Plants ship May 1, 2023 through August 31, 2023.

*Order anytime and select your preferred ship date on the calendar during checkout.*

**Order online at [cannas.net](http://cannas.net)**

### Greetings from Oklahoma!

We are grateful for the new year. This past summer's drought was brutal. September 2022 was our driest September since the 1950s. But provision followed, and we had a very wet October and November. We were most grateful for the rainfall, even if the wet field caused the fall harvest to be quite challenging.

I (Nikki) celebrated my 25th year at Horn Canna Farm this summer. I am thankful to walk down our driveway to work every morning alongside Dustin. Although uncertainty is a daily part of farming, our greatest reward is you, our customer. Each time you tell us how beautiful your yard is and how much you enjoy your cannas, it reminds us why we do what we do. It is a tremendous joy to be a small part of creating beauty in your gardens, whether a flowerbed or an apartment balcony container garden.

We ended 2022 with a lovely celebration of Madison's marriage to our new son-in-law, Ty. Their small, intimate wedding fit them beautifully. Thankfully, Madison can still manage the farm's social media remotely while continuing her work as a PA. She has new YouTube videos planned for 2023!

Our oldest son, Sage, is in a 12-month maintenance technician course for Goodyear. He loves the rigor and challenge of this new opportunity. Our twins, Ellyn and Corinne, are in their second year of college. Corinne is pursuing an interior design degree, and Ellyn is pursuing a degree in nursing. (Ellyn and Madison currently work in the same emergency department in Oklahoma City!) Our youngest, Turner, graduates from high school this year. He is deciding whether to enter the military or begin college for a criminal justice degree. We love how each of our children is following their callings and passions.

You are the reason we grow cannas on the Oklahoma plains. Thank you for allowing us the opportunity to be a part of adding color and beauty to your gardens.

Blessings,

*Dustin & Nikki Snow*

# NEW! Canna Varieties for 2023

### New! Pink Magic

Large, globe shaped blooms with dark pink petals. Adds a magical swirl of deep pink to flowerbeds or containers. Dwarf height of three feet tall. \$17.00 bulb (only)

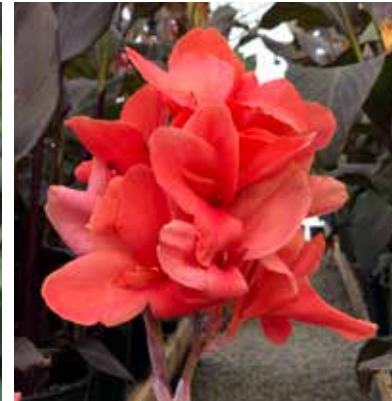

### New! Orange Punch

Happy orange blooms with accents of yellow. Unique pendant-shaped bloom. Deep green leaves. Dwarf height averaging three feet tall. \$12.00 bulb (only)

### New! Thai Pink

Soft, salmon-pink flowers with elongated petals. Blooms sit just above subtle hues of blue green foliage. Dwarf height of three to four feet tall. \$17.00 bulb (only)

### New! Whitelm Pride

Watermelon pink blooms deliciously mixed with blue green leaves that are edged with bronze. Medium height of four to five feet tall. \$17.00 bulb (only)

### New! Confetti

Delicate yellow blossoms dappled with splashes of pink. Festivities are certain with this lovely in your garden! Medium height of four to five feet tall. \$12.00 bulb (only)

## Buy your cannas as bulbs or potted plants!

Order your bulbs for shipment from mid-February through the month of June. Order your plants for shipment between the months of May and August. Bulbs are shipped fresh and healthy with a minimum of three to five eyes each. A sample size bulb is pictured left. Plants are shipped in 1.2 quart containers that measure about 4x4x5 inches. A sample size of our plants is pictured right. Plants range in height from 12 to 24" tall, depending on the time of year they are shipped.

# Dwarf Canna Varieties

These varieties reach an average height of 3 to 4 feet tall.

