

# Review of the Shell-bearing Gastropods in the Russian Waters of the East Sea (Sea of Japan).

## III. Caenogastropoda: Neogastropoda

Vladimir V. Gulbin

A.V. Zhirmunsky Institute of Marine Biology, Far East Branch, Russian Academy of Sciences, Vladivostok 690041, Russia

### ABSTRACT

Based on investigation of collections at the A.V. Zhirmunsky Institute of Marine Biology of the Far-Eastern Branch of the Russian Academy of Sciences (Vladivostok) and Zoological Institute of the Russian Academy of Sciences (Saint Petersburg), as well as on the analysis of published data, the species composition of shell-bearing gastropod mollusks of the Russian waters of the East Sea (Sea of Japan), consisting of 331 species and subspecies, has been identified. Each species is assigned to a biogeographic grouping in the study area. Its type locality and habitat (depth and substrate) are also documented. The third part of this review includes 129 species in Neogastropoda (Caenogastropoda).

**Key words:** Gastropoda, East Sea (Sea of Japan), faunal.

### INTRODUCTION

The fauna of shell-bearing gastropod mollusks of the Russian waters of the East Sea includes 331 species and subspecies: 306 prosobranchs, 24 opisthobranchs, and 1 pulmonate. The third part of this review includes 129 species in Neogastropoda (Caenogastropoda).

For each species a brief synonymy is given, including the original description, and reference to the most complete faunal reports on the mollusks of Korea (Min, 2004), Japan (Higo *et al.*, 1999), and Russia (Kantor and Sysoev, 2006). Its type locality is also listed, as well as its distribution. The distribution includes its biogeographic grouping, the specific faunal zones (Fig. 1) where it was obtained in the Russian waters of the East Sea (Roman numerals), and a general statement of its abundance. Its habitat is also listed, and includes data on depth and substrate which refer only to its distribution in the

Russian waters of the East Sea.

The classification of gastropod mollusks developed by Bouchet and Rocroi (2005) is used in the paper up

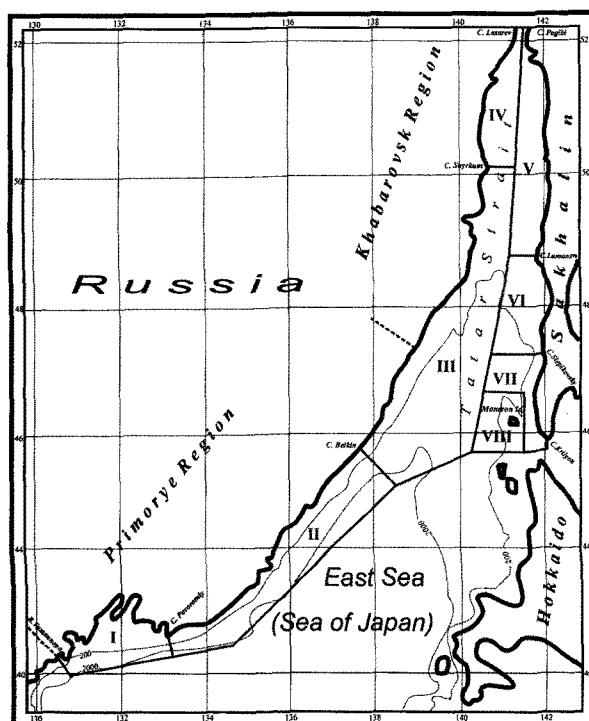

Fig. 1. The Faunal zones in the Russian Waters of the East Sea (Sea of Japan).

to superfamily rank. Also, all shell-bearing gastropod mollusks have been divided into the groups of Patellogastropoda, Vetigastropoda, Cocculiniformia, Caenogastropoda and Heterobranchia, without assigning them a taxonomic rank. Subordinate taxa within a higher rank taxon are listed, as a rule, in alphabetical order. Subgenera were not distinguished.

## SYSTEMATICS

### Caenogastropoda

#### Neogastropoda

##### Superfamily Buccinoidea Rafinesque, 1815

###### Family Buccinidae Rafinesque, 1815

###### Subfamily Ancistrolepisinae Habe and Sato, 1973

###### Genus *Ancistrolepis* Dall, 1895

Type species: *Chrysodomus eucosmius* Dall, 1891.

###### 157. *Ancistrolepis okhotensis* Dall, 1925

[*Ancistrolepis okhotensis* Dall, 1925: 4, pl. 30, fig. 1; Kantor and Sysoev, 2006: 154, pl. 70 D; *Clinopegma okhotensis*: Higo et al., 1999: 227].

Type locality: Terpenia Cape, Sakhalin (Sea of Okhotsk).

Distribution: Pacific, mainly Asian, boreal species; II, VIII; rare.

Habitat: 40–220 m; mainly sand and muddy sand.

###### 158. *Ancistrolepis sasakii* (Habe and Ito, 1970)

[*Clinopegma sasakii* Habe and Ito, 1970: 107–108, text-fig. 1; Higo et al., 1999: 227; *Ancistrolepis sasakii*: Kantor and Sysoev, 2006: 154, pl. 70 E–E'].

Type locality: Hokkaido, East Sea.

Distribution: Asian low-boreal species; III, VII; rare.

Habitat: 350–594 m; mud.

###### Genus *Clinopegma* Grant and Gale, 1931

Type species: *Buccinum unicum* Pilsbry, 1905.

###### 159. *Clinopegma decora* (Dall, 1925)

[*Ancistrolepis decora* Dall, 1925: 3, pl. 35, fig. 10; *Clinopegma decora*: Higo et al., 1999: 226; Kantor and Sysoev, 2006: 155, pl. 71 C].

Type locality: South-western Sakhalin (East Sea).

Distribution: Pacific boreal species; II, V; rare.

Habitat: 20–64 m; mud and muddy sand.

###### Genus *Pseudoliomesus* Habe and Sato, 1972

Type species: *Tritonium (Buccinum) ooides* Middendorff, 1841.

###### 160. *Pseudoliomesus canaliculata* (Dall, 1874)

[*Buccinopsis canaliculata* Dall, 1874: 252; *Pseudoliomesus ooides canaliculatus*: Higo et al., 1999: 227; *Pseudoliomesus ooides ooides*: Min, 2004: 219, fig. 582; *Pseudoliomesus canaliculata*: Kantor and Sysoev, 2006: 157, pl. 72 A].

Type locality: Nunivak Island, Aleutian Islands.

Distribution: Pacific boreal species; I; rare.

Habitat: 62 m; muddy sand.

###### Subfamily Buccininae Golikov and Starobogatov, 1975

###### Genus *Beringius* Dall, 1887

Type species: *Chrysodomus crebricostatus* Dall, 1877.

###### 161. *Beringius stimpsoni* (Gould, 1860)

[*Buccinum (Neptunea) stimpsoni* Gould, 1860: 325; *Beringion stimpsoni*: Higo et al., 1999: 223; *Beringius stimpsoni*: Kantor and Sysoev, 2006: 158–159, pl. 73 D].

Type locality: Arikamchechen Island, Bering Strait.

Distribution: Boreal-arctic, mainly Pacific species; V; single record only.

Habitat: 100–150 m; muddy sand.

###### Subfamily Buccininae Rafinesque, 1815

###### Genus *Buccinum* Linnaeus, 1758

Type species: *Buccinum undatum* Linnaeus, 1758.

###### 162. *Buccinum acuminulatum* Golikov, 1980

[Golikov, 1980: 256–257, fig. 7 B, 326 (2), pl. 20 (1a, 1b); Kantor and Sysoev, 2006: 161, pl. 75 F].

Type locality: Tatar Strait, Sakhalin Island.

Distribution: Asian low-boreal species; VII; single record only.

Habitat: 46 m; sand with shells.

###### 163. *Buccinum acutispiratum* Dall, 1907

[*Buccinum acutispiratum* Dall, 1907: 146; 1925: 6, pl. 33, fig. 8; Kantor and Sysoev, 2006: 161, pl. 75 C; *Reticubuccinum acutispiratum*: Higo et al., 1999: 245; Min, 2004: 235, fig. 639].

Type locality: East Sea.

Distribution: Pacific, mainly Asian, boreal species; I, II, IV, VI; single records only.

Habitat: 50-545 m; mud and muddy sand.

164. *Buccinum bayani bayani* (Jousseaume, 1883)  
 [Tritonium bayani Jousseaume, 1883: 191-192, pl. X, fig. 5; *Buccinum bayani*: Higo et al., 1999: 243; Min, 2004: 233, fig. 630; Kantor and Sysoev, 2006: 162, pl. 78 C-D; *Buccinum aniwianum*: Min, 2004: 233, fig. 629].

Type locality: Korean Peninsula, East Sea.

Distribution: Asian low-boreal subspecies; I, II, III, IV, V; abundant commercial species.

Habitat: 25-510 m; mainly sand and muddy sand, pebbles (less frequently).

165. *Buccinum ciliatum ciliatum* (Fabricius, 1780)  
 [Tritonium ciliatum Fabricius, 1780: 401-402; *Buccinum ciliatum*: Higo et al., 1999: 244; *Buccinum ciliatum ciliatum*: Kantor and Sysoev, 2006: 163, pl. 76 F-G].

Type locality: Greenland.

Distribution: Boreal-arctic subspecies; II, IV, VII; rare.

