

Natural Cosmetic Ingredients

Exotic Butters & Oleins

Conventional, Organic and Internal Stabilized

Exotic Butters & Oleins

Exotic Oils and butters are derived from uncontrolled plantations or jungles of Asia, Africa and South – Central America.

The word exotic is used to define clearly that these crops are dependent on geographical and seasonal variations, which has an impact on their yearly production capacity.

Our selection of natural exotics butters and oils are great to be used in the following applications:

- ❖ Anti-aging and anti-wrinkle creams
- ❖ Sun Protection Factor SPF
- ❖ Softening and hydration creams
- ❖ Skin brightening applications
- ❖ General skin care products

Internal Stabilization I.S. extends the lifecycle of the products 20-30 times as compare to conventional.

COCOA BUTTER

Theobroma Cacao

- Emollient
- Stable emulsions and exceptionally good oxidative stability
- Reduce degeneration and restores flexibility of the skin
- Fine softening effect
- Skincare, massage, cream, make-up, sunscreens

CONVENTIONAL ORGANIC STABILIZED

AVOCADO BUTTER

Persea Gratissima

- Skincare, massage, cream, make-up
- Gives stable emulsions
- Rapid absorption into skin
- Good oxidative stability
- High Oleic acid content
- Protective effect against sunlight
- Used as a remedy against rheumatism and epidermal pains
- Emollient

CONVENTIONAL ORGANIC STABILIZED

ILLIPE BUTTER

Shorea Stenoptera

- Emollient
- Fine softening effect and good spreadability on the skin
- Stable emulsions and exceptionally good oxidative stability
- Creams, stick product
- Hair and body butters
- Skincare, massage, cream, make-up and sunscreens

CONVENTIONAL ORGANIC STABILIZED

SAL BUTTER

Shorea Robusta

- Emollient
- Oxidative stability
- Good softening effect and good spreadability on the skin
- Cocoa butter replacer
- Protective effect against sunlight
- Skincare, massage, cream, make-up, sunscreens

CONVENTIONAL ORGANIC STABILIZED

SAL OLEIN

Shorea Robusta

- Emollient obtained from fractionation designed for cosmetic applications
- High stearic and oleic acid content
- Prevents skin drying and stop formation of wrinkles
- Skin care products, massage creams and make up, sunscreens
- High content of unsaponifiables and antioxidants

CONVENTIONAL ORGANIC STABILIZED

TAMANU BUTTER

Calophyllum Inophyllum

- Emollient
- Excellent skin healing properties
- Strong anti-neuralgic properties
- Strong anti-oxidants properties
- Strong anti-microbial and anti-biotic properties
- Strong anti-inflammatory properties

CONVENTIONAL ORGANIC STABILIZED

SHEA BUTTER

Butyrospermum Parkii

- Good emollient and refatting agent
- Melts at body temperature
- Good water binding properties and high unsaponifiable content
- Burns and skin irritation
- Skin, body, baby care and make-up
- Protective against sunlight, cutaneous, dryness, dermatitis, dermatoses

CONVENTIONAL ORGANIC STABILIZED

SHEA OLEIN

Butyrospermum Parkii

- Soothing emollient
- Good water binding properties and very high unsaponifiable content
- Good spreadability on the skin
- Massage creams and oils, cutaneous dryness, solar erythema burns
- Skin, body, baby care and make-up
- Melts at body temperature and is good refatting agent

CONVENTIONAL ORGANIC STABILIZED

DHUPA BUTTER

Vateria Indica

- Emollient
- High stearic acid content
- Cocoa butter equivalent
- Superior oxidative stability
- Protective against sunlight
- Used as a remedy against rheumatism and epidermal pains

CONVENTIONAL ORGANIC STABILIZED

MAFURA BUTTER

Trichilia Emetica

- Good emollient
- Skin conditioner
- Used as a carrier in the cosmetic and pharmaceutical industry
- Excellent at cold weather stability
- Skin and body care

CONVENTIONAL ORGANIC STABILIZED

PHULWARA BUTTER

Bassia Butyracea

- Good emollient
- Skin and body care, massage creams and make-up
- Suitable for night creams and creams for dry skin
- Good moisture retaining properties
- High softening effect and spreadability on the skin
- Oxidative stability

CONVENTIONAL ORGANIC STABILIZED

WALNUT BUTTER

Juglans Regia

- Emollient
- Good conditioner
- Excellent penetrating quality
- Good spreadability
- Adds moisturizing attributes to creams and lotions
- Body care and make-up

CONVENTIONAL ORGANIC STABILIZED

RICE BRAN BUTTER

Oryza Sativa

- Content various saponifiables
- Enhances peripheral blood flow in the skin
- Maintains the elasticity and moisture of the skin
- Cosmetic applications
- Reduces sunburn to the skin
