

HP IPAQ VOICE MESSENGER

It feels like a phone and acts smarter.

If you insist on a small mobile phone, yet need practical and powerful voice, email, and GPS features^{1,2,5}, this sleek 3G world phone is deceptively simple and surprisingly smart.

Small and simple

First and foremost, you want it to be a phone. You'll appreciate how easy it is to quickly dial a number on the 20-key keypad. Text messaging² is easy, too, with intelligent predictive text that learns your words and style from messages and emails. You can instant message² from your phone with your network of friends and colleagues with integrated Windows Live Messenger. And when you need to quickly silence your phone, simply push the convenient ringer/sound switch on top of the device. Familiar Windows Mobile 6.1 Standard Edition means you can skip the "new phone" learning curve.

Smart and practical

You also want more sophisticated features. Get to your email and the Internet in many countries

around the world with advanced wireless technology (Tri-Band 3G, HSPA, and Quad-band GSM/GPRS/EDGE)¹. Where WiFi is available, you can connect to the Internet and email¹ without using your data plan minutes.

While on the road, find your way with integrated GPS and Google Maps⁵. Synchronize your extensive contacts, appointments, and tasks from your PC with Microsoft Office Outlook Mobile. Access your important Microsoft Office Mobile files and your favorite photos and music with up to 8GB⁴ of convenient micro SD storage. Capture and share pictures with the 3.1MP auto focus camera with 5X digital zoom – even upload your photos to Snapfish¹ directly from your iPAQ Voice Messenger.

Who knew such a small phone could do so much!

For more details visit www.hp.com/go/lookuptool

- 1 A standard GSM/GPRS/EDGE/UMTS/HSPA infrastructure, Wi-Fi network access, other Bluetooth-enabled devices, separately purchased equipment, and a service contract with a wireless service provider may be required for applicable wireless communication. Wireless Internet access requires separately purchased Internet service contract. Check with service provider for availability and coverage in your area. Not all web content available. Normal GSM Data Calls (CSD) are not basic GSM data services. These services may not be available via all service providers, and may require separate subscription. Establishment and continuation of a wireless connection depends on network availability, provider support and signal strength. Coverage is subject to transmission limitations and terrain, system, capacity and other limitations. Not all features and service options are available in all areas.
- 2 Telephone service requires separately purchased contract with a telephone service provider with coverage in your service area. Additional fees may apply for some features, check with service provider.
- 3 Service levels and response times for HP Care Pack Services may vary depending on your geographic location. Restrictions and limitations apply. For details, visit www.hp.com/go/carepack.
- 4 Sold separately or as an-add on feature.
- 5 Purchase of additional maps and/or GPS navigation software may be required to enable some features or allow navigation in certain areas. Availability of maps is limited. Map coverage may vary and is not guaranteed.
- 6 The 'Read email' Voice Command feature is only available for email sent via an Exchange Server to the Outlook Inbox.