Habitat: 45-380 m; sand and muddy sand.

166. *Buccinum japonicum* A. Adams, 1861  
 [*Buccinum japonicum* A. Adams 1861: 135; Higo et al., 1999: 240; Kantor and Sysoev, 2006: 167-168, pl. 77 H].

Type locality: Hokkaido, East Sea.

Distribution: Asian low-boreal species; II; single record only.

Habitat: Unknown.

167. *Buccinum middendorffi* Verkrüzen, 1882  
 [*Buccinum middendorffi* Verkrüzen, 1882: 213-214; Higo et al., 1999: 241; Min, 2004: 231, fig. 624; Kantor and Sysoev, 2006: 169, pl. 81 I-J].

Type locality: East coast of Sakhalin.

Distribution: Asian low-boreal species; I-VIII; common.

Habitat: 4-62 m; mainly sand and muddy sand, stones (less frequently).

168. *Buccinum mirandum mirandum* E.A. Smith,

1875

[*Buccinum mirandum mirandum* Smith, 1875: 107-108; *Buccinum polaris mirandum*: Higo et al., 1999: 242; Kantor and Sysoev, 2006: 169, pl. 81 G]. Type locality: Eastern Hokkaido (Japan). Distribution: Asian boreal subspecies; I-VIII; common. Habitat: Intertidal-67 m; sand, muddy sand, stones, rock.

169. *Buccinum ochotense ochotense* (Middendorff, 1848)

[*Tritonium (Buccinum) ochotense* Middendorff, 1848: 235; *Buccinum ochotense ochotense*: Higo et al., 1999: 242 (in part, non *B. ochotensis timessa*); Kantor and Sysoev, 2006: 170, pl. 83 A-B].

Type locality: Sea of Okhotsk.

Distribution: Asian, mainly high-boreal, subspecies; III; single record only.

Habitat: 20-25 m; pebbles.

170. *Buccinum ochotense timessa* Bartsch in Golikov, 1980

[*Buccinum ochotense timessum* Golikov, 1980: 190-191, 257 (2), 258 B, 259 (2), 260 (2), 261, pl. 4 (2a-2d); Kantor and Sysoev, 2006: 171, pl. 83 C; *Buccinum ochotense ochotense*: Higo et al., 1999: 242 (in part); Min, 2004: 231, fig. 625].

Type locality: Southern Sakhalin, East Sea.

Distribution: Asian low-boreal subspecies; I-VIII; common.

Habitat: 3-165 m; mainly rock and stones, sand and muddy sand (less frequently).

171. *Buccinum opisoplectum* Dall, 1907

[*Buccinum opisoplectum* Dall, 1907: 142; Higo et al., 1999: 240; Min, 2004: 231, fig. 622; Kantor and Sysoev, 2006: 171, pl. 82 C-D].

Type locality: East Sea.

Distribution: Asian low-boreal species; I; single record only.

Habitat: 54 m; substrate unknown.

172. *Buccinum percrassum* Dall, 1883

[*Buccinum polare* var. *percrassa* Dall: Kobelt, 1883:

86-87, pl. 91, fig. 5; *Buccinum chishimatum chishimanum*: Higo et al., 1999: 242; *Buccinum percrassum*: Kantor and Sysoev, 2006: 171-172, pl. 82 E-F].

Type locality: North of Bering Strait.

Distribution: Asian boreal species; VII, VIII; rare.

Habitat: 2-13 m; rock, boulders.

173. ***Buccinum polium polium*** Dall, 1907

[*Buccinum polium* Dall, 1907: 145; *Buccinum percrassum polium*: Higo et al., 1999: 243; *Buccinum polium polium*: Kantor and Sysoev, 2006: 172, pl. 81 E].

Type locality: Aniwa Bay, Sakhalin (Sea of Okhotsk).

Distribution: Asian boreal subspecies; VII; single record only.

Habitat: 95-120 m; muddy sand.

174. ***Buccinum rossellinum*** Dall, 1919

[*Buccinum rossellinum* Dall, 1919b: 327; Kantor and Sysoev, 2006: 173, pl. 81 K].

Type locality: Chirikoff Island, Alaska.

Distribution: Asian, mainly high-boreal, species; I; single record only.

Habitat: 355 m; substrate unknown.

175. ***Buccinum rossicum*** Dall, 1907

[*Buccinum rossicum* Dall, 1907: 150, 151; Higo et al., 1999: 244; Min, 2004: 235, fig. 635; Kantor and Sysoev, 2006: 173, pl. 84 A-B]

Type locality: Aniwa Bay, Sakhalin (Sea of Okhotsk), and Tsugaru Strait, northern Japan.

Distribution: Asian boreal species; I, II, III, IV, V, abundant commercial species.

Habitat: 57-710 m; mainly mud and muddy sand, less frequently mixed with pebbles.

176. ***Buccinum sakhalinense*** Dall, 1907

[*Buccinum sakhalinense* Dall, 1907: 148; Higo et al., 1999: 241; Kantor and Sysoev, 2006: 173-174, pl. 82 J]

Type locality: Aniwa Bay, Sakhalin (Sea of Okhotsk).

Distribution: Asian low-boreal species; I, II, V, VI, VII, VIII; common.

Habitat: 2-100 m; mainly mud and muddy sand, less frequently mixed with pebbles and stones.

177. ***Buccinum striatissimum*** Sowerby, 1899

[*Buccinum striatissimum* Sowerby, 1899 : 370-371, fig. 1; Higo et al., 1999: 243; Min, 2004: 235, fig. 633; Kantor and Sysoev, 2006: 175, pl. 84 J]

Type locality: Tango Peninsula, Honshu, East Sea.

Distribution: Asian low-boreal species; I; single record only.

Habitat: 668 m; muddy pebbles.

178. ***Buccinum tenuissimum*** Kuroda in Teramachi, 1933

[*Buccinum tenuissimum* Teramachi, 1933: 361, 364, fig. 4, 6; Higo et al., 1999: 243; Min, 2004: 235, fig. 634; Kantor and Sysoev, 2006: 175, pl. 84 C]

Type locality: Toyama Bay, eastern Noto Peninsula, East Sea.

Distribution: Asian low-boreal species; I; rare.

Habitat: 859-1500 m; muddy pebbles and clay.

179. ***Buccinum tenuisulcatum*** Golikov and Gulbin, 1977

[Golikov and Gulbin, 1977: 214-215, fig. 12; Kantor and Sysoev, 2006: 175-176, pl. 86 A-B].

Type locality: East of Paramushir Island (North Kurile Islands).

Distribution: Asian boreal species; II; rare.

Habitat: 100-400 m; mud and muddy sand, mixed with pebbles.

180. ***Buccinum verkruseni*** Kobelt, 1882

[*Buccinum verkruseni* Kobelt 1882 : 230-231; Higo et al., 1999: 241; Min, 2004: 231, fig. 623; Kantor and Sysoev, 2006: 176, pl. 87 A-B]

Type locality: Southern Sakhalin.

Distribution: Asian low-boreal species; I, II, VI, VIII; abundant commercial species.

Habitat: 1-80 m; mainly muddy sand, less frequently mixed with pebbles and stones.

Genus ***Plicibuccinum*** Golikov and Gulbin, 1977

Type species: *Plicibuccinum plicatum* Golikov and

Gulbin, 1977.

**181. *Plicibuccinum plicatum*** Golikov and Gulbin, 1977

[*Plicibuccinum plicatum* Golikov and Gulbin, 1977: 196-198, fig. 7, 17 (5); *Plicibuccinum ochotensis declivis*: Higo et al., 1999: 242; *Plicibuccinum declivis*: Kantor and Sysoev, 2006: 177, pl. 87 C].

Type locality: Titova Cape, southern Primorye Region (East Sea).

Distribution: Asian low-boreal species; I, II, IV, V, VIII; uncommon.

Habitat: 30-62 m; muddy sand with pebbles and stones.

Genus ***Thysanobuccinum*** Golikov and Gulbin, 1977  
in Golikov, 1980

Type species: *Thysanobuccinum tunicatum* Golikov and Gulbin, 1977.

**182. *Thysanobuccinum pilosum*** Golikov and Gulbin, 1977

[*Thysanobuccinum pilosum* Golikov and Gulbin, 1977: 210-211, fig. 11; Higo et al., 1999: 244; *Thysanobuccinum pilosum*: Kantor and Sysoev, 2006: 177, pl. 86 F].

Type locality: Moneron Island (East Sea).

Distribution: Asian boreal subspecies; VIII; rare.

Habitat: 65-70 m; shells.

Genus ***Volutaripa*** Fisher, 1856

Type species: *Volutaripa deshayesiana* Fischer, 1956 (= *Bulla ampullacea* Middendorff, 1848)

**183. *Volutaripa ampullacea*** (Middendorff, 1848)

[*Bulla ampullacea* Middendorff 1848: 245; *Volutaripa ampullacea ampullacea*, *V. ampullacea morchiana*, *V. ampullacea limnaeformis*, *V. ampullacea perryi*: Higo et al., 1999: 245; Min, 2004: 237, fig. 640-643; *Volutaripa ampullacea*: Kantor and Sysoev, 2006: 177, pl. 86 G].

Type locality: Shantar Islands (Sea of Okhotsk).

