Large size tub with underwater massage system ...

Large volume for optimal treatments

This classical hydrotherapy tub fits perfectly for underwater massage treatments. Due to its large dimensions and a powerful underwater massage system (up to 4 bar), the bath tub yields excellent therapeutic results, both for therapist and the patient. The tub body is made of double-walled heat-and-acid-resistant GRP-material (optionally STAINLESS STEEL). In order to enhance the bathing experience, the tub can be equipped with 10 or 20 hydro-jet-nozzles.

Advantages for the patient and the therapist:

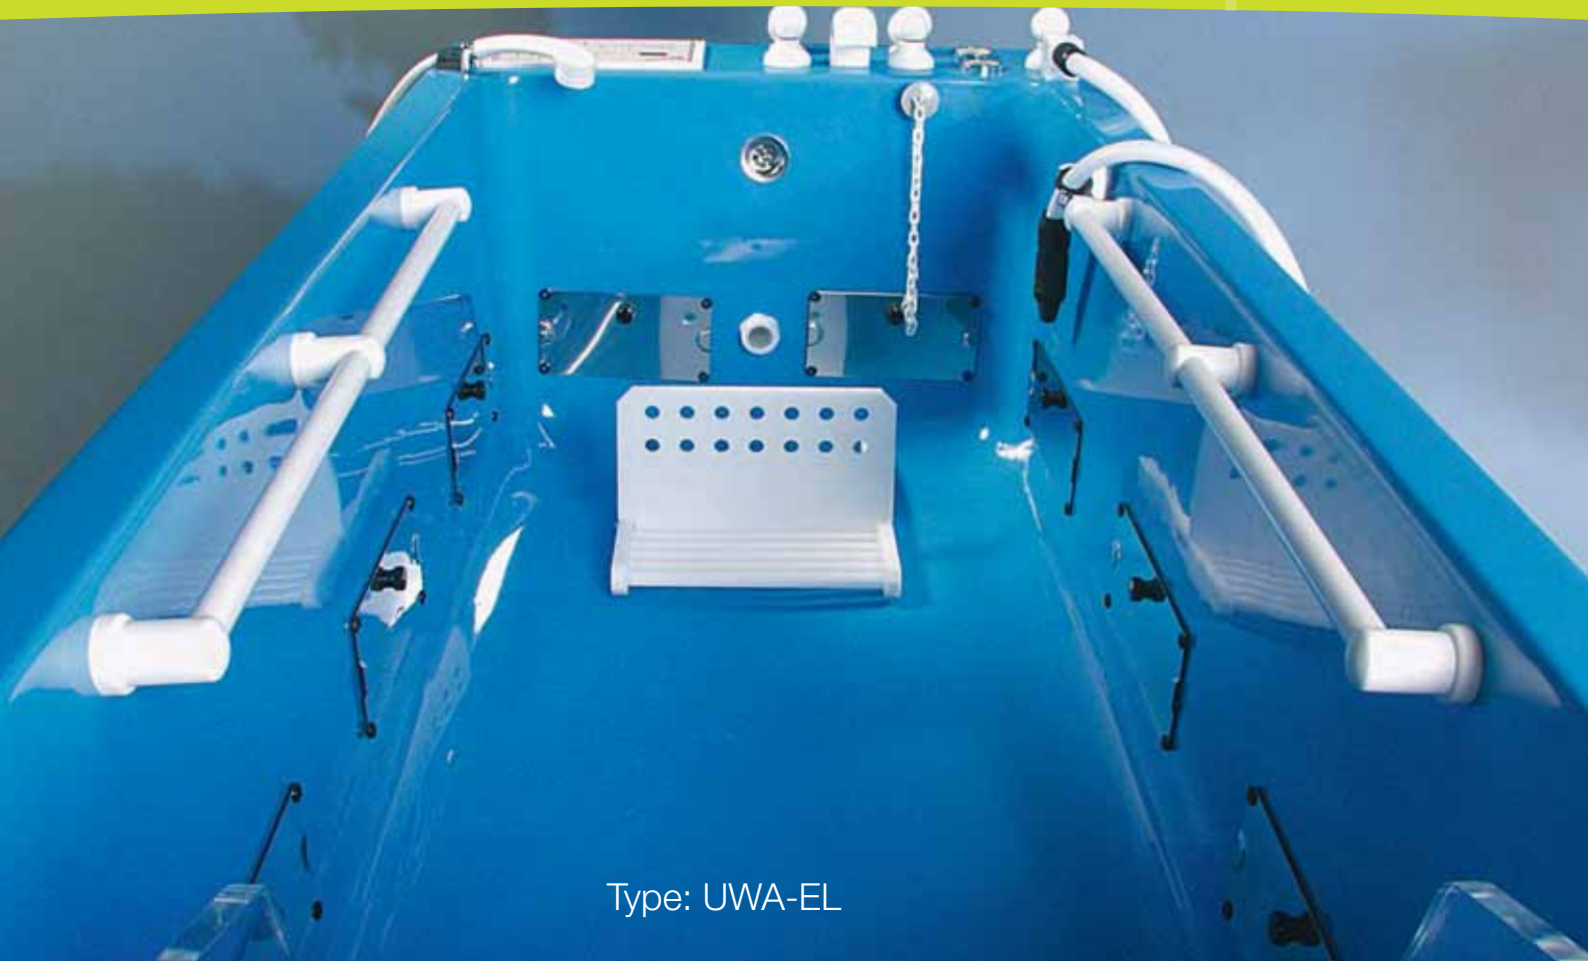

- Optimal positioning of the patient
- Large volume for optimal underwater massage treatments
- Tub body in acid-proof GRP-material
- Smoothly accessible with lifts etc.
- High stability

Large size tubs
the classical hydrotherapy tubs ...

Type: GRW

Type: UWA-EL

Also with electro-galvanic functional unit

By combining the large size tub with an underwater massage and electro-galvanic functional unit, a versatile combination unit is created. An electro-galvanic full bath is used, among other things, for the treatment of lumbago, fibromyalgia, rheumatism and arthrosis of the big joints.

Advantages for the patient and the therapist:

- Electro-galvanic treatment ("galvanic-bath")
- Digital operating panel
- Removable electrodes to facilitate cleaning
- Large size for optimal underwater massage treatments
- Optimal positioning of the patient
- Tub body in acid-proof GRP-material
- Smoothly accessible with lifts etc.
- High stability

Butterfly-shaped tub
moving in the water ...

