

Curriculum Vita

Nicholas S. Flann
Associate Department Head
Department of Computer Science
Utah State University
Logan, UT 84322-4205

`nick.flann@usu.edu`

<http://www.cs.usu.edu/~flann/index.html>

(435) 797 2432 (w)

Education:

Ph.D., Computer Science, Oregon State University, 1992, under Professor T. G. Dietterich.

Title of dissertation: ``Correct Abstraction in Counter-planning: A Knowledge Compilation Approach."''

M.S., Computer Science, Oregon State University, 1986, under Professor T. G. Dietterich.

Title of thesis: ``Learning Functional Descriptions From Examples."''

B.S., Electrical and Electronic Engineering, (with first class honors), Coventry Polytechnic, England, 1982, under Professor P. Taberner. Title of thesis: ``Speech Recognition and Analysis."''

Research Interests:

Computational modeling of integrated multi-cellular systems with particular interest in:

- Understanding the emergence of complex structures through local-only computation of cells and sub-cellular mechanisms
- Application in 2D/3D tissue development during angiogenesis with an emphasis on
 - understanding interactions between the spatial structure of the stroma and the growing endothelial cells
 - modeling the regulatory control of cell differentiation and its effect on the regularity and effectiveness of the resulting vessel network
- Applying massively parallel machine intelligence search-based methods to
 - validate and build computational models using live-cell imaging and protein expression data
 - discover novel potential therapies through perturbation analysis and multi-criteria optimization
- High-performance graphics-based models of tissue development based on the stochastic Potts model with extensions that capture physical cytoskeleton structures (such as filopodia and adherens junctions)
- Role of criticality in the dynamics of multi-scale systems.

Teaching Specialties:

Introductory and Advanced Bioinformatics. Courses include bioinformatics I and II, bioinformatics problems and solutions and bioinformatics research. Basic biology is covered along with advanced algorithms over strings, sequences and trees; databases and networking; search engines; data mining; modeling and simulation; and models of collaboration. Courses cover both practical skills in extracting and using data from existing databases and research in advanced modeling of biological systems and development of new algorithms.

Introductory and Advanced Artificial Intelligence for undergraduate and graduate students. Courses include expert systems, genetic algorithms, neural networks, robotics, machine learning, general artificial intelligence, learning and problem solving. Practical applications of new methods and technology are emphasized, with students completing projects such as controlling a simulated robot, an expert system, an intelligent interface using speech or handwriting recognition, or a scheduling or planning system using genetic algorithms.

Algorithms and Data Structures for undergraduate and graduate students. Courses include beginning data structures and programming and introduction to advanced algorithm design and analysis. Principles and practices are emphasized, with students learning how to design efficient algorithms for novel problems, deriving the expected complexity of algorithms then implementing and carefully evaluating their empirical behavior.

Classes Taught:

CS Introductory Class: Introduction to Computer Science II, Introduction to Computer Science III

Math Introductory Class: Discrete Mathematics (for Computer Science BS students)

CS BS Senior/Graduate Classes: Operating Systems, Programming Languages, Expert Systems, Advanced Algorithms, Introduction to Artificial Intelligence, Applied Robotics (Special Topics), Bioinformatics I, Bioinformatics II, Bioinformatics Problems and Solutions.

CS Advanced Graduate Classes: Advanced Artificial Intelligence, Neural Networks, Genetic Algorithms, Reinforcement Learning, Bio-Inspired Artificial Intelligence, Planning and Intelligent Autonomous Behavior, Bioinformatics II, Artificial Life, and Bioinformatics Research, and Multi-cellular development systems.

Academic Experience:

2011 Associate Department Head, Computer Science Department, USU

2010 Affiliated Faculty, Institute for Systems Biology, Washington

2010 Visiting Research Scientist, Institute for Systems Biology, Seattle, Washington

2002 Visiting Faculty, Computer Science Department, Southern Oregon University

1997--present: Associate Professor, Department of Computer Science, Utah State University.
1991--1997: Assistant Professor, Department of Computer Science, Utah State University.
1985--1991: Research Assistant, Department of Computer Science, Oregon State University.
1983--1985: Teaching Assistant, Department of Computer Science, Oregon State University.

