

## Crataegus monogyna 'Stricta'

<b>Height</b>	8-10 m
<b>Crown</b>	columnar, half-open crown
<b>Bark and branches</b>	flaking, brown, grey
<b>Leaf</b>	green
<b>Autumn colour</b>	yellow
<b>Flowers</b>	white, flowers in May, fragrant flowers
<b>Fruits</b>	red
<b>Spines/thorns</b>	Yes
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	loamy soil, sandy soil, nutrient-poor soil
<b>Paving</b>	tolerates paving
<b>Winter hardiness zone</b>	5a (-28,8 to -26,1 °C)
<b>Other resistances</b>	resistant to frost (WH 1 - 6)
<b>Fauna tree</b>	resistant to frost (WH 1 - 6), valuable for butterflies
<b>Application</b>	avenues and broad streets, narrow streets, small gardens
<b>Shape</b>	clearstem tree, multi-stem tree

Crataegus monogyna 'Stricta' forms a more or less columnar tree with branches that hang down somewhat at a later age. Height up to 10 m, breadth up to 3 m. The lobed, deeply incised leaves are dark green and turn yellow in the autumn. Flower umbels appear in May with single white and sweetly scented florets. In the autumn the unremarkable, small, dull red fruits emerge. Because of its columnar growth this tree is suitable for narrow streets and small gardens. It does not stand up to wet soil. In dry summers its leaves can suffer from burn. Winter hardiness zone: 5a
