Illinois Property Tax Statistics Order Form 202

Introduction

This book details equalized assessed valuation (EAV), tax rates, extensions, collections, Property Tax Extension Limitation Law (PTELL) dollar reductions, and other information, either statewide or by county. The figures reported are for the 2000 tax year, taxes payable in 2001, unless specified otherwise. Data submitted to the department by county clerks and treasurers are the primary source for all of the tables. The department has published the statistics book annually since 1963.

The property tax is based on the value of real property owned. These taxes help finance the services provided by local governments, with the largest share going to school districts.

Generally, the property tax cycle is a two-year cycle. The tax year is the year of assessment. During the first year, property is assigned a value that reflects its value as of January 1 of that year. (For farm land and farm buildings, a certification and review procedure is initiated more than nine months before the assessment process begins.) During the second year, the tax bills are calculated and mailed and payments are distributed to local taxing districts.

Property taxes are collected in two installments, generally in June and September. In Cook County, the first installment is due March 1, and the second, normally about August 1. The tax bills for 2000 assessments were mailed in 2001.

In most of Illinois, real property is reviewed and reassessed every four years. Between these general assessments, any property whose condition has significantly changed or that is incorrectly assessed is subject to reassessment. In “township” counties, the township is the assessment unit. In Cook County, assessments are done at the county level. In “commission” counties, there is no township government; property assessment is performed at the county level. The last general assessment was in 2002 for commission counties, and in 1999 for township counties, except the counties that are divided into assessment districts.

A county board may, by resolution, divide the county into four assessment districts. In these counties, one district is reassessed each year on a rotating basis. In 2000, counties divided into four assessment districts included Christian, Clark, Crawford, Edgar, Effingham, Jo Daviess, Lake, Madison, Massac, Menard, Monroe, Pulaski, and Tazewell. Cook County is divided into 3 assessment districts, each of which is reassessed every 3 years.

Farmland is revalued every year.

After boards of review complete their adjustments and finalize assessments, the department certifies an equalization factor to the county, and taxes are extended by the county clerk. Tax rates are computed by dividing the levy for each fund in a particular taxing district by the EAV of the district. If the computed rate is higher than the applicable maximum tax rate limit, then the maximum statutory rate is applied. The rates may be further reduced in districts affected by the PTELL.

Definitions

Assessment

The value placed on property for tax purposes and the basis for determining what portion of the overall tax burden each property owner will bear. Assessment may also be referred to as “valuation” or “assessed value”. An assessment involves identifying the real property within a jurisdiction and placing a value for it on the tax rolls.

Chief County Assessment Officer (CCAO)

The individual appointed by a county board, or elected in a county, to supervise township and multi-township assessors (who complete original assessments) and to review their work. In commission counties, the chief county assessment officer makes the original assessment.

In most counties the title of the chief county assessment officer is “supervisor of assessments.” In Cook and St. Clair counties, it is “county assessor.” The supervisor of assessments has the power to revise and equalize assessments and is the clerk of the board of review.

Collar counties

The five suburban counties of DuPage, Kane, Lake, McHenry, and Will, that are contiguous to Cook County.

Collections

The net amount of money received from property taxes and distributed to taxing districts, after removing charges against collections, such as delinquent taxes and certificates of error.

Effective tax rate

The ratio of taxes billed to the market value, generally expressed as a percentage.

Equalization

The application of a uniform or blanket percentage increase or decrease to assessed values of various areas or classes of property to bring assessment levels, on average, to a uniform level of the market value.

Equalization factor (multiplier)

The factor that must be applied to local assessments to bring about the percentage increase or decrease that will result in an equalized assessed value equal to one-third of the market value of taxable property in a jurisdiction (other than farm acreage, farm buildings, and coal rights). **Note:** Intra-county factors may be used by a county to bring all property to a uniform level. Factors are also referred to as multipliers.

Equalized assessed value (EAV)

The assessed value multiplied by the state-certified equalization factor; the result is the value from which the tax rate is calculated after deducting homestead exemptions, if applicable. For farm acreage, farm buildings, and coal rights, the final assessed value is the equalized assessed value. Also, tax bills are calculated by multiplying the equalized assessed value by the tax rate.

Exemption

The removal of the assessed value or a portion of the assessed value from the tax base. There are two types of exemptions: homestead and non-homestead exemptions. An exemption may only be for a portion of the EAV, such as a homestead exemption, or for the complete amount of the EAV, such as a church building used exclusively for religious purposes.

Extension

1) The process in which the county clerk determines the tax rate needed to raise the revenue (levy) certified by each taxing district in the county; 2) The actual dollar amount billed to property owners in a taxing district. The sum may differ from the levy due to the tax rate limits or other factors.

Levy

The amount of money a taxing body certifies to be raised from the property tax. The governing board of each taxing district determines the total amount of money it needs to operate during the coming year and how much of that sum must be raised from property taxes. Each taxing district adopts a property tax levy ordinance, or resolution, which is filed with the county clerk.

