

# Fish Species Documented in the Cedar River Municipal Watershed

## Upper Cedar River Municipal Watershed

### Native Species:

Bull trout (*Salvelinus confluentus*)  
Pygmy whitefish (*Prosopium coulteri*)  
Shorthead sculpin (*Cottus confusus*)

### Potentially introduced species

Rainbow trout (*Oncorhynchus mykiss*)

## Lower Cedar River Municipal Watershed

### Native Species:

Coho salmon (*Oncorhynchus kisutch*)  
Chinook salmon (*Oncorhynchus tshawytscha*)  
Sockeye salmon\* (*Oncorhynchus nerka*)  
Kokanee salmon (*Oncorhynchus nerka*)  
Steelhead and rainbow trout (*Oncorhynchus mykiss*)  
Coastal cutthroat trout (*Oncorhynchus clarkii*)  
Bull trout (*Salvelinus confluentus*)  
Mountain whitefish (*Prosopium williamsoni*)  
Northern squawfish (*Ptychocheilus oregonensis*)  
Speckled dace (*Rhinichthys osculus*)  
Shorthead sculpin (*Cottus confusus*)  
Torrent sculpin (*Cottus rhotheus*)  
Prickly sculpin (*Cottus asper*)  
Riffle sculpin (*Cottus gulosus*)  
Coastrange sculpin (*Cottus aleuticus*)  
Brook lamprey (*Lampetra planeri*)

### Non-native Species: introduced to Walsh Lake through stocking programs

Largemouth bass (*Micropterus salmoides*)  
Yellow perch (*Perca flavescens*)

\* Sockeye salmon entering the fish ladder at Landsburg Diversion Dam are sorted from other salmon from September through January and returned to the Cedar River downstream of the dam. However, it is suspected that a few sockeye have moved through the fish passage facility at Landsburg Diversion Dam prior to the period when fish are actively sorted.
