

How to Unreject a Transfer in Metrc.

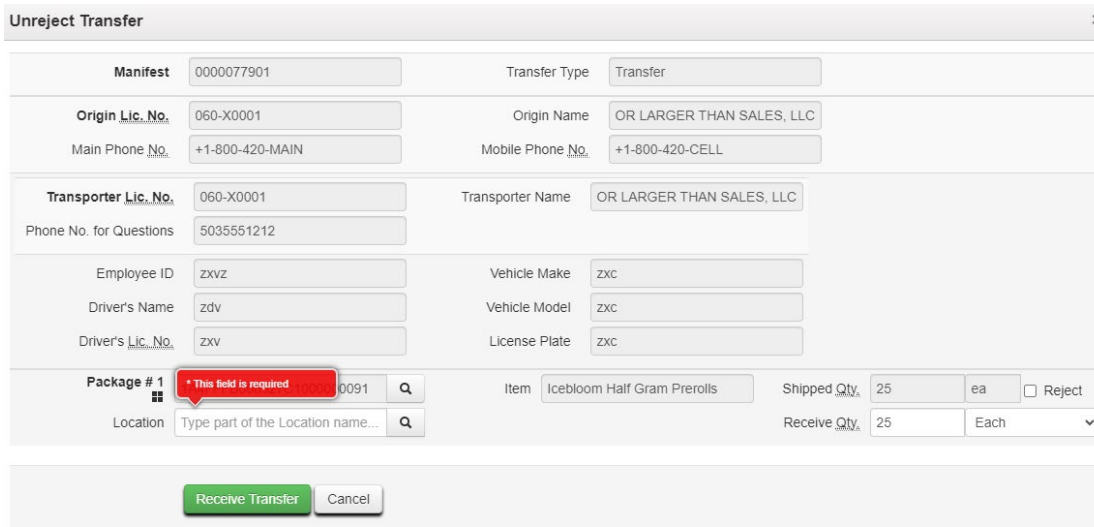

This process is intended to correct an accidental rejection of specific or all packages on a manifest. *If the originator of the manifest has already received the return in Metrc, you will need to complete the virtual transfer process outlined on the [OLCC Wiki](#).*

1. Once logged into Metrc, navigate to the Transfers Area and select the manifest from the Incoming tab. Then click the **unreject** button on the far right side of the screen as shown below.