## Durban

One of our very best sellers! Psychedelic leaves and orange blooms are like no other! Originating from Durban, South Africa. Also known as Phasion. Excellent foliage canna. \$14.00 bulb/\$29.00 plant

Customer photo by:  
James from Lawton, OK

## Cover Feature Alaska

Alaska's nearly white blooms are just what gardeners have been seeking for years. Rich green leaves complement the creamy petals. Limited availability. \$29.00 plant (only)

## Banana Punch

Lots of rich yellow petals open in an arch shape on the pendant blooms. Average height of three feet with deep green foliage. It is a showstopper! \$29.00 plant (only)

## Dawn Pink

Flamingo pink blooms create a stark contrast to the dark chocolate foliage. Barely reaches 3 feet tall. Tips of the leaves cup slightly. \$17.00 bulb (only)

## Tenerife

Yellow petals splashed with red fill the top of each stalk with lots of vertical blooms. Dwarf height averaging about three feet tall. \$10.00 bulb (only)

Customer photo by:  
Don from Canton, MI

# Dwarf Canna Varieties

These varieties reach an average height of 3 to 4 feet tall.

## Kreta

Brilliant red blooms and green foliage. Great for attracting hummingbirds with a prolific number of petals. One of the Island Series cannas. \$12.00 bulb /\$26.00 plant

### From Our Customers

*"I received my order and WOW, so surprised. I have never received as beautiful plants in great condition by mail. In fact, I could not have gone to my local nursery and found anything this nice. Thank you for your prompt mailing and service."*  
-Sharon from Georgetown, TX

## Dwarf Mixture

**Exclusive!** A medley of our shortest cannas. Enjoy a wide variety of our dwarf cannas all in one package. 24 rhizomes for \$163.00

**Save 45%!**

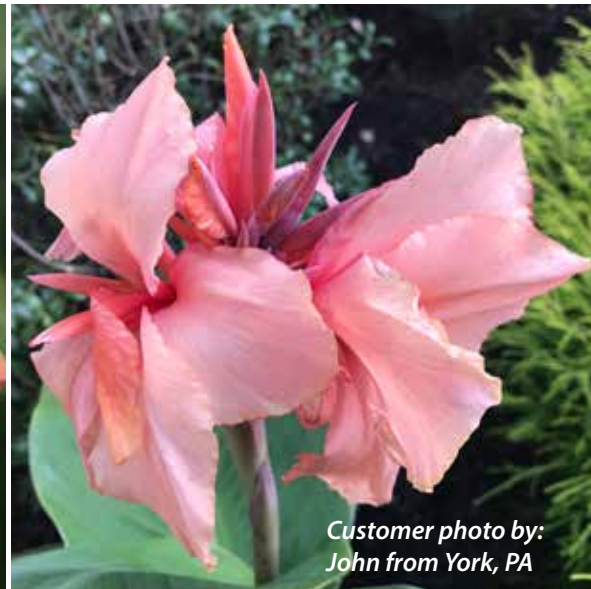

## Madeira

Orangish-red petals edged in bright yellow with green foliage. The bi-color blooms are great in containers. Also an Island Series canna. \$26.00 plant (only)

## Corsica

Soft apricot blooms with yellow centers and irregular yellow edging. Green foliage. Limited supply for 2023. Dwarf height of three feet tall. \$14.00 bulb

Customer photo by:  
John from York, PA

## Chinese Coral

The perfect baby pink canna with huge blooms. It multiplies slowly making this variety a rare gem among cannas. Dwarf height of three to four feet tall. \$17.00 bulb

## Wyoming

This award winner brings impact to the garden! Orange blooms contrast against bronze-tinted foliage in a dramatic combination. \$12.00 bulb (only)

## Black Knight

Black Knight's irresistible, velvety red blooms are unlike any other canna. Bronze tinted foliage. This variety always sells out early. \$14.00 bulb (only)

# Medium Canna Varieties

These varieties reach an average height of 4 to 5 feet tall.