Optimal for therapy in the water...

An optimal solution to carry out therapeutic exercises in the water is the ergonomically-shaped butterfly tub from BEKA Hospitec. Due to the large ground clearance, it is smoothly accessible with a lift. Butterfly tubs offer the possibility to administer an individual movement therapy treatment in water, even if you do not have an exercise pool.

Advantages for the patient and the therapist:

- Large movement range for therapeutic exercises
- Tub in double-walled GRP-material (optional stainless steel)
- High stability due to 5 high-adjustable feet
- Can be optional equipped with air-jet or hydro-jet systems for a special bathing experience
- Optional underwater massage system with adjustable pressure levels (0-4 bar).

EVE! - Bath and shower lift

the perfect solution for bathing and showering ...

Advantages for your patients and your therapists...

- ❑ Completely made of aluminium and stainless steel.
- ❑ 100% usable as shower seat
- ❑ Smooth operation by just one therapist
- ❑ Fits in every modern bath tub
- ❑ Unrestricted transfer from the BEKA stand-up aid to the seat lift
- ❑ The design and shape of the chassis enables a comfortable and autonomous access by the patient
- ❑ Ergonomically-shaped safety control handles provides an accurate manoeuvring
- ❑ Low entrance height of only 49,5 cm
- ❑ Closed, smooth-running twin castors
- ❑ Handset with optical display of the battery charge level
- ➔ Battery and charger suitable for all mobile BEKA Hospitec lifts!

ADAM! - Bath stretcher

modern, safe and comfortable ...

ADAM! - Advantages for your patients and your therapists ...

