

Project profile

Name of the Project: Project for Strengthening Human Resources Development System of Co-medicals

Project Period: June 2010 to June 2015
CP organization: Ministry of Health, Cambodia

Supporting agency in Japan: National Center for Global Health and Medicine

Background:

Technical cooperation in the field of Co-medical education system was started as “Project for Human Resources Development for Co-Medicals”, from 2003 to 2010. The Project contributed to develop regulations on the “School Approval Criteria” and “Guidelines for Approved Schools”; and provided some reference books to the schools for co-medicals (Nurse, Laboratory Technician, Physiotherapy and Radiology) and short refresher courses for school teachers in Cambodia. However, some issues still remain, i.e. lack of systematic mechanism for capacity building of teaching staff, insufficient regulations for controlling the quality of health professionals, and difficulties in harmonization and alignment among partners pre-service and in-service training needs. Based on the lessons learned from the previous Project, a new Project named “Project for Human Resources Development System of Co-medicals” was launched as taking position of phase 2 of the previous Project de-

scribed above. The newly started project has two main pillars with the focus on nursing profession. The first pillar is focusing on developing a training system for existing and new teachers. Another pillar is supporting to develop a regulatory framework for nursing professionals.

The Project office locates at the Department of Human Resource Development, MOH, Cambodia and activities were started in June 2010.

Overall Goal

Quality Co-medicals are produced through the human resources development system.

Project Purpose

The educational basis for quality co-medicals (mainly nursing/midwifery human resources) is improved by enhancement of Department of Human Resources Development (HRDD) management capacity.
