

Time Span Analysis

David Attaway

Time Span Analysis

Also known as Aoristic Analysis...

What is **Aoristic**?

1840-50

Dr. Jerry Ratcliffe,
Temple University

indefinite → indeterminate

“without defined occurrence in time”

**Temporal
Analysis!**

Probability Analysis?

Spatial Temporal Analysis?

**Space Time
Analysis!**

Aoristic?

**Weighted
Analysis?**

To help with the confusion:

~~Acoustic~~

Time Span Analysis

Yeaaa!

Thank God!

Formulas....

Data Ent... Formatting:
ddd

Hour End:
=IF(MINUTE(F2)<10,HOUR(F2)+1)

Day's P

Day's Between Fr...
=(B2-A2)-(ROUNDDOWN(A2+1))

Simplified the Process
(Now in a Template)

Day of week start:
=TEXT(L2,"ddd")

Day...
=((M4)-...)

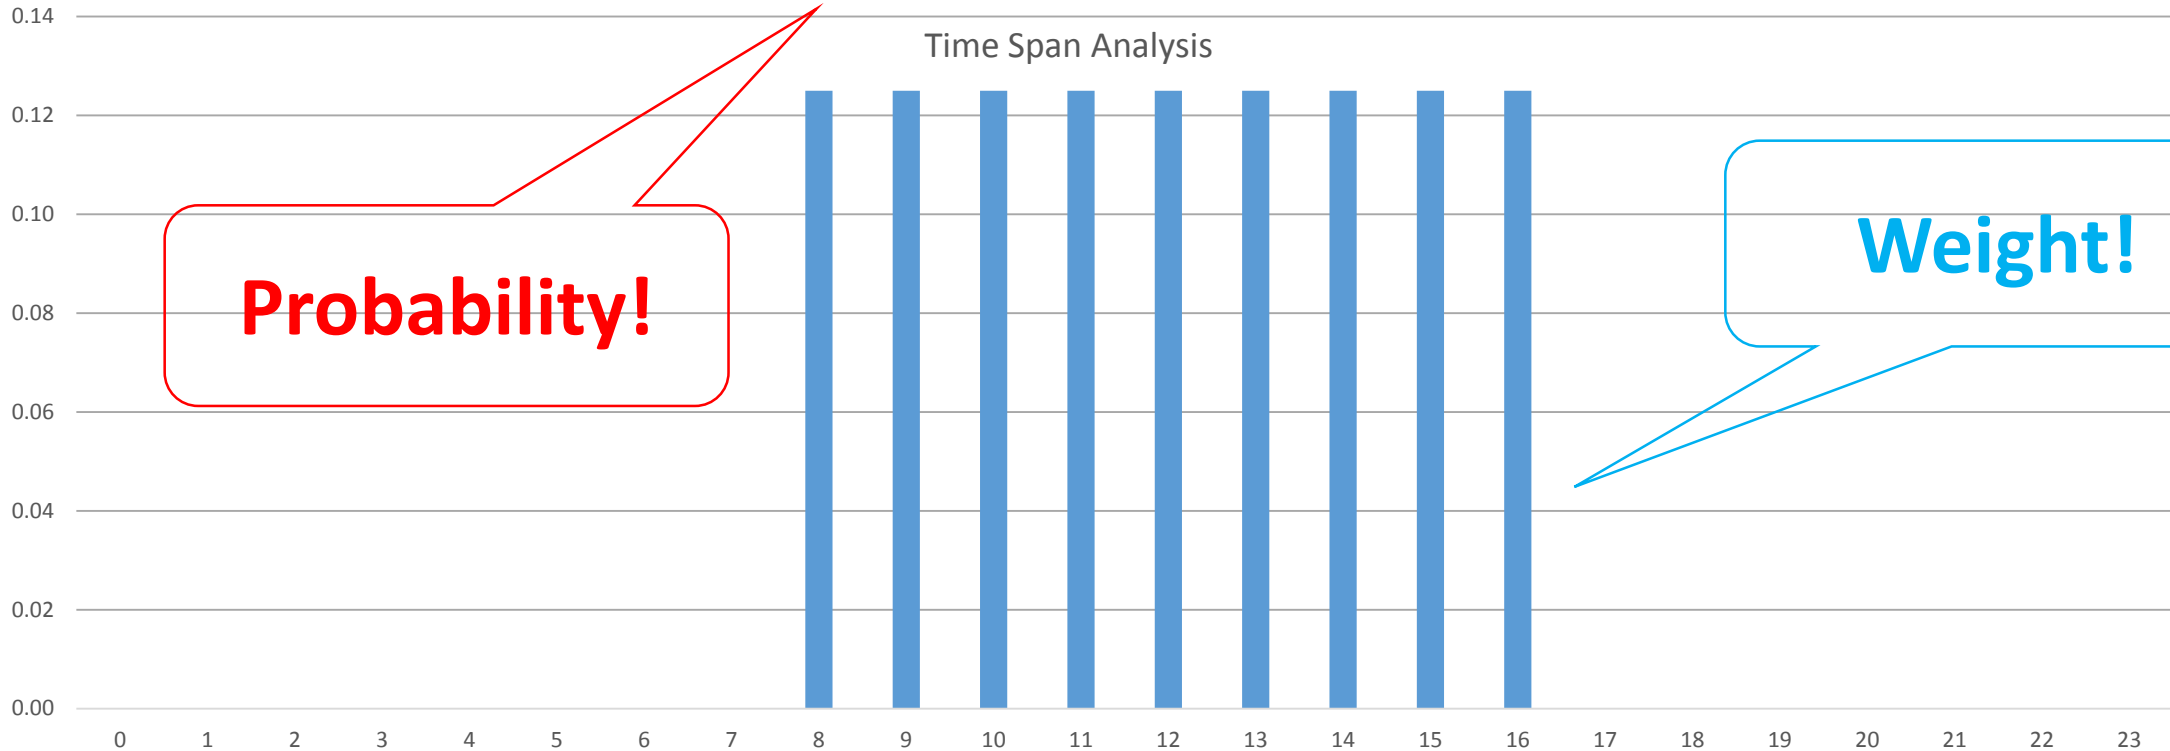

Weight per hour:
=IF(Q2>=\$J2,IF(AND(Q\$1>=\$J2,Q\$1<=\$K2),\$P2,0),IF(OR(Q\$1>=\$J2,Q\$1>=\$K2),\$P2,0))

Park my car:
April 12th, 2014
8:00 am

Total of 8 Hours unattended...

Notice my car is stolen
April 12th, 2014
4:00 pm

datetimestart	datetimeend	days	hours	weight
8/12/2014 8:00 AM	8/12/2014 4:00 PM	0.33	8	0.13

Calculates the probability that an incident occurred at a location:

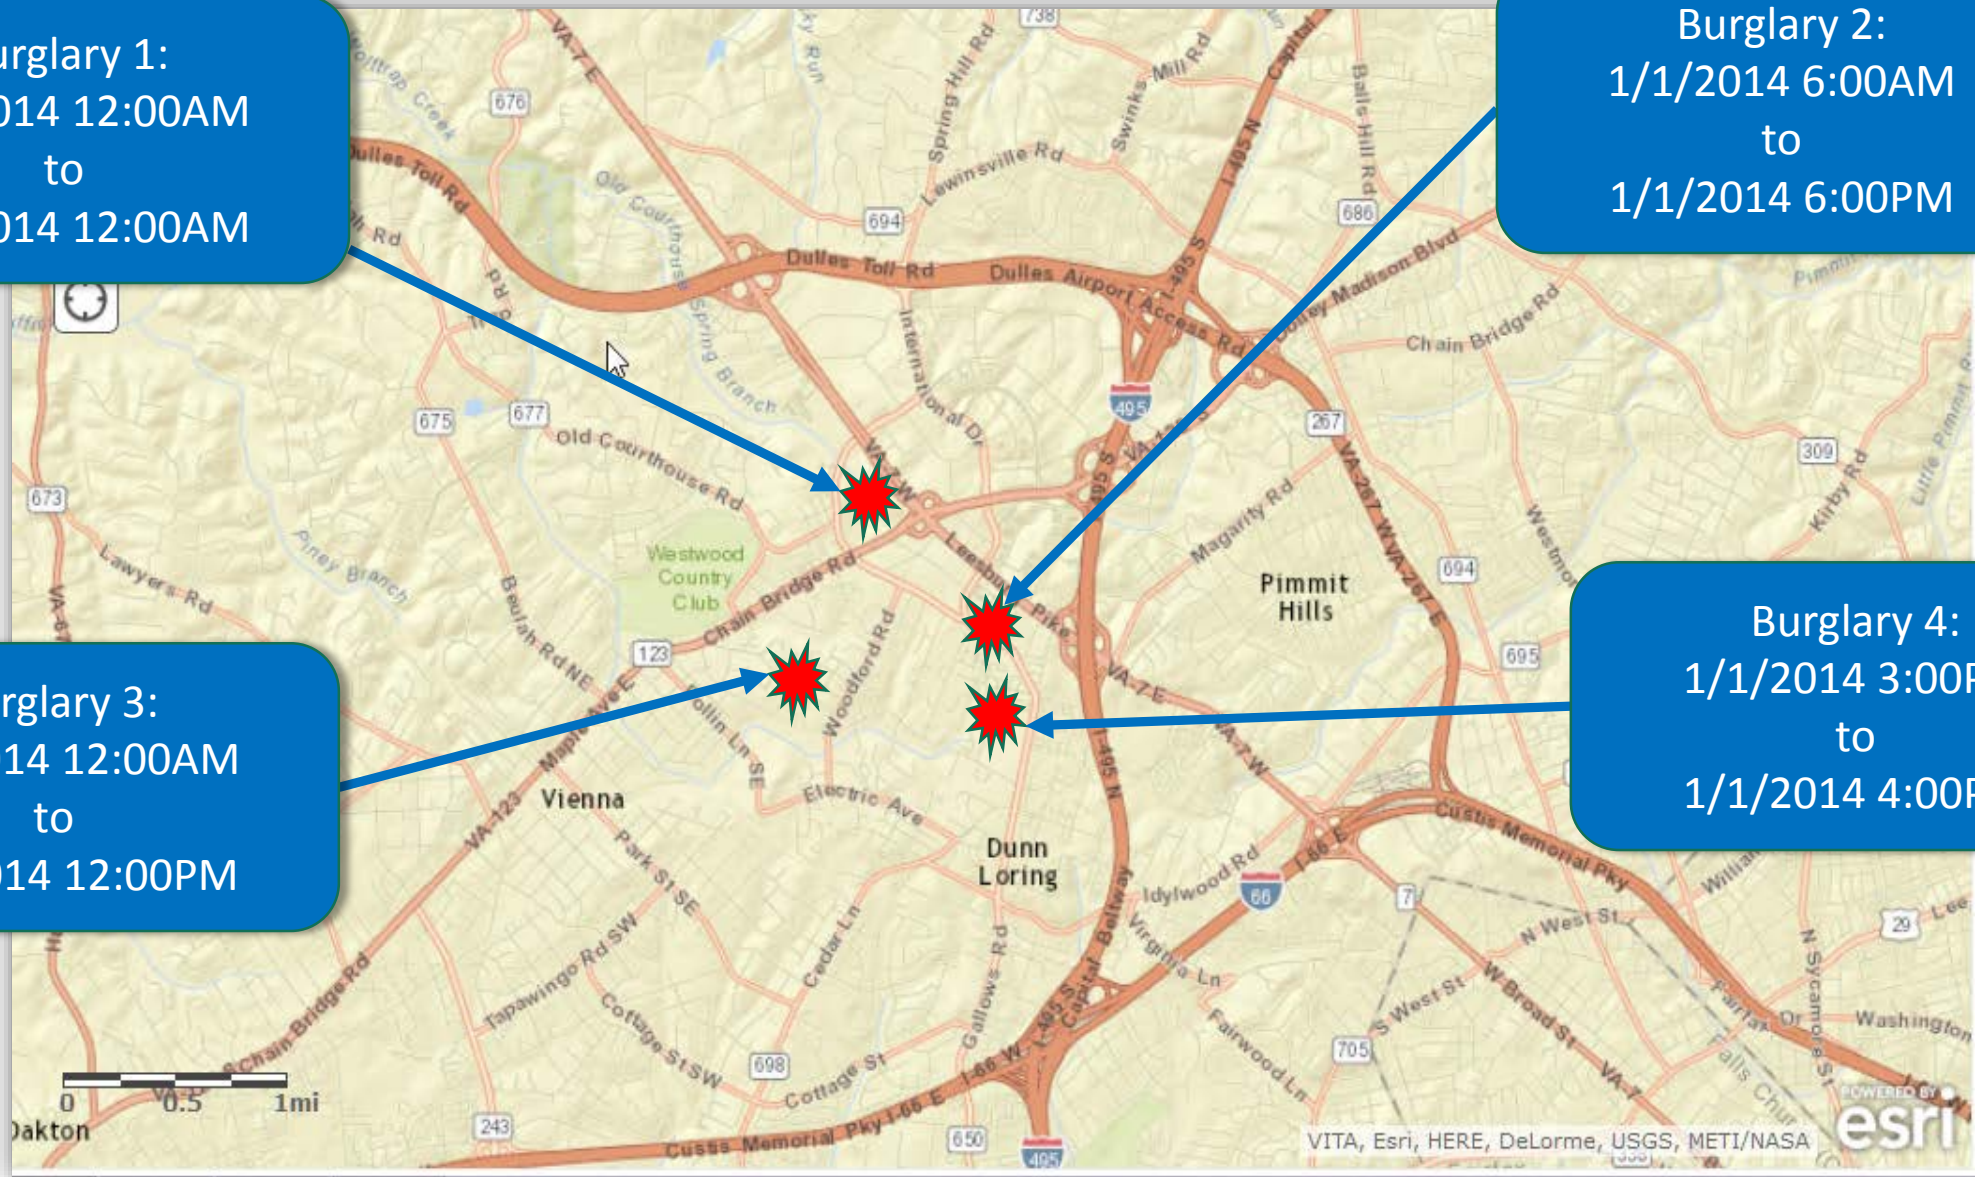

Burglary 1:
1/1/2014 12:00AM
to
1/2/2014 12:00AM

Burglary 2:
1/1/2014 6:00AM
to
1/1/2014 6:00PM

Burglary 3:
1/1/2014 12:00AM
to
1/1/2014 12:00PM

Burglary 4:
1/1/2014 3:00PM
to
1/1/2014 4:00PM

Burglary 1:
1/1/2014 12:00AM
to
1/2/2014 12:00AM

Total of 1 Hour unattended...

Analysis POWER comes
w/ many points for
analysis!!!

datetimestart	datetimeend	days	hours	weight
1/1/2014 12:00AM	1/1/2014 12:00PM	0.5	12	0.08
1/1/2014 6:00AM	1/1/2014 6:00PM	0.5	12	0.08
1/1/2014 12:00PM	1/2/2014 12:00AM	0.5	12	0.08
1/1/2014 3:00PM	1/1/2014 4:00PM	0.04	1	1.0

Gives you....

Search Blocks of Equal Duration

Time Span Analysis Distribution of All Crime Data

Crime Incidents – Southern California (All Types)