- ❑ Completely made of aluminium
- ❑ Electrically adjustable backrest!
- ❑ 100% usable as shower stretcher
- ❑ Large resting surface
- ❑ Removeable PUR reposing area
- ❑ Integrated safety guard (optional)
- ❑ Smooth operation by just one therapist
- ❑ Low transfer height of only 46,5 cm
- ❑ Closed, smooth-running twin casters
- ❑ Handset with optical display of the battery charge level
- ➔ Battery and charger suitable for all mobile BEKA Hospitec lifts!

SENTA PUR L Shower and bath lift smoothly extensible to stretcher ...

Fits in every modern bath tub ...

The SENTA PUR L shower and bath lift is the perfect tool to safely and comfortably shower or bath the patient at anytime, regardless of his or her mobility. The SENTA PUR L is an extremely manoeuvrable and easy-to-use lift, which can be flexibly used in any available bath tub.

The battery-operated electrical drive provides for a continuous height adjustment; as a consequence, the patient will not experience any sensation of fear. The lift can be easily and safely operated by one caregiver through remote control.

Every lift is equipped with an overload protection as well as an anti-collision protection. An integrated service module reports failures of the lifts and indicates, that a maintenance is due. A manual emergency lowering is integrated..

Smoothly extensible to a stretcher ...

With the optional stretcher module, the SENTA PUR L bath lift can be smoothly and quickly transformed into a fully adequate stretcher. Because of the intelligent design, one caregiver can easily install the lateral wings without physical effort. This provides the necessary flexibility, without the need to use a second lift. The seat has a large hygienic opening, which can be covered if necessary.

Advantages for the patient and the therapist:

- ❑ Smooth operation by just one caregiver
- ❑ Electrical height adjustment with emergency system
- ❑ Flexible system for seat and stretcher lift
- ❑ Safe transfer to and from the tub
- ❑ Materials used: stainless steel and aluminium
- ❑ Closed, smooth-running twin castors

Medical bath tub Balneo

ideal for the modern hydrotherapie ...

Versatile application

This medical bath tub from BEKA Hospitec meets the highest requirements of modern hydrotherapy.

With various configuration features, such as special thermal water fittings, hydro- and air-jet systems and wellness equipment, the bath tub can be tailored to the individual needs and desires of the customer. The ergonomic design of the tub interior with backrest and armrests provides a peaceful relaxation during the treatment.

Advantages of the Balneo tub:

- Large selection of fittings (1/2", 3/4" up to 1")
- No corroding metal frames
- Tub body in acid- and heat-proof GRP-material
- Can be equipped with hydro- and air-jets
- Wellness equipment (aromatherapy, sound-system, light therapy)

Four-cells bath compact and water-saving ...

Also with electro-galvanic functional unit

The compact and water-saving four-cells bath provide solutions for various hydrotherapeutic treatments as electro galvanic partial baths, contrast baths and temperature rising arm and foot baths. The electrotherapeutic and the alternating treatments produce beneficial therapeutically effects on the nervous and the circulatory system. All treatments can be performed for each chamber independently or in a combined manner.

Advantages:

- Removable electrodes
- Sinusoidal and rectangular phase current forms
- Individual electrode control with automatic program sequence
- Microprocessor controlled operation panel with digital display
- Made of double walled GRP-material

Hydro-air-jet arm and foot bath the perfect addition to your therapy ...

Foot bath

Fully automatic foot bath with hydro-air-jets

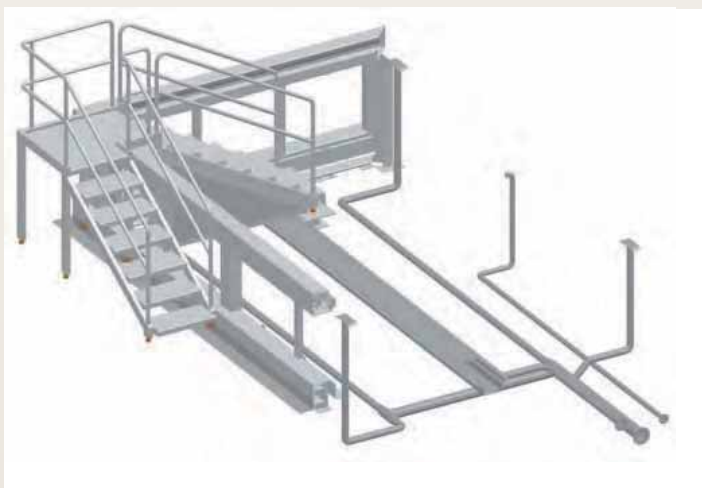

The hydro-air-jet baths perfectly complete your therapy offer. With their compact and economic design, they are perfect for relaxing hydromassage applications for numerous indications.