Tax rate

The amount of tax due stated in terms of a percentage of the tax base. Example: $6.81 per $100 of equalized assessed valuation (equal to 6.81%). This percentage is derived by dividing the levy for a fund by the EAV for the taxing district. Some funds have a maximum statutory tax rate limit that may not be exceeded. The sum of the fund rates equals the total district rate.

Tax year

This term refers to the year of assessment. Tax year 2000 refers to assessments based on property values as of January 1, 2000; 2000 taxes were payable in calendar year 2001. Unless otherwise specified, any year reported in this book refers to the tax year.

The Department of Revenue's Role

Although property tax is a local tax, the department has the statutory duty and responsibility to direct and supervise the local assessment process. The department's Local Government Services Bureau is involved with many aspects of the local administration of property tax. The department provides technical assistance, maintains taxing district maps, approves non-homestead exemptions, equalizes assessments between counties, administers the personal property replacement tax, and assesses certain types of property. In addition, the department publishes appraisal and assessment manuals and conducts training programs for assessors and board of review members.

Approval of exemptions

The department must approve non-homestead exemption applications forwarded by county boards of review, who can only make a recommendation for disposition.

Equalization

The department equalizes the average level of assessment among all counties in the state. Assessment levels must be uniform to ensure

- equal distribution of the tax burden among taxpayers;
- fair distribution of state grants-in-aid for education, highways, and public assistance (assessed valuation is a component in the formulas used to calculate these distributions); and
- that tax rate and bonded indebtedness limitations are applied to local government taxing bodies on an equal basis.

The department's annual sales ratio studies provide the foundation for inter-county equalization by comparing assessed values and sales prices. The equalization factors, annually certified to each county, are used to adjust assessments to bring county assessment levels to the statutory standard level. Taxes are then extended on each parcel's EAV.

Farmland

Farms have been assessed according to "agricultural economic value," the ability of the farm to produce income, since 1981. A tract of land must have been used for agricultural purposes for the two preceding years to be eligible for assessment as a farm. Farm buildings are assessed at one-third of their respective contributions to the farm's productivity. Farm homesites and dwellings are assessed at one-third of the market value.

Illinois Personal Property Tax Replacement Income Tax

The 1970 Illinois Constitution directed the legislature to abolish personal property taxes and replace the revenue lost by local governments and school districts. To replace the revenue from the personal property tax, the General Assembly enacted state replacement taxes on income and invested capital. Funds collected from these taxes are deposited into the Personal Property Replacement Tax Fund and distributed to taxing districts. The department certifies each taxing district's share of the replacement revenues. Approximately 6,600 taxing districts receive payments eight times per year.

State-assessed property

The department assesses railroad operating property and pollution-control facilities. The assessments are then certified to the county officials, who include these assessments in the local tax base. Taxes on these properties are collected and spent locally.

Taxing district maps

The department uses the Geographic Information System (GIS), to prepare and maintain taxing district maps for all counties in the state. These maps outline boundaries of counties, political townships, municipalities, and taxing districts, such as park districts, school districts, sanitary districts, community college districts and fire protection districts. The maps also detail major rivers, lakes, and railroads.

General information

For a comprehensive guide to the property tax system, see PTAX-1004, Illinois Property Tax System. This free publication may be obtained visiting our web site at www.ILtax.com, calling 217 782-3254, or by writing to “Illinois Department of Revenue, Local Government Services Bureau, P.O. Box 19033, Springfield, Illinois 62702-9033.”

Specific property tax information for a district or group of districts is available. Please send your request to the address and telephone number listed above.

To receive the next edition of the Illinois Property Tax Statistics, complete and return the order form found on the last page of this book. This document will also be available on the department’s web site at www.ILtax.com.

Tax Relief and Incentive Programs

The relief and incentive programs described in this section reflect the provisions of current law through the 92nd General Assembly. Statistics reflect the law in effect for tax year 2000.

Non-homestead exemptions

Some real property is exempt from paying property tax. The Illinois Constitution allows exemptions for property that belongs to the State of Illinois, units of local government and school districts, property that is used *exclusively* for agricultural and horticultural societies, and for school, religious, cemetery, and charitable purposes. Exemption of federal government properties is required by federal law.

The property owner must file a non-homestead exemption application with the county board of review. The county board of review will review the application and then forward it, along with a recommendation, to the Illinois Department of Revenue for a final determination. If approved, certain property owners may be required to file an annual affidavit or certificate of exempt status with the chief county assessment officer on or before January 31 of each year.

Homestead exemptions

The Illinois Constitution also allows homestead exemptions for certain residential property. The property generally must be occupied as a principle residence on January 1 of the tax year. The homestead exemptions available for tax year 2000 are described below.

