Abstract

Ampullariidae are freshwater snails predominantly distributed in humid tropical and sub-tropical habitats in Africa, South and Central America and Asia. This catalogue is concerned only with the non-fossil Old World species, the majority of which are placed in the genera *Pila* and *Lanistes*, with a few species in *Afropomus*, *Forbesopomus* and *Saulea*. *Pila* occurs in Africa and Asia, *Lanistes*, *Afropomus* and *Saulea* only in Africa and *Forbesopomus* only in Asia. New World taxa were catalogued in a previous publication. The taxonomy of the group is heavily based on shell morphology but the true number of valid taxa remains unknown, pending revisionary work. This catalogue provides the rigorous nomenclatural base for this future work by bringing together all the available and unavailable genus-group and species-group names that have been applied to Recent Asian and African ampullariids, indicating their current nomenclatural status (species, subspecies, synonyms, etc.). Fossil taxa are not included. The catalogue lists 21 published genus-group and 244 published species-group names of Old World ampullariids, excluding 25 names that are *incertae sedis* and cannot be definitively determined as Old or New World. Of these 265 Old World names, five genus-group and 104 species-group (including 30 infraspecific) names are currently valid. There are 16 genus-group synonyms, 118 species-group synonyms and four species-group homonyms that are not treated as junior synonyms. Also listed are five unavailable family-group, one unavailable genus-group and 18 unavailable species-group names, and a number of unpublished names from museum labels. The catalogue provides bibliographic details for all published names, locations of type material, details of type localities and geographic distributions as far as can be ascertained given the confused state of the taxonomy. The catalogue is a work of nomenclature; it is not a revisionary work of taxonomy. Additional details and corrections to the earlier catalogue of the apple snails of the Americas are provided. No new names are proposed. Seven apparently new combinations are introduced, all with the genus *Pila* Preston: *complicata* Reeve, *dira* Reeve, *major* Germain (described as a variety of *ovata* Olivier), *major* Germain (described as a variety of *speciosa* Philippi), *obvia* Mabilie, *pallens* Philippi, *turbinoides* Reeve.

Key words: freshwater snails, distributions, nomenclature, Old World, New World, type localities, type material

Introduction

Ampullariidae Gray are freshwater snails predominantly distributed in humid tropical and sub-tropical habitats in Africa, Asia and South and Central America. They include the largest of all freshwater snails (*Pomacea maculata* Perry can attain a shell height of >165 mm; Hayes *et al.* 2012) and frequently constitute a major portion of the native freshwater mollusc faunas of these regions.

Ampullariidae (junior synonym Pilidae Preston; Cowie 1997b; ICZN 1999a) are operculate snails and basal members of the Caenogastropoda. The family is in the superfamily Ampullarioidea within the informal group Architaenioglossa Haller (shown to be paraphyletic by Harasewych *et al.* 1998), which also includes the

Jeroen Goud, Bram van der Bijl and Robert Moolenbeek (RMNH), Ronald Janssen (SMF), Ira Richling (SMNS), Taehwan Lee (UMMZ), Matt Lowe and Richard Preece (UMZC), Robert Hershler and Ellen Strong (USNM), Pavel Kijashko (ZIN), Matthias Glaubrecht, Frank Köhler and Christine Zorn (ZMB), Martin Sørensen and Tom Schiøtte (ZMUC) and Enrico Schwabe (ZSM). I thank Philippe Bouchet and Neal Evenhuis for nomenclatural advice and discussion, and Thierry Backeljau, Ken Hayes, Alan Kabat, Yuri Kantor, Eike Neubert, Winston Ponder, Silvana Thiengo and Jackie van Goethem for additional discussion, in some cases extensive, help with literature and/or help with locating type material. Gene Coan and Frank Köhler reviewed the manuscript and Marta deMaintenon guided its publication. This work is part of a project funded in part by NSF grant DEB0949061.

