

ACIDULATE

Foaming Soap Film & Scum Remover

DESCRIPTION

This phosphoric acid based foaming cleaner descales, dissolves and emulsifies body oils, soap scum and hard water deposits just by spraying it on.

BENEFITS

CLEANS WITHOUT SCRUBBING: Just spray on a solution of Acidulate to remove soap film, hard water deposits, etc. without the need of scrubbing.

FOAMING CLEANSER: Produces a foam that clings to vertical surfaces and keeps in contact with soil longer.

FORMULATED WITH PHOSPHORIC ACID.

If an acid is needed to do the job, we have chosen phosphoric because it won't harm chrome plumbing fixtures, grouting between tiles, etc.

REMOVES MILDEW STAINS: Again, just by spraying on Acidulate it removes mildew stains and the odors that accompany them.

HOW TO USE

For best results and coverage, use foam application equipment. Dilute with warm water if available to the proper concentrations required for the job. Then spray on liberally, allow to stand a few minutes and rinse off.

Light Duty - Dilute 1 part product to 35 parts water.

Medium Duty - Dilute 1 part product to 25 parts water.

Heavy Duty - Dilute 1 part product to 15 parts water.

Extra Heavy - Dilute 1 part product to 5 parts water.

Agitation with a fine non-metallic scrub pad will speed cleaning of heavily encrusted surfaces.

IMPORTANT: Do not use on marble surfaces.

USES

For use on bathroom surfaces such as shower doors, walls and floors, bathtubs, sinks, etc.

SPECIFICATIONS

APPEARANCE.....	Green liquid
ODOR.....	Mint-like
SPECIFIC GRAVITY.....	1.085 ± 0.005
DENSITY.....	9.05 ± 0.05 lb/gal
BOILING POINT.....	Near 212°F
pH.....	2.0 ± 0.5
FLASH POINT.....	None to boiling
STABILITY.....	One year minimum
PERCENT OF ACID.....	3.5%

PRODUCT CODE.....ACD