The flat or selective nozzle application can be manually set.

Medicare exercise pool

the therapy pool for optimised movement therapy
and water gymnastics ...

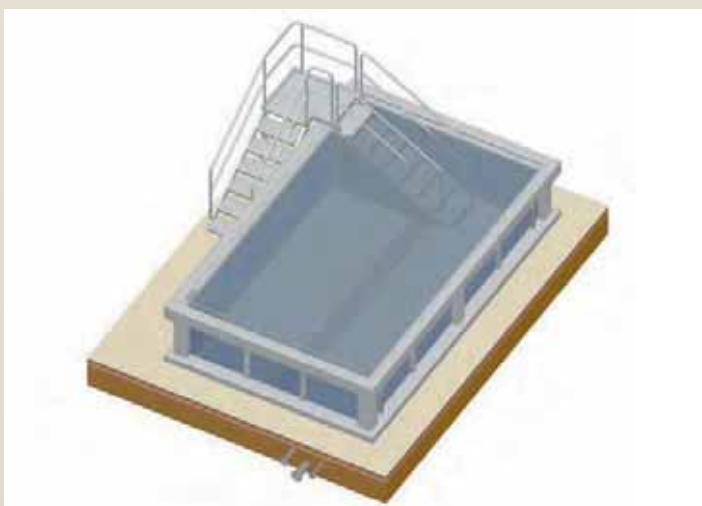

MEDICARE Pool

- 1 Interface for the water preparation
- 2 Overflow channel
- 3 Construction with floor angle and tiles
- 4 Pedestal with elevated safety side edge
- 5 Trailing ramp
- 6 Inlet channel
- 7 Glass plates
- 8 Raw concrete
- 9 Styrodur structure,
Height to structural conditions
- 10 Fine sand layer
- 11 Stainless steel pastille-type flooring
- 12 Flooring structure (on site)
- 13 Ceramic tiling (on site)

Pool lift

The MEDICARE Pool can be individually adjusted to your structural conditions and the special requirements of your therapeutic treatments.

The walls in distortion-free float glass guarantee an optimal control of the therapy in the water.

Bath tubs for burn patients

AVERO Premium plus and butterfly tub ...

AVERO Premium plus 190

The height-adjustable bath tub for burn patients, AVERO Premium 190 is particularly suitable for rooms with restricted space.

The tub body is made of stainless steel and meets the highest hygienic requirements in order to guarantee a safe treatment of burn victims. With the height adjustment feature, the tub can be set to a comfortable working height, so that an ergonomic work posture is ensured at all times.

Butterfly tub

The special butterfly bath tub for burn patients makes a careful, less painful mobilisation of the patient in the warm water possible. This type of tub in stainless steel is a compact and comfortable variant to administer movement therapy in water during the revalidation stage of the burn victim.

Optional specifications:

- Underwater massage system
- Air-jet whirl nozzles (with water non-return device)

Bath tubs for burn patients

large size tub VA steel ...

High-volume tub VA

Because of its large dimension, the large size tub VA provides for an optimal wound care of difficult to reach body parts. The tub in stainless steel meets the high hygienic requirements that are applicable to the treatment of burn patients or patients with chronic skin diseases.

Advantages:

- Scald protection
- Optionally with cleaning and disinfecting system with supplementary hand shower
- Volume: 610 l

PRO-Line PN and Bobath therapy, treatment and examination tables ...

PRO-Line PN ...

Highly stable examination and treatment table with positively and negatively adjustable headboard. The Pro Line PN is particularly suitable as examination bed in doctor's rooms or as table for the application of mud pack and electrical applications in the therapeutic field.