General Homestead Exemption. This exemption is available to residential property that is occupied as the principal dwelling place by the owner or a lessee with an ownership interest. The amount of exemption is the increase in the current year's EAV, above the 1977 EAV, up to a maximum of $3,500. The exemption for Cook County is limited to a maximum of $4,500.

Homestead Improvement Exemption. This exemption is limited to the fair cash value that was added to the homestead property by any new improvement, up to an annual maximum of $45,000. The exemption continues for up to four years from the date the improvement is completed and occupied.

Senior Citizens Homestead Exemption. This is a $2,000 reduction in the EAV of real property that a person 65 years of age or over is obligated to pay taxes on and, owns and occupies, or leases and occupies as a residence. The exemption is $2,500 in Cook County. This exemption is in addition to the General Homestead Exemption.

Senior Citizens Assessment Freeze Homestead Exemption. This exemption allows qualified seniors, who are 65 years of age or older, and have a household income of $40,000 or less, ($35,000 prior to January 1, 1999) to elect to maintain the EAVs of their homes at the base year values and prevent any increase due to inflation.

Disabled Veterans' Exemption. This exempts up to $58,000 ($50,000 prior to January 1, 2000) of the assessed value for certain types of housing owned and used by disabled veterans. The Illinois Department of Veterans' Affairs determines the eligibility for this exemption, which must be reestablished annually.

Incentives

Abatements — General authority abatements are provided for under 35 ILCS 200/18-165. A local taxing district may instruct the county clerk to abate any portion of its taxes for qualifying types of property such as commercial and industrial expansion, horse racing, auto racing, academic or research institutes, housing for older persons, historical societies, recreational facilities, or relocated corporate headquarters. The abatement amount and its duration depends on the type of property for which the taxes are being abated.

Note: The Property Tax Code provides for several other abatements for qualifying properties.

Enterprise Zone Abatements — The Enterprise Zone Act authorizes the Department of Commerce and Economic Opportunity to certify a limited number of enterprise zones. State income, sales, and property tax incentives are all associated with the zones to encourage business investment. Each taxing district has the authority to abate property tax new

improvements or renovation or rehabilitation of existing improvements for any class of property in the Enterprise Zone, as provided in 35 ILCS 200/18-170. The abatement is limited to the term of the zone.

Preferential assessments

Certain properties may receive a reduced, or preferential, assessment if qualifications specific to that type of preferential assessment are met. Some types of preferential assessments include those for

- property used as open space;
- property heated or cooled by solar energy equipment;
- residential property within certain historic designations for which a certificate of rehabilitation has been given by the Historic Preservation Agency;
- property that is newly subdivided and platted land in transition from vacant land to residential, commercial, or industrial use (outside Cook County);
- a single-family dwelling, townhome, or condominium unit that is used as a model home (*i.e.,* it is not used as a dwelling, but as a display or demonstration model home for prospective buyers); and
- property owned by qualified veterans and fraternal organizations.

Truth-in-Taxation Act

This act, provided for by 35 ILCS 200/18-55 *et seq.*, requires any taxing district levying more than 105 percent of its prior year extension to publish a notice in the newspaper and hold a public hearing concerning the proposed levy increase. If the provisions of the act are not met, the county clerk may not extend an amount greater than 105 percent of the prior year's extension.

Tax increment financing

Tax increment financing (TIF) is a financing tool used to redevelop blighted areas and create economic recovery. The six types of property tax TIFs are explained below.

Tax Increment Allocation Redevelopment Act. This act, provided for by 65 ILCS 5/11-74.4-1 *et seq.*, allows Illinois municipalities to designate some areas, *i.e.*, residential neighborhoods, commercial business districts, or industrial areas, as redevelopment areas and create a TIF district. The tax revenue, derived from the assessment increases in the project area, is used to pay for the public investments made in the TIF area and certain costs to the developer. The TIF district is dissolved once all redevelopment costs are paid or at the end of 23 years, whichever comes first, although some have been extended to 35 years.

Economic Development Area Tax Increment Allocation Act. This act, provided for by 20 ILCS 620/1 *et seq.*, encourages commerce and industry on sites of at least 320 acres. The guidelines include creating and maintaining no less than 2,000 jobs, and the private investment of at least $100 million. These areas are certified by the Department of Commerce and Community Affairs and are limited in number.

County Economic Development Project Area Property Tax Allocation Act. This act, provided for by 55 ILCS 85/1 *et seq.*, allows for a rebate to any developer or nongovernment person of taxes generated from the increase in the tax base of the project area, if the TIF area is located in an enterprise zone. The act applies only to counties that are adjacent to the Mississippi River, with 200,000 to 300,000 inhabitants. Other guidelines include creating or retaining no less than 1,000 jobs, and the private investment of at least $50 million. These are also certified by the Department of Commerce and Community Affairs.

