### **Who to contact**

Material for publication, books for review, obituaries, advertisements – the Editor  
ALL OTHER MATTERS (subscriptions, change of address, late or non-arrivals, back issues –  
e-mail [registrar@amentsoc.org](mailto:registrar@amentsoc.org) or write to PO Box 8774, London SW7 5ZG

### **Back Issues**

Volumes more than ten years old may be read at [www.biodiversitylibrary.org/bibliography/8408](http://www.biodiversitylibrary.org/bibliography/8408)

**Readers are respectfully advised that the publication of material in this journal does not imply that the views and opinions expressed therein are shared by the Editor or by the Amateur Entomologists' Society or by any party other than the named author or authors.**

### **Guidelines for Contributors**

The Editor welcomes contributions on British Isles Lepidoptera, on non-British Lepidoptera where likely to be of interest to British researchers and on other groups of British Insects for which specialist English language journals do not currently exist. We accept descriptions of new species. Other subject matter may be accepted entirely at the discretion of the Editor, whose decision is final.

Please follow the format in this issue; if in doubt, ask the Editor. We positively encourage the use of colour photographs of insects and their habitats but their inclusion must enhance the text or serve some other useful purpose. We encourage the use of colour in the interpretation of graphs, charts etc. All images must be sent as individual separate files; please send high resolution files – do not reduce file size for ease of e-mailing. Images embedded (pasted into) word processor files cannot be used.

All papers are subject to peer-review and may be returned for changes prior to acceptance. Shorter communications and Notes are normally reviewed by the Editor but may also be sent for external review before acceptance; to reduce both cost and delay required changes to these are usually made by the Editor.

We now issue Pdf files in place of paper reprints. These are sent automatically to the first named author of Papers. Authors of Notes may request a Pdf of their contribution. Abstracts of Papers are published on our website.

Books for review must be sent to the Editor in the first instance. We do not normally accept unsolicited reviews by third parties.

### **The General Data Protection Regulation (GDPR)**

It is the policy of this journal to include the name(s) and contact details of authors, as supplied to the Editor, as a part of their published contributions. To comply with the new regulation authors will in future be asked to confirm that they are happy with this arrangement. The Editor will maintain a list of persons who have given such consent. Where the publication of an address is considered unacceptable, a "care of" address may be substituted by the author(s). Advertisements and other non scientific material submitted for publications are also subject to the GDPR and must adhere to the published AES policy.
