Seeking a Senior Project Manager to manage new Saudi Arabia project, could require two weeks a month in Saudi Arabia.

SUMMARY & OBJECTIVE

As a senior project manager you will be responsible for being a senior member of a team, training, guiding and mentoring more junior project managers and throughout the company to bring about cultural change. You will be responsible for compiling the project charters, scope, project plans, resource plans, and schedule to ensure the project meets the organization's and the client's needs. You will be the main contact for the external client and internal staff in dealing with successful implementation of the project based on the needs of the project stakeholders. As a senior project manager you will be given some of the more complex and challenging projects to implement. As a senior project manager you will partner with most departments within the organization, such as IT engineering and infrastructure, deployment and configuration, product support, training, account management, sales, and customer experience.

As the senior project manager you will run projects such as initial client install, client upgrades, conversions from the legacy system to the new system, hardware installs such as GPS projects, logistical projects dealing with a variety of needs. Along with a number of projects both internally hosted and externally hosted applications. These projects can range in scope from 2 weeks to 9 months or more.

As a senior project manager you will be responsible for weekly status reporting on all the projects assigned to you. You will communicate this status to the Director of PMO in order to communicate the overall project delivery to executive management. An advanced knowledge of project management practices and the proven ability to handle multiple projects simultaneously to successful completion is a must.
