

LOGICIAN

(TURBULENT)

INTP-T

ROLE: ANALYST

Intuitive (N) and Thinking (T) personality types, known for their rationality, impartiality, and intellectual excellence.

STRATEGY: CONSTANT IMPROVEMENT

Constant Improvers are quiet, individualistic people. They tend to be success-driven and often perfectionistic, spending a lot of time and effort on their work.

TRAITS

Introverted (I) individuals prefer solitary activities and get exhausted by social interaction. They tend to be quite sensitive to external stimulation (e.g. sound) in general.

Intuitive (N) individuals are very imaginative, open-minded and curious. They prefer novelty over stability and focus on hidden meanings and future possibilities.

Thinking (T) individuals focus on objectivity and rationality, prioritizing logic over emotions. They tend to hide their feelings and see efficiency as more important than cooperation.

Prospecting (P) individuals are very good at improvising and spotting opportunities. They tend to be flexible, relaxed nonconformists who prefer keeping their options open.

Turbulent (-T) individuals are self-conscious and sensitive to stress. They are likely to experience a wide range of emotions and to be success-driven, perfectionistic and eager to improve.

RESEARCH INSIGHT

Turbulent Logicians are the most likely personality type to get “lost” in researching a topic.

STRENGTHS

Analytical: Logicians analyze everything that they come across, spotting unexpected patterns and connections that other personality types might overlook.

Original: Thanks to their unrelenting imagination, Logicians can come up with creative, counterintuitive ideas that wouldn't occur to most people.

Open-Minded: Logicians are driven by curiosity and an intense desire to learn everything that they can. People with this personality type tend to be receptive to new ideas and ways of doing things.

Objective: Logicians care about the truth. Rather than taking comfort in ideology or received ideas, they want to understand what's going on beneath the surface.

WEAKNESSES

Disconnected: Logicians can get lost in their own train of thought, even when they're with other people. This can cause them to feel disconnected from others, especially in large social gatherings.

Insensitive: People with this personality type see rationality as the key to a better, happier world. They may underestimate the importance of such values as compassion, etiquette, and tradition.

Dissatisfied: Logicians can't help but imagine how things could be better than they already are. This mindset can become overwhelming, with Logicians constantly trying to reinvent the wheel.

Perfectionistic: Logicians *want* to get things done, but their quest for perfection can get in the way. At times, these personalities may get so lost in analyzing various options that they never reach a decision or even give up on the project.
