

Pickling Cucumbers

[CU82-20 - A & C Pickling Cucumbers](#)

55 days. Cucumis sativus. Open Pollinated. The plant produces high yields of 8 to 10" long dark green cucumbers. The cucumbers hold their dark color for a long time. Excellent pickling variety. It is best when picked when 4 to 6" long. Excellent choice for home gardens and market growers. An heirloom variety was introduced in 1928 by Abbott & Cobb of Philadelphia, USA.

[CU101-20 - Alibi Cucumber Seeds](#)

50 days. Cucumis sativus. (F1) Alibi Cucumber. The plant produces very high yields of 3 to 4" long medium green cucumbers. This is a very productive variety. If you keep picking, they'll keep producing. Great for making gherkin pickles and best when picked 2" long for pickling. An excellent choice for home gardens and market growers. Disease Resistant: Ccu, CMV, DM, PM.

[CU76-20 - Beit Alpha Cucumber Seeds](#)

56 days. Cucumis sativus. (F1) Beit Alpha Cucumber. The plant produces excellent yields of 12" long sweet, bitter free, and burpless cucumbers. A Middle Eastern type cucumber that is smooth and blocky with dark green skin. The flesh is crunchy, and the skin is so mild it does not have to be peeled. It is usually picked small at 5 to 6" long. It can be used for pickling or sliced in salads. Long shelf life. One of the most disease-resistant cucumbers on the market. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. United States Department of Agriculture, PI 292010. Disease Resistant. CMV, CVYV, DM, PM, WMV, ZYMV.

[CU64-20 - Bianco Lungo Cucumbers](#)

58 days. Cucumis sativus. Open Pollinated. The plant produces heavy yields of 7 ½ to 9" long shiny white-skinned cucumbers. Excellent for making dill pickles and fresh in salads. An excellent choice for home gardens. A variety from Italy.

[CU61-20 - Boston Pickling Improved Cucumber Seeds](#)

55 days. Cucumis sativus. Open Pollinated. Boston Pickling Improved Cucumber. The plant produces heavy yields of small 3 to 7" long cucumbers. Perfect for making pickles, but also good in salads. They are very crisp and good quality. Best when harvested at 2 to 6" long. An 1880 heirloom variety. An excellent choice for home gardens and market growers. United States Department of Agriculture, NSL 5716. Disease Resistant: CMV.

[CU20-20 - Bush Crop Cucumber Seeds](#)

55 days. Cucumis sativus. (F1) Bush Crop Cucumber. This early maturing compact bush plant produces high yields of 6 to 8" green cucumbers. They are crisp, tender, and flavorful. Excellent in salads or for making dills or fancy sweet pickles. Bush cucumbers produce very nice straight cucumbers. It grows very short vines, only 1 to 2 feet long, and is one of the best varieties for container gardens and small gardens. An excellent choice for home gardens. Disease Resistant: Ccu.

CU133-10 - Bush Hog Cucumber Seeds

85 days. Cucumis sativus. Open Pollinated. Bush Hog Cucumber. This small compact bush plant produces high yields of 2 to 3" long cucumbers. The flesh is crisp and delicious. It can be used for pickling or sliced in salads. A great gourmet cucumber. Easy to grow and maintain. Suitable for small gardens, containers, and patios. An excellent choice for home gardens. A variety from the USA.

CU5-20 - Bush Pickle Cucumber Seeds

45 days. Cucumis sativus. (F1) Bush Pickle Cucumber. This early maturing compact plant produces high yields of very flavorful 4 to 5" long green cucumbers. This is one of the best quality varieties for making crisp whole dill pickles. If you make your own pickles, you have to try this variety! This variety was developed specifically for space-saving gardens and containers. An excellent choice for home gardens. Disease Resistant: Ccu, CMV.

CU134-20 - Bushy Cucumber Seeds

48 days. Cucumis sativus. (F1) Bushy Cucumber. This early maturing compact plant produces high yields of very flavorful 4 to 5" long green cucumbers. This is one of the better quality varieties for making crisp whole dill pickles. If you make your own pickles, you have to try this variety! It is also great in salads. This variety will take only 2 or 3 square feet as vines are only 5 ft long. Suitable for small gardens. A variety was brought into the USA from Russia in the early 1990s.

