH NATIONAL SHOW OF MINERALS, FOSSILS AND SHELLS. Location: Scuola Media Satale "G. Boccaccio", Via G. Leopardi, Certaldo (FI), Italy.