Burglary Thefts Time Reported - Southern California

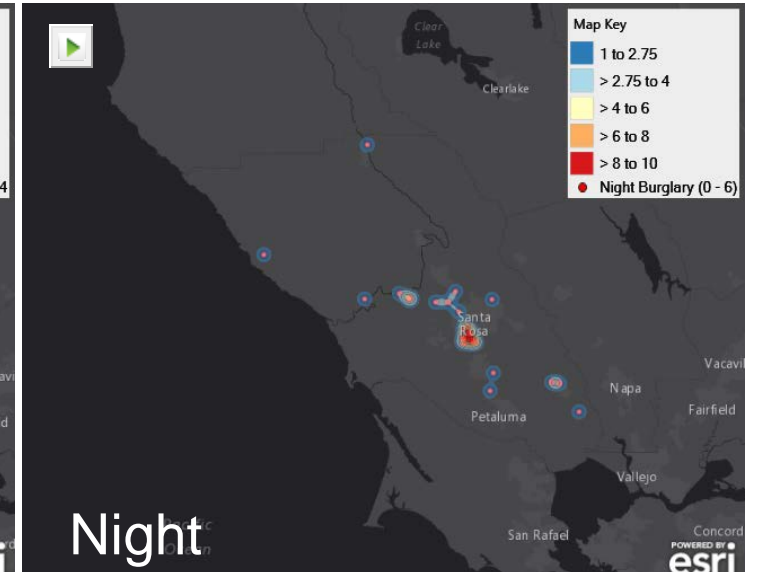

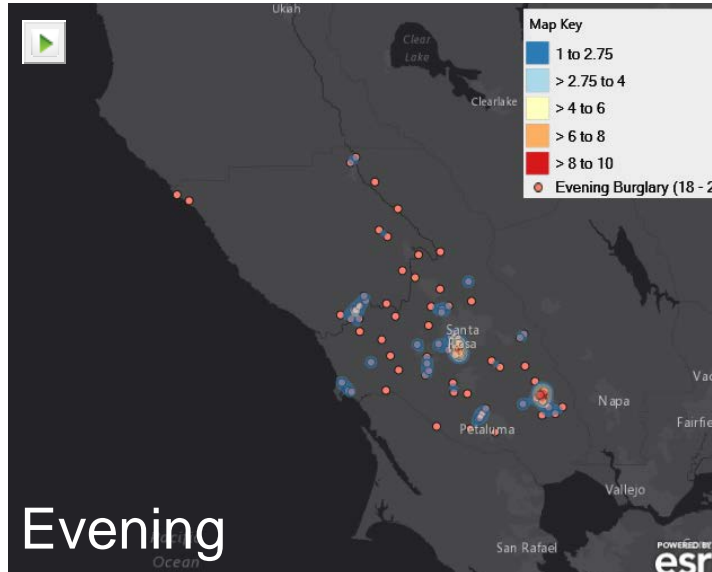

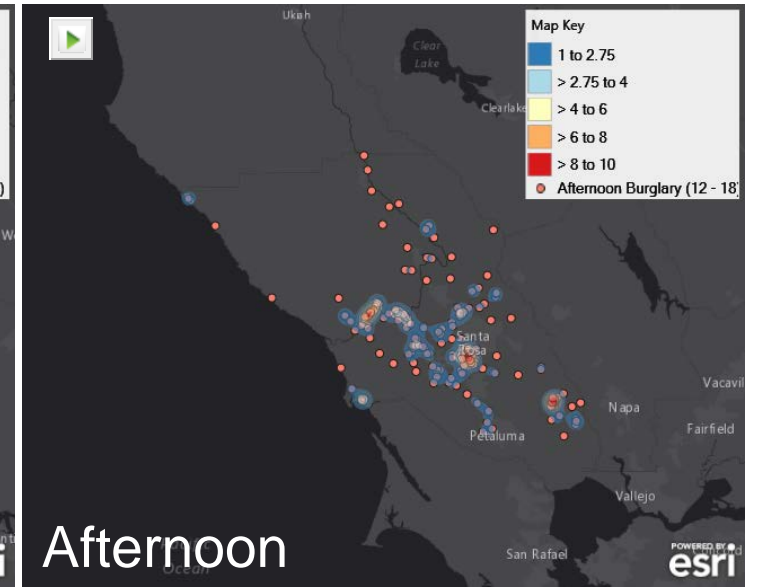

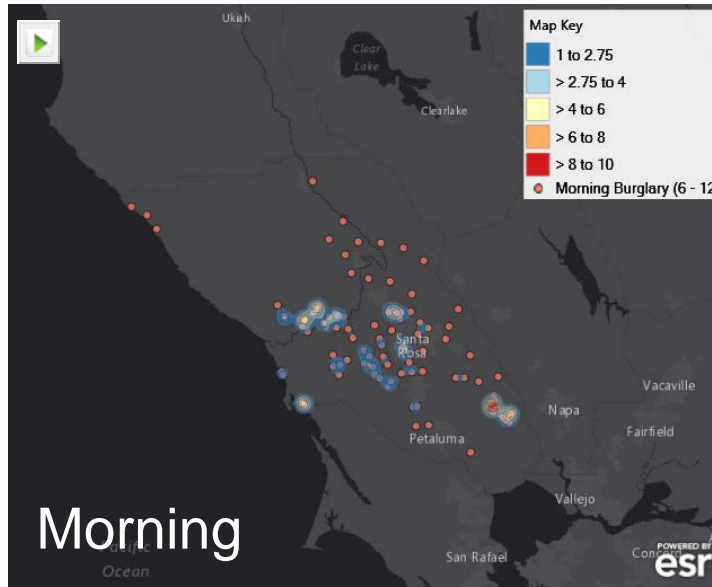

Distribution of Residential burglary

The times are divided into:

- Morning*,
- Afternoon*,
- Evening*,
- and Night* (four 6-hr intervals).