CU40-10 - Calypso Cucumber Seeds

52 days. Cucumis sativus. (F1) Calypso Cucumber. The plant produces heavy yields of 3 to 6" long dark green cucumbers. Great for making pickles. It is suitable for hand or machine harvesting. Excellent choice for home gardens and market growers. Developed by North Carolina State University. United States Department of Agriculture, NSL 214302. Disease Resistant: A, ALS, CMV, DM, PM, S.

CU43-20 - Carolina Pickling Cucumber Seeds

51 days. Cucumis sativus. (F1) Carolina Pickling Cucumber. The plant produces good yields of 3" long cucumbers. The excellent quality variety is used to make pickles. One of the most disease resistant cucumbers on the market. An excellent choice for home gardens and market growers. Developed by Clemson University, South Carolina, USA. Disease Resistant: A, ALS, Ccu, CMV, DM, PM.

CU7-20 - Cool Breeze Cucumbers

45 days. Cucumis sativus. (F1) This early variety produces huge yields of 4 to 5" long flavorful cucumbers. Excellent for making sweet pickles. Best when picked about 2" long for pickling. Plant yields as many as 50 cucumbers per plant. The parthenocarpic variety and no male pollen are needed, so even if bees are scarce you'll still get a bumper crop. Plants are widely adapted and are particularly popular in Northern regions. An excellent choice for home gardens and market growers. Disease Resistant. Ccu, CMV, PM.

CU78-20 - County Fair Cucumber Seeds

52 days. Cucumis sativus. (F1) County Fair Cucumber. This early maturing plant produces high yields of 6 to 8" long green cucumbers. A high-quality cucumber that is sweet, non-bitter, firm, and crunchy. A perfect variety for making chips, spears, and whole pickles. Best when harvested when 2 to 4" for pickling. It also makes a good slicer. This parthenocarpic variety and no male pollen is needed, so even if bees are scarce you'll still get a bumper crop. Perfect for greenhouse production. An excellent choice for home gardens, greenhouses, and market growers. Disease Resistant: BW.

CU36-20 - Cross Country Cucumber Seeds

53 days. Cucumis sativus. (F1) Cross Country Cucumber. The plant produces high yields of dark green cucumbers. Cucumbers are crisp and tender and perfect for making bread and butter or dill pickles. Does well under a variety of growing conditions. One of the most disease resistant cucumbers on the market. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant: A, ALS, BW, Ccu, CMV, DM, PM.

CU130-20 - Cucamelon Cucumber Seeds

67 days. Melothria scabra. Open Pollinated. Cucamelon Cucumber. The plant produces good yields of small 1" long pale green cucumbers with dark green stripes. They are very delicious and have a unique flavor. They look like miniature watermelons but have a cucumber taste with a slight citrus flavor. It has been used for centuries by the Aztecs and other native peoples. Excellent for salads, sandwiches, spreads, pickling, or snacks. Kids love them. You should pick mature cucumbers to encourage longer yields. Similar to the Mexican Sour Gherkin and known as the Mouse Melon. The plant is most productive in hot weather or a greenhouse setting. Heat Tolerant. Drought Tolerant. High Humidity Tolerant. It would be best if you used a trellis or a pea fence. Suitable for hanging baskets. An excellent choice for home gardens, Farmer's Markets, greenhouses, market growers, and open field production. An heirloom variety from Mexico and Central America. Disease Resistant.

CU24-20 - Diva Cucumber Seeds

2002 All-America Selections Winner!

58 days. Cucumis sativus. (F1) Diva Cucumber. The plant produces high yields of non-bitter burpless and seedless 6 to 8" long glossy dark green cucumbers. Cucumbers are tender, crisp, sweet, and bitter-free. Best when harvested at 4 to 5" long. Excellent for salads or pickling. Plant foliage is non-bitter and less attractive to the cucumber beetles than some varieties. It is a gynocercious and parthenocarpic variety and will produce without pollination! It is known for its big yields. An excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: ALS, Ccu, CVYV, DM, PM.

CU100-20 - Double Yield Cucumbers

50 days. Cucumis sativus. Open Pollinated. This early maturing plant produces high yields of 5 to 6" long dark green cucumbers. This is a very productive variety - for every pickle that is cut off, two or three more are grown, so keep on picking! Best when picked at 4 to 5" long. Does well in most parts of the country. Excellent choice for home gardens. An heirloom variety was developed in 1924 by Joseph Harris & Company of Coldwater in New York, USA. United States Department of Agriculture, PI 414157.

