THE BRESSINGHAM GARDENS

Welcome to our new spring 2016 Bressingham Gardens Spring and Summer Catalogue where we hope that you will find plenty to whet your appetites for the coming growing season. That now feels tantalizingly close, with the days lengthening and the sun becoming stronger we should all be able to get out and enjoy the freshness of spring and gardens bursting full of life once again. All of the plants listed in the catalogue have been tried and tested in the 17 acres of display gardens here at Bressingham and their inclusion here proves that their garden worthiness and reliable performance can be trusted. We continue to believe that we offer very good value for money in relation to most other catalogues, with all of our plants supplied in well established, **2 litre pots** at a price that is lower than many others are charging for single 9cm pot.

Our front cover this year features the Plant of the Centenary, as judged by the Royal Horticultural Society, Geranium 'Rozanne'. To win this accolade proves altogether what a winner this remarkable plant is, and seen here planted in a drift providing a continuous river of constantly re-blooming flowers it is difficult to disagree. No garden should be without this amazing performer that can bloom from May to the first frosts in November.

New to the catalogue this year are a wonderfully big and bold 'Bears Breeches', *Acanthus* 'Hollande du Nord' with long lasting, fat, purple and white flowers in summer. Another gem we have for you this year is *Amsonia* 'Blue Ice' a spectacular introduction from the famous White Flower Farm Nurseries in the U.S.A. Dwarfed with a neat and compact habit it is topped with a mass of ice blue flowers, held in clusters in summer, with incredibly vivid golden yellow foliage in autumn that give it a double attraction. Also new is a plant discovered in Adrian Bloom's Foggy Bottom garden as a chance seedling, *Brunera* 'Little Jack'. This diminutive variety has all of the attributes of his magnificent father B. 'Jack Frost' just condensed into smaller form. Ideal for the front of the border or in a patio container, it will not disappoint. Again from the U.S.A is a wonderful Sun Flower *Heliopsis* 'Summer Nights' with green and maroon foliage contrasting beautifully with the abundant display of open, long lasting, rich, yellow flowers. We also now have enough stocks of the elegant and much sought after *Roscoea* 'Kew Beauty', this plant seen in its full, creamy-yellow bloom is truly a sight to behold. Again after many years of building stocks we are now able to offer again a plant that as far as we know cannot be obtained anywhere else, *Selinium tenuifolium*, with wonderful large, flat, creamy-white heads held on reddish stems over a lattice of finely dissected, lace like leaves. Finally, on our back cover we have Tanacetum 'Laurin' a perennial that always makes visitors to the gardens gasp when they see its vibrant, clear pink flowers held above attractive, ferny, lush green foliage. It performs equally well in a patio container. This is just a small palette of the plants we have to offer you this year in the catalogue and of course a much, much wider range is available on our website www.bressinghamgardens.com

Happy Gardening,

Jason Bloom
