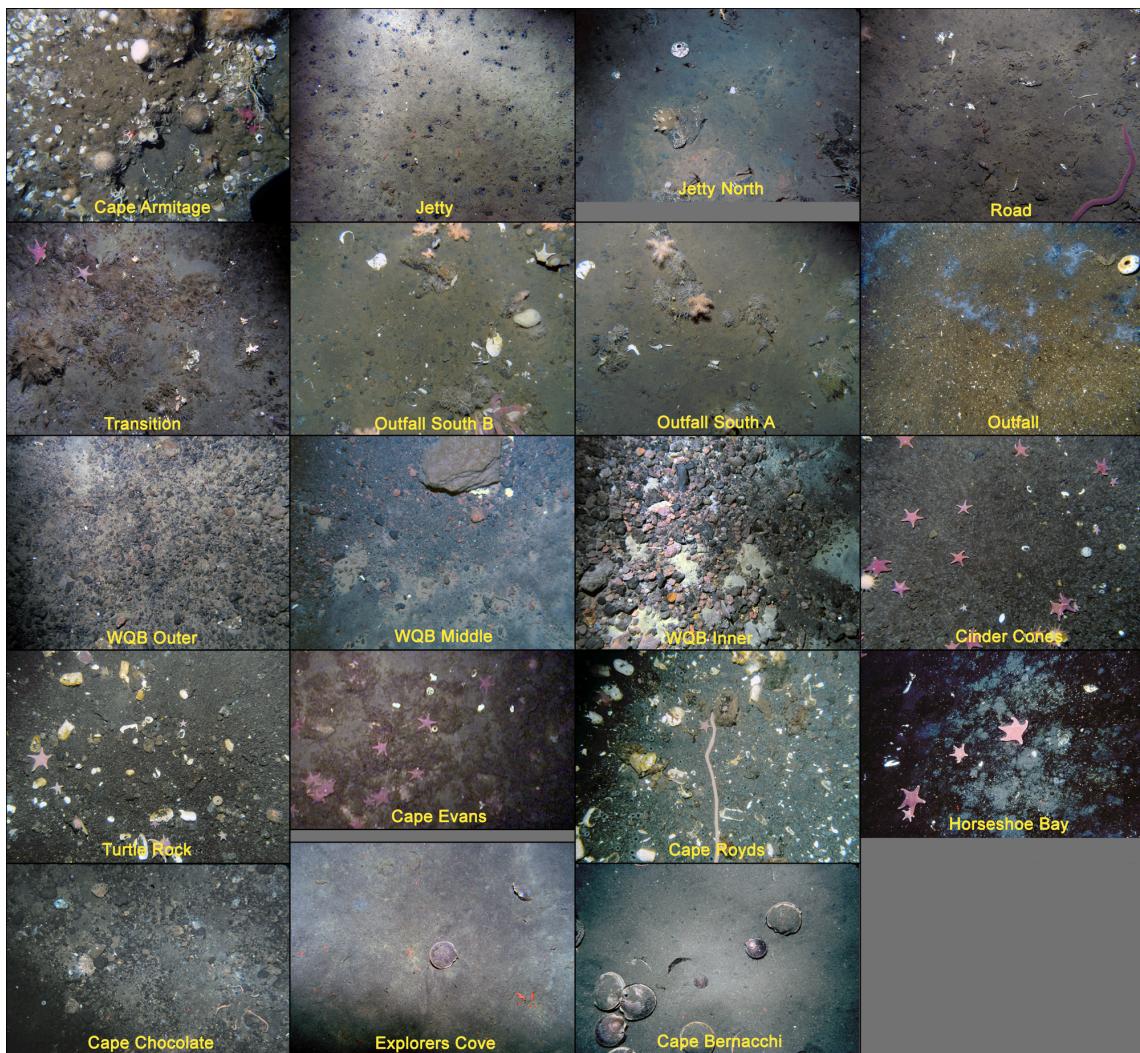

Figure S1. Representative example seafloor images from each site. Dates were: Cape Armitage 21 October 2008; Jetty 11 November 2014; Jetty North 26 October 2004; Road 10 November 2014; Transition 14 November 2014; Outfall South B 29 October 2008; Outfall South A 30 October 2008; Outfall 30 October 2008; WQB Outer 4 November 2012; WQB Middle 19 November 2007; WQB Inner 30 October 2012; Cinder Cones 18 November 2008; Turtle Rock 24 October 2012; Cape Evans 30 October 2002; Cape Royds 6 December 2007; Horseshoe Bay 1 December 2004; Cape Chocolate 28 October 2004; Explorers Cove 12 November 2008; Cape Bernacchi 15 November 2004.