Distribution: Pacific boreal species; I, II, VI, VII, VIII; uncommon.

Habitat: Intertidal-70 m; stones with shells, less frequently mixed with pebbles and mud.

Subfamily **Colinae** Gray, 1857

Note. The systematics of this subfamily is under revision. In this review I follow the nomenclature of Kosyan (2007).

Genus ***Aulacofusus*** Dall, 1918

Type species: *Fusus spitzbergensis* Reeve, 1855 (= *Fusus brevicauda* Deshayes, 1832).

**184. *Aulacofusus brevicauda kurilensis*** Golikov and Gulbin, 1977

[*Aulacofusus schantaricus kurilensis* Golikov and Gulbin, 1977: 183, fig. 4; *Colus (Colus) schantaricus kurilensis*: Higo et al., 1999: 229; *Aulacofusus brevicauda kurilensis*: 2006: 179, pl. 88 G-H].

Type locality: Paramushir Island, Kurile Islands.

Distribution: Pacific boreal subspecies; I, II, III, V, VI; uncommon.

Habitat: 15-130 m; stones with shells, less frequently mixed with pebbles and sand.

**185. *Aulacofusus herendeenii*** (Dall, 1899)

[*Sipho herendeenii* Dall, 1899: 543; *Colus (Colus) nobilis*: Higo et al., 1999: 229; *Aulacofusus herendeenii*: Kantor and Sysoev, 2006: 180, pl. 89 B].

Type locality: Pribiloff Islands (Bering Sea).

Distribution: Pacific boreal species; VIII; single record only.

Habitat: 150 m; sandy mud with shells.

Genus ***Colus*** Röding, 1799

Type species: *Murex islandicus* Mohr, 1786.

**186. *Colus kujiensis*** Tiba, 1973

[*Colus kujiensis* Tiba, 1973: 65-68, pl. 6, fig. 6-8; *Colus (Colus) esychus kujiensis*: Higo et al., 1999: 228; *Colus kujiensis*: Kantor and Sysoev, 2006: 183, pl. 91 A-B].

Type locality: Off Kuji, northeastern Honshu (Japan).

Distribution: Asian low-boreal species; II; single record only.

Habitat: 170 m; mud.

**187. *Colus minor*** (Dall, 1925)

[*Volutopsius minor* Dall, 1925: 30-31, pl. 32, fig. 3; *Plicifusus (Helicofusus) minor*: Higo et al., 1999: 321; *Aulacofusus minor*: Kantor and Sysoev, 2006: pl. 89 A].

Type locality: Aniwa Bay, Sakhalin (Sea of Okhotsk).

Distribution: Asian low-boreal species. [This species is absent in collections of the Zoological Institute of the Russian Academy of Sciences and Institute of Marine Biology of the Far-Eastern Branch of the Russian Academy of Sciences. According to Higo *et al.*, (1999), this species was reported from "Sakhalin, Primorye region (Japan Sea coast of Russia) "].

Genus *Neptunea* Bolten in Röding, 1798

Type species: *Murex antiquus* Linnaeus, 1758.

188. *Neptunea arthritica* (Valenciennes, 1858)

[*Fusus arthriticus* Valenciennes, 1858: 144; *Neptunea (Barbitonia) arthritica*: Higo *et al.*, 1999: 233; Min, 2004: 225, fig. 600; *Neptunea arthritica*: Kantor and Sysoev, 2006: 188-189, pl. 94 B-C].

Type locality: Sangar Strait (Japan).

Distribution: Asian low-boreal species; I, II, IV, V, VI, VII, VIII; common.

Habitat: Intertidal-400 m; mainly rock and stones, muddy sand (less frequently).

189. *Neptunea bulbacea* (Valenciennes, 1858)

[*Fusus arthriticus* Valenciennes, 1858: 144; *Neptunea bulbacea*: Higo *et al.*, 1999: 232 (in part); Kantor and Sysoev, 2006: 189, pl. 94 F-G].

Type locality: Tatar Strait (East Sea).

Distribution: Asian low-boreal species; I, II, IV, V, VI, VII, VIII; common.

Habitat: Intertidal-510 m; mainly rock and stones, muddy sand (less frequently).

190. *Neptunea constricta* (Dall, 1907)

[*Chrysodomus insularis* var. *constrictus* Dall, 1907: 153-154; *Neptunea constricta*: Higo *et al.*, 1999: 231-232; Min, 2004: 223, fig. 594; Kantor and Sysoev, 2006: 190, pl. 95 F].

Type locality: East Sea, off Korea.

Distribution: Asian low-boreal species; I, II, IV, V, VI, VII; common, sometimes abundant commercial species.

Habitat: 35-510 m; mainly muddy sand, stones (less frequently).

191. *Neptunea lyrata lyrata* (Gmelin, 1791)

[*Murex lyratus* Gmelin, 1791: 3531; *Neptunea lyrata*: Higo *et al.*, 1999: 232; Min, 2004: 225, fig. 598; *Neptunea lyrata lyrata*: Kantor and Sysoev, 2006: 193, pl. 97 C].

Type locality: King George Sound, northwestern USA.

Distribution: Pacific boreal species; I, II, IV, V, VI, VII; common, sometimes abundant commercial species.

Habitat: 31-234 m; mainly muddy sand, stones (less frequently).

192. *Neptunea polycostata* Scarlato in Galkin and Scarlato, 1955

[*Neptunea polycostata* Galkin and Scarlato, 1955: 178, pl. 46, fig. 10; Kantor and Sysoev, 2006: 193, pl. 97 E-F; *Neptunea polycostata polycostata*: Higo *et al.*, 1999: 231; Min, 2004: 221 fig. 591].

Type locality: Tatar Strait (East Sea).

Distribution: Asian low-boreal species; I, II, III, IV, V, VI, VII, VIII; common.

Habitat: 14-95 m; mainly muddy sand, stones (less frequently).

193. *Neptunea rugosa* Golikov, 1962

[*Neptunea rugosa* Golikov, 1962: 8, fig. 11-13; Kantor and Sysoev, 2006: 194, pl. 98 F; *Neptunea bulbacea*: Higo *et al.*, 1999: 231-232 (in part)].

Type locality: Tatar Strait (East Sea).

Distribution: Asian low-boreal species; III, V, VI, VII, VIII; uncommon.

Habitat: 10-67 m; mainly muddy sand, pebbles (less frequently).

Genus *Pararetifusus* Kosuge, 1967

Type species: *Phymorhynchus tenuis* Okutani, 1966

194. *Pararetifusus kantori* Kosyan, 2006

[Kosyan, 2006: 6-12, figs. 1, 3-5].

Type locality: Primoriye Region, northwestern East Sea.

Distribution: Asian low-boreal species; II; single record only.

Habitat: 1400 m; muddy clay with pebbles.

Genus *Plicifusus* Dall, 1902

Type species: *Fusus kroyeri* Møller, 1842.

195. ***Plicifusus croceus*** (Dall, 1907)

[*Tritonofusus croceus* Dall, 1907: 161; *Plicifusus croceus*: Higo et al., 1999: 230; Min, 2004: 221, fig. 585; Kantor and Sysoev, 2006: 195–196, pl. 99 C].

Type locality: South coast of Hokkaido, East Sea.

Distribution: Asian low-boreal species; I, II, III, V; common.

Habitat: 25–1400 m; mainly muddy sand, muddy stones (less frequently).

196. ***Plicifusus kroyeri*** (Møller, 1842)

[*Fusus kroyeri* Møller, 1842: 88; *Plicifusus kroyeri*: Higo et al., 1999: 230; Kantor and Sysoev, 2006: 197, pl. 100 A-B].

Type locality: Western Greenland.

Distribution: Boreal-arctic species; I; single record only.

Habitat: 146 m; substrate unknown.

197. ***Plicifusus plicatus*** (A. Adams, 1863)

[*Sipho plicatus* Adams, 1863: 107; *Plicifusus plicatus*: Kantor and Sysoev, 2006: 198, pl. 101 A-C].

Type locality: Aniwa Bay, Sakhalin Island (Sea of Okhotsk).

Distribution: Asian low-boreal species; I, II, III, IV, V, VI, VIII; common.

Habitat: 10–146 m; mainly rock and stones, muddy sand with pebbles and gravel (less frequently).

198. ***Plicifusus rhyssus*** (Dall, 1907)

[*Tritonofusus rhyssus* Dall, 1907: 160; *Plicifusus rhyssus*: Higo et al., 1999: 230; *Helicofusus rhyssus*: Kantor and Sysoev, 2006: 184–185, pl. 91 I].

Type locality: Aniwa Bay, Sakhalin Island (Sea of Okhotsk).

Distribution: Pacific boreal species; IV; single record only.

Habitat: 74 m; mud.

199. ***Plicifusus scissuratus*** (Dall, 1918)

[*Plicifusus* (*Retifusus*) *scissuratus* Dall, 1918: 226; *Plicifusus* (*Plicifusus*) *scissuratus*: Higo et al., 1999: 230; Min, 2004: 221, fig. 588; *Retifusus* *scissuratus*:

Kantor and Sysoev, 2006: 200, pl. 102 A].

Type locality: Nemuro, Hokkaido Island (Japan).

Distribution: Asian low-boreal species; II, VII; rare.

Habitat: 63–84 m; muddy sand.