- Pressure-resistant, 50 mm thick upholstery
- Rounded edges
- Two-lever system for continuous adjustment of the headboard
(in total 60°, positively and negatively)

VARIO-LINE stool

Mobile stool with ergonomic seat for comfortable working, especially during long manual therapy, osteopathy or massage treatments

- Height adjustable (48-64 cm oder 54-73 cm)

Bobath Linear and MAXI

Optimal for the therapy of neurological patients

The BEKA Hospitec Bobath/Vojta tables are the perfect partner of neurological therapy. Due to their stability and their unlimited functionalities, they have proven their worth over time in daily practice.

- Maximum load 200 kg
- Sufficient place for mobile lifts
- High stability (also with two persons simultaneously on the treatment surface)
- Version Maxi EL with extremely large table top of 2 m x 2 m (not shown)

Saddle stool Comfort

Classic stool for medical staff with height adjustment of 52-66 cm and comfortable padding.

VARIO-Line Special
reliable and versatile ...

VARIO-Line Special therapy table

Straightforward elegant treatment table for universal use in practice. The three-part variant of the table can be smoothly set to roof-shape position by the gas spring with continuous setting, for instance to position the patient in lateral flexion position.

Advantages:

- Hydraulically or electrically height adjustable from 55 to 105 cm.
- Two-, three- or five sections at the customer's choice.
- Headboard continuously adjustable, positively to +30° and negatively to -20°.

MANIPULAT

ideal partner for therapeutic practice ...

The therapeutic treatment table MANIPULAT has been designed to meet the highest requirements with respect to functionality, processing quality and technical maturity. The MANIPULAT therapeutic treatment table is an excellent equipment for daily use, especially for manual or osteopathic therapy purposes.

- Optionally: hydraulic or electrical height adjustment
- Headboard negatively and positively adjustable
- Optionally 2-, 3- or 5-sections
- Vertical height adjustment by scissor system (no lateral misalignment/shifting)
- Height adjustment from 40 cm to 100 cm
- Hinges with Teflon bearings

VARIO-Line Pro tilting table

gently and safely back on your feet ...

Tilting table VARIO-Line PRO

The tilting table VARIO-Line PRO is a versatile therapeutic equipment for a safe verticalization (0° to 90°!) of neurology, orthopaedic, cardiology, phlebology and traumatology patients. The VARIO-Line PRO has two independently adjustable foot parts, which can be tilted both horizontally and vertically for an individual adaption to contractures or foot deformities.

Advantages:

- Integrated inclinometer
- Side rails
- Rigid or with electrical height adjustment
- Smooth operation by remote control
- Maximum load 150 kg
- Tilting function with continuous speed adjustment

Practice stairs

With the practice stairs from BEKA Hospitec, you can practice stair climbing after surgical operations or neurological diseases. The two different step heights and the height adjustable handrails provide a safe training of the stepping motion.

- Straight or corner version
- Chromed handrails
- Height adjustable handrails
80cm-120cm

Parallel bars

In the locomotion and walking therapy, parallel bars support patients with different disease patterns, either in neurology, orthopaedics or traumatology. The BEKA Hospitec parallel bars have an easy-to-use height adjustment and track width adjustment.

- Wooden grips
- Height adjustment from 68 bis 104cm
- Available in 3- and 4m length

BEKA Hospitec GmbH

About us ...

Since 1967, BEKA Hospitec develops and manufactures in the German town of Dutenhofen near Wetzlar rehabilitation and care aids. The company, which was originally incorporated as Bernd Kraft Medizinischer Apparatebau, focussed on hydrotherapy equipment and treatment tables for hospitals and rehabilitation clinics. In the eighties, the product range was extended by patient-care bath tubs and lift systems. In 1998, the well-established German company Hospitec was integrated in the company. This is where the present company name, BEKA Hospitec, came into existence.

Today, the global exporting company is one of the most innovating enterprises on the market. BEKA Hospitec's key expertise lies both in equipping of nursing homes, hospitals and facilities for people with disabilities with suitable hygienic and transfer aids and the planning and equipping of complete rehabilitation and therapy facilities.

In its facilities located in Germany, BEKA Hospitec develops and manufactures innovative and high-quality equipment and aids in close collaboration with regional suppliers to provide its customers with products "Made in Germany" featuring the highest quality and reliability.