CU109-20 - Early Fortune Cucumber Seeds

55 days. Cucumis sativus. Open Pollinated. Early Fortune Cucumber. The plant produces good yields of 7 to 8" long dark green cucumbers. Very delicious and a perfect slicing cucumber for salads and pickling. Also known as Special Dark Green Cucumber. Does well in most parts of the United States. An excellent choice for home gardens. A 1906 heirloom variety from George Starr of Royal Oak, Michigan, USA. United States Department of Agriculture, NSL 5726.

CU89-20 - Eureka Cucumbers

57 days. Cucumis sativus. (F1) This early producing plant produces high yields of 5 to 7" long dark green cucumbers. Best when harvested when 2 to 5" for pickling. Monoecious and virtually trouble-free. Very flavorful and crisp. One of the most disease-resistant cucumbers on the market. An excellent choice for home gardens and market growers. Disease Resistant: A, ALS, Ccu, CMV, DM, PM, PRSV, WMV, ZYMV.

CU94-20 - Fancipak Cucumber Seeds

57 days. Cucumis sativus. (F1) Fancipak Cucumber. The plant produces high yields of medium dark green cucumbers. They are crisp and very tasty. Best when harvested when 4" long. The plant has dense foliage protecting the cucumbers from sunscald. Excellent pickling variety. One of the most disease resistant cucumbers on the market. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant: A, ALS, Ccu, CMV, DM, PM, ZYMV.

CU10-20 - Homemade Pickles Cucumber Seeds

55 days. Cucumis sativus. Open Pollinated. Homemade Pickles Cucumber. The plant produces heavy yields of 5 to 6" long green cucumbers. This variety was specially bred for making pickles and is best when harvested when 1 ½ to 2" for making tiny pickles. The cucumbers are solid and crisp with superb flavor. Perfect for container gardening or small gardens where space is very limited! An excellent choice for home gardens. Disease Resistant: A, ALS, CMV, DM, PM.

CU44-20 - Improved Long Green Cucumbers

65 days. Cucumis sativus. Open Pollinated. The plant produces heavy yields of 10 to 14" long glossy dark green cucumbers. A popular variety is used for slicing and pickling. It has the old-fashioned flavor. They are solid and crisp, perfect for making pickles. Best when harvested at 5 to 6" long for pickles. It is also a superior slicing cucumber! Grows best if grown on trellis or stakes. Also known as London Long Cucumber. An excellent choice for home gardens. An 1842 heirloom variety. United States Department of Agriculture, NSL 28181.

CU97-20 - Jackson Supreme Cucumbers

52 days. Cucumis sativus. (F1) This early maturing plant produces high yields of dark green pickling cucumbers. Cucumbers are best when harvested when 3 or 4" long. Excellent quality pickling variety. One of the most disease-resistant cucumbers on the market. Grows well in the Southern States of the USA. Excellent choice for home gardens, market growers, and open field production. Disease Resistant: A, ALS, Ccu, CMV, DM, PM.

CU99-20 - Japanese Long Pickling Cucumber Seeds

68 days. Cucumis sativus. Open Pollinated. Japanese Long Pickling Cucumber. The plant produces high yields of 18 to 20" long dark green burpless cucumbers. They are very mild, very crisp, and easy to digest. One of the best Japanese burpless cucumbers on the market. Best when harvested when 12" long. Excellent pickling variety with very small seeds! An excellent choice for home gardens.

CU11-20 - Lemon Cucumber Seeds

65 days. Cucumis sativus. Open Pollinated. Lemon Cucumber. The plant produces heavy yields of 2 ½ to 4" round lemon-shaped cucumbers. They are tender and sweet, are never bitter, and are great for salads and pickling. Great for large containers! Does well in cool weather. Cold Tolerant. Drought Tolerant. Great specialty market salad item. Excellent choice for home gardens and specialty market growers. An 1894 heirloom variety from Australia. United States Department of Agriculture, NSL 106620.