County Economic Development Project Area Tax Increment Allocation Act. This act, provided for by 55 ILCS 90/1 *et seq.*, limits the number of areas that could be created to the first 20 months of its inception. The act allows for a rebate to any developer or nongovernment

person of taxes generated from the increase in the tax base of the project area, if the TIF is located in an enterprise zone. The area must cover an aggregate of 5,000 acres and the county unemployment rate cannot be less than 12 percent. The guidelines also include creating or retaining 1,000 jobs, and the private investment of at least $100 million.

Industrial Jobs Recovery Law. This law, provided for by 65 ILCS 5/11-74.6-1 *et seq.*, allows municipalities that meet certain site conditions, *i.e.,* unemployment, declining EAV, vacant industrial buildings, or environmental contamination, to create TIF districts. If no project is initiated within five years, the municipality may adopt an ordinance repealing this designation.

Economic Development Project Area Tax Increment Allocation Act of 1995. This act, provided for by 65 ILCS 110/1 *et seq.*, allows municipalities to establish tax increment financing redevelopment areas for all or part of closed military installations located within their boundaries.

Senior Citizens Real Estate Tax Deferral Act

This act, provided for by 320 ILCS 30/1 *et seq.*, establishes a program for people who are 65 years of age or older, and who meet other prescribed income criteria, to defer all or part of their real estate taxes or special assessments. It is administered by the county treasurers' offices. Participants must reapply for each year they wish to defer their real estate taxes or special assessments.

Tax year	Participants	Amounts deferred and lien fees	Tax year	Participants	Amounts deferred and lien fees
2000	1,776	3,617,116	1992	527	978,495
1999	1,749	3,630,671	1991	441	794,704
1998	1,771	3,712,352	1990	328	539,534
1997	1,784	3,716,708	1989	295	432,605
1996	1,624	3,439,766	1988	232	289,154
1995	1,575	3,253,077	1987	223	240,906
1994	1,296	2,701,508	1986	178	187,729
1993	913	1,838,472	1985	153	150,364

Circuit Breaker Property Tax Relief Program

The "Circuit Breaker" property tax relief program, provided for by 320 ILCS 25/1 *et seq.*, was initiated in 1972 by the Senior Citizens and Disabled Persons Property Tax Relief and Pharmaceutical Assistance Act. For more information about this program, visit our web site at www.ILtax.com.

Property Tax Extension Limitation Law (PTELL)

Limitation history	
1991	5.0 percent*
1992	3.1 percent
1993	2.9 percent
1994	2.7 percent**
1995	2.7 percent
1996	2.5 percent
1997	3.3 percent
1998	1.7 percent
1999	1.6 percent
2000	2.7 percent
2001	3.4 percent

* The change in CPI was 6.1 percent.

** For Cook County, the limitation for 1994 was 5.0 percent as specified by the "One-Year Property Tax Extension Limitation Law." See Section 18-246 *et seq.* of the Property Tax Code.

The Property Tax Extension Limitation Law (PTELL), was enacted to limit the annual increases in property tax extensions (total taxes billed) for non-home rule taxing districts. Increases in property tax extensions are limited to the lesser of five percent or the increase in the consumer price index (CPI), for the year preceding the levy year. The CPI increase for 1999 was 1.6%. The limitation for a taxing body can be increased with voter approval.

Although the law is commonly referred to as "tax caps," use of this phrase can be misleading. The PTELL does not "cap" either individual property tax bills or individual property assessments. Individual tax bills may still increase or decrease. PTELL only limits increases in taxing districts' extensions. The PTELL allows a taxing district to receive a limited inflationary increase in tax extensions on existing property, plus an additional amount for new construction, and voter-approved rate increases.

The limitation slows the growth of revenues to taxing districts when property values and assessments are increasing faster than the rate of inflation. In addition, local taxing districts are able to capture the increased EAV that is the result of new construction. As a whole, property owners have some protection from tax bills that increase only because the market value of their property is rising rapidly.

Payments for bonds issued without voter approval are subject to strict limitations.

If a taxing district determines that it needs more money than is allowed under the PTELL, it can ask the voters to approve an increase.

The PTELL was originally passed in 1991 and affected taxing districts in the "collar counties" (*i.e.,* DuPage, Kane, Lake, McHenry, and Will). Cook County taxing districts were added next. Beginning in 1996, taxing districts in all other counties in Illinois may be affected if county referenda are approved by the voters. Only non-home rule taxing districts are subject to the PTELL.

The following districts are subject to the PTELL:

- Non-home rule taxing districts with a majority of their 1990 EAV in DuPage, Kane, Lake, McHenry, or Will counties;
- Non-home rule taxing districts with a majority of their 1994 EAV in Cook and the collar counties that were not subject to the PTELL before 1995;
- Non-home rule taxing districts in other counties if every county in which the district is located has held a referendum asking if voters want the PTELL to be applicable, and if the majority of the EAV of the district is in counties where voters have approved the referendum;
- Non-home rule taxing districts with part of their EAV in Cook or the collar counties if every other county in which the district is located has held a referendum asking if voters want the PTELL to be applicable, and if the majority of the EAV in the district is in counties where voters have approved the referendum and in Cook and the collar counties.

