**Top Quality, Top Size Bulbs**

Flower Bulb Specialists Since 1868

Dear Sir/Madam

I am delighted to present our new Spring 2023 catalogue, offering over 400 bulbs with which to add colour and interest to your garden from June onwards. At least a quarter of these are exciting new varieties, or bulbs we have reintroduced to the catalogue due to popular demand.

**To guarantee the availability of your chosen varieties, we would always recommend that you order as early as possible, as with the burgeoning interest in gardening over the last two years we anticipate that there could again be a shortage of supply. As this time of year is particularly busy, it would greatly help the workload and be very much appreciated if, whenever possible, orders were placed by post or via our website [www.dejager.co.uk](http://www.dejager.co.uk)**

The past year has seen some momentous changes, including the very sad death of Her Majesty Queen Elizabeth II. She was such a reassuring presence for so many years, providing leadership, security, stability and above all an unswerving sense of duty. But a new chapter has now begun, and long live the King!

Thinking of glorious autumn colour, it is difficult to beat Nerines (Pages 36-37). I would like to thank one of our loyal customers for these lovely pictures of the de Jager Nerine Bowdenii bulbs that she grows. Do please continue to send us your photographs as we so much appreciate seeing our bulbs in flower.

We live in difficult times, and the horrific war in the Ukraine, together with a changing climate, political and economic turmoil worldwide, and alarming rates of inflation at home, cannot but affect us all and lead to rising levels of stress. But it is possible to rediscover our humanity, and gain some solace from the natural worlds, in the garden we personally create to provide a healing space and a haven for beauty in a world seemingly gone mad.

My wife Rose and I get a lot of pleasure - not to mention wonderful flower arrangements - from the Dahlias (Pages 2-13) and Gladioli (Pages 12-17) which we grow for cutting. These magnificent plants provide a blaze of colour late in the season when so many others are past their best, and I would - from personal experience - strongly encourage you to plant some! We have some 90 Dahlias and more than 20 varieties of Gladiolus to choose from, including the new compact Glamini Gladioli.

**Top Quality, Fresh Cut Flowers**

More and more people are discovering our beautiful bouquets, which provide highly attractive combinations of top quality blooms. Each of the nine arrangements is available to purchase in different sizes to suit any occasion. Do please visit [www.dejagerfreshflowers.co.uk](http://www.dejagerfreshflowers.co.uk) to order your wonderful fresh flowers.

We are also finding that customers are keen to give bulbs or gift vouchers as presents - a welcome and long-lasting way to express a sentiment and make someone happy.

We continue to support Greenfingers, a most worthy charity who do remarkable work building gardens for children at hospices up and down the land. So far they have built over 60 gardens, with another 3 currently in progress. These gardens bring opportunity and great comfort to

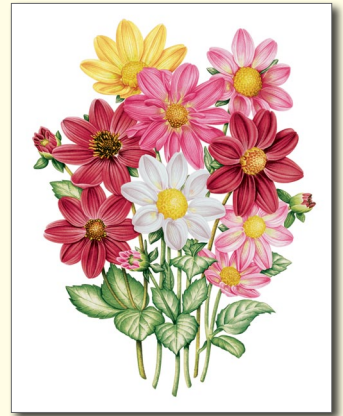

terminally ill children and their families. Should you also wish to lend your support, please visit [www.greenfingerscharity.org.uk](http://www.greenfingerscharity.org.uk)

We are also very proud to continue supplying bulbs to the life-changing charity Horatio's Garden. The first garden opened in 2012 at the Duke of Cornwall Spinal Treatment Centre in Salisbury; since then it has become a national charity with the objective of providing a garden for each of the UK's 11 specialist NHS spinal injury centres. To date four further gardens have been completed: at Stoke Mandeville, at The Scottish National Spinal Injuries Unit in Glasgow, at the Midland Centre for Spinal Injuries in Oswestry, and at The Royal Orthopaedic Hospital in London. The sixth garden is planned for the new Welsh Spinal Cord Injury Rehabilitation Centre in Llandough. Do read more about this inspirational charity at [www.horatiogarden.org.uk](http://www.horatiogarden.org.uk)

The front cover of this catalogue features another wonderful painting, this time of Dahlia Topmix (Pages 10-11).

