Vision and foresight at the core of every product

clarion

Clarion was founded in 1940, and ever since developing Japan's first car radio in 1951 has continued to actively develop breakthrough technologies and launch innovative products. Clarion's trusted technologies are incorporated by leading car manufacturers all over the world, under our brand name or otherwise, and are playing a key role in enhancing the relationship between people and their vehicles.

Clarion's original research and development expertise has been the driving force providing not only entertainment, but also a safer and more secure driving environment for many generations. And by accommodating the convergence of cars and networks, people's cars are rapidly becoming one of the most fulfilling places to experience high-quality digital content and access a wealth of information.

Corporate Commitment

To improve society by seeking to develop the relationship between sound, information, and human interaction, and by creating products that meet those needs.

Corporate Vision

The connection between sound and information communication in the mobile environment of the car will evolve into new domains based on our unique ideas and advanced technologies. Through this, we will provide safety, security, comfort and excitement to our customers all over the world. We at Clarion will remain at the forefront of the industry, as we accurately identify the needs of the market and realize long-term growth.

Bright future through brilliant technologies

The world's first Full Digital Sound

Clarion was the first manufacturer to develop and market the full digital speaker, which balances premium sound with eco friendliness. Through a collaboration of Dnote digital signal processing technology and Clarion's own in-car acoustic technologies, the full digital sound system successfully achieved a totally digital-to-digital signal transfer from the digital source all the way to the speaker.

Advanced image recognition and processing for a safer drive

Clarion is actively involved in Intelligent Safety, which utilises image recognition and image processing technologies to support users in driving and parking. Development includes an all-round-view camera that visually displays information on the vehicle's immediate surroundings.

Apple CarPlay™ compatible for an advanced driving experience

Apple CarPlay is the smarter, safer way to use iPhone in your car. Apple CarPlay seamlessly integrates your iPhone® with NX807. Now you can make phone calls, access your music, send and receive messages, get directions, and more while you stay focused on the road.

Enjoy long drives with family and friends

Clarion offers a line-up of car navigation systems geared especially for camping vehicles — they even remove routes that are legally inaccessible to camping vehicles automatically, and display camping facility information, including pictures. The latest advances, such as Apple CarPlay, are supported. Use voice commands, such as search, and enjoy music stored on your smartphone or USB device. Make the most of your long-haul excursions with family and friends.

Full Digital Sound

From source to speakers, digital-to-digital changes audio

Full digital signal transfer from a digital source enables direct input of high-resolution audio sources to the speakers without loss. High-quality full digital sound is reproduced, with purity that's true to the original. High efficiency conversion from digital signals into sound makes the system capable of delivering 4 times the high power output of conventional Full Digital Sound Systems[*1], while achieving low power consumption that's only about 1/5th that of analogue systems[*2].

*1 Compared to other Clarion references.
(Conventional Full Digital Sound Systems were only sold in the Japanese market)
*2 Compared to the driving circuit of a typical factory original audio system.

Digital sound processor delivers versatility

Digital sound processor accommodates factory original centre unit as well as those from other manufacturers, and external digital audio equipment. The ability to connect analogue speakers also contributes to the system's versatility.

Optical digital output for assured Clarion connectivity

If the centre unit is a Clarion car navigation system (Digital output compatible), it's easy to create a full total digital system and enjoy leading-edge digital sound.

---

■ Apple CarPlay™ compatible for an advanced driving experience

Enjoy safer operation of your iPhone® features in your car — make calls, listen to music, or even send and receive messages, get directions, and more while you stay focused on the road.

Phone   Maps

■ Maps
The power and simplicity of Apple Maps is now available on your dashboard. Apple CarPlay can predict where you most likely want to go using addresses. Maps will even estimate how long it will take.

■ Phone
Apple CarPlay works with Siri so you can access contacts and make calls, redial, and listen to stored messages by voice activation.

■ Music
Siri lets you play music from your iPhone just by saying the tune, artist name or genre. It supports Apple Music® so you can get the latest tunes.