Table A illustrates the effect of PTELL.

Table A

Note: This information was obtained from the county clerks' offices.

Cook County Real Property Classifications

Cook County classifies real property for the purpose of taxation. In 1974, the Cook County Board passed an ordinance establishing assessment classes and the percentage of market value at which each class is to be assessed. This ordinance, amended previously, was again amended and approved on December 6, 1994. The newest amendment created 11 classes, previously 9. These classes are assessed at the following percentages of market value. For more information, contact the Cook County Clerk's office or the Cook County Board of Commissioners.

Class 1	22%	**Class 2**	16%	**Class 3**	33%	**Class 4**	30%
Class 5a	38%	**Class 5b**	36%	**Class 6b**	16%	**Class 7a**	16%
Class 7b	16%	**Class 8**	16%	**Class 9**	16%		

Measures of Assessment Uniformity

The tables on the following two pages present the two measures of assessment uniformity: the coefficient of dispersion (COD) and the coefficient of concentration (COC), and report the median level of assessment. All figures on these two pages are compiled from the annual sales ratio studies the department prepares, comparing sale price to assessed value. The median levels and the equalization factors for 2000 are presented on Page 23.

By law, the median level of assessment in a county must be 33 1/3 percent; that is, property must be assessed at 1/3 of its market value. When local assessing officials fail to come within 1 percent of the statutory level, the department issues an equalization factor, or multiplier, that brings the median level to the statutory requirement.

In Cook County, assessment levels for different types of property are set by the county classification ordinance. The department's equalization factor brings the overall assessment of property in Cook County to 1/3 of market value, although no class is at this level.

A 33 1/3 percent median level of assessment does not guarantee fairness. For example, if half the property in a county is assessed at 16 2/3 percent and half is assessed at 50 percent, the median level of assessment would be 33 1/3 percent. However, on properties of equal market value, the under-assessed properties would be paying one-third the taxes of the over-assessed properties.

The COD is a statistical measure of how much the average assessment deviates from the median level, ignoring whether the parcel is under or over-assessed. The COD is expressed as a percent of the median level. In the example above, the average deviation is 16 2/3 percent for both the under and over-assessed properties and the median level is 33 1/3 percent, making the COD 50 percent (16 2/3 average deviation divided by the 33 1/3 percent median level).

The more uniform the tax base, the easier it is to attain a low COD. A lower COD is easier to attain in an area of primarily residential property than in one that contains a mix of residential, commercial, and industrial property.

The lower the COD, the more uniform the assessment and the apportionment of the property tax burden. The department pays a bonus to assessors in counties with 50,000 or more inhabitants, but fewer than 3 million, whose CODs are 15 percent or less, and whose median level of assessment is between 31 1/3 and 35 1/3 percent of market value. In counties with fewer than 50,000 inhabitants, the COD must be no greater than 30 percent (since 1999). In addition, the median level of assessment must be between 31 1/3 and 35 1/3 percent of market value.

The second measure of assessment uniformity, the COC, measures the percentage of assessments that fall within 10 percent of the median level of assessment. For example, in a taxing district that assessed at the 33 1/3 percent median level, the COC would measure the percentage of assessments that fall between 30 percent and 36 2/3 percent (*i.e.,* within 10 percent of the median level).

A higher COC indicates a higher degree of assessment uniformity. Unlike the COD, the COC is not elevated by a small number of sales ratios that are far from the average. Higher COCs are more easily obtained in areas that contain similar types of property.

As the table indicates, counties with low CODs tend to have high COCs.