CU41-20 - Little Leaf Cucumber Seeds

57 days. Cucumis sativus. Open Pollinated. Little Leaf Cucumber. This compact plant produces high yields of 3 to 5" long emerald green colored cucumbers. It may be the highest yielding pickling cucumber on the market today, producing 25 to 30 cucumbers per plant! An excellent cucumber for salads and pickling. It is a parthenocarpic variety and no male pollen is needed, so even if bees are scarce you'll still get a bumper crop. Perfect for container gardening. Does well under stress and adverse weather conditions. Heat Tolerant. Drought Tolerant, Cold Tolerant. One of the most disease resistant cucumbers on the market. An excellent choice for home gardens, hydroponics, greenhouses, market growers, and open field production. Developed in 1991 by the University of Arkansas, USA. Disease Resistant: A, ALS, BW, Ccu, CMV, DM, PM.

CU125-10 - Manny Cucumber Seeds

50 days. Cucumis sativus. (F1) Manny Cucumber. The plant produces good yields of 5 to 7" long shiny medium green cucumbers. This Beit Alpha cucumber has tender skin and a delicious mild flavor. It grows best if grown on trellis or stakes. This is a parthenocarpic variety and sets fruit without bee pollination making it an excellent variety for greenhouse and open field production. It is ideal for those growing in tunnels. Impressive yields in open field production too. An excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: PM.

CU12-20 - Marketer Cucumbers

1943 All-America Selections Winner!

55 days. Cucumis sativus. Open Pollinated. The plant produces high yields of 8 to 9" long smooth dark green cucumbers. Great for slicing and salads. Perfect for pickles when picked small. Does well in hot and humid regions and in the Southern states. Heat Resistant. Excellent choice for home gardens and market growers. A 1942 heirloom variety from New Haven, Connecticut, USA. United States Department of Agriculture, NSL 5739.

CU13-20 - Marketmore 76 Cucumber Seeds

68 days. Cucumis sativus. Open Pollinated. Marketmore 76 Cucumber. The plant produces heavy yields of 8 to 10" long dark green cucumbers. Excellent slicing cucumber and can also be used to make dill pickles. Does well even under adverse weather conditions over a long season in hot or cool weather. One of the most disease-resistant cucumbers on the market. Excellent choice for home gardens and market growers. Developed in 1976 by Dr. Henry Munger of Cornell University, Ithaca, New York, USA. United States Department of Agriculture, PI 561148. Disease Resistant: A, ALS, Ccu, CMV, DM, PM.

CU113-20 - Marketmore 97 Cucumber Seeds

55 days. Cucumis sativus. Open Pollinated. Marketmore 97 Cucumber. The plant produces good yields of 9 to 11" long cucumbers. Excellent flavor and is perfect for salads or pickling when harvested at 3 to 5" long. Cucumbers are non-bitter and burpless. Tolerant to the striped cucumber beetle and the spotted cucumber beetle. One of the most disease-resistant varieties developed. Suitable for commercial growers. An excellent choice for home gardens, market growers, and open field production. Developed in 1976 by Dr. Henry Munger of Cornell University, Ithaca, New York, USA. Disease Resistant: ALS, Ccu, CMV, DM, PM, PRSV, TLS, ULS, WMV, ZYMV.

[CU79-20 - Mexican Sour Gherkin Cucumber Seeds](#)

75 days. *Melothria scabra*. Open Pollinated. Mexican Sour Gherkin Cucumber. The plant produces heavy yields of 1 to 2" long cucumbers that look like miniature watermelons. They have the sweet cucumber flavor, followed by a surprising sourness, which leads you to believe they are already pickled! Perfect for salads, snacks, and pickling. They fall off the vines when ripe. This cucumber grows best if grown on trellis or stakes. The most cold tolerant of all cucumbers will continue to produce until the first frost. Perfect for container gardening, hanging baskets, or small gardens where space is very limited. Also known as the Cucamelon and Mouse Melon. An heirloom from Mexico and Central America.

[CU60-20 - Miniature White Cucumber Seeds](#)

48 days. *Cucumis sativus*. Open Pollinated. Miniature White Cucumber. This bush-type plant produces high yields of 3" long white cucumbers. One of the best white cucumbers on the market. It does not have bitterness like most white cucumbers. The cucumber is so tender there's no peeling necessary. Excellent for salads, pickles, or gourmet dishes. Impress your neighbors by growing some white cucumbers. Perfect for container gardening. An excellent choice for home gardens.

