

# VIBURNUM

## ALLEGHANY

**(LATIN: VIBURNUM X RHYTIDOPHYLLOIDES)** Attractive, dense upright grower makes a great hedge, screen or windbreak. Large clusters of fragrant white flowers followed by showy red fruit that matures to black. Evergreen. Deciduous below 0 Fahrenheit. **Fast grower, up to 10 feet tall.** Full sun to part shade Zone 5-8

## AURORA

**(LATIN: VIBURNUM CARLESII)** This Korean spice viburnum cultivar is a slow-growing, upright, rounded, deciduous shrub which typically **matures to 4-5' tall but may reach a height of 8'** in optimum growing conditions. Red buds open in late March/early April to pink-changing-to-white flowers which are arranged in snowball-like clusters. Flowers are fragrant. Foliage usually turns red in fall. Full sun to part shade Zone 4

## AUTUMN JAZZ

**(LATIN: VIBURNUM DENTATUM)** A superior plant with a graceful, upright, vase shaped habit. Creamy-white, flat-topped cymes in early June followed by clusters of metallic blue-black fruits from late August through October. Foliage is medium green with shades of red. Fall color is a kaleidoscope blend of yellow, orange, red, and burgundy. **10 feet tall and 8 feet wide.** Full sun to part shade Zone 3

## BLACKHAW

**(LATIN: VIBURNUM PRUNIFOLIUM)** Black haw is usually grown as a large, upright, multi-stemmed, deciduous shrub with an irregular crown, but it also may be grown as a small, single trunk tree. As a shrub, it typically **grows 12-15' tall with a spread of 6-12'**. Non-fragrant white flowers appear in spring. Flowers give way in autumn to blue-black, berry-like drupes which often persist into winter. Glossy dark green leaves turn attractive shades of red and purple in fall. Fruits are edible and may be eaten off the bush when ripe. Full sun to part shade Zone 3

## BRANDYWINE

**(LATIN: VIBURNUM NUDUM)** A striking shrub with glossy green foliage that turns a dark, maroon-red in autumn. A profusion of berries with changing colors from greens to pinks and blues start in fall and persist well into winter. **Will grow to 5 to 6 feet tall with a spread of 4 to 5 feet.** Full sun to part shade Zone 5

## BURKWOOD

**(LATIN: VIBURNUM BURKWOODII)** A large, medium-growing, deciduous, upright shrub reaches **8 to 10 feet tall and 5 to 8 feet wide.** Early blooming white flowers opening from pink buds are very fragrant. Makes an excellent screen or specimen. Both heat and cold tolerant. Sun to part shade Zone 5

### C.A. HILDEBRANTS

**(LATIN: VIBURNUM WRIGHTII)** Compact and sturdy, it will grow **only 4 feet tall** and holds its large trusses of bright red fruits late into the winter. Autumn colors range from amber to reds and maroons and makes a very impressive display. Full sun Zone 5

### CARDINAL CANDY

**(LATIN: VIBURNUM DILATATUM)** Large clusters of shiny, scarlet-red fruit adorn this Viburnum with improved hardiness. Tons of creamy-white flowers cover the well-branched, rounded plant in May. **Matures at 5 to 8 feet tall and wide.** Fruits well even without a nearby pollinator. Full sun to part shade Zone 4

### CAYUGA

**(LATIN: VIBURNUM CARLCEPHALUM)** Produces abundant blooms with pink buds that open up to white flowers in May. Dark green, shiny, medium textured foliage during summer. Rounded, dense shrub with stiff upright branches. **Matures at 4-6 feet tall and 4-5 feet wide.** Full sun to part shade Zone 5-8

## CHICAGO LUSTRE

**(LATIN: VIBURNUM DENTATUM)** An outstanding upright-rounded habit with glossy dark green foliage. Creamy white flowers appear in mid to late June, followed by ornamental clusters of blue-black fruit in autumn. Extremely wet sites should be avoided. This fast growing Viburnum grows **10 to 12 feet in height with an 8 to 10 foot spread** in 10 years.

Full sun Zone 5

## CONOY

**(LATIN: VIBURNUM BURKWOODII)** This compact evergreen shrub is covered in small, glossy dark green foliage. Creamy-white flowers appear in spring followed by red berries in late summer. **Matures at 4 to 5 feet tall and 7 to 8 feet wide.** Partial shade Zone 5

## COPPER RIDGE

**(LATIN: VIBURNUM PLICATUM F. TOMENTOSUM)** The Copper Ridges Viburnum forms a dome shaped, compact shrub with dense, spreading branches. The leaves are heavily textured, densely serrated. The new leaves emerge with a copper tint. White flowers emerge in late spring and form 2-3" clusters. Fruits are scarlet red, changing to black as they mature. Copper to dark maroon fall foliage. Forms a lovely spring hedge or border. **It will grow 5-8' tall with a spread of 4-7'.** Full sun to part shade Zones 5 to 8. Cold resistant.