References

All references have been seen by the author. Titles are cited verbatim, even if they include errors, which if noted are followed by “[sic]”. If an article lacks a title, a suitable title or “no title” is given in square brackets. If authorship of a work is inferred from sources external to the work, the author’s name is given in square brackets. The year of publication is given following the name(s) of the author(s). If a book published in parts over a range of years only bears the year of publication of the final part, the range is given with the year of the first part enclosed in square brackets. If a journal volume or issue appeared in a year after the year represented by the volume/issue, this earlier year is given in square brackets (e.g. “[for 1863]” after the volume/issue number of the journal. If a journal did not number volumes but only gave the year that the volume represented, the year is given in square brackets (e.g. “[for 1878]”) in place of a volume number. If sources external to the work indicate that the year of publication differs from any year derived from the work itself, the actual year of publication is given in square brackets. Specific dates of publication are derived from multiple sources, as explained in square brackets following the full reference. An exhaustive search for dates of publication of all references has not been undertaken. Printed pages that are un-numbered are enclosed in square brackets. Plates are cited only if they are numbered separately from other pages in the work.

Germain (1907d: 593) gave a full citation of Germain (1907a), listing it as published in 1907, even though there is nothing in Germain (1907a) to indicate that it was published after 1906. Germain (1907a: 234) cited "1907 . . . Étude Mollusques Afrique centrale française; Pl. V, fig. 16", which is not the exact title of Germain (1907d) and he did not cite any text page, suggesting that at the time Germain (1907a) was completed only the plates of Germain (1907d) were printed or in proof. It seems, therefore that Germain (1907a), although its printed date is 1906, was not published until 1907, but that it nonetheless was published before Germain (1907d).

Text published in sections, which are dated on the first page of each section. The sections were combined into "parts", for which later dates are given by Smith & England (1937: 97) and more detailed dates of receipt by the Staats- und Universitäts-Bibliothek Göttingen (Germany) by Welter-Schultes (1999: 198). In this catalog, the Welter-Schultes dates are taken as the dates of publication. Nonetheless, the fact that Kobelt (1912a), which was supposedly published on 15 January, cited descriptions and illustrations from this work, with page and plate numbers, casts some doubt on these dates.

Section	Pages	Part	Plates	Printed date	Smith & England date	Welter-Schultes date
1	1–8	550	22–27	13 March 1911	1911	24 July 1911

- Morlet, L. (1889) Catalogue des coquilles recueillies, par M. Pavie, dans le Cambodge et le Royaume de Siam et description d'espèces nouvelles. *Journal de Conchyliologie*, 37 (2), 121–200, pls. 6–9. [20 September; Fischer-Piette 1937: 91]
- Morrison, J.P.E. (1946) The nonmarine mollusks of San José Island, with notes on those of Pedro Gonzáles Island, Pearl Islands, Panamá. *Smithsonian Miscellaneous Collections*, 106 (6), 1–49, pls. 1–3. [12 September; p. v of volume]
- Mousson, A. (1848) Über die Land- und Süsswasser-mollusken von Java. *Mittheilungen der Naturforschenden Gesellschaft in Zürich*, 1 (3) (30), 264–273. [after 27 November; p. 264]

Sherborn (1930: 5825) considered this published in 1849, the date on the cover of the volume (*erster Band*). The volume consisted of three parts divided into 39 numbers, Mousson's article appearing in the third part (*drittes Heft*), number 30. However, the year is given on the first page of each number, and the date each article was presented is given on the first page of the article. In the *drittes Heft*, years are 1847–1849, with the number in which Mousson's article appeared dated 1848. In the absence of any other evidence, Mousson's article is deemed to have been published in 1848, after 27 November, the date it was presented.

- Nevill, G. (1885) *Hand list of Mollusca in the Indian Museum, Calcutta. Part II. Gastropoda. Prosobranchia-Neurobranchia (contd.)*. Indian Museum, Calcutta, x + 306 pp. [after 25 January; preface]
- Ng, T.H., Tan, S.K. & Low, M.E.Y. (2014) Singapore Mollusca: 7. The family Ampullariidae (Gastropoda: Caenogastropoda: Ampullarioidea). *Nature in Singapore*, 7, 31–47. [14 March; p. 31]
- Olivier, G.A. (1804a) *Voyage dans l'Empire Othoman, l'Egypte et la Perse, fait par ordre du Gouvernement, pendant les six premières années de la République. 4^o Edition*. Tome second. Henri Agasse, Paris, ii + 466 + [1] pp. [July or early August, but no later than the second week of August; Baur & Adler, 2003: 10]
- Olivier, G.A. ("An 12" [1804]b) *Voyage dans l'Empire Othoman, l'Egypte et la Perse, fait par ordre du Gouvernement, pendant les six premières années de la République. 8^o Edition*. Tome troisième. H. Agasse, Paris, iv + 359 + [1] pp. [July or early August, but no later than the second week of August; Baur & Adler, 2003: 10]