**Berry Pink**

**Exclusive!** Vivid reddish-pink or cerise blooms with lots of upright petals. Pairs well with yellow blooming cannas. Medium height of four feet. \$12.00 bulb

## From Our Customers

*"This was my first time ordering from your company. To say that I was impressed is an understatement. I have never received such nice plants from a nursery through the mail. The rhizomes were HUGE!!! I look forward to enjoying the beautiful flowers these cannas will produce."*

*-Sandi from West, TX*

## Medium Height Collection

**Exclusive!** A perfect combo of our medium-sized cannas. 3 each: Yellow King Humbert, City of Portland and Crimson Beauty. 9 rhizomes for \$81.00

**Save 10%!**

*Customer photo by:  
Dennis from Wyckoff, NJ*

## Cleopatra

Dustin's favorite variety and our customers agree! Red randomly marks both the bloom and foliage on this best seller. Can also grow with a yellow bloom with green foliage or a red bloom with red foliage. No two are alike! \$14.00 bulb/\$29.00 plant

*Customer photo by:  
Greg from Waikoloa, HI*

**Crimson Beauty**

Red and pink fused together for a fabulous shade of hot pink. Complemented by shiny green leaves. Tried and true mid-height canna. \$12.00 bulb (only)

**Yellow King Humbert**

This unique and vintage variety has bicolor blooms of buttery yellow splashed with orange. A gardening favorite for over 125 years. \$9.00 bulb (only)

**City of Portland**

This popular and well-known canna produces coral pink blooms and lush, tropical green foliage. First introduced in 1916 by Antoine Wintzer. \$9.00 bulb (only)

*Customer photo by:  
Melinda from Coleman, TX*

**Australia**

Dark chocolate foliage topped with ruby red blooms grow from a surprisingly small bulb. Stunning in contrast to green foliage plants. Very popular for its deep, dark foliage \$12.00 bulb/\$26.00 plant

# Tall Canna Varieties

These varieties reach an average height of 5 to 6 feet tall.

Customer photos by:  
Chandra from  
Norman, OK

## Pretoria

Purplish-red stems reach up from the wildly marked stripy foliage giving way to massive orange blooms. Also known as Bengal Tiger.

\$14.00 bulb/\$29.00 plant

## Orange Beauty

This classic tall variety paints a gorgeous backdrop in the garden for shorter cannas. Beautiful in butterfly gardens. Surprisingly large blooms for such a tall plant.

\$12.00 bulb (only)

Customer photo by:  
Sharron from High Point, NC

## #1 Best Seller! Musifolia

Dramatic foliage towers above the garden in late season. Bronze trimmed foliage explodes in the evening sun reaching six feet or more. Produces massive rhizomes.

\$12.00 bulb/\$26.00 plant

Customer photo by:  
Breanna from El Dorado Hills, CA

# Giant Canna Varieties

These varieties reach an average height of 6 to 8 feet tall!

## Orange Musifolia

An orange blooming option to the ever-popular Musifolia! Giant bronze leaves create a tropical backdrop averaging six to eight feet tall. \$12.00 bulb (only)

## Omega

The tallest canna that we grow (8 feet and up), originally shared with us by our long-time customer, Alan. Apricot blooms with rich green leaves. \$12.00 bulb (only)

Customer photo by:  
Patty from Howell, MI

## Robert Kemp

Feathery, upright red blooms and a mass of green foliage create a splendid hummingbird playground. \$9.00 bulb (only)

## Grande

Tropical, wavy foliage resembles a banana plant. Upright blooms of reddish orange with huge foliage. \$12.00 bulb (only)

## Caring for Your Cannas

Look for all of our YouTube videos for complete canna care

Cannas are herbaceous perennials native to the northern and southern hemisphere. Cannas grow beautifully throughout the United States, flourishing with plenty of heat and water. Cannas are very dependable; **easy to plant and easy to grow.**

### Planting

Canna rhizomes may be planted in the spring after danger from frost. Plant cannas when soil temperatures have warmed to 60 degrees or warmer. Best results are achieved when planted in loose, fertile and well-draining soil. **Cannas love full sun and require a minimum of four hours of direct sunlight.**

Plant bulbs (rhizomes) 12 to 18 inches apart. Lay the long part of the rhizome horizontal to the earth's surface with eye up, if visible. This is not critical, as cannas will grow no matter which direction they are planted.

**Cannas are best planted in warm ground covered with one to two inches of soil.**

Water cannas well at planting. They require little to no water until cannas begin sprouting. Cannas are slow to sprout, sometimes taking three weeks to break through the soil surface. After sprouting, begin regular watering several times a week.

