Subject: Request for Rescission of Interim Compensatory Measure B.1.a from EA-02-026, "Order for Interim Safeguards and Security Compensatory Measures"

Omaha Public Power District (OPPD) is submitting a request to rescind Interim Compensatory Measure (ICM) B.1.a for Fort Calhoun Station (FCS), Unit No. 1 related to EA-02-026, "Order for Interim Safeguards and Security Compensatory Measures".

By letter dated February 25, 2002 (Reference 1), the Nuclear Regulatory Commission (NRC) issued an Order for Interim Safeguards and Security Compensatory Measures to all operating nuclear power reactor licensees (EA-02-026). OPPD completed the response to the Order on September 3, 2002 for FCS (Reference 2).

By letter dated November 28, 2011 (Reference 6), the NRC partially rescinded Order EA-02-026. However, the letter noted that some requirements, including ICM B.1.a of Order EA-02-026, would remain in effect. The requirements of Order EA-02-026 addressed by ICM B.1.a involved training for a specific security initiated event that were not covered by proposed or existing regulations and remained in effect.

By letters dated June 24, 2016 (Reference 3) and August 25, 2016 (Reference 4), OPPD submitted certification to the NRC indicating its intention to permanently cease power operations. OPPD submitted certification of "Permeant Removal of Fuel from the Reactor Vessel" for FCS on November 13, 2016 (Reference 5). Upon docketing of these certifications, the 10 CFR Part 50 licenses for FCS no longer authorize operation of the reactor or emplacement or retention of fuel into the reactor vessel, as specified in 10 CFR 50.82(a)(2).

Pursuant to Section III of Order EA-02-026, a request to rescind ICM B.1.a is provided in the Enclosure to this Letter. This rescission request is part of the transition from an operating station to a permanently defueled station.