Olivier's text was published in two formats (Baur & Adler, 2003; Cowie & Héros, 2012): a large format (quarto) version (three volumes) and a small format (octavo) version (six volumes, with the first and second volumes, third and fourth volumes, and fifth and sixth volumes corresponding, respectively, to the first, second and third volumes of the quarto version).

Olivier, G.A. ("An XII" [1804]c) *Atlas pour servir au voyage dans l'Empire Othoman, l'Égypte et la Perse, fait par ordre du Gouvernement, pendant les six premières années de la République. Deuxième livraison.* H. Agasse, Paris, vii pp., pls 9, 18–33. [July or early August, but no later than the second week of August; Baur & Adler, 2003: 10]

The Atlas appeared in three parts (livraisons) corresponding to the three volumes of the quarto version and respectively with the six octavo volumes. The Atlas (second livraison) includes an "explication des planches" and the plates themselves. There is no evidence that the corresponding volumes of the two versions of the text and the three parts of the Atlas were not published simultaneously (Baur & Adler, 2003; Cowie & Héros, 2012).

Paetel, F. (1873) *Catalog der Conchylien-Sammlung von Fr. Paetel. Nebst Uebersicht des angewandten Systems.* Gebrüder Paetel, Berlin, [i] + 172 pp. [April or later; date of *Vorwort*]

- Perry, G. (1810–1811a) *Arcana; or the museum of natural history.* Stratford, London, 84 pls. [un-numbered], associated text.

Issued in monthly parts of un-numbered plates and associated text. The plates were numbered by Mathews & Iredale (1912) and monthly dates are here given following those authors. *Pomacea maculata* appears on pl. [12], although Cowie (1997a: 84) indicated that it appeared on pl. [11], based on pencilled numbers in the NHMUK copy. Neave (1940: 866) indicated that it appeared in signature G5. It was confirmed as appearing on pl. [12] in signature G5 by Petit (2003: 22, 40).

Plates	Date of publication
[1–4]	1 January 1810
[5–8]	February 1810
[9–12]	1 March 1810
[13–16]	1 April 1810
[17–20]	May 1810
[21–24]	June 1810
[25–28]	July 1810
[29–32]	August 1810
[33–36]	September 1810
[37–40]	October 1810
[41–44]	November 1810
[45–48]	December 1810
[49–52]	January 1811
[53–56]	February 1811
[57–60]	March 1811
[61–64]	April 1811
[65–68]	May 1811
[69–72]	June 1811
[73–76]	July 1811
[77–80]	August 1811
[81–84]	September 1811

Published in Lieferungen as follows (Coan & Kabat 2014 (Annex 2): 21):

Lieferung	Pages	Plates	Date of publication
104	1–24	A, 1–5	1851
107	25–48	6–11	1852a

110	49–74	12–17	1852a
113	18–21		1852a

Note that pl. 17 (1852) is referenced on p. 19 (1851), raising some doubt regarding the true dates of publication of the plates. Also, Philippi (1852b), even though citing the plates of Philippi (1952a), is here considered to have been published before Philippi (1852a) as no actual date of publication in 1852 has been found for the latter.

This is a lambda book (a book in which plates were published separately, along with un-numbered pages of explanatory text, as the plates were ready). After all plates were completed, they were bound into volumes. Dates of publication as given on the bottom of the explanatory text for each plate are as follows for *Ampullaria*.

Plates	Date of publication
2–4	June 1856a
5–12	August 1856b
13–20	October 1856c
21, 22	November 1856d
1, 23–28	December 1856e

The entire work was published in parts grouped into livraisons, with dates of publication documented by Sherborn & Woodward (1901a). The section by Valenciennes cited here appeared as part of two livraisons, with dates of publication of these livraisons as follows (Sherborn & Woodward, 1901a: 202):

Livraison	Pages	Publication date
13	225–256	17 January 1827
14	257–352, title page	15 December 1832 (title page has the printed date 1833)