## EMERALD TRIUMPH

**(LATIN: VIBURNUM EMERALD TRIUMPH)** This is a compact, rounded, deciduous shrub that typically **matures to 6-8' tall and as wide**. Showy white flowers in flat clusters bloom in late April-May. Flowers give way to fruits that mature to bright red in late summer but turn black by autumn. Leathery, glossy dark green leaves turn bronze to dark red in fall. Full sun to part shade Zone 4

## ESKIMO

**(LATIN: VIBURNUM X ESKIMO)** This is a compact, semi-evergreen shrub that typically **matures to 4-5' tall and as wide**. Showy white flowers bloom profusely in snowball inflorescences in May. Flowers give way to fruits that mature in late summer to red then black. Ovate, leathery, glossy dark green leaves turn attractive shades of yellow, orange and red in fall. Full sun to part shade Zone 6-8

## FRAGRANT

**(LATIN: VIBURNUM FERRERI)** This viburnum is a hardy, medium sized deciduous shrub with a rounded form. Beautiful clusters of extremely fragrant pinkish-white blossoms appear in late spring. The dark green foliage, along with black fruit in fall, and its purple color in fall will provide many seasons of interest. **Grows to 8 feet tall and 10 feet wide.** Full sun to part shade Zone 4-9

## IRONCLAD

**(LATIN: VIBURNUM SIEBOLDII)** A large, coarsely-textured ornamental shrub covered in creamy white flower clusters in spring followed by very showy bright pink-red fruits that slowly fade through dark red to black, leaving behind colorful flower stems for a long performance. **Grows up to 15 ft. tall with a 12ft. spread.** Sun to part sun Zone 4

## JUDDI

**(LATIN: VIBURNUM X JUDDI)** It is a rounded deciduous shrub that typically matures to **6-8' tall and 6-10' wide.** It is noted for its sweet fragrant white flowers in spring, quality dark green foliage, and black fruit in fall and purple fall color. Full sun to part shade Zone 4

## KILIMANJARO

**(LATIN: VIBURNUM PLICATUM F. TOMENTOSUM)** Upright, narrow form is perfect for small spaces. White blooms appear from top to bottom. Deciduous, heavy-flowering plant is heat tolerant and low maintenance. Red fruit in mid- to late-Summer. **Grows to 8 feet tall and 3 feet wide.** Full sun Zone 5

## KOREAN SPICE

**(LATIN: VIBURNUM CARLESII)** A small deciduous shrub **grows to 5 feet tall** with a rounded form and an upright open branching habit. Clusters of fragrant white flowers open from pink buds in spring. Red fruit turns black in summer. Prefers slightly acidic soil. Full to part sun Zone 5

## LEATHERLEAF

**(LATIN: VIBURNUM RHYTIDOPHYLLUM)** An evergreen shrub, commonly called leatherleaf viburnum, which can ultimately reach a **height of 6-10'**. Produces flat cymes of creamy white flowers in the spring and berries in early fall which first appear red and then change to a glossy black. Berries will often persist to the end of December. Full sun to part shade Zone 5

## MARIESII

**(LATIN: VIBURNUM PLICATUM F. TOMENTOSUM)** Hardy, medium growing deciduous shrub to **6 feet in height** with slightly greater spread. Large panicles of pure white flowers borne in June make this one of the most elegant flowering shrubs. Excellent when used as a screen or specimen. Full sun to part shade Zone 5

## MOHAWK

**(LATIN: VIBURNUM BURKWOODII)** A dense, compact plant that grows to **5 feet high and wide**. Pale cream buds open to pure white snowballs of flowers. Full to part sun Zone 6

## MOLLY SCHROEDER

**(LATIN: VIBURNUM PLICATUM F. TOMENTOSUM)** An outstanding pink flowering selection **growing 8' tall and 5' wide** with horizontal branching. Inflorescence consists of an outer ring of sterile pink flowers with creamy-white variation with a darker cream throat. Inner fertile flower buds are green, opening pink, then turning white. Full sun to part shade Zone 5

## POPCORN

**(LATIN: VIBURNUM PLICATUM F. PLICATUM)** Amazing snow white popcorn-like cluster of flowers bloom along the branches in spring. A dense upright multi-stemmed shrub with horizontal branching matures at **5 to 8 feet tall and 4 to 7 feet wide**. Has attractive red to burgundy autumn color. Full sun to part shade Zone 5

## PRAGENSE

**(LATIN: VIBURNUM X PRAGENSE)** This hybrid viburnum is an evergreen, multi-stemmed shrub that typically **grows 8-12' tall with a similar spread.** Flat cymes of slightly fragrant, creamy white flowers in spring gives way to berries in early fall which first appear red and then change to glossy black. Berries will often persist to the end of December. Elliptic, dark green leaves. Full sun to part shade Zones 5-8

## PRAIRIE CLASSIC

**(LATIN: VIBURNUM X PRAIRIE CLASSIC)** The Prairie Classic Viburnum is a naturally occurring tree-form viburnum. The leathery green foliage shows good disease resistance. Abundant inflorescences of flat topped cymes bloom in spring. These attractive blooms are followed by fruits that mature to black in fall. Red, yellow, green and maroon fall foliage. It will grow **14-16' tall with a spread of 6-8'.** Heat and drought tolerant. Cold hardy. Humidity tolerant. Full to part sun Zone 4