In colder regions, (6-8 weeks before spring), bulbs can be planted in pots and placed in greenhouse conditions. When danger of frost is past, remove from pot and plant outside.

### Summer Care

Cannas typically bloom 90 days from the planting date. Cannas should be watered thoroughly several times a week by slowly soaking the area around roots. Water more often during the heat of the summer. Cannas are heavy feeders. Apply 5-10-5 or 10-10-10 fertilizer two or three times during the growing season for added performance. Although cannas will continue to bloom if not dead-headed, cutting spent flowers and seed pods will keep flowerbeds looking tidy.

Cultivate often to keep soil loose and free of weeds and grass.

Leaf feeding insects and leaf rolling caterpillars can be stopped by regular applications of bT. Other products include systemic insecticides with an active ingredient of 97.4% acephate as well as garlic barrier insect repellent. Neem oil products are also helpful in removing leaf-rollers. It is best to treat cannas very early in the season to control canna leaf rollers. Be certain to apply the treatment to the soil near your cannas as well as the foliage.

### Overwintering

Cannas multiply producing three to five new rhizomes for each one planted. Dig clumps of bulbs in the late fall or after the first frost for re-planting the following spring. The most common mistake is allowing the canna rhizomes to dry out too much while in storage.

Rhizomes must not be allowed to freeze during storage. **The ideal storage temperature is 50 degrees.**

Rhizomes can be washed, divided and layered with peat moss in plastic bags. A few air holes around the sides will help give a small amount of needed air flow. Store in a basement or other cool place such as a cool corner of a garage, under the house, cellar, etc.

**IN WARMER CLIMATES** (zone 7-10) where the ground does not freeze below four to six inches, cannas can be left in the ground all winter. For zone 7, cut foliage down to the ground and cover flowerbed with six to twelve inches of grass clippings, leaves, compost, hay straw, etc. Cannas in zones 8-10 do not require mulch for winter protection. Cannas can be thinned in the spring every two to three years by digging out thick areas of bulbs to allow spacing between the plants.

Exclusive!

## Cannova® Cannas

We are excited to offer five great colors of Cannova® cannas this year! Each plant grows to an average height of 3 to 4 feet.

### New! Cannova® Bronze Peach

Brand new for spring 2023! Soft, salmon pink blooms grow in lovely contrast to bronze-hued foliage. We think you will love it!

### Cannova® Yellow

Canary yellow flowers with the slightest hint of salmon speckles. Large, deep green leaves add tropical flare to mixed containers and gardens.

### Cannova® Orange Shades

Perfectly mixed hues of orange above lush, green tropical foliage. Beautiful as a backdrop in a landscape or as a showpiece on a patio or pool deck.

### Cannova® Rose

Stunning rose colored blooms atop rich, green leaves. Its dwarf height is ideal for mass plantings, in beds, and borders. Creates a stunning focal point when planted in pots.

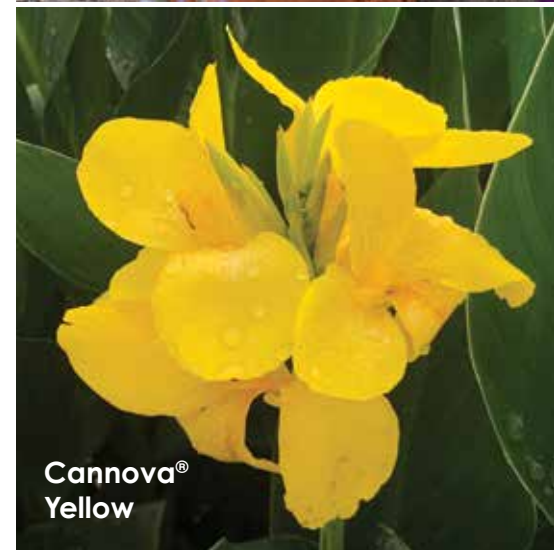

### Cannova® Mango

A sweet treat that produces shades of salmon and mango blooms with lush, green foliage. Mango is ideal in the landscape or in containers.

Available as plants only. \$26 each