Genus ***Retifusus*** Dall, 1916

Type species: *Tritonium jessoensis* Schrenck, 1863

200. ***Retifusus brunneus*** (Dall, 1877)

[*Chrysodomus brunneus* Dall, 1877: 1; *Plicifusus* (*Retifusus*) *brunneus*: Higo et al., 1999: 230; *Retifusus brunneus*: Kantor and Sysoev, 2006: 199, pl. 101 K].

Type locality: Nunivak Island, Bering Sea.

Distribution: Pacific boreal species; I, II; rare.

Habitat: 20–62 m; muddy sand.

Note. Kosyan (2007) considers *Retifusus brunneus* (Dall, 1877), *Fusus* (*Sipho*?) *manchuricus* E. A. Smith, 1875 and *Mohnia okhotskana* Tiba, 1981 as synonyms of *Retifusus jessoensis* (Schrenck, 1863).

201. ***Retifusus frielei*** (Dall, 1891)

[*Mohnia frielei* Dall, 1891: 186; *Retimohnia frielei*:

Higo et al., 1999: 228; Min, 2004: 219, fig. 583;

Kantor and Sysoev, 2006: 201, pl. 102 I-J].

Type locality: Queen Charlotte Island, British Columbia, Canada.

Distribution: Pacific boreal species; II; rare.

Habitat: 89–1320 m; sand with stones and mud.

202. ***Retifusus laticingulatus*** Golikov and Gulbin, 1977

[*Retifusus laticingulatus* Golikov and Gulbin, 1977: 188–189, fig. 6; *Plicifusus* (*Retifusus*) *laticingulatus*: Higo et al., 1999: 231; Kantor and Sysoev, 2006: 199, pl. 101 D-D'].

Type locality: Shikotan Island, southern Kurile Islands.

Distribution: Asian low-boreal species; I; rare.

Habitat: 46–65 m; sand.

203. ***Retifusus roseus*** (Dall, 1877)

[*Chrysodomus roseus* Dall, 1877: 2; *Aulacofusus* *roseus*: Kantor and Sysoev, 2006: 181, pl. 89 I-J; *Plicifusus parvus*: Kantor and Sysoev, 2006: 197–198, pl. 100 J-K; *Plicifusus saginatus*: Kantor and Sysoev,

2006: 198, pl. 100 H-I; *Retifusus semiplicatus*: Kantor and Sysoev, 2006: 198, pl. 102 A].

Type locality: Bering Strait.

Distribution: Boreal-arctic species; I, II, VI, VII, VIII; common.

Habitat: 51–900 m; mainly muddy sand, muddy stones (less frequently).

Subfamily Volutopsinae Habe and Sato, 1973

Genus *Lussivolutopsius* Kantor, 1983

Type species: *Lussivolutopsius hydractiniferus* Kantor, 1983

204. *Lussivolutopsius emphaticus* (Dall, 1907)

[*Volutopsius middendorffii* var. *emphaticus* Dall, 1907: 163; *Lussivolutopsius emphaticus*: Higo et al., 1999: 225; Min, 2004: 219, fig. 578; Kantor and Sysoev, 2006: 203–204, pl. 104 A; *Volutopsius middendorffii middendorffii*: Higo et al., 1999: 224; Min, 2004: 219, fig. 577].

Type locality: East Sea.

Distribution: Asian boreal species; I, II, III, VIII; common.

Habitat: 100–663 m; muddy sand, pebbles, stones.

205 *Lussivolutopsius marinae* Kantor, 1984

[Kantor, 1984: 1620, figs. 1; 2 (B); 4; 5 (2); Kantor and Sysoev, 2006: 204, pl. 104 G]

Type locality: Northern Sea of Okhotsk.

Distribution: Asian boreal species; III; rare.

Habitat: 230–411 m; muddy stones.

Genus *Volutopsius* Mörcz, 1857

Type species: *Fusus largillierti* Pelit de la Saussaye, 1852 (= *Strombus norwegicus* Gmelin, 1790)

206. *Volutopsius castaneus* Mörcz, 1857

[*Fusus* (*Volutopsius*) *castaneus* Mörcz, 1857: 341; *Volutopsius castaneus*: Higo et al., 1999: 244; Kantor and Sysoev, 2006: 206, pl. 106 A].

Type locality: Sitka Island, Alaska.

Distribution: Pacific boreal species; I, II, VIII; rare.

Habitat: 100–500 m; shells with stones.

Family Columbellidae Swainson, 1840

Genus *Astyris* H. and A. Adams, 1853

Type species: *Buccinum (Astyris) rosaceum* Gould, 1839

207. *Astyris amiantis* (Dall, 1919)

[*Columbella amiantis* Dall, 1919b: 331; *Astyris amiantis*: Higo et al., 1999: 252; Kantor and Sysoev, 2006: 207–208, pl. 106 H].

Type locality: Kiska Harbour, Aleutian Islands (Alaska).

Distribution: Mainly Asian boreal species; I, II, III, IV, VI, VIII; rare.

Habitat: 30–850 m; shells with sand and stones.

Genus *Mitrella* Risso, 1826

Type species: *Mitrella flaminea* Risso, 1826 (= *Murex scriptus* Linnaeus, 1758)

208. *Mitrella tenuis* Gaskoin, 1851

[*Columbella tenuis* Gaskoin, 1851: 2; *Mitrella tenuis tenuis*: Higo et al., 1999: 24; Min, 2004: 239, fig. 649; *Mitrella bicincta*: Min, 2004: 239, fig. 648; *Mitrella burchardi*: Kantor and Sysoev, 2006: 208–209, pl. 107 A].

Type locality: None designated

Distribution: Asian low-boreal species; I–VIII; abundant.

Habitat: Intertidal–35 m; mainly rock and stones.

Family Nassariidae Iredale, 1916

Genus *Nassarius* Dumeril, 1806

Type species: *Buccinum arcularia* Linnaeus, 1758.

209. *Nassarius fraterculus* (Dunker, 1860)

[*Nassa fratercula* Dunker, 1860: 230; *Hima fratercula fratercula*: Higo et al., 1999: 257; Min, 2004: 247, fig. 677; *Hima fratercula hiradoensis*: Higo et al., 1999: 257–258; Min, 2004: 247, fig. 679; *Hima fratercula hypolia*: Min, 2004: 247, fig. 678; *Nassarius fraterculus*: Kantor and Sysoev, 2006: 210, pl. 107 B]. Type locality: Dejima Island, Nagasaki City harbour, western Kyushu (Japan).

Distribution: Asian subtropical-low-boreal species; I, VII, VIII; common in shallow bays.

Habitat: Intertidal–5 m; rock and stones, pebbles and sand.

210. *Nassarius multigranosus* (Dunker, 1847)

[*Nassa multigranosa* Dunker, 1847: 61; *Hima*

*multigranosa*: Higo et al., 1999: 258; Min, 2004: 247, fig. 680; *Nassarius multigranosus*: Kantor and Sysoev, 2006: 210: pl. 107 C].

Type locality: Hirado Island, western Kyushu (Japan).

Distribution: Asian subtropical-low-boreal species; I; rare.

Habitat: Intertidal-12 m; rock and stones, pebbles and muddy sand.

Superfamily Cancellarioidea Forbes and Hanley, 1851

Family Admetidae Troschel, 1869

Genus **Admete** Kröyer in Møller, 1842

Type species: *Admete crispa* Møller, 1842, 1842 [= *Tritonium viridulum* Fabricius, 1780].

211. **Admete laevior** Leche, 1878

[*Admete viridula* var. *laevior* Leche, 1878: 48; *Admete middendorffiana* Dall 1902: 516, pl. 38, fig 6; *Admete laevior*: Kantor and Sysoev, 2006: 211-212, pl. 108 D-E].

Type locality: Bering Sea.

Distribution: Boreal-arctic species; I; rare.

Habitat: 45-62 muddy sand.

212. **Admete viridula** (Fabricius, 1780)

[*Tritonium viridula* Fabricius, 1780: 402; *Admete couthouyi*: Higo et al., 1999: 296; Min, 2004: 259, fig. 721; *Admete viridula*: Kantor and Sysoev, 2006: 212, pl. 108 F-G].

Type locality: Greenland.

Distribution: Boreal-arctic species; I, II, IV, V, VII; common.

Habitat: 33-300 m; sand, muddy sand, and muddy pebbles.

213. **Admete sp.**

[*Admete unalaskensis* (?) : Gulbin, 2004: 6].

Distribution: I, II; rare.

Habitat: 45-610 m; muddy sand.

Superfamily Muricoidea Rafinesque, 1815

Family Muricidae Rafinesque, 1815

Subfamily Ocenebrinae Cossmann, 1903

Genus **Ceratostoma** Hermannsen, 1846

Type species: *Purpura nuttalli* Conrad, 1837.

214. **Ceratostoma burnettii** (Adams and Reeve, 1848)

[*Murex burnettii* Adams, Reeve, 1848: 38, pl. 8, fig. 4a, b.

*Ceratostoma burnettii*: Higo et al., 1999: 206; Min, 2004: 211, fig. 551; Kantor and Sysoev, 2006: 139, pl. 62 A].

Type locality: Korea.

Distribution: Asian subtropical-low-boreal species; I, VIII; rare.

Habitat: Intertidal-15 m; rock, stones and mud.

