

# Andrija Mohorovičić 1857-1936

Croatia

Shadow range of p-waves  
 Passing through earth core  
 After refraction in the shell layers

Two paths of p-waves from hypocenter  
 one direct from earthquake  
 Two after refraction in the Mohorovicic discontinuity (Moho) that arrives later.

## Mohorovicic law:

Increasing shock wave speed with depth. Estimate of depth of earthquake focus.