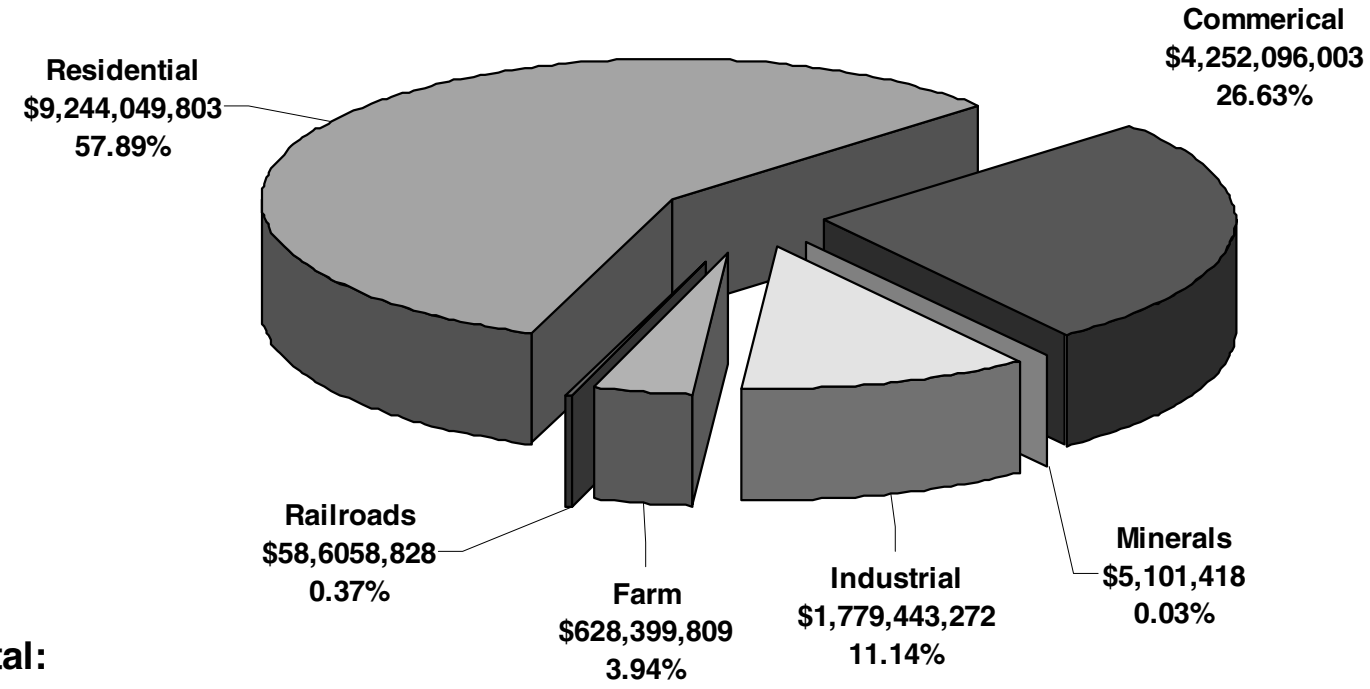
Note: The equalization factor for 2000 is based on a 3-year (1997, 1998, and 1999) average assessment level, adjusted to reflect any reassessment through 1999.

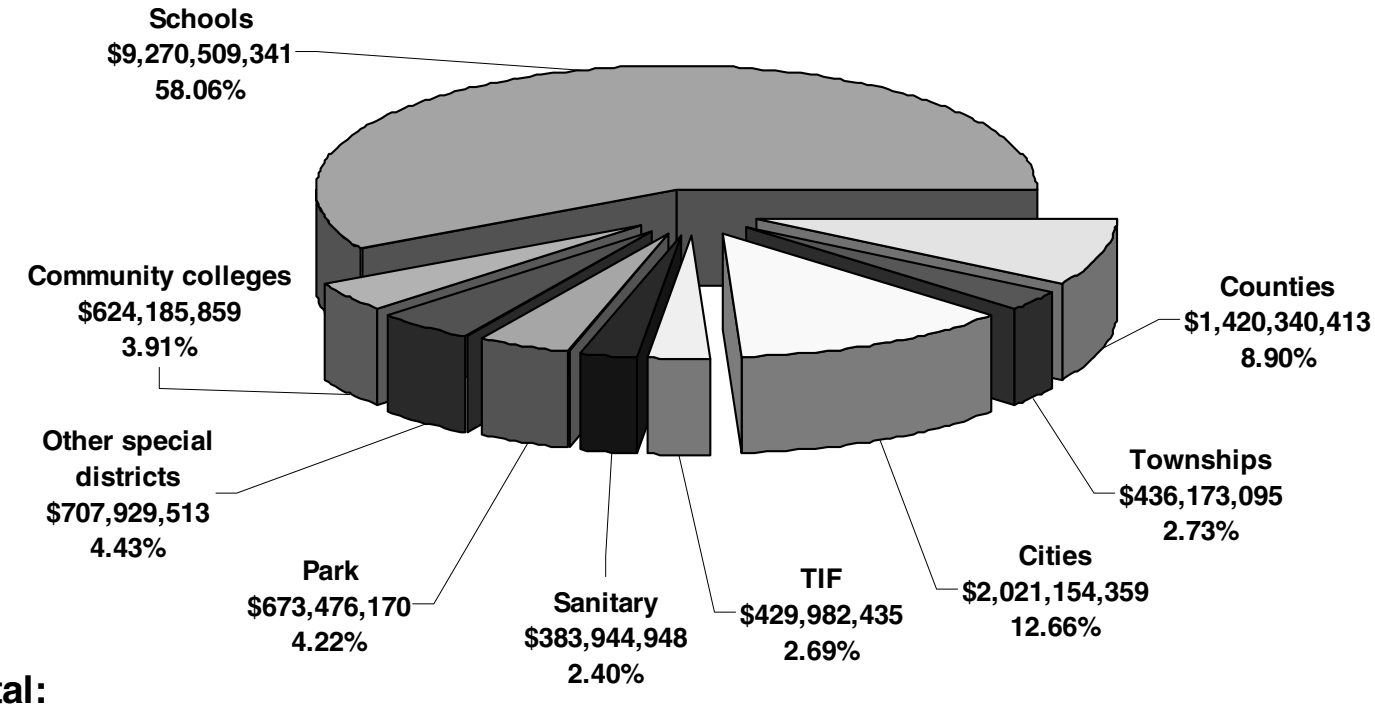
(1 A final equalization factor of 1.0000 is issued to any county whose actual level of assessment is within 1 percent of the required statutory level under 35 ILCS 200/17-25.