■ Apps
Apple CarPlay works with your iPhone apps, so your enjoyment is limitless including Music, Audiobooks, Podcasts, and beyond.

■ Gyro sensor and vehicle speed pulse sensor for high-precision car navigation

The internal gyro sensor enables the vehicle's location to be followed even in long tunnels where GPS reception is poor. The vehicle speed pulse sensor provides higher-accuracy car navigation.

GYRO sensor | PULSE sensor

■ Line-up of DAB-ready models to meet your needs

Clarion offers a selection of DAB-ready source units which allow easy, direct connection of the DAB404E receiver.

NX405E C

Navigation optimised for camping vehicles (NX405E C, NX706E C, NX807E C)

POIICON NAVIGATION CONTENT | camping.info dieser Campingführer liebt!

The GPS navigation system of the NX405E C, NX706E C, NX807E C incorporates map data that has been optimised for driving camping vehicles and caravans. It can search for and display routes that avoid areas that are restricted due to the size and weight of your vehicle. In addition, information about camping areas and sanitation facilities are included to make your trip as comfortable as possible, with the optimum route available.
Expand your world, right from your car

- Soft turn-on and turn-off circuitry
- Ground loop isolation circuit

4 ch. Power AMP | HPF | MOS-FET Technology | Class D

MOS-FET power amp

There's only one way for Clarion's main units to deliver unyielding power output and linearity: MOS-FET amplification, or metal oxide semiconductor field effect transistor amplification. Smaller and more efficient than conventional power supplies, a MOS-FET amplification circuit delivers power with less distortion and zero on / off switching noise. This means you can crank up the volume or set it to easy listening. Either way, your sound will be crystal clear.

Circuit design achieves high-quality sound.

Circuit design achieves high-quality sound Clarion amplifiers feature uncompromising resistance to magnetic noise, thereby minimising distortion. The result is high-quality sound you can enjoy in a variety of systems.

Advanced technologies in micro size

XC1410, despite its compact dimensions, is a superb D-class 4-channel amplifier realising astounding sound output.

2-ohm stability

Utilizing this design for peak performance and unwavering reliability, Clarion's amplifiers can drive lower impedance loads for increased power.

More gravity for the bass line

Made for safer driving
Safety cameras and monitor systems

Cameras

COMMERCIAL VEHICLE REAR CAMERA

Durable design, low distortion, low ghosting front guard shutter included (CC6500E only)

CC6500E

CMOS colour camera (with shutter) (wide-angle / mirror image)

CC6600E

CMOS colour camera (without shutter) (wide-angle / mirror image)

Wide-angle

Mirror image

Main features of the CC6500E / CC6600E

- Rugged, reliable and durable, high-quality camera system is built from the ground up with all-original parts.
- Latest-generation CMOS sensor with 330,000 pixels which offers low-noise night-time images.
- Fluorine coating on shutter prevents dirt and snow from clinging.

IR ILLUMINATED COMPACT COLOUR CCD CAMERA

Dynamic range function and infrared illuminators improve the driver's visibility in dark situations

CC2020E

IR illuminated colour CCD camera (wide-angle / mirror image)

Wide-angle

Mirror image
Features
- Dynamic range function improves the camera image clarity in both light and dark situations.
- 5 built-in infrared emitters.
- Built-in microphone.
- Built-in heating element ensures the camera is ready for use at all times.
- Weather-resistant die-cast aluminium housing.
- Electronic iris.
- Can also be connected to a universal monitor with a composite (RCA) input terminal via the dedicated conversion cable (CCA730). (12V vehicles only)

CMOS COLOUR CAMERA

CC520

CMOS vision assist camera

CC720

CMOS vision assist camera (true / mirror image)

CC520

CC720

Defeatable distance guide lines (red, orange, yellow, green) make parking a cinch

By connecting the CC520, CC720 to a Clarion navigation multimedia unit, you'll be able to view different coloured guide lines to indicate the distance from your vehicle to a safe stopping point.