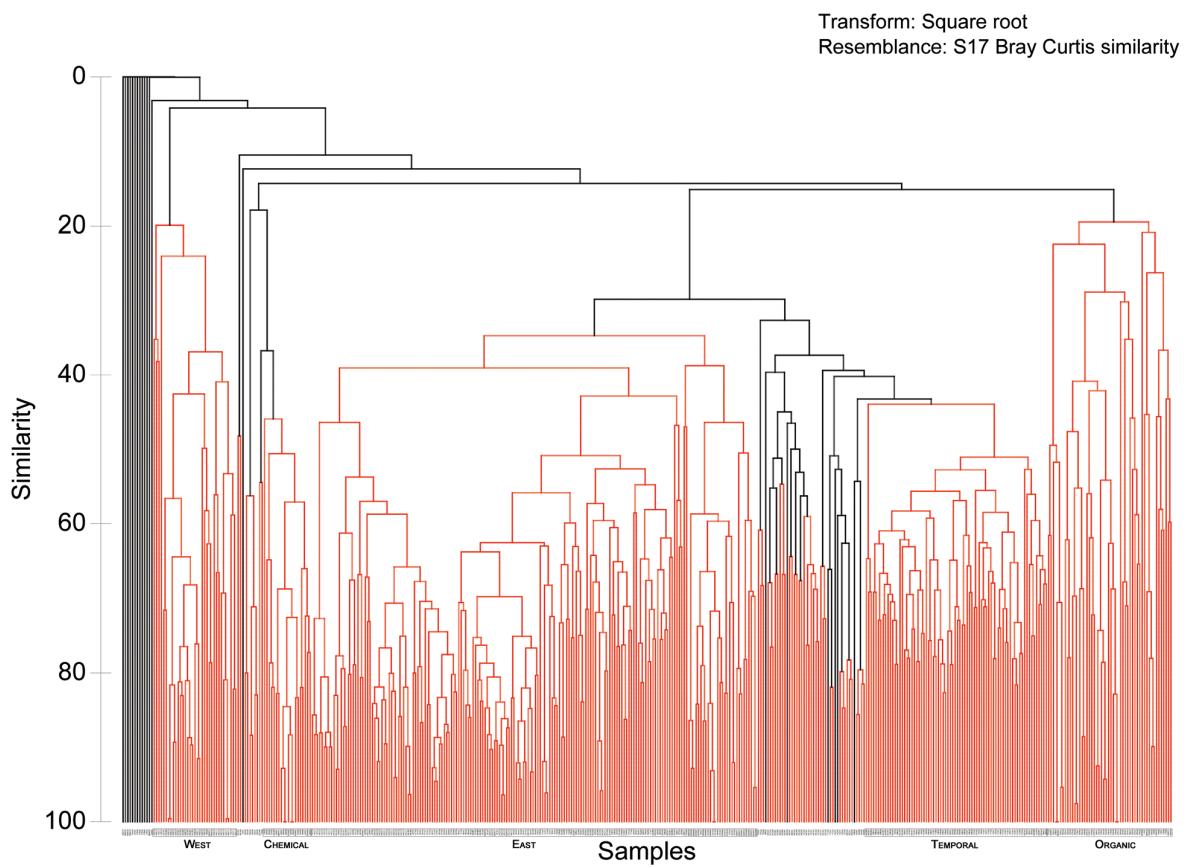

Figure S2. Dendrogram of SIMPROF results for all sites and times. Abbreviations are two digit years, followed by two character station designations as in Figure 2, followed by replicate number. Red dashed lines indicate groupings of indistinguishable samples; boxes delineate groupings West, Chemical, East, Temporal, and Organic.