US Patents Awarded:

Number 7,228,214	Path planner and method for planning a path plan having a spiral component
Number 7,216,033	Path planner and method for planning a contour path of a vehicle
Number 7,110,881	Modular path planner
Number 7,079,943	Point-to-point path planning
Number 7,010,425	Path planner and a method for planning a path of a work vehicle
Number 6,934,615	Method and system for determining an efficient vehicle path
Number 6,907,336	Method and system for efficiently traversing an area with a work vehicle

Business Experience:

1982 -- 1983: Electronic Engineer, British Aerospace Dynamics, Space Division, England.
1978 -- 1982: Engineering apprentice, British Aerospace Dynamics, England.
1995 -- 2008: Intelligent systems consultant for United States Air Force project.
1999: Co-founder and co-owner of Autonomous Solutions
1999 -- 2008: Autonomous vehicle planning and intelligent behaviors consultant for AutonomousSolutions.com
2000 -- present: Expert witness for internet related criminal proceedings

Professional Activities:

Associate Editor for BioSystems Journal since 2008
Reviewer for International Joint Conference on Artificial Intelligence IJCAI 2011
Session Chair for the Computational Systems Biology Conference, WCSB 2010
Reviewer for BMC Systems Biology Journal, since 2007
Reviewer for 2009 IEEE International Conference on Robotics and Automation
Reviewer for IEEE Transactions on Parallel and Distributed Systems, since 2001
Reviewer for Journal of Theoretical Biology, since 2006
Reviewer for 2008 IEEE International Conference on Robotics and Automation
Reviewer for Symposium on Risk Management and Cyber-Informatics: RMCi 2008
Local Arrangements Chair, First Human Robot Interaction Conference, SLC, 2006
Session Chair and Program Committee Member for 1st I IFAC conference on Teleomatics Applications in Automation and Robotics, July 2001
Program Committee Member and Session Chair for SPIE Conference on Unmanned Ground Vehicles Technology, Orlando, Florida, April 2001
Program Committee Member and Session Chair for SPIE Conference on Unmanned Ground Vehicles Technology, Orlando, Florida, April 2000

Program Committee Member and Session Chair for SPIE Conference on Unmanned Ground Vehicles Technology, Orlando, Florida, April 1999
Program Committee for the 1998 SPIE Robotic and Semi-Robotic Ground Vehicle Technology Conference
Program Committee for the 1997 International Joint Conference on Artificial Intelligence
Program Committee for the 1997 Second Genetic Programming Conference
Reviewer for Journal of Intelligent and Fuzzy Systems
Program Committee for the 1996 National Conference on Artificial Intelligence
Program Committee for the 1996 International Conference on Machine Learning in Bari (Italy)
Reviewer for International Journal in Computer Simulation
Reviewer for 1995 International Conference on Parallel Processing
Reviewer for 1995 Computational Learning Theory Conference
Reviewer for the Journal of Artificial Intelligence Research
Reviewer for Computational Intelligence
Reviewer for the 1994 Transputer Research And Applications Conference
Reviewer for book: Grammatical Inference: Theory, Applications and Alternatives
Committee member for Workshop on Speedup Learning and Knowledge Compilation at 1993 Machine Learning Conference
Submissions Chair for the American Association for Artificial Intelligence 1993 Fall Symposium on Games: Planning and Learning
Committee member for Workshop on Speedup Learning and Knowledge Compilation at 1992 Machine Learning Conference
Reviewer for Artificial Intelligence Journal (Since 1992)
Reviewer for National Science Foundation Information Sciences Program (since 1986)
Reviewer for Canadian Artificial Intelligence Association (since 1987)
Reviewer for Institute of Electrical and Electronic Engineer Transactions (since 1990)
Reviewer for Institute of Electrical and Electronic Engineer Software (since 1988)
Reviewer for Machine Learning Journal (since 1988)

Memberships:

International Society for Optical Engineering (since 1997)
Association for Computing Machinery (since 1983)
American Association of Artificial Intelligence (since 1984)
Institute of Electrical and Electronic Engineers (since 1993)
Pattern Recognition Society (since 1993)

Grants under Review:

Ilya Shmulevich (co-PI), Nicholas Flann, (co-PI) and Wei Zhang (co-PI), BRP R01 PAR-10-234, Oct 2010, *Multi-scale Multi-systems Modeling of Glioma*. Amount requested for five years \$4,800,00 total direct for three labs.

Aimee Dudley (PI), Nicholas Flann (co-PI), and Ilya Shmulevich (co-PI), component of NIH Systems Biology Center Grant, Oct 2010, *Multiscale RNA Expression Patterns and their*

Role in Fluffy Yeast Colony Formation. Amount requested \$2,500,00 total direct for 2 labs.

Grants in Preparation:

Aimee Dudley (co-PI), Nicholas Flann (co-PI), and Ilya Shmulevich (co-PI), NIH RO1 Oct 2011, Understanding Fluffy Yeast Colony Formation: A multi-scale data-driven approach. Amount requested for three years \$900,000 total direct for three labs.