Genus **Ocenebra** Gray, 1847

Type species: *Murex erinaceus* Linnaeus, 1758

215. **Ocenebra inornata** (Récluz, 1851)

[*Murex inornatus* Recluz, 1851: 207-209, pl. 6, fig. 8; *Ceratostoma inornatum*: Higo et al., 1999: 206 (in part, non *O. lumaria*); Min, 2004: 211, fig. 554; *Murex endermoris*: Min, 2004: 211, fig. 556; *Ocenebra inornata*: Kantor and Sysoev, 2006: 139-140, pl. 62 B].

Type locality: Korea.

Distribution: Asian subtropical-low-boreal species; I, VIII (two empty shells); rare.

Habitat: Intertidal-15 m; rock, stones, muddy sand (less frequently).

216. **Ocenebra lumaria** (Yokoyama, 1926)

[*Ocenebra lumaria* Yokoyama, 1926: 270, pl. 32, fig. 21; Min, 2004: 211, fig. 555; *Ceratostoma inornatum*: Higo et al., 1999: 206 (in part, *O. lumaria*); *Ocenebra inornata*: Kantor and Sysoev, 2006: 140, pl. 62 C].

Type locality: Sado Island (East Sea).

Distribution: Asian subtropical-low-boreal species; I, II, VI, VII; rare.

Habitat: Intertidal-15 m; rock, stones, muddy sand (less frequently).

Subfamily Trophoninae Cossmann, 1903

Subfamily Trophoninae Cossmann

Genus **Boreotrophon** P. Fischer, 1884

Type species: *Murex clathratus* Linnaeus, 1767.

217. **Boreotrophon alaskanus alaskanus** Dall, 1902

[*Boreotrophon alaskanus* Dall, 1902: 546-546; Higo et

al., 1999: 204; *Boreotrophon alaskanus* alaskanus: Kantor and Sysoev, 2006: 141-142, pl. 63 H-I]. Type locality: Unalaska, Bering Sea. Distribution: Pacific boreal species; II, III, V, VI; rare. Habitat: 40-400 m; mud.

218. ***Boreotrophon beringi*** Dall, 1902

[*Boreotrophon beringi*: Dall, 1902: 544; Higo et al., 1999: 204; Kantor and Sysoev, 2006: 142, pl. 63 K]. Type locality: Nunivak Island, Bering Sea. Distribution: Pacific boreal species; I, II, IV, VII; rare. Habitat: 13-200 m; rock and sand with stones.

219. ***Boreotrophon candelabrum*** (Reeve, 1848)

[*Fusus candelabrum* Reeve, 1848: pl. 19, fig. 79; *Boreotrophon candelabrum*: Higo et al., 1999: 203-202; Min, 2004: 208, fig. 542; Kantor and Sysoev, 2006: 142, pl. 64 A-B]. Type locality: None designated. Distribution: Asian low-boreal species; I, II, IV, V, VII, VIII; common. Habitat: Intertidal-62 m; rock, stones and pebbles with shells.

220. ***Boreotrophon cepula*** (Sowerby, 1880)

[*Trophon cepula* Sowerby, 1880: 61, pl. 404, fig. 14; *Boreotrophon cepula* Higo et al., 1999: 215; Kantor and Sysoev, 2006: 142-143, pl. 63 F-G]. Type locality: Icy Cape (Alaska).

Distribution: Pacific boreal species; I, II, III, IV, VI; common.

Habitat: 40-160 m; muddy sand, pebbles, stones.

221. ***Boreotrophon ithitomus*** (Dall, 1919)

[*Neptunea ithitoma* Dall, 1919b: 337-338; *Boreotrophon ithitomus*: Higo et al., 1999: 204; Kantor and Sysoev, 2006: 144, pl. 64 G].

Type locality: Taiya Inlet, Alaska.

Distribution: Pacific boreal species; II; single record only.

Habitat: 280-320 m; substrate unknown.

222. ***Boreotrophon pacificus*** Dall, 1902

[*Boreotrophon pacificus* Dall, 1902: 544; Kantor and

Sysoev, 2006: 144, pl. 64 C-D; *Boreotrophon pacificus pacificus*: Higo et al., 1999: 204; Min, 2004: 209, fig. 546; *Boreotrophon pacificus aomoriensis*: Higo et al., 1999: 204; Min, 2004: 209, fig. 547].

Type locality: Sitka Harbour, Alaska.

Distribution: Pacific boreal species; II, VIII; rare. Habitat: 50-100 m; pebbles with shells.

223. ***Boreotrophon truncatus*** (Ström, 1768)

[*Buccinum truncatum* Ström, 1768: 369, pl. 16; *Boreotrophon truncatus*: Higo et al., 1999: 204; Kantor and Sysoev, 2006: 145 pl. 65 K].

Type locality: Norway.

Distribution: Boreal-arctic species; VIII; rare. Habitat: 100-120 m; pebbles with shells.

Genus ***Nodulotrophon*** Habe and Ito, 1965

Type species: *Trophon dalli* Kobelt, 1878 (= *Trophon coronatus* H. and A.Adams, 1864).

224. ***Nodulotrophon coronatus*** (H. and A.Adams, 1864)

[*Trophon coronatus* H. and A.Adams, 1864: 429-430; *Nodulotrophon coronatus*: Higo et al., 1999: 205; Kantor and Sysoev, 2006: 145-146, pl. 65 F-G].

Type locality: New Zealand (erroneous locality; Cuming collection)

Distribution: Pacific boreal species; III, V, VIII; rare. Habitat: 94-280 m; muddy sand.

Genus ***Scabrotrophon*** McLean, 1996

Type species: *Trophon maltzani* Kobelt, 1878.

225. ***Scabrotrophon scitulus*** (Dall, 1891)

[*Trophonopsis (Boreotrophon) scitulus* Dall, 1891: 188; *Nipponotrophon scitulus*: Higo et al., 1999: 204; Min, 2004: 209-211, fig. 549; *Scabrotrophon scitulus*: Kantor and Sysoev, 2006: 147, pl. 66 G].

Type locality: Nunivak Island, Bering Sea.

Distribution: Asian boreal species; I, II, III, VII; rare. Habitat: 58-300 m; mainly mud and muddy sand.

Genus ***Trophonopsis*** Bucquoy, Dautzenberget  
Dollfus, 1882

Type species: *Murex muricatus*: Montagu, 1803.

226. ***Trophonopsis kamchatkana*** (Dall, 1902)

[*Boreptrophon (Trophonopsis) kamchatkanus* Dall, 1902: 541; *Trophonopsis kamchatkanus*: Higo et al., 1999: 203; Kantor and Sysoev, 2006: 148, pl. 67, H-I]. Type locality: South-eastern Kamchatka. Distribution: Asian boreal species; I, II, III, V, VI; rare. Habitat: 45-200 m; muddy sand.

**227. *Trophonopsis nodulosus*** Golikov in Golikov and Scarlato, 1985

[*Trophonopsis nodulosus* Golikov and Scarlato, 1985: 425, fig. 9; Higo et al., 1999: 203; Kantor and Sysoev, 2006: 148, pl. 67 G].

Type locality: South-eastern Sakhalin.

Distribution: Asian low-boreal species; III, V; rare.

Habitat: 57-64 m; muddy sand.

**228. *Trophonopsis tegularis*** Golikov and Gulbin 1977

[*Trophonopsis tegularis* Golikov and Gulbin 1977: 228-229, figs. 15; 8, 17; Higo et al., 1999: 203; Kantor and Sysoev, 2006: 148: pl. 67 C.

Type locality: Shikotan Island (Kurile Islands).

Distribution: Asian low-boreal species; II, III, IV, VIII; rare.

Habitat: 30-100 m; pebbles with shells, rock (less frequently).

#### Subfamily Rapaninae Gray, 1853

Genus ***Nucella*** Bolten in Röding, 1798

Type species: *Buccinum filosum* Gmelin, 1791 (= *Buccinum lapillus* Linnaeus, 1758).

**229. *Nucella elongata*** Golikov and Kussakin, 1974

[*Nucella elongata* Golikov and Kussakin, 1974: 295; *Nucella lamellosa hormica*: Higo et al., 1999: 214; Kantor and Sysoev, 2006: 150, pl. 68 H; *Nucella heyseana*: Min, 2004: 215, fig. 569.]

Type locality: Ismena Bay, Kunashir Island (Kurile Islands).

Distribution: Asian low-boreal species; I, II, IV, V, VII, VIII; common.

Habitat: Intertidal-10 m; mainly rock and boulders.

**230. *Nucella freycinetti*** (Deshayes, 1841)

[*Purpura freycinetti* Deshayes, 1839: 360; *Nucella*

*freycinetti freycinetti*: Higo et al., 1999: 214; Kantor and Sysoev, 2006: 149, pl. 68 A-C].

Type locality: Kamchatka Peninsula.

Distribution: Pacific boreal species; V, VI, VII, VIII; common

Habitat: Intertidal-10 m; mainly rock, boulders, stones and sand.

**231. *Nucella heyseana*** (Dunker, 1882)

[*Purpura heyseana* Dunker, 1882: 40, tab. 13, fig. 10; *Nucella heyseana*: Higo et al., 1999: 214; Kantor and Sysoev, 2006: 149-150, pl. 68 D; *Nucella freycinetti alabaster*: Higo et al., 1999: 214; Kantor and Sysoev, 2006: 149, pl. 68 E; *Nucella freycinetti freycinetti*: Min, 2004: 215, fig. 570; *Nucella lamellosa hormica*: Min, 2004: 217, fig. 571].