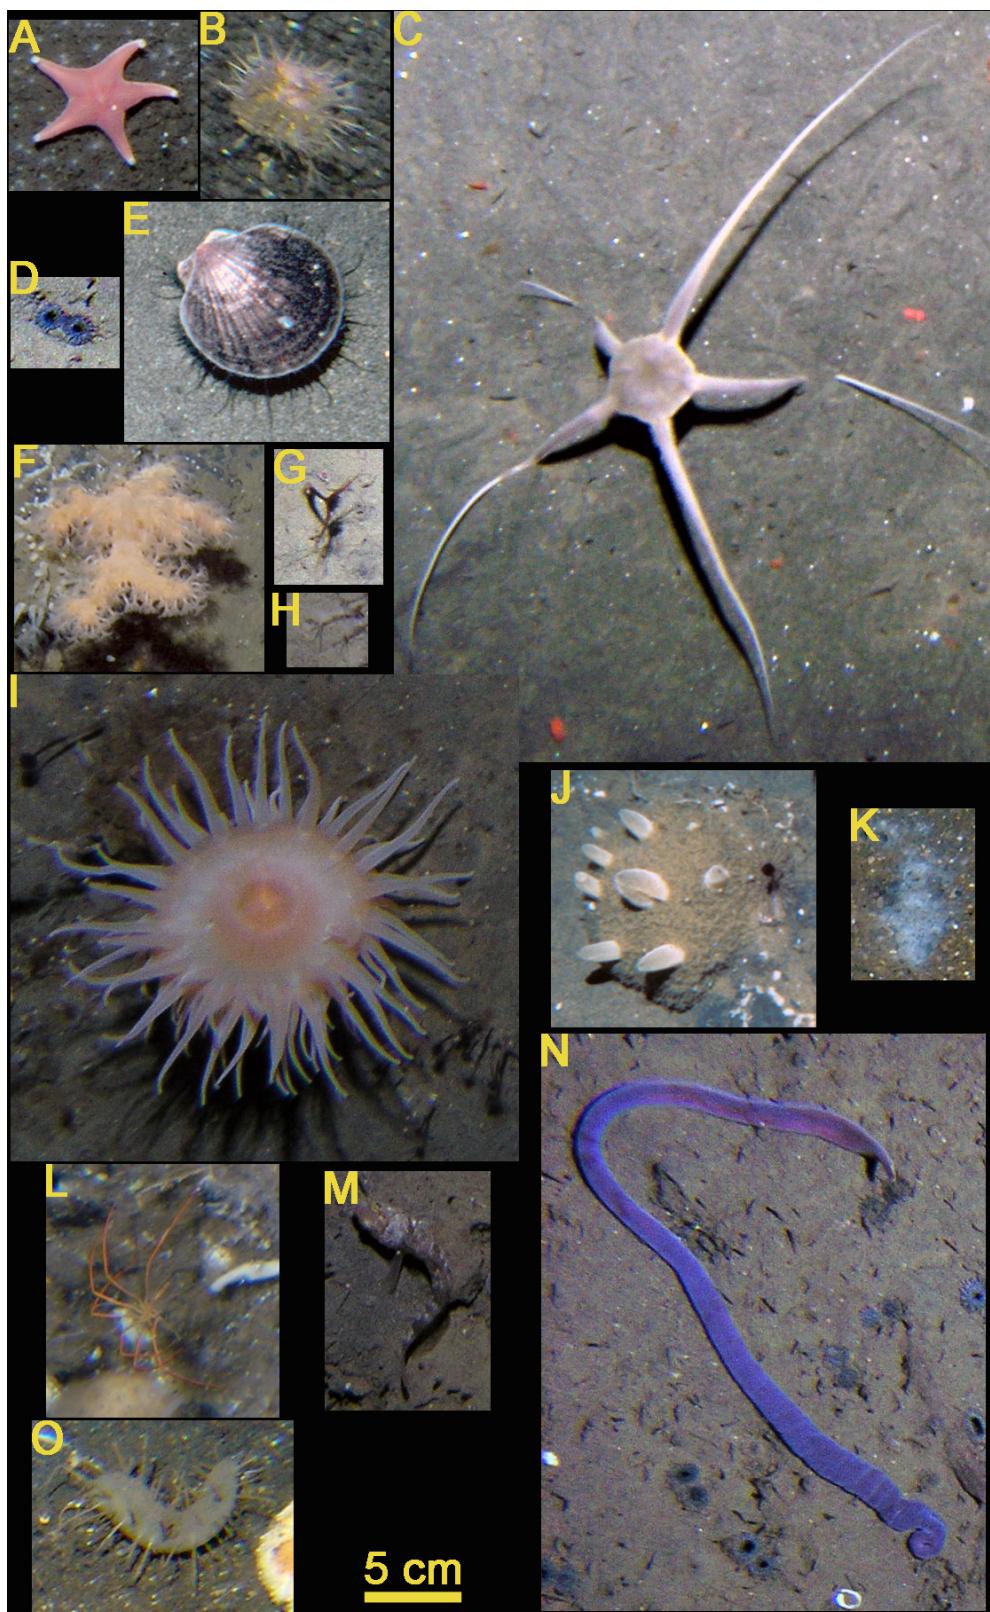

Figure S3. Representative example images of dominant taxa (per Table 3), plus *Beggiatoa*. A. *Odontaster validus*. B. *Sterechinus neumayeri*. C. *Ophionotus victoria*. D. *Laternula elliptica*. E. *Adamussium colbecki*. F. *Alcyonium antarcticum*. G. *Zyzzyzus parvula*. H. *Edwardsia* sp. I. *Isotealia antarctica*. J. *Sphaerotylus antarcticus*. K. *Beggiatoa*. L. *Pycnogonoidea*. M. *Trematomus bernacchii*. N. *Parborlasia corrugatus*. O. *Flabegraviera mundata*.

Table S1. PERMANOVA pairwise test results for all tests. Bold indicates significant differences at the  $p < 0.05$  level. Dashes indicate comparisons that could not be made because years were not sampled. Alternating white and grey shading differentiate sites.