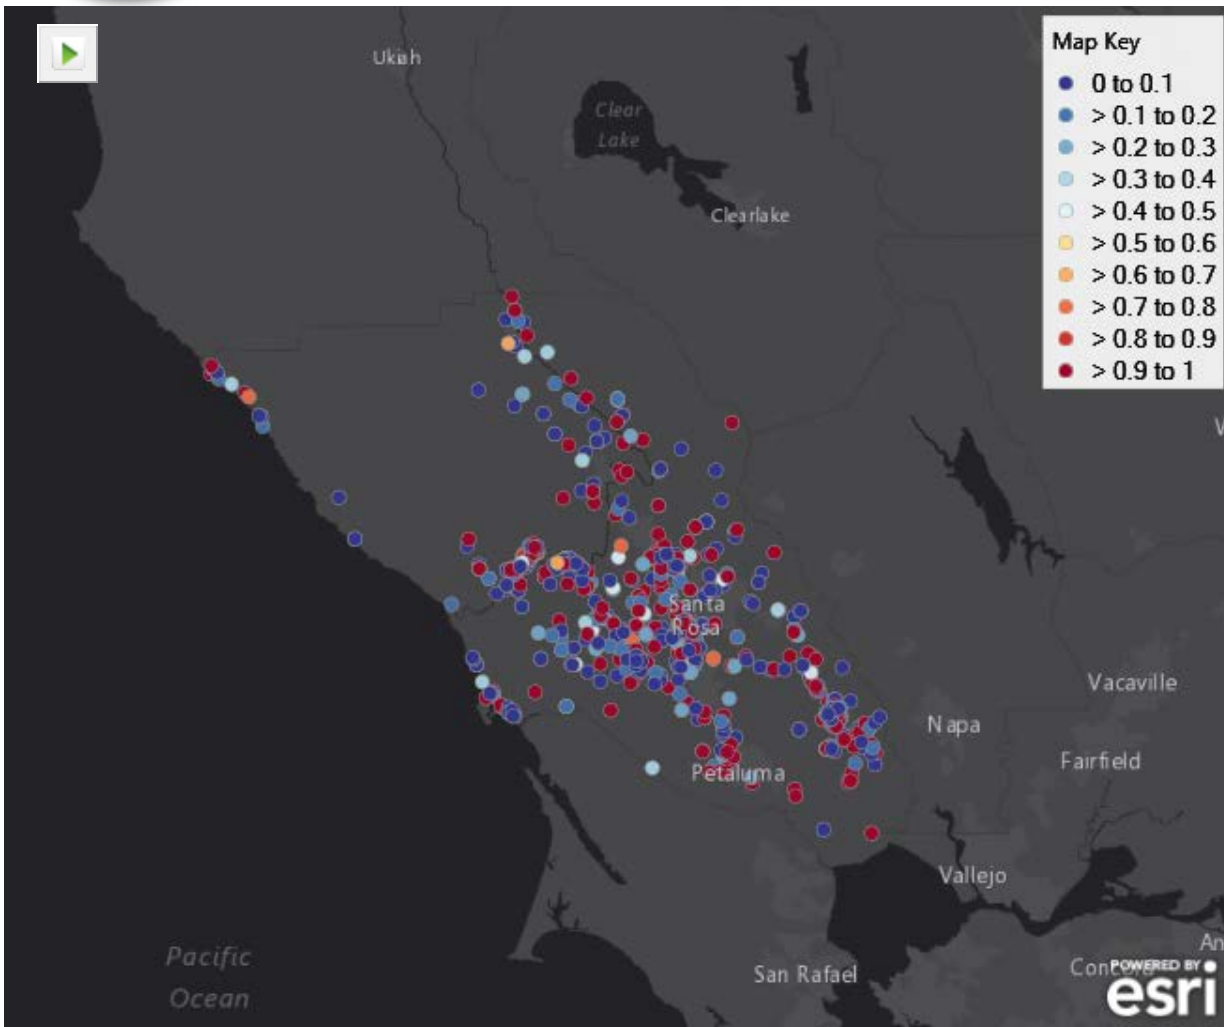

* (The times of day represent the time in which the vehicle theft was discovered)

Residential burglary reporting is highest in the Afternoon (1200-1800).

Time Span Analysis Residential Burglary

The greatest probability of times when the residential burglaries:

- **Between 12 – 1pm (1200 – 1300)**
and
- **5pm – 6pm (1700 – 1800).**