Grants and Contracts Received:

Nicholas Flann (PI), *Multiscale Spatial and Temporal Dynamics of Yeast Colony Development: Integrating Measurement and Modelling.* Awarded by Luxembourg Centre for Systems Biomedicine and the University of Luxembourg, April 2011. Amount \$113,000.

Simon Kahan (P.I), Nicholas Flann, and Ilya Shmulevich, *High Performance 3D Cell Modeling: Applications in Angiogenesis and Skin* LDRD grant, Department of Energy. Amount \$50,000.

Nicholas Flann (P. I). Discovering Initiator Cells in Immunity and Cancer from Live-cell Microscopic Images: A Model-Based Approach, Utah State University Research Catalyst Program, June 2010, Amount \$20,000.

Nicholas Flann (P.I). Addition to Automatic Piece Packing, Funded by National Engineering and Environmental Laboratory, Idaho Falls, June 2000 – December 2001. Amount \$53,000.

Kevin Moore (P.I), Nicholas Flann, and Carl Wood. Modification 03 to Agreement DAAE07-98-3-0023, TACOM Lightweight Robotic and Semi-autonomous Ground Vehicle Mobility and Survivability Enhancements Program, June 2000, Amount \$1,800,000.

Kevin Moore (P.I), Nicholas Flann, and Carl Wood. Modification 02 to Agreement DAAE07-98-3-0023, TACOM Lightweight Robotic and Semi-autonomous Ground Vehicle Mobility and Survivability Enhancements Program, June 1999, Amount \$2,200,000.

Nicholas Flann (P.I), Funded by National Engineering and Environmental Laboratory Automatic Piece Packing, Idaho Falls, April-October 1999, Amount \$28,000.

Dan Watson (P.I.), Nicholas Flann & Scott Cannon. Generational Scheduling Environment for Autonomous Negotiating Teams, Funded by DARPA, January 1999, Amount \$167,000.

Kevin L. Moore (P.I), Nick Flann and Carl Wood. Obstacle Detection and Avoidance for an Automated Tractor, Funded by John Deere Co. Nov 15, 1998 to August 31, 1999, Amount \$384,884.

Kevin Moore (P.I) and Nicholas Flann. 5510N Autonomous Orchard Project, , Funded by John Deere, October 1999, Amount \$330,000.

Kevin Moore (P. I), Nicholas Flann, Cindy Furse and Randy Haupt. TACOM Safety Project, Funded by TACOM, February 2000, Amount \$117,700.

Bishop, B. (P. I.), Gunderson, R., Flann, N. S., & Abbott, B.(1998). DAAE07-98-Q-BAA1: Lightweight Robotic and Semiautonomous Ground Vehicle Mobility and Survivability Enhancements. TACOM (Army Tank Command). Duration 1 year; Total amount: \$2,489,520.

Flann, N. S. (P. I.) (1997). Real-time Computer Controlled Optimal Harvest Coordination. Case International Corporation. Duration 1 year; Total amount \$45,000.

Hansen, W., (P. I), Steadman, B. L., & Flann, N. S. (1998). Statistical Control Process Applications to Test Failure Information. United States Air Force, AF98-262. Duration 1 year; Total amount: \$100,000.

Gunderson, R. W. (P. I.), Flann N. S., Abbott B., Anderson M, & M. McKay. (1997). Multiple Cooperating Robotic Vehicles for the U. S. Army. US Army Artificial Intelligence Center. Duration 2 year; Total amount: \$150,000.

Gunderson, R. W. (P. I) & Flann N. S. (1995). Intelligent Fully Autonomous Micro-Robotic Control Systems for Hazardous Waste Site Characterization, Department of Energy & Massachusetts Institute of Technology Research Consortium. Duration: 3years, Total amount: \$600,000.

Roberts D. W. (P. I.), Falconer A. & Flann N. S. (1994). Shoshone National Forest Ecological Survey Project, Shoshone National Forest Research Division. Duration: 3years; Total amount: \$300,000.

Flann N. S. (P. I.) (1993). Technical Service Support for COTS Risk Management IR&D Project No. 93268718, TRW Ballistic Missiles Division, Duration: 1year; Total amount: \$5,300.

Flann N. S. (P. I.) (1993). On-line Cursive Handwriting Recognition using Time-delayed Neural Networks, USU Faculty Grant, Duration: 1year; Total amount: \$15,000.

Flann N. S. (P. I.), Zhang J., Cheng H., & Althouse B. (1992). A Cost Effective Machine Intelligence Laboratory, National Science Foundation, Instrumentation and Laboratory Improvement Program, Duration: 3years; Total amount: \$113,636.