Type locality: East Sea.

Distribution: Asian low-boreal species; I-VIII; common..

Habitat: Intertidal-100 m; mainly rock, boulders, stones and sand.

#### Genus ***Rapana*** Schumacher, 1817

Type species: *Buccinum bezoar* Linnaeus, 1767

**232. *Rapana venosa*** (Valenciennes, 1846)

[*Purpura venosa* Valenciennes, 1846: 22; *Rapana venosa venosa*: Higo et al., 1999: 215; Min, 2004: 217, fig. 572; *Rapana venosa*: Kantor and Sysoev, 2006:

150-151, pl. 68 J].

Type locality: Not designated.

Distribution: Asian subtropical-low-boreal species; I; rare.

Habitat: 2-10 m; sand.

#### Superfamily Olivoidea Latreille, 1825

##### Family Olivellidae Troschel, 1869

###### Genus ***Olivella*** Swainson, 1831

Type species: *Oliva purpurata* Swainson, 1831 (= *Voluta dama* Mawe in Wood, 1825).

**233. *Olivella borealis*** Golikov in Golikov and Scarlato, 1967

[*Olivella borealis* Golikov and Scarlato, 1967: 62-63, fig 41; Kantor and Sysoev, 2006: 152 pl. 69 B].

Type locality: Possiet Bay (Peter the Great Bay, East

Sea).

Distribution: Asian low-boreal species; I, II, V; common.

Habitat: 0-23 m; mainly sand.

Superfamily Conoidea Fleming, 1822

Family Conidae Fleming, 1822

Subfamily Clathurellinae H. and A.Adams, 1858

Genus *Ophiodermella* Bartsch, 1944

Type species: *Pleurotoma inermis* Hinds, 1843.

234. *Ophiodermella erosa* (Schrenck, 1861)

[*Pleurotoma (Clavatula) erosa* Schrenck, 1861: 410; *Ophiodermella erosa*: Higo et al., 1999: 310; Min, 2004: 265-267, fig. 749; "*Bela*" *erosa*: Kantor and Sysoev, 2006: 219, pl. 111 A-B].

Type locality: De Castri Bay, Tatar Strait (East Sea).

Distribution: Asian low-boreal species; I, II, III, IV, V, VI, VII; common.

Habitat: 5-47 m; mainly muddy sand and sand.

235. *Ophiodermella ogurana* (Yokoyama, 1922)

[*Genotia ogurana* Yokoyama, 1922: 38-39, pl. I, fig. 29; *Ophiodermella ogurana*: Higo et al., 1999: 310; Kantor and Sysoev, 2006: 218, pl. 111 K].

Type locality: Sado Island, East Sea (fossil).

Distribution: Asian low-boreal species; I, VIII; rare.

Habitat: Mainly muddy sand and sand.

Genus *Suavodrillia* Dall, 1918

Type species: *Drillia kennicotti* Dall, 1871.

236. *Suavodrillia kennicotti* (Dall, 1871)

[*Drillia kennicotti* Dall, 1871: 102, pl. 16, fig. 2; *Suavodrillia kennicottii*: Higo et al., 1999: 311; Min, 2004: 267 fig. 752; Kantor and Sysoev, 2006: 219, pl. 111 J].

Type locality: North Harbour, Unga Island, Alaska.

Distribution: Pacific boreal species; I, IV; rare.

Habitat: 5-50 m; mainly muddy sand and sand.

Subfamily Mangeliinae P.Fischer, 1883

Genus *Guraleus* Hedley, 1918

Type species: *Mangelia picta* Adams and Angas, 1864.

237. *Guraleus deshayesii* (Dunker, 1860)

[*Mangilia (Pleurotoma) deshayesii* Dunker, 1860: 228;

*Guraleus deshayesii*: Higo et al., 1999: 320; Min, 2004: 271, fig. 775; *Cytharella deshayesii*: Kantor and Sysoev, 2006: 220, pl. 112 D].

Type locality: Nagasaki Harbor, Kyushu Island (East Sea).

Distribution: Asian subtropical species; I; two empty shells.

Habitat: 5-6 m; mud.

Subfamily Oenopotinae Bogdanov, 1987

Genus *Curtitoma* Bartsch, 1941

Type species: *Curtitoma hecuba* Bartsch, 1941 (=*Bela incisula* Verrill, 1882).

238. *Curtitoma becklemishevi* Bogdanov, 1989

[*Curtitoma becklemishevi* Bogdanov, 1989 a: 134, fig. 1, 1-2; 2, a-b; Higo et al., 1999: 313; Min, 2004: 269, fig. 758; Kantor and Sysoev, 2006: 221, pl. 112 G.

Type locality: Paramushir Island, Sea of Okhotsk.

Distribution: Asian low-boreal species; I; single reliable record only.

Habitat: 510-545 m; mud.

239. *Curtitoma candida* (Yokoyama, 1926)

[*Bela candida* Yokoyama, 1926: 261, pl. 34, fig. 1; *Oenopota candida*: Higo et al., 1999: 314; Min, 2004: 269, fig. 765; *Curtitoma candida* Kantor and Sysoev, 2006: 222].

Type locality: Sado Island (East Sea) (fossil).

Distribution: Asian low-boreal species; I; single reliable record only.

Habitat: 88 m; substrate unknown.

240. *Curtitoma decussata* (Couthouy, 1839)

[*Pleurotoma decussata* Couthouy, 1839: 183, pl. 4, fig. 8; *Curtitoma decussata*: Kantor and Sysoev, 2006: 222, pl. 112 I].

Type locality: Cape Cod (Massachusetts Bay) (U. S. A.).

Distribution: Boreal-arctic species; I, II, III, IV, V; common.

Habitat: 25-780 m; mainly muddy sand and sand.

241. *Curtitoma hebes* (Verrill, 1880)

[*Bela hebes* Verriill, 1880: 367; *Curtitoma hebes*:

Kantor and Sysoev, 2006: 222, pl. 112 H].  
 Type locality: Martha's Vineyard (Massachusetts Bay) (U. S. A.).  
 Distribution: Amphiboreal species; I, II, V, VI; common.  
 Habitat: 100-1320 m; mainly muddy sand and sand, stones and pebbles (less frequently).

**242. *Curtitoma hokkaidoensis*** (Bartsch, 1941)  
 [*Nematoma hokkaidoensis* Bartsch, 1941: 9, pl. 1, fig. 1; *Obestoma hokkaidoensis*: Higo et al., 1999: 313-314; *Curtitoma hokkaidoensis*: Kantor and Sysoev, 2006: 222-223, pl. 113 M].  
 Type locality: Off southeast Hokkaido (Japan).  
 Distribution: Asian low-boreal species; I, II, III; rare.  
 Habitat: 167-1600 m; muddy sand and sand.

**243. *Curtitoma incisula*** (Verrill, 1882)  
 [*Bella incisula* Verrill, 1882: 461, pl. 43, fig. 12, pl. 57, fig. 14; *Curtitoma incisula*: Higo et al., 1999: 312; Kantor and Sysoev, 2006: 223, pl. 113 D-E].  
 Type locality: Labrador to Newport (U. S. A.) (Northwestern Atlantic).  
 Distribution: Amphiboreal species; I, II, III, IV, V, VIII; common.  
 Habitat: 20-190 m; mainly muddy sand, also sand and pebbles .

**244. *Curtitoma lawrenciana*** (Dall, 1919)  
 [*Lora lawrenciana* Dall, 1919a: 43, pl. 15, fig. 6; *Curtitoma lawrenciana*: Higo et al., 1999: 312; Kantor and Sysoev, 2006: 223, pl. 113 L].  
 Type locality: Plover Bay (Bering Strait, Chukchi Peninsula).  
 Distribution: Pacific boreal species; I, II, III; uncommon.  
 Habitat: 62-800 m; muddy sand.

**245. *Curtitoma microvoluta*** (Okutani, 1964)  
 [*Nematoma microvoluta* Okutani, 1964: 431, pl. 6, fig. 10; *Curtitoma microvoluta*: Higo et al., 1999: 312; Kantor and Sysoev, 2006: 223-224, pl. 113 G].  
 Type locality: Sagami Bay, Honshu (Japan).  
 Distribution: Asian low-boreal species; I; single record

only.  
 Habitat: 269-340 m; muddy sand.

**246. *Curtitoma neymanae*** Bogdanov, 1989  
 [*Curtitoma neymanae* Bogdanov, 1989b: 147, fig. 1, 1-2; 2, a-d; Kantor and Sysoev, 2006: 224, pl. 113 B].  
 Type locality: Chikhachev Bay, Tatar Strait (East Sea).  
 Distribution: Asian boreal species; I, IV; rare.  
 Habitat: 0.1-63 m; muddy sand.

**247. *Curtitoma violacea*** (Mighels and Adams, 1842)  
 [*Pleurotoma violacea* Mighels and Adams, 1842: 51, pl. 4, fig. 21; *Curtitoma violacea*: Higo et al., 1999: 312-313; Kantor and Sysoev, 2006: 225, pl. 113 C].  
 Type locality: Casco Bay, Massachusetts (U. S. A.).  
 Distribution: Boreal-arctic species; I, II, IV, V; common.  
 Habitat: 6.5-90 m; various substrates, mainly mud.

