

## Phase transitions and non-analyticities in large $N_c$ gauge theories

**Presenter: Helvio Vairinhos**

*F. Bursa, M. Teper, H. Vairinhos*

Abstract: We investigate numerically various phase transitions and non-analyticities at large  $N_c$  using both twisted Eguchi-Kawai space-time reduction and the standard Wilson theory. As an example, we present results on the bulk transition and how it affects various observables.
