At Matsuda's, we have a history of growing a broad assortment of woody ornamentals, camellias, perennials, azaleas and rhododendrons. Over the course of the last three years, we've introduced new plants to our product line, to include succulents, quarts, annuals. New this year, our branded cans, quarts and tags will help your customers to identify premium products at affordable prices.

In addition to growing our product, we are proud to grow for these premium brands:

ABOUT

The Hardiness Zone Map is divided into eleven zones according to the range of average minimum temperatures set by the United States Department of Agriculture. To the best of our knowledge each container grown plant is listed with the zone number in which the plant will be best suited. However, we cannot be responsible due to varying conditions in certain areas.

Many plants do well in more than one zone which may not be listed. Feel free to call your sales representative for assistance in selecting the most adaptable plants for your area.