[CU132-10 - Mini-Me Cucumber Seeds](#)

45 days. *Cucumis sativus*. (F1) Mini-Me Cucumber. This early maturing plant produces high yields of 3 ½" long sweet, bitter-free, and burpless cucumbers. This mini Beit Alpha is smooth and with shiny green skin. The flesh is crunchy and delicious, and the skin is so mild it does not have to be peeled. It is usually picked small for the best quality. It can be used for pickling or sliced in salads. Long shelf life. Very disease-resistant cucumbers. It is a parthenocarpic variety, producing only female flowers, and does not require pollination, making cultivation super easy. The plant continues to produce all season long. This is the high variety you find in supermarkets. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant. CMV, CVYV, DM, PM.

[CU15-20 - Muncher Cucumber Seeds](#)

60 days. *Cucumis sativus*. Open Pollinated. Muncher Cucumber. The plant produces heavy yields of 6 to 9" long cucumbers. A delicious burpless cucumber that is crisp and non bitter. Best when harvested when 4 to 6" long for pickling. Also can be eaten fresh straight from the garden or used in salads. Excellent for making pickles. An excellent choice for home gardens. Disease Resistant: CMV.

[CU16-20 - National Pickling Improved Cucumbers](#)

54 days. *Cucumis sativus*. Open Pollinated. The plant produces heavy yields of 6" long medium green cucumbers. Ideal for making dill pickles or eating fresh in salads. Can also be harvested when very tiny 1 to 2" for making little pickles. They are slightly tapered in shape to fit in a pickle jar. Excellent choice for home gardens and market growers. Developed by the National Pickle Packers Association. United States Department of Agriculture, NSL 5746. Disease Resistant: Ccu, CMV.

[CU95-10 - Palace Pride Cucumber Seeds](#)

58 days. *Cucumis sativus*. (F1) Palace Pride Cucumber. This early maturing plant produces high yields of 10 to 12" long slender glossy dark green cucumbers. It is crisp and perfect for making Bread & Butter Pickles. An excellent slicer and perfect for salads and gourmet dishes. There is no need to peel the skin since the white spines are easily removed by washing. Heat Tolerant. An excellent choice for home gardens.

[CU19-10 - Persian Middle East Cucumber Seeds](#)

50 days. Cucumis sativus. Open Pollinated. Persian Middle East Cucumber. This early producing plant produces high yields of 5 to 7" long sweet and crunchy cucumbers. This thin skinned variety has excellent flavor and is never bitter. Vines bear extremely early and are very productive. Adaptable to a variety of climates. Excellent fresh or pickled. A favorite variety from the Middle East region. An excellent choice for home gardens and market growers.

[CU124-20 - Pick a Bushel Cucumbers](#)

2014 All-America Selections Winner!

60 days. Cucumis sativus. (F1) Semi bush plant produces high yields of 3 to 6" long green cucumbers. These cucumbers can be picked when they are 3" long for gherkin size or left to grow into 6" long for use in salads. They are tasty with no bitterness. The semi-bush vines grow only 24" long, so they are great for growing in patio containers as well as in small gardens. An excellent choice for home gardens. Heat Tolerant. Disease Resistant: Ccu, CGMMV, CMV.

[CU56-20 - Pioneer Cucumbers](#)

51 days. Cucumis sativus. (F1) The plant produces high yields of 3 to 6" long dark green cucumbers. Crunchy flesh makes it great for making pickles. Can be used fresh in salads or pickled. One of the most reliable cucumbers on the market. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant: ALS, Ccu, DM.

[CU118-20 - Poona Kheera Cucumbers](#)

50 days. Cucumis sativus. Open Pollinated. The plant produces good high yields of 4 to 5" long cucumbers. The best thing about Poona Keera is that it will never, ever get bitter. This cucumber looks like a large russet potato with a russet brown color. It is very tender, crisp, juicy, and delicious. It turns from white, to golden yellow, then to russet brown. It may be eaten at any stage, skin and all, but the flavor is best when the skin is just turning brown. Used in stir-fries, long-marinating dishes, pickles, and chutneys. Very strong vines allow for huge yields. Trellising makes it easier to harvest. It does extremely well in hot climates in the Western part of the country where it is difficult to grow cucumbers. This is an excellent hydroponic variety. Also known as Puneri Cucumber. An excellent choice for home gardens. An heirloom variety from Poona, India.