Flann N. S. (P. I.) (1992). Improving Extensional Programming through Smooth Encodings, USU Faculty Grant, Duration 1year; Total amount: \$15,000.

Administrative Service:

Faculty Senate,
Committee on Committees (Faculty Senate),
College of Science Awards committee,
Department awards committee, search committee, tenure committees.
Chair of Daniel Bryce's tenure committee
Chair of the Department's curriculum assessment committee
Ombudsperson for College tenure committees.
Science and Engineering Recruitment Team (part of the NSF Advance Grant).
College of Science Currie Grant review committee
Department Graduate Advisor
College of Science Graduation Committee
University Genome Task Force

Student Mentoring:

Over 60 Master of Science Thesis and Projects supervised.

Flann N. S. (1990). **Exploiting a Second Order Theory of Influence to Learn in Intractable Domains.** In the Proceedings of the Change of Representation Workshop, Menlo Park, CA.

Flann N. S. (1989). **Learning Appropriate Abstractions for Planning in Formation Problems.** In the Proceedings of the Sixth International Workshop on Machine Learning (pp. 235-239), Ithaca, NY: Morgan Kaufmann.

Flann N. S. (1988). **Improving Problem Solving Performance by Example Guided Reformulation of Knowledge.** In the Proceeding of the International Workshop on Change of Representation and Inductive Bias (pp 14-28), Briarcliff, NY.

Dietterich T. G. and Flann N. S. (1988). **An Inductive Approach to Solving the Imperfect Theory Problem.** In the Proceeding of the American Association of Artificial Intelligence Spring Symposium on Explanation Based Learning (pp. 42-46), Palo Alto, CA.

Flann N. S. and Dietterich T. G. (1985). **Exploiting Functional Vocabularies to Learn Structural Descriptions.** In the Proceeding of the Third International Machine Learning Workshop (pp. 41-43), Skytop, PA.

Invited Talks:

Building and Simulating Multiscale Models in Systems Biology: A High Performance Computing Approach, presented to Signal Processing Group, Tampere University of Technology, Finland, June 2010

Building and Simulating Multiscale Models in Systems Biology: A High Performance Computing Approach, presented to High Performance Computing and Systems Biology Groups at the Pacific Northwest National Laboratory, May 2010

Discovering Novel Cancer Therapies: A Computational Modeling and Search Approach, presented at the IEEE conference on Computational Intelligence in Bioinformatics and Bioengineering, September 2008.

Evaluating Cancer Interventions by Simulating Tumor-Induced Angiogenesis, Blood Flow and Oxygen Delivery, presented at the European Conference on Mathematical and Theoretical Biology, July 2008.

An Introduction to Unmanned Systems (Tutorial), presented at the SPIE Defense and Security Symposium. Orlando, Fl., April 2008.

Co-option and Irreducibility in Regulatory Networks for Cellular Pattern Development, presented at the First IEEE Symposium on Artificial Life 2007, Honolulu, Hawaii. April 2007.

Using a Web-based Application to Improve Assessment, presented at the 2007 Best Assessment Processes IX Symposium, Indianapolis, IN., April 2007.

An Introduction to Unmanned Systems (Tutorial), presented at the SPIE Defense and Security Symposium. Orlando, Fl., April 2007.

Biological Development of Cell Patterns: Characterizing the Space of Cell Chemistry Genetic Regulatory Networks, presented at the Eighth European Conference on Artificial Life, Canterbury, Kent, UK, September 2005.

Computational Modeling Studies of Development, presented at Oregon State University Bioinformatics Seminar Series, May 2005.

Adaptive Optimal Rover Path Planning: A Delayed Commitment Approach, presented at SWIM Mars Experiments and Rover Technologies Workshop, San Antonio, Texas, USA. August 2002.

Our Future with Intelligent Autonomous Vehicles: from Mowing Lawns to Clearing Mine Fields, presented at Science Seminar at Southern Oregon University, May 2002.

A Small Mobile Robot for Security and Inspection Operations, presented at 1st I IFAC conference on Teleomatics Applications in Automation and Robotics, Weingarten, Germany. July 2001.

Intelligent Mobility through Omni-Directional Vehicles: A Research Program, presented at SPIE Conference on Unmanned Ground Vehicles Technology, Orlando, Florida, April 2000.

Optimal Two Dimensional Bin Packing with Applications to Waste Processing, presented at Brigham Young University Computer Science Colloquium, Jan 2000.

Object-Orientated Terrain Modeling for Intelligent Path Planning, presented at Brigham Young University Computer Science Colloquium, Jan 2000.

