Column Customization

Customizing the columns that show in ZIMS search results
Contact Species360 Support

Columns in ZIMS for Studbooks, Animal Basic Search, Animal Advanced Search, and Enclosure searches, Institution searches, Life Support searches, Taxonomy searches, and Collection Trip searches are customizable. This will help with custom queries within your institution and/or globally.
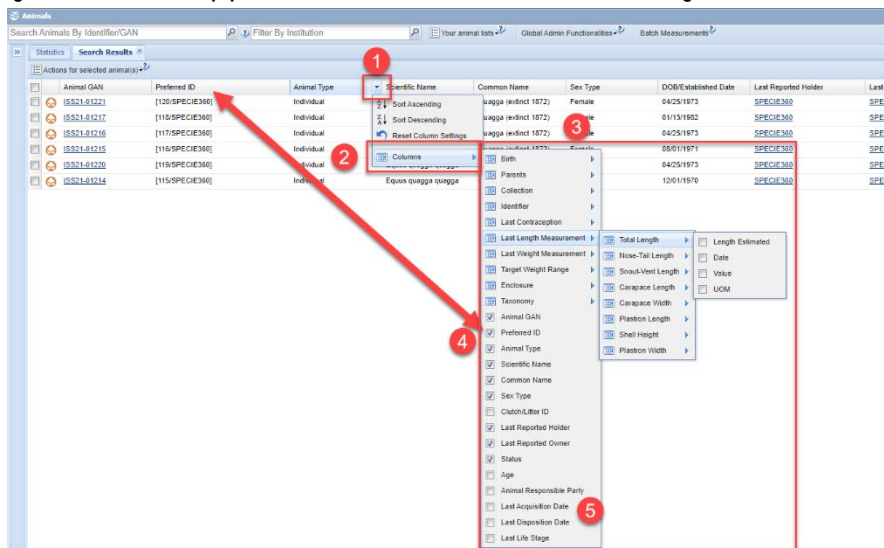

ZIMS for Husbandry
ZIMS for Studbooks
ZIMS for Medical

Addition additional columns of data not currently in view as well as organizing the order of the columns makes ZIMS a more personalized tool. Your view of search results are unique to you when you log into ZIMS – so, when speaking with colleagues, remember that they might not have the same column customization format that you have selected.

ZIMS for Husbandry
Column customization is available in the Animals, Enclosures/Life Support/Collection Trip, Institution and Taxonomy modules searches. To customize columns in any of the search results, select the arrow to the right of any column header (1), navigate down to columns (2), and a dropdown list will appear of column options (3). Check the boxes for what data you want to appear (4), and uncheck the ones you want hidden (5).

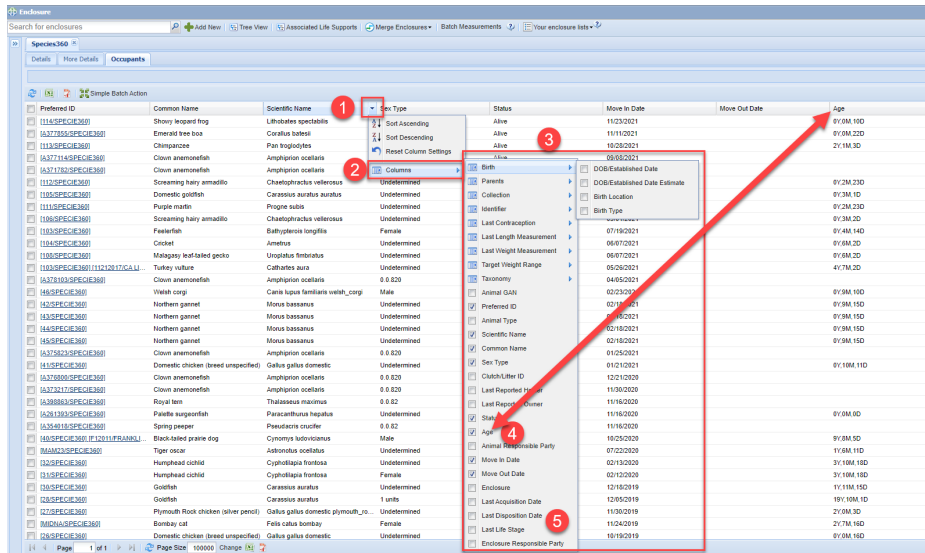

The simple and advanced animal searches can be customized separately.

Customization is unique per user, and ZIMS will remember any customization so your results will always show the columns you have set.
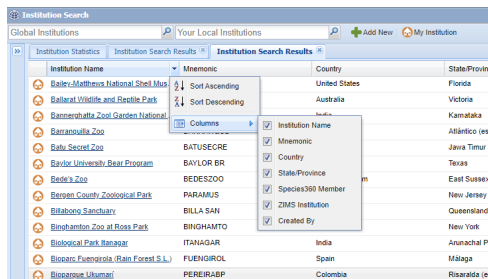

The options for customizable columns differ with each type of search. Below are some of the different column selections for different modules:
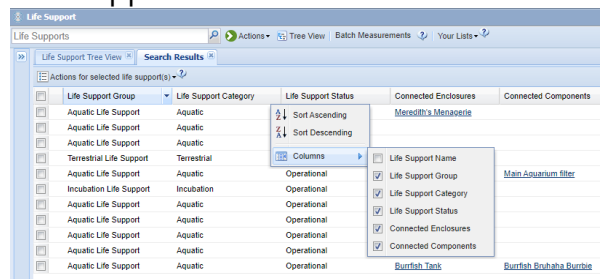

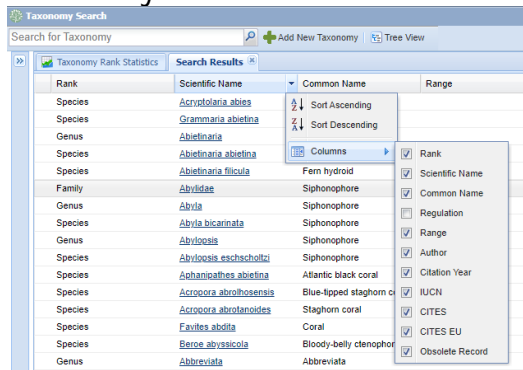

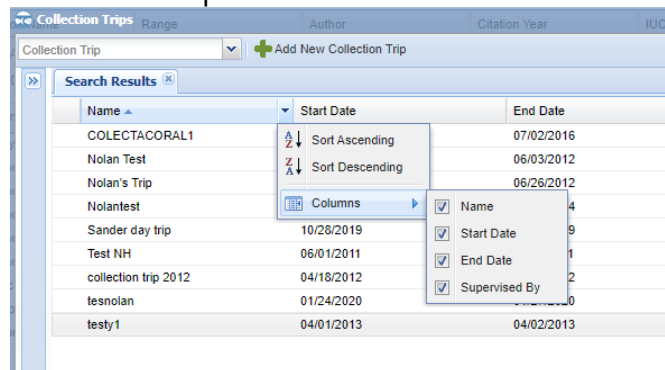

Enclosures:

Institutions:

Life Support:

Taxonomy:

Collection Trips:

ZIMS for Studbooks

Your Studbook Dashboard can be customized to display only the columns that you want to see and in the order that you want to see them. To select your desired columns, select the down arrow to the right of any column heading. Select Columns then check or uncheck the columns that you want to see or want to remove.

Columns available in the Studbook Dashboard:

Studbook ID	Sex Type	Current Status	Birth Date