[CU71-20 - Regal Cucumbers](#)

52 days. Cucumis sativus. (F1) This early maturing plant produces high yields of 2 to 4" long dark green cucumbers. A variety with slightly longer, a slimmer shape which makes it perfect for making chips, spears, and whole pickles. An excellent pickling cucumber that produces continuously all season. It can be either hand-picked or machine harvested in the North or South parts of the country. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA. Disease Resistant: PM.

[CU88-20 - Rhinish Pickle Cucumbers](#)

55 days. Cucumis sativus. Open Pollinated. The plant produces high yields of 4 to 6" long cucumbers. The cucumbers are crisp and very tasty. Best when harvested at 4" long for pickling. Also good for salads and slicing. Also known as Vorgebirgstrauben. An excellent choice for home gardens. An heirloom variety from Germany.

CU98-10 - Salad Bush Cucumber Seeds

1988 All-America Selections Winner!

57 days. Cucumis sativus. (F1) Salad Bush Cucumber. This early maturing compact bush plant produces good yields of 8" long by 2 ¼" wide glossy dark green cucumbers. Cucumbers are tender and crisp. This small plant is the perfect variety for growing indoors in containers and small gardens as it only uses 2 square feet of space. Also grows well in hanging baskets. An excellent choice for home gardens. Disease Resistant: Ccu, CMV.

CU123-20 - Salt and Pepper Cucumbers

49 days. Cucumis sativus. Open Pollinated. This early maturing bush-type plant produces high yields of 3" to 5" long white cucumbers. It is very flavorful and one of the best white cucumbers on the market. Excellent for salads, pickles, or gourmet dishes. Impress your neighbors by growing some white cucumbers. It was the 2011 Green Thumb Award Winner! The Salt and Pepper variety will be replacing the Miniature White Cucumber and the Boothby's Blonde Cucumber. This variety was developed by Jason Cavatorta and Molly Jahn at Cornell University. An excellent choice for home gardens. Disease Resistant: ALS, PM.

CU110-20 - Snow's Fancy Pickling Cucumbers

55 days. Cucumis sativus. Open Pollinated. This early maturing plant produces good yields of 5" long dark green cucumbers. It is firm, crisp, and tender. The ideal pickler! This variety was introduced in 1905 by Vaughan's Seed House of Chicago. It was selected by J. C. Snow of the famous Snow Pickle Farm located in Rockford, Illinois. At that time, it fit the requirements for small pickling manufacturing. Excellent choice for home gardens and market growers. An heirloom variety from Illinois, USA.

CU23-20 - Spacemaster 80 Cucumber Seeds

60 days. Cucumis sativus. Open Pollinated. Spacemaster 80 Cucumber. This compact bush-type plant produces heavy yields of 7 to 8" long nicely shaped dark green cucumbers. Excellent for pickling when small, and slicing when they get bigger. They are crisp and tasty. A great bush variety cucumber has amazing flavor with no bitterness. Ideal for containers, hanging baskets, or home gardens with limited space. The plant has short vines, only 3 feet long! Also perfect for close commercial cropping. Also suitable for hydroponic gardening. Excellent choice for home gardens and market growers. Developed in 1980 by Dr. Henry M. Munger of Cornell University, Ithaca, New York, USA. Disease Resistant: Ccu, CMV, DM, PM.

CU22-20 - Spacemaster Cucumbers

60 days. Cucumis sativus. Open Pollinated. This compact bush-type plant produces excellent yields of 6 to 8" long slender dark green cucumbers. Great for pickling when small, and slicing when they get bigger. The ultimate cucumber for vegetable gardens with limited space! Its vines are only 2 to 3 feet long. It is ideal for containers, hanging baskets, or small gardens with limited space. It is almost a daily ritual to keep them picked since they grow so rapidly. Suitable for hydroponic gardening too. An excellent choice for home gardens. Developed by Dr. Henry M. Munger of Cornell University, Ithaca, New York, USA. United States Department of Agriculture, NSL 112204. Disease Resistant: Ccu, CMV.

