The MK Series: Performs better than other speakers that cost much more!

- 4" treated-paper woofer extends the low-frequency range to play down to 60 Hz without hindering the critical vocal range for a clean, robust low-end response
- 3/4" tweeter delivers precise vocal and instrumental reproduction that give you a clear and detailed high-frequency performance
- Each MK Series speaker features the same drivers to create a timbre-matched audio system when using multiple models
- Wide speaker dispersion range allows the MK Series to be used in a myriad of audio systems without compromising sound quality
- Textured, black vinyl finish with a removable cloth grill provides an attractive look that doesn't compromise your rooms décor

Dayton Audio Max-X High Excursion DVC Subwoofers

The Max-X high excursion subwoofers from Dayton Audio are built for incredible low frequency extension and high SPL. These affordable drivers combine durability, efficiency, and displacement into a great looking speaker that will deliver the deepest bass with power and authority.

- High excursion and maximized surface area for excellent displacement capability
- Seamless dish cone is extremely rigid and durable with a sleek and modern look
- Custom tooled surround allows long throw without sacrificing cone area
- Extensive venting cools the voice coil enabling high power handling with low power compression
- Dual spiders maintain linear excursion for lower distortion even when pushed to the limit
- The dual 2 ohm voice coils give you the ability to get the most out of any amplifier

Engineered for max excursion and max SPL, with minimal distortion!

DAYTONAUDIO