Genus ***Granotoma*** Bartsch, 1941  
 Type species: *Bela krausei* Dall, 1887.  
**248. *Granotoma albrechti*** (Krause, 1885)  
 [*Bela albrechti krausei*, 1885: 276, pl. 18, figs. 3, 11; *Granotoma albrechti*: Higo et al., 1999: 316; Min, 2004: 271, fig. 768; Kantor and Sysoev, 2006: 225, pl. 114 A-B].  
 Type locality: Plover Bay (Bering Strait, Chukchi Peninsula).  
 Distribution: Pacific boreal species; I, II, III, V, VI, VII, VIII; common..  
 Habitat: 3-900 m; various substrates, mainly sand.

**249. *Granotoma krausei*** (Dall, 1887)  
 [*Bela krausei* Dall, 1887: 301, pl. 4, fig. 4; *Granotoma krausei*: Higo et al., 1999: 316; Kantor and Sysoev, 2006: 225, pl. 114 A-B].  
 Type locality: Port Etches, Alaska.  
 Distribution: Pacific boreal species; I, IV, V; common  
 Habitat: 53-133 m; mainly muddy sand.

Genus ***Obesotoma*** Bartsch, 1941  
 Type species: *Obesotoma japonica* Bartsch, 1941  
**250. *Obesotoma japonica*** Bartsch, 1941

[*Obesotoma japonica* Bartsh, 1941: 7, pl. 1, fig. 11; Higo et al., 1999: 313 (in part, non *O. tenuilirata*); Kantor and Sysoev, 2006: 226, pl. 115 A; *Obesotoma tenuilirata*: Min, 2004: 269, fig. 761].

Type locality: East Sea.

Distribution: Asian low-boreal species; I, II; rare.

Habitat: 10.5-330-380 m; mainly sand.

251. ***Obesotoma laevigata* (Dall, 1871)**

[*Bela laevigata* Dall, 1871a: 98, pl. 16, fig. 7; *Obesotoma simplex*: Higo et al., 1999: 313; *Obesotoma laevigata*: Kantor and Sysoev, 2006: 226, pl. 114 E].

Type locality: Norton Sound, Alaska.

Distribution: Boreal-arctic species; VI; single record only.

Habitat: 48 m; substrate unknown.

252. ***Obesotoma robusta* (Packard, 1867)**

[*Bela robusta* Packard, 1867: 232, pl. 7, fig. 12; *Obesotoma robusta*: Higo et al., 1999: 313; Kantor and Sysoev, 2006: 226, pl. 114 I].

Type locality: Caribou Island, Labrador, northeastern Canada.

Distribution: Amphiboreal species; I, II, III, IV, V, VI, VII; common.

Habitat: 7-1600 m; sand and mud.

253. ***Obesotoma sachalinensis* Bogdanov, 1989**

[*Obesotoma sachalinensis* Bogdanov, 1989b: 150, figs. 1 (5-6); 2 (i-m); Kantor and Sysoev, 2006: 226-227, pl. 114 J].

Type locality: Southern Sea of Okhotsk.

Distribution: Asian boreal species. [This species is absent in collections of the Zoological Institute of the Russian Academy of Sciences and Institute of Marine Biology of the Far-Eastern Branch of the Russian Academy of Sciences. According to Bogdanov's data (1990), this species was reported "in the northern part of the East Sea"].

Habitat: Unknown.

254. ***Obesotoma schantarica* (Middendorff, 1848)**

[*Pleurotoma schantarica* Middendorff, 1849: 118; *Obesotoma schantarica*: Higo et al., 1999: 313; Kantor

and Sysoev, 2006: 227, pl. 115 B].

Type locality: Yugur Bay (Sea of Okhotsk).

Distribution: Asian boreal species; I, II, III, V, VI, VII; common.

Habitat: 10-400 m; sand, mixture of mud, pebbles, and gravel (less frequently).

255. ***Obesotoma solida* (Dall, 1887)**

[*Lora solida* Dall, 1887: 301, pl. 3, fig. 4; *Obesotoma solida*: Higo et al., 1999: 313; Kantor and Sysoev, 2006: 227, pl. 114 F].

Type locality: Kiska Harbor, Alaska.

Distribution: Pacific boreal species; I, IV; uncommon.

Habitat: 5-380 m; muddy sand.

256. ***Obesotoma tenuilirata* (Dall, 1871)**

[*Beta laevigata var tenuilirata* Dall, 1871: 98;

*Obesotoma tenuilirata*: Higo et al., 1999: 313 (in part, non *O. japonica* Bartsch, 1941); Kantor and Sysoev, 2006: 227, pl. 114 H].

Type locality: Norton Sound, Alaska.

Distribution: Amphiboreal species; I, II, III, V, VI, VII; common.

Habitat: 47-780 m; mud and muddy sand.

257. ***Obesotoma tomiyaensis* (Otuka, 1949)**

[*Lora tomiyaensis* Otuka, 1949: 308, pl. 13, fig. 17;

*Obesotoma tomiyamaensis*: Higo et al., 1999: 314; *Obesotoma tomiyaensis*: Kantor and Sysoev, 2006: 227].

Type locality: Chiba Prefecture, Honshu Island (Japan) (fossil).

Distribution: Asian low-boreal species; VIII; single record only.

Habitat: 67 m; sand with stones.

258. ***Obesotoma uchidai* Habe, 1958**

[*Obestoma uchidai* Habe, 1958: 33, pl. 2, fig. 23; *Obesotoma uchidai*: Higo et al., 1999: 313; Kantor and Sysoev, 2006: 228, pl. 115 K-K].

Type locality: Akkeshi Bay, Hokkaido (Japan).

Distribution: Asian low-boreal species; I, VII, VIII; common

Habitat: 17-200 m; various substrates, mainly sand

with stones.

**Genus *Oenopota* Mörch, 1852**

Type species: *Fusus pleurotomarius* Couthouy, 1838  
 (= *Buccinum pyramidale* Strøm, 1788).

259. ***Oenopota alba*** Golikov in Golikov and Scarlato, 1985

[*Oenopota alba* Golikov and Scarlato, 1985:433, fig. 13; Kantor and Sysoev, 2006: 228, pl. 115 E].

Type locality: South-eastern Sakhalin (Sea of Okhotsk).

Distribution: Asian low-boreal species; I; single record only.

Habitat: 220 m; muddy sand.

260. ***Oenopota biconica*** Bogdanov, 1989

[*Oenopota biconica* Bogdanov, 1989a: 134, fig. 1 (3); 2 (g-e); Kantor and Sysoev, 2006: 228, pl. 115 G].

Type locality: Olga Bay (East Sea).

Distribution: Asian low-boreal species; II; single record only.

Habitat: 22 m; substrate unknown.

261. ***Oenopota cancellata*** (Mighels and Adams, 1842)

[*Fusus cancellata* Mighels and Adams, 1842: 50; *Oenopota (Noctotoma) cancellata*: Higo et al., 1999: 314; Kantor and Sysoev, 2006: 228, pl. 115 D].

Type locality: Casco Bay, Maine (northeastern USA).

Distribution: Amphiboreal species; I; common.

Habitat: 33-62 m; muddy sand.

262. ***Oenopota dubia*** Golikov in Golikov and Scarlato, 1985

[*Oenopota dubia* Golikov and Scarlato, 1985: 431-432, fig. 10; Kantor and Sysoev, 2006: 229, pl. 115 F]

Type locality: South-eastern Sakhalin (Sea of Okhotsk).

Distribution: Asian low-boreal species; VIII; single record only.

Habitat: 220 m; muddy sand.

263. ***Oenopota elongata*** Bogdanov, 1989

[*Oenopota elongata* Bogdanov, 1989a: figs. 1 (4-5), 2

(i-k); Higo et al., 1999: 315; Kantor and Sysoev, 2006: 229, pl. 117 H].

Type locality: Peter the Great Bay (East Sea).

Distribution: Asian low-boreal species; I; single record only.

Habitat: 1076-1400 m; mud.

264. ***Oenopota harpa*** (Dall, 1885)

[*Bela harpa* Dall, 1884: 523; *Oenopota harpa*: Higo et al., 1999: 314; Kantor and Sysoev, 2006: 229, pl. 116 L].

Type locality: Nunivak Island, Point Barrow, Alaska.

Distribution: Boreal-arctic species; I; rare.

Habitat: 40-201 m; mud.

265. ***Oenopota impressa*** (Beck in Mörch, 1869)

[*Pleurotoma (Ischnula) impressa* Mörch, 1869 : 21; *Oenopota impressa*: Kantor and Sysoev, 2006: 229-230, pl. 117 J].

Type locality: Spitsbergen (Arctic Ocean).

Distribution: Boreal-arctic species; I, II, III, IV, VI, VII, VIII; common.

Habitat: 43-246 m; mud and muddy sand.

266. ***Oenopota inequita*** (Dall, 1919)

[*Lora inequita* Dall, 1919a: 44-45, pl. 16, fig. 9; *Oenopota inequita*: Higo et al., 1999: 314-315; Kantor and Sysoev, 2006: 230, pl. 116 G-H].

Type locality: Plover Bay, Bering Sea.