This illustration has been specially commissioned from the up-and-coming botanical artist, Emma Tildesley Brunton DipSBA (Dist).

Our website [www.dejager.co.uk](http://www.dejager.co.uk) is always evolving to provide an ever more user-friendly experience. ## DAHLIAS - SET THE TONE IN MID-SUMMER

Dahlias are much prized for cutting and they are very decorative in the garden. The Dahlias we offer are in the form of tubers, and from early March onwards **TOP QUALITY FIELD-GROWN TUBERS** will be despatched in polythene bags, in which they may be safely kept until planting time, stored in a cool place. Dahlias thrive in rich soil, and an application of well rotted manure is most beneficial. During dry weather water liberally. Plant 60-75 cm (24-30") apart each way. Protect from slugs.

P. de Jager & Sons Limited have been selling top quality, top size bulbs for over 155 years. We cannot overemphasise the importance of size. Top size bulbs really do make a huge difference both in terms of flowering and naturalisation.

Smaller size bulbs will be less expensive but the results will be very noticeably inferior.

In order to illustrate the contrast in size, we have photographed a de Jager Amaryllis bulb beside one purchased from a garden centre. You can see the difference! All de Jager top bulb sizes are published in our catalogues.

## LARGE-FLOWERED GLADIOLI

Many of our customers grow Gladioli in rows in the vegetable garden or a spare piece of ground, to provide cut flowers. If planting is staggered, a continuous supply over a long period is assured. They thrive in any good, well-manured garden soil. Plant 3-5 cm (1-2") deep and the same apart. In dry weather water regularly until growth is established. (Corms).

When considering lilies in your garden, the first and most important factor to bear in mind is that they must have good drainage.

Soil which remains waterlogged after rain is not suitable and will almost certainly mean an early death for any lily planted in it.

## PICTORIAL MEADOWS MIXTURES

These Meadow Mixtures are carefully blended seed mixes of native and non-native hardy species, designed to provide high quality flowering displays. They have been developed following several years of intensive trials at the University of Sheffield. Unlike other mixes that are available, they will flower and provide visual interest over an extremely long period of time (from summer through to late autumn) and are formulated to produce a succession of flowering species.

They inject drama into large-scale commercial landscapes and create sparkling, complex and intricate pictures in the very smallest of spaces. They provide a colourful, wildlife-friendly replacement for mown grass; they can be sown formally in beds or to provide colour between shrubs, trees and perennials. Leeds City Council included a meadow mixture in their magnificent Gold Medal winning garden at the Chelsea Flower Show in 2010, and these mixtures have been used extensively in the Olympic Park.

Sow the Annual seed mixes at a rate of 2-3g per square metre in the spring - March, April or May - and they will produce superb colour displays within 8 weeks or so of sowing. The Perennial seed mixes all contain over 20 species of plants, and should be sown at a rate of 2g per square metre (except Purple Haze – 3g per sq. m.) from early autumn to late spring, with October/November being the best for medium to large scale plantings. Once established the meadow can be managed simply with an annual cut in late February.