CU126-20 - Super Max Cucumbers

50 days. Cucumis sativus. (F1) The plant produces high yields of 4" long dark green cucumbers. These quality cucumbers are perfect for making pickles. They are crunchy, never get soft or mushy, and are very flavorful. They have very few seeds too. This is an improved version of Supremo Cucumber. An excellent choice for home gardens, market growers, and commercial growers. Disease Resistant: CMV, PRSV, WMV, ZYMV.

CU25-20 - Suyo Long Cucumber Seeds

65 days. Cucumis sativus. Open Pollinated. Suyo Long Cucumber. The plant produces excellent yields of thin 12 to 18" long cucumbers. It is delicious, tender, crispy, burpless, and non-bitter. It can be picked at any stage, from very young to fully mature. Excellent for salads and bread and butter pickles. Grow it on a trellis for straight cucumbers. This variety grows well in hot weather. An excellent choice for home gardens. An heirloom variety from China.

CU2-10 - Sweeter Yet Cucumber Seeds

48 days. Cucumis sativus. (F1) Sweeter Yet Cucumber. This early maturing plant produces high yields of 10 to 12" long dark green cucumbers. A dual-purpose non-bitter cucumber that can be used fresh in salads or pickled. Cucumbers are sweet, burpless, bitter-free, and their skins require no peeling. Compact semi-bush type plants produce continually all season long. One of the most disease resistant cucumbers on the market. An excellent choice for home gardens, market growers, and open field production. Disease Resistant: CMV, DM, PM, PRSV, ZYMV.

CU38-20 - Tendergreen Burpless Cucumbers

55 days. Cucumis sativus. Open Pollinated. The plant produces heavy yields of 6 to 8" long medium green cucumbers. It is crispy, tender, burpless, bitter-free, and acid-free. It has thin skin and doesn't need any peeling. Great for salads and for pickling when cucumbers are small. Does well in high soil moisture and also cold soil. Best when harvested when 3 to 6" long. An excellent choice for home gardens and market growers. An heirloom dating back to the 1930s. United States Department of Agriculture, NSL 106653. Disease Resistant: CMV, DM, PM.

CU33-20 - West Indian Gherkin Cucumber Seeds

65 days. Cucumis anguria. Open Pollinated. West Indian Gherkin Cucumber. The plant produces heavy yields of 1 to 2" oval cucumbers. They have been used for centuries to make small pickles and relishes. It can be cooked and added to soups. It was grown by Thomas Jefferson at Monticello vegetable garden between 1812 and 1824. They do great in hot and humid regions. Also known as Burr Gherkin Cucumber or Burr Cucumber. It is believed that it originated in Africa and then was taken to the West Indies through the slave trade. The heirloom was introduced into the United States in 1792 via Jamaica, by Minton Collins of Richmond, Virginia, USA. An excellent choice for home gardens. United States Department of Agriculture, NSL 5769.

CU58-20 - White Wonder Cucumbers

60 days. Cucumis sativus. Open Pollinated. The plant produces high yields of 6 to 8" long lovely ivory-skinned cucumbers. They are exceptionally crisp and very delicious without the bitter taste. Great for salads, pickles, or gourmet dishes. It looks great in salads to add extra color to gourmet dishes. The tender white skins are so thin that they won't even need peeling. Great for making chips, spears, and whole pickles. Suitable for greenhouses too! Impress your neighbors by growing some white cucumbers! Also known as Albino Cucumber, Ivory King Cucumber, Jack Frost Cucumber, Landreth's White Slicing Cucumber, Long White Cucumber, and White Albino Cucumber. Does well in hot weather. An excellent choice for home gardens, greenhouses, and specialty market growers. An 1893 heirloom variety from New York, USA. United States Department of Agriculture, NSL 5773.

CU30-20 - Wisconsin SMR 58 Cucumbers

55 days. Cucumis sativus. Open Pollinated. The plant produces heavy yields of 2 ½ to 6" long dark green cucumbers. Best for making dill pickles. Very crisp and sweet. You have to try this variety if you love making homemade pickles. It has a mild flavor that is perfect for soaking up spices when making pickles. One of the absolute best non-hybrid pickling cucumbers available. Grow on trellis or fence for straight cucumbers. Excellent choice for home gardens and market growers. Developed by the University of Michigan in 1959 short seasons and Northern climates. United States Department of Agriculture, NSL 30808. Disease Resistant: Ccu, CMV.
