### ICRA BUSINESS

A number of new *Brugmansia* cultivar names have been placed in the public domain on-line or in electronic publications which do not meet the conditions of publication set out in the 2009 ICNCP — specifically that they should appear in dated hard copy (Art. 25.1). Such names are open to establishment for other cultivars, and their cultivars are open to having other names established for them. Therefore, in the interests of nomenclatural stability, we establish them here. If it transpires that any of these have in fact already been established, then those names of course date from the earlier publication. It is to be understood that the epithets listed here are preceded by the name of the denomination class, *Brugmansia*.

**Notice of retraction:** In a previous version of this issue, three names were printed erroneously. ‘Lemon Belle’ is too similar and easily confused with ‘Lemon Bell’ est. by Anne Kirchner-Abel, in 2004. ‘Sunglow’ is too similar and easily confused with ‘Sun Glow’, also est. by Anne Kirchner-Abel, in 2004. ‘Snowstar’ was already established by Didier Sevestre in 2011. They have now been noted in the registry.