Extensions by Class



Total:
$15,967,696,133

Extensions by Type of District



Total:
$15,967,696,133

Note: TIF distributions and enterprise zone abatements have not been removed.

Comparison Tables

Each of the following tables either compares the current year to an historic year or years, or analyzes the current year by class or type of taxing district. A brief explanation of each table follows.

Table 1

This table illustrates, by county, changes in the tax base, or EAV, and the change in taxes, or extensions, between 1999 and 2000.

Table 2

This table reports a 23-year history, 1978 to 2000, of the statewide EAV, and the total property taxes extended. It also shows the annual change for the past 23 years.

Table 3

This table shows property taxes extended by the various types of districts for 1999 and 2000.

Table 4

This table illustrates a ten-year history of the number of taxing districts by type, from 1991 to 2000. Each taxing district is placed in its home county and counted once. The township category combines the township road and bridge district with the township, and counts each combination as one township. The road district category contains the road districts in commission counties.

Table 5

This table shows the number and type of taxing districts in Illinois, by county. The total home county taxing districts category consists of the township or road district, municipalities, total schools and colleges, total special districts, and the county itself. Each taxing district is placed in its home county, by type, and is counted once, even though it may overlap into several counties. A township, and a township road and bridge district, are counted as one district.

Table 6

This table compares the property taxes extended for schools to the total statewide property tax extensions, from 1990 to 2000. The table illustrates an 11-year history of total tax extensions and extensions for schools, including community colleges.

Table 7

This table illustrates EAV, before exemptions, by class of property, for both local and state-assessed property.

Table 1

Comparison of EAV and Taxes Extended, 1999 and 2000

County	Total EAV				Total Extensions			
	2000 Total EAV	1999 Total EAV	Amount of increase or decrease	% of increase or decrease	Total taxes extended 2000	Total taxes extended 1999	Amount of increase or decrease	% of increase or decrease
Statewide	204,178,019,641	192,993,890,240	11,184,129,401	5.80	15,967,696,133	15,191,472,335	776,223,798	5.11

Rate Tables

The next three tables are rate tables. The average tax rates shown in Tables 8 and 9 are computed by dividing the extensions by the EAV and converting to a percentage. A change in the rate can result either from changes in the EAV, changes in the extensions, or both. The aggregate tax rate in Table 10 is the sum of the individual taxing districts' rates. A brief explanation of each table is below.

Table 8

This table lists the average tax rate by county. For tax years 1999 and 2000, the average tax rate is also given by class of property. The total rate is given for the three preceding years: 1998, 1997, and 1996.

Table 9

This table lists the average tax rates for taxing districts with a corporate or education fund. In addition, two districts are listed that have a road and bridge fund or assessing fund. The rates are calculated by dividing the total extensions for each type of district, by the total EAV for the same type of district.

Table 10

This table reports the principal aggregate tax rate, sometimes referred to as a combination rate, for county seats and cities with populations greater than 10,000. This rate is the sum, or combination of the tax rates, of each taxing district within a specific geographical area. The rates are those that the majority of people living in a specific geographical area would pay. However, every possible rate may not be listed.

Effective tax rates and ranks are also shown. The effective tax rate shows taxes paid, expressed as a percent of the actual market value of the property, as opposed to the nominal rate, which is the rate applied to the taxable EAV. The effective tax rate used is for an owner-occupied residential property of $100,000 market value.

To compute the effective rate, the market value of the property is multiplied by the median level of assessment for the jurisdiction. The median level for the township is from the 2000 assessment/sales ratio study, as adjusted for any 2000 reassessment. If there are insufficient sales for a separate study for the township, the median level for the "All Other" category of the sales ratio study for that county is used. In commission counties, the urban weighted average is used. This result is then multiplied by the county multiplier for 2000 to determine the EAV. The general homestead exemption maximum of $3,500 ($4,500 in Cook County), is then subtracted. This remainder is then multiplied by the aggregate tax rate from Table 10. The final number is then divided by the market value of the property and the result is expressed as a percent.

Table 8

Average Tax Rates, 1996 — 2000

Extension Tables

The next five tables are categorized as extension tables. A brief explanation of each table is below.