<b>SD111</b>	<b>Classic Annual Mix</b>	The original Pictorial Meadows mix is illustrated in the main picture opposite (taken at The Eden Project) and produces stunning displays right through until late October/November. Starting out with white, blues, pinks and reds, the tapestry turns to reds, orange and yellow in the autumn. The mix has been carefully balanced for colour and succession of flowering, and components include: Shirley Poppy, Californian Poppy, Cornflower, Fairy Toadflax, Tickseed, Red Orache and Larkspur. FH: up to 1m (39").	Per 50g 24.00	Per 100g 45.00
<b>SD141</b>	<b>Cornfield Annual Mix</b>	A carefully selected mix of pretty cornfield annuals that will flower mainly in July and August, including: Field Poppy, Cornflower, Scentless Mayweed and Corncockle. FH: up to 1m (39").	Per 50g 24.00	Per 100g 45.00
<b>SD161</b>	<b>Pixie Annual Mix</b>	A mix suited especially to more restricted or compact situations, but having the same long-flowering characteristics of the standard mixture; components include: Fairy Toadflax, Red Flax, Shirley Poppy, Love-in-amist, Candytuft and Blue Flax. FH: up to 50 cm (20").	Per 50g 24.00	Per 100g 45.00
<b>SD241</b>	<b>Pollinator Lawn Perennial Mix</b>	A low growing meadow mix that will happily thrive just about anywhere. Responds well to additional mid-season cuts to help promote fresh foliage and flowers. Components include: Autumn Hawkbit, Leontodon autumnalis, Birds Foot Trefoil, Lotus corniculatus, Catsear, Hypochaeris radicata, Heartsease and Viola tricolor.	Per 20g 39.00	Per 40g 70.00
<b>SD251</b>	<b>Persian Carpet Perennial Mix</b>	A flowering meadow with a very long season, and complex and subtle colour combinations throughout the year. Also perfect for narrow borders and edges. Includes: Carthusian Pink, Dianthus carthusianorum, Hard Fescue, Festuca longifolia, Maltese Cross, Lychnis chalcidonica, Vipers Bugloss and Echium vulgare.	Per 20g 39.00	Per 40g 70.00
<b>SD211</b>	<b>Tuscan Hills Perennial Mix</b>	A warm, vibrant mixture for normal fertility soils. Mostly yellows and golds with white, hints of orange and flashes of later purples, our most popular perennial mix performs best in free-draining, sunny spots. Includes: Blackeyed Susan, Rudbeckia hirta, Sea Holly, Eryngium planum, Yarrow, Achillea millefolium, Yellow Ox Eye, Bupthalmum salicifolium.	Per 20g 39.00	Per 40g 70.00
<b>SD221</b>	<b>Moody Blues Perennial Mix</b>	A beautiful, cool, elegant combination for normal fertility soils, this mix will perform quite happily in semi-shade. Predominantly mauve and blue with billows of white and flashes of purple. Includes: Michaelmas Daisy, Greater Knapweed, Field Scabious, Wild Carrot, Perennial Flax, Purple Coneflower, Ox-eye Daisy and Columbine. FH: up to 50 cm (20").	Per 20g 39.00	Per 40g 70.00
<b>SD231</b>	<b>Turkish Delight Perennial Mix</b>	A gorgeous, robust and very richly coloured carpet designed for a long flowering season on normal fertility soils. Includes: Field Scabious, Knautia arvensis, Great Burnet, Sanguisorba officinalis, Meadow Cranesbill and Geranium Pratense.	Per 20g 39.00	Per 40g 70.00

## FREQUENTLY ASKED QUESTIONS

**Q. Is there any grass seed content?**

A. There is no grass content to the mixes. Don't mix with grass as it will kill off the flowers.

**Q. Can I just scatter the flowers over existing grass to create a meadow effect?**

A. Unfortunately not - the seeds have to be sown on bare soil.

**Q. Will the annual mixes self-seed?**

A. Only some of the species in the annual mixes will. To get the same effect you have to resow each year.

**Q. Will birds eat the seed?**

A. No, they are too small for them to notice.

**Q. Will the mixes work in Sandy/Chalky/Clay soil?**

A. Yes. They will work on all types of soil, but for these mixes, the better the soil the better the result.

**Q. Do I need to water the seeds if it doesn't rain once I've sown them?**

A. For annuals no there is usually enough rain eventually and if you over-water they could rot before they germinate. However, if there is prolonged drought after you have sown then you could try watering once a week. Perennials are more demanding and we recommend irrigation in Spring.

**Q. Will the mixes work in shady areas?**

A. Yes, but the mixes do need sunshine at some point during the day.

**Q. Can I combine the annual and perennial seed mixes?**

A. We don't recommend this, as each seed mix is carefully formulated to produce a specific result.

**Q. How long will the seed keep if I don't use it all?**

A. Usually for several years - keep stored in a cool dry place.

## PLANTING DEPTH

Failures with bulbs are most frequently due to their having been planted too deep or too shallow. A good general rule to follow is to cover the bulb with soil one and a half to twice its own depth, measuring the bulb from the base to the shoulder. Thus a bulb measuring 2 inches from the base to the shoulder should be covered with 3-4 inches of soil. Always unpack bulbs on arrival and leave bags open so air can circulate until planting.