Area Coverage Planning with Dynamic Obstacle Avoidance for Autonomous Vehicles, at IASTED, October, 1999, Santa Barbara, CA.

- Optimal Route Re-planning for Mobile Robots: A Massively Parallel Incremental A* Algorithm*** presented at IEEE International Conference on Robotics and Automaton, Albuquerque, NM, April 1997.
- Advanced Rover Chassis III: An Intelligent Autonomous Robotic System***, presented at the 1997 International Conference on Mobile Planetary Robots & Rover Roundup, Santa Monica, CA, January 1997.
- Petri Net Representation for Parallel Loop Scheduling Using a Genetic Algorithm***, presented at the Fourteenth Workshop of the UK Planning and Scheduling Special Interest Group, Essex, UK, November 1995.
- Explanation-based Learning and Reinforcement Learning: A Unified View*** presented at the Computer Science Colloquium at Brigham Young University, UT, March 1995.
- Parallel Simulated Annealing and Genetic Algorithms: A Space of Hybrid Methods*** presented at the Third Parallel Problem Solving from Nature Conference, Jerusalem, October 1994.
- Applied Artificial Intelligence Research at Utah State University*** presented at the Air Force Group Meeting on Artificial Intelligence, Hill Air Force Base, Ogden, UT, May 1994.
- A Hybrid On-line Handwriting Recognition System***, presented at the Software Technologies Symposium, U. S. Air Force, Salt Lake City, UT, June 1994.
- Computer Recognition of On-line Cursive Writing: Progress and Challenges***, presented at the University of Utah Neural Networks Research Group and the VA GRECC, Salt Lake City, UT, 1993.
- Recognizing On-line Cursive Handwriting Using a Mixture of Cooperating Pyramid-style Neural Networks***, presented at the World Congress on Neural Networks, Portland, OR, July 1993.
- Improving Spoken Communication for Dysarthric Individuals Using Voice Analysis and Synthesis***, presented at the Sixteenth Annual RESNA Conference, Las Vegas, NV, June 1993.
- Integrating Recognition and Segmentation in On-line Cursive Handwriting using Error-correcting Grammars***, presented at the First Conference on Grammatical Inference: Theory, Applications and Alternatives, Essex, UK, June 1993.
- Knowledge Compilation in Counter-planning Using Abstract Reverse Enumeration***, presented at the Knowledge Compilation and Speedup Learning Workshop, Aberdeen, Scotland, July 1992.

Applying Abstraction and Simplification to Learn in Intractable Domains, presented at the Seventh International Conference on Machine Learning, University of Texas at Austin, TX, June 1990.

Exploiting a Second Order Theory of Influence to Learn in Intractable Domains, presented at the Change of Representation Workshop, Menlo Park, CA, March 1990.

Compiling Search into Recognition, presented at the Symposium on Computational Approaches to Concept Formation, Stanford University, CA, January 1990.

Learning Appropriate Abstractions for Planning in Formation Problems, presented at the Sixth International Workshop on Machine Learning, Cornell University, Ithaca, NY, June 1989.

Improving Problem Solving Performance by Example Guided Reformulation of Knowledge, presented at the International Workshop on Change of Representation and Inductive Bias, Briarcliff, NY, June 1988.

Forward Chaining Logic Programming with the ATMS, presented at the National Conference on Artificial Intelligence, Seattle, WA, August 1987.

Selecting Appropriate Representations for Learning from Examples, presented at The National Conference on Artificial Intelligence, Philadelphia, PA, August 1986.

Invited Posters:

Isolating Specific Cells in Mixed Population Cultures: A Computational Approach, presented at the Institute for Systems Biology's 9th annual international symposium, Systems Biology & Global Health.

Improving the Accuracy and Robustness of Genetic Programming through Expression Simplification, presented at Genetic Programming 1996, Stanford, CA, July 1996.

Designing Error Correcting Codes for Learning in Context presented at the Machines that Learn Workshop, Snowbird, UT, April 1995.

A Hierarchical Approach to Recognizing On-line Cursive Handwriting, presented at the Seventh Annual Conference on Neural Information Processing Systems: Natural and Synthetic 1993, Denver, CO, December 1993.

On-line Cursive Handwriting Recognition Using Time-delayed Neural Networks: Preliminary Results, presented at the British Neural Network Society Symposium on Recent Advances in Neural Networks, Lucas Institute, University of Birmingham, Edgbaston, Birmingham, UK, January 1993.

Strong Abstraction: Exploiting Knowledge to Derive Useful Abstractions in Complex Domains, presented at the Symposium on Learning Methods for Planning and Scheduling, Stanford University, CA, January 1991.