Distribution: Asian species. [This species is absent in collections of the Zoological Institute of the Russian Academy of Sciences and Institute of Marine Biology of the Far-Eastern Branch of the Russian Academy of Sciences. According to Bogdanov's data (1990), this species was reported "in the East Sea near the Asian coasts"].

Habitat: Unknown.

267. ***Oenopota pavlova*** (Dall, 1919)

[*Lora pavlova* Dall, 1919a : 43, pl 14, fig. 9; *Oenopota (Nodotoma) pavlova*: Higo et al., 1999: 315; Kantor and Sysoev, 2006: 230, pl. 116 B-C].

Type locality: Pribilof Island, Bering Sea.

Distribution: Pacific boreal species. [This species is

absent in collections of the Zoological Institute of the Russian Academy of Sciences and Institute of Marine Biology of the Far-Eastern Branch of the Russian Academy of Sciences. According to Bogdanov's data (1990), this species was reported "in the north part of the East Sea and near the coasts of Sakhalin Island".  
Habitat: Unknown.

Genus *Propebela* Iredale, 1918

Type species: *Murex turricula* Montagu, 1803.

268. *Propebela arctica* (A. Adams, 1855)  
[*Bela arctica* A. Adams, 1855: 121; *Propebela viridula*: Higo et al., 1999: 315-316; *Propebela arctica*: Kantor and Sysoev, 2006: 232: pl. 119 A-B].

Type locality: Greenland.

Distribution: Boreal-arctic species; I, II, III; rare.

Habitat: 33-780 m; sand and muddy sand.

269. *Propebela areta* (Bartsch, 1941)

[*Funitoma areta* Bartsch, 1941: 11, pl. 1, fig. 8; *Propebela areta*: Higo et al., 1999: 315; Kantor and Sysoev, 2006: 232, pl. 120 D].

Type locality: Japan Sea (East Sea).

Distribution: Asian boreal species; I, VIII; rare.

Habitat: 1-50 m; rock and muddy sand.

270. *Propebela assimilis* (G. O. Sars, 1878)

[*Bela assimilis* G.O. Sars, 1878: 231, Tab. 23, fig. 8; *Propebela (Propebela) assimilis*: Higo et al., 1999: 315; Kantor and Sysoev, 2006: 232, pl. 119 J].

Type locality: Norway.

Distribution: Boreal-arctic species; I, III, V; common.

Habitat: 8-253 m; muddy sand.

271. *Propebela cingulata* (Golikov and Gulbin, 1977)

[*Oenopota cingulata* Golikov and Gulbin, 1977: 243, figs. 16, 18; Higo et al., 1999: 314; *Propebela cingulata*: Kantor and Sysoev, 2006: 233, pl. 118 J].

Type locality: Shikotan Island, southern Kuril Islands.

Distribution: Asian low-boreal species; I, II, VIII; rare.

Habitat: 10-26 m; muddy sand.

272. *Propebela golikovi* (Bogdanov, 1985)

[*Oenopota golikovi* Bogdanov, 1985: 452, fig. 1, (c-u); 2,

(5); *Propebela golikovi*: Kantor and Sysoev, 2006: 233-234, pl. 120 C].

Type locality: Southern Sakhalin Island (East Sea).

Distribution: Asian low-boreal species; I, VI; common

Habitat: 10-50 m; muddy sand.

273. *Propebela goryachevi* Bogdanov, 1989

[*Propebela goryachevi* Bogdanov, 1989a: 13-7, figs. 1 (8-9), 2 (r-u); Kantor and Sysoev, 2006: 234, pl. 117 A-B].

Type locality: Southern Sakhalin Island (East Sea).

Distribution: Asian boreal species; VII; single record only.

Habitat: 120 m; muddy sand.

274. *Propebela harpularia* (Couthouy, 1838)

[*Fusus harpularia* Couthouy, 1838: 106, pl. 1, fig. 10; *Propebela harpularia*: Kantor and Sysoev, 2006: 234, pl. 119 G].

Type locality: Phillips Point, Massachusetts Bay (U. S. A.).

Distribution: Boreal-arctic species; I, VI, VIII; rare.

Habitat: 19-63 m; muddy sand.

275. *Propebela margaritae* (Bogdanov, 1985)

[*Oenopota margaritae* Bogdanov, 1985: 451, figs. 1 (n-r), 2 (4); *Propebela margaritae*: Higo et al., 1999: 316; Kantor and Sysoev, 2006: 234, pl. 117 D].

Type locality: Bering Island (Bering Sea).

Distribution: Asian boreal species; I; single record only.

Habitat: 60 m; muddy sand.

276. *Propebela marinae* Bogdanov, 1989

[*Propebela marinae* Bogdanov, 1989b: 152, figs. 1 (11-12), 2; Higo et al., 1999: 316; Kantor and Sysoev, 2006: 234, 117 K].

Type locality: Sea of Okhotsk.

Distribution: Asian boreal species; II; single record only.

Habitat: 300 m; muddy sand.

277. *Propebela mitrata* (Dall, 1919)

[*Lora mitrata* Dall, 1919a: 43, pl. 16, fig. 1; *Propebela*

*mitrata*: Higo et al., 1999: 316; Kantor and Sysoev, 2006: 234-235, 118 A].

Type locality: Shumagin Islands (Alaska).

Distribution: Asian boreal species; I; single record only.

Habitat: 62 m; muddy sand.

**278. *Propebela nobilis* (Møller, 1842)**

[*Defrancia nobilis* Møller, 1842: 85; *Propebela nobilis*: Higo et al., 1999: 315; Kantor and Sysoev, 2006: 235, 120 G].

Type locality: Southwestern Greenland.

Distribution: Boreal-arctic species; I, II, IV, V, VI, VII, VIII; common..

Habitat: 22-548 m; various substrates, mainly sand and muddy sand.

**279. *Propebela svetlanae* Bogdanov, 1989**

[*Propebela svetlanae* Bogdanov, 1989b: 151, figs. 1 (7-8), 2 (n-p); Kantor and Sysoev, 2006: 236, 118 B].

Type locality: Nagaec Bay, Sea of Okhotsk.

Distribution: Asian boreal species; I; single record only.

Habitat: 33 m; muddy sand.

**280. *Propebela terpeniensis* Bogdanov, 1989**

[*Propebela terpeniensis* Bogdanov, 1989b: 151, figs. 1 (10), 2; Kantor and Sysoev, 2006: 236, 118 D].

Type locality: Topina Cape, southern Sakhalin (Sea of Okhotsk).

Distribution: Asian low-boreal species. [This species is absent in collections of the Zoological Institute of the Russian Academy of Sciences and Institute of Marine Biology of the Far-Eastern Branch of the Russian Academy of Sciences. According to Bogdanov's data (1990), this species was reported "in the waters of Primorye Region"].

Habitat: Unknown.

**281. *Propebela tersa* Bartsch, 1941**

[*Canetoma tersa* Bartsch, 1941: 6, pl. 1, fig. 6; *Propebela exarata tersa*: Higo et al., 1999: 316; *Propebela tersa*: Kantor and Sysoev, 2006 236, 117 F. Type locality: Primorye, East Sea.

Distribution: Amphiboreal species; I, II, III, VI, VIII; common.

Habitat: 33-196 m; sand and muddy sand.

**282. *Propebela verrilli* Bogdanov, 1989**

[*Propebela (Propebela) verrilli* Bogdanov, 1989a: 137, figs. 1 (6-7), 2 (l-p); Kantor and Sysoev, 2006: 237, 119 E].

Type locality: Nelma Cape, Primorye, East Sea.

Distribution: Asian low-boreal species; III; single record only.

Habitat: 31 m; mud mixed with pebbles and gravel.

**Genus *Antiplanes* Dall, 1902**

Type species: *Pleurotoma perversa* Gabb, 1865.

**283. *Antiplanes kurilensis* Kantor and Sysoev, 1991**

[*Antiplanes kurilensis* Kantor and Sysoev, 1991: 136-137, fig. 6, 89-93, 104; 2006, 215, pl. 110 M].

Type locality: Iturup Island, Kurile Islands.

Distribution: Asian species; VIII; three empty shells.

Habitat: 115 m; shells and sand.

**284. *Antiplanes sanctioannis* (E.A. Smith, 1875)**

[*Pleurotoma* (?) *Sancti-Ioannis* Smith, 1875: 416-417; *Antiplanes sanctioannis*: Kantor and Sysoev, 1991: 130-136, fig. 1, 11-17, 25-28, 59-88, 100-103; 2006: 216, pl. 110; Higo et al., 1999: 305].

Type locality: Hokkaido Island (Japan).

Distribution: Pacific boreal species; I, II, III, IV, V, VI, VIII; common.

Habitat: 43-400 m; mainly muddy sand and sand, less frequently with pebbles.

**285. *Antiplanes vinosa* (Dall, 1874)**

[*Pleurotoma* *vinosa* Dall, 1874: 553; *Antiplanes vinosa*: Higo et al., 1999: 306; Kantor and Sysoev, 2006: 216, pl. 110 L].

Type locality: Kiska Harbour, Aleutian Islands (Alaska).

Distribution: Pacific boreal species; I, II, VI, VIII; uncommon.

Habitat: 63-200 m; mainly muddy sand and sand, less frequently with stones.