## RASPBERRY TART

**(LATIN: VIBURNUM DENTATUM)** Named for its exceptionally showy raspberry-red fall foliage, this compact selection **grows to only 4 to 5 feet.** Durable under harsh conditions; superior winter hardiness. Produces showy flat-topped clusters of creamy white flowers in spring. Shiny, disease resistant foliage lasts all summer, then shows raspberry-red color and blue-black fruit in the fall. Full sun to part shade Zone 3

## RED BALLOON

**(LATIN: VIBURNUM DENTATUM)** In spring, large, lacy white flower clusters cover the plant, followed by green fruit which turns brilliant red in late summer. The thick, leathery foliage lends a distinguished, handsome look to the plant all season. **Grows 6-8' tall and wide.** This viburnum will develop some berries without another variety as a pollinator, but you'll get more fruit if planted around 'Mohican' or 'Alleghany.' Sun to part sun Zone 4

## RED FEATHER

**(LATIN: VIBURNUM DENTATUM)** Red Feather has an outstanding, long lasting, maroon fall color, and its autumn color is consistent from year to year. White flowers appear in June, followed by blue-black berries in the fall. It prefers loamy, well-drained soil but tolerates dry conditions, **grows 8-10 feet tall and 10-12 feet in width.** Sun to part shade Zone 3

## SENECA

**(LATIN: VIBURNUM SIEBOLDII)** A large shrub with dark green foliage growing **15' to 20' high and nearly as wide** making it a good candidate when grown as a single or multi-stemmed ornamental tree. Massive creamy-white flowers bloom May to early June followed by orange-red fruits progressing to blood-red, finally maturing to black. Full sun to part shade Zone 4

## SHASTA

**(LATIN: VIBURNUM PLICATUM F. TOMENTOSUM)** Shasta is a cultivar that typically **matures to 4-6' tall and spreads to 9-12' wide**. This is a large shrub that produces abundant flowers in spring on horizontal branches followed by abundant red maturing to black fruits. Large flower clusters feature showy outer snow-white flowers. Full sun to part shade Zone 5

## SNOWBALL

**(LATIN: VIBURNUM MACROCEPHALUM)** This semi-evergreen or evergreen shrub has a rounded form. In late spring, it bears flower clusters, sometimes up to 8 inches wide that start out chartreuse and turn pure white. Dark green leaves are semi-evergreen in southern states, where it **can grow to 20 feet high and 15 feet wide**. Shelter from cold, drying winds. Full to part shade Zone 3

## SNOWFLAKE

**(LATIN: VIBURNUM PLICATUM F. PLICATUM)** An introduction from the University of British Columbia of a semi-dwarf double file Viburnum that **grows 6 to 8 feet tall and 8 to 10 feet wide**. The lovely white flowers bloom almost continuously all summer in flat clusters, and reddish fruit appear in winter. Full sun to part shade Zone 5

### SPICE BABY

**(LATIN: VIBURNUM CARLESII)** A compact, upright and somewhat outwardly spreading shrub that has dark green leaves. Its large inflorescences have numerous fragrant light pink to white, 5-petaled flowers. Considered suitable for container gardening, **growing 3 1/2 to 5 ft. tall and 3 1/2 to 6 ft. wide.** Full sun to part shade Zone 4

### SUMMER MAGIC

**(LATIN: VIBURNUM PRUNIFOLIUM)** This upright-rounded blackhaw is ideal as a specimen tree. It **matures at 12-15' and 10-12' wide** and is more compact. Selected for its attractive new growth of red leaves, changing to pink, maturing to a leathery mauve green. Fall foliage is a spectacular display of red and yellow. Full sun to part shade. Zone 4

### TANDOORI ORANGE

**(LATIN: VIBURNUM DILATATUM)** An excellent, low maintenance landscape shrub with clusters of white flowers in spring followed by ornamental orange fruit later in the season. **Grows 6-8' tall and wide.** The foliage turns attractive shades of orange-red in fall. Use as an accent shrub, screen or border addition. Sun to part shade Zone 5

## WILLOWWOOD

**(LATIN: VIBURNUM X RHYTIDOPHYLLOIDES)** It is a semi-evergreen, multi-stemmed, upright-arching shrub that typically **matures to 10-12' tall and wide**. It's a cultivar that has lustrous green foliage. Flat creamy white flowers bloom in spring. A second lighter bloom may occur in fall. Spring flowers give way to berries in early fall. Berries first appear green, then bright red and finally change to glossy black by September. Fruit set may be poor in some years. Leathery, thick, wrinkled, ovate-oblong, dark green leaves are light green beneath. Full sun to part shade Zone 5

## WINTERHUR

**(LATIN: VIBURNUM NUDUM)** A striking, dense, compact shrub, has exceedingly shiny waxy foliage that turns red to reddish-purple in the fall. **Mature height is 6 feet**. Creamy white clusters of tiny flowers appear in June to July, followed by autumn fruit clusters ranging from pink/red to blue/black. Full sun to part shade Zone 5