Table 11

This table shows extensions by class of property. The residential extension includes residential lots, houses, condominiums, and apartment buildings of six units or less. The farm extensions include farmland, farm buildings, and farm homesites and dwellings.

Table 12

This table consists of separate tables that summarize the current extensions for each type of taxing district and fund, such as townships and road districts, park districts, and elementary school districts.

Table 13

This table lists the percentage distribution of the total property tax extended for each type of taxing district.

Table 14

This table reports the special service areas by county.

Table 14A Graph

This graph reports the growth in TIF districts from 1980 through 1999. In addition, the EAV for the TIF area, the total TIF extension, and the percentage increase of the TIF extension are shown for each year.

Table 14A

This table reports all the tax increment financing (TIF) districts in Illinois. The EAV in the TIF is the growth in tax base, and the EAV increment shown is generally calculated on an aggregate basis. The total taxes extended are the tax increment funds generated to finance the public improvements associated with the TIF area. The law requires that the taxes be distributed to the TIF on a parcel-by-parcel basis.

Table 11

Comparison of Current Taxes Extended by Class of Property

County	Total	Residential	%	Farm	%	Commercial	%	Industrial	%	Railroads	%	Minerals	%

3) Special Service Areas within the district, county did not report details.

Assessed Value Tables

The next four tables are categorized as assessed value tables. They present a picture of the composition of the tax base for each county in Illinois, and the values after action by the CCAO, by boards of review, and by the state. A brief explanation of each table is below.

Table 15

This table compares the EAV, minus exemptions, by class of property, for each county.

Table 16

This table details locally-assessed value at various stages in the assessment cycle: after the chief county assessment officer (CCAO) action, after board of review action, and as equalized by the state multiplier and reduced by exemptions. It also reports values for state-assessed railroad property and pollution-control facilities. The total equalized valuation, which includes tax increment financing distributions and enterprise zone abatements, is shown in the last column.

Table 17

This table reports the EAV, before exemptions, of locally assessed real estate and railroad property for each county, the Cook County assessment districts, and statewide totals.

Table 18

This table details local assessments by class, before state equalization, and before removing the exemptions. The assessed value is presented before and after board of review action.

Table 15

Comparison of Equalized Assessed Valuations by Class of Property

(Thousands of dollars, Exemptions have been removed)

Collection Tables

The next two tables are collection tables. They outline taxes collected as a percentage of taxes billed (extended) and the reasons for the differences. A brief explanation of the tables is below.

Table 19

This table details the amount of taxes extended by selected class of property. The amount extended is compared to the tax collected to obtain the collection rate shown.

Table 20

This table reports the charges against collections: protests and amounts withheld, delinquencies, certificates of error, and other charges. It then details the net collections available for distribution after these charges, plus the amount of omitted taxes. Effective December 12, 1997, no additional funds paid under protest can be withheld from distribution per Public Act 90-556.

Table 19

Comparison of Taxes Extended and Collected by Selected Classes of Property

Homestead Exemption Tables

The next three tables are categorized as homestead exemption tables. They illustrate the effect of tax exemptions on either the EAV or AV base. A brief explanation of the tables is below.

Table 21

This table illustrates the number of general homestead exemptions granted in each county and the reduction in the EAV as a result of those exemptions. The table shows a five-year history from 1996 to 2000.

Table 22

This table details the senior citizens' homestead exemption, the disabled veterans' exemption, and the homestead improvement exemption by showing the number of exemptions and either the EAV or AV reduction for each one in 2000.

Table 22A

This table reports the number of exemptions, the EAV reduction, and the average exemption amount for the Senior Citizens Assessment Freeze Homestead Exemption (SCAFHE) for the 2000 tax year. This exemption was first effective for the 1994 tax year.

Table 21

Number of General Homestead Exemptions and the EAV Reduction, 1996 — 2000

Replacement Tax Tables

The next two tables are replacement tax tables. They detail the distribution of the corporate personal property replacement tax money to local governments. A brief explanation of the tables is below.

Table 23

This table details a five-year history, 1997 through 2001, of the amount of personal property replacement tax allocations distributed to the eligible taxing districts in each county.

Table 24

This table shows the amount of corporate personal property replacement tax allocations distributed by the type of taxing district for the 2001 calendar year.

Table 23

Calendar Year Replacement Tax Allocations, 1997 — 2001

County	2001	2000	1999	1998	1997

Abatement Tables

The next two tables are categorized as abatement tables. They detail locally approved tax abatements. A brief explanation of the tables is below.

Table 25

This table lists the enterprise zones in each county and the abatements that were given in these zones.

Table 26

This table illustrates the general authority abatements under 35 ILCS 200/18-165.

Table 25

Enterprise Zones

County	Name of zone	Equalized assessed valuation	Total abatement for 2000	Abated extensions by type of district					Year certified
				Counties	Township/ road district	Cities	Special district	Schools/ colleges
